Your OS for real-time commerce

Integrated Insights, Planning and Trading Platform

tradeswell.

Realtime commerce data is complex

Real-time commerce technology inhibitors

- Fragmented sales information environment
- Difficult to connect marketing spend dollars to fully loaded landed cost data
- Bundling and kitting decision data is difficult to access in near real time, with short windows of consumer demand
- Explosion of retail data sources
- Difficulty in predicting millennial user behavior
- Disconnected logistics data

A faster, more precise, smarter—better way

Integrating the entire value chain for ecommerce native units of trade

ML-Based OS for holistic ecommerce operations for coordinated performance

Realtime optimization to automate success based on brand goals

tradeswell.

The platform uses machine learning to power actions across

ecommerce channels, marketing, operations, forecasting, financing & settlement
