

Small change. Big change.

We have a plan to plant
1 billion trees

and we'd like your help
to do it

Trend 1

Consumer fintech is mainstream. With 25% of under 35s are using a challenger bank product.

chime Varo Revolut

The development ecosystem is streamlined and mature.

MARQETA onfido SYNAPSEFI

Trend 2

The world is on fire. And public concern for the environment has exploded.

treecard.

We're partnering with a major Bank in the U.S. to create a free debit card that plants trees.

Every $60 spent will plant a tree.

The economics are very good

The average American spends ~$650 per month, and ~$7800 per year through their debit card.

This means, each TreeCard user generates $78/year with a profit of around $53/year.

The average user will plant about 113 trees a year.

Carefully designed spending app with focus on the mission.

Payment categorisation and insights

Live payment notifications

Detailed overview of trees planted

Intuitive, easy-to-use UI

We will emulate leading players.
