VERSATILE

Turning Construction into Controlled Manufacturing.

MEIRAV OREN, CO-FOUNDER & CEO

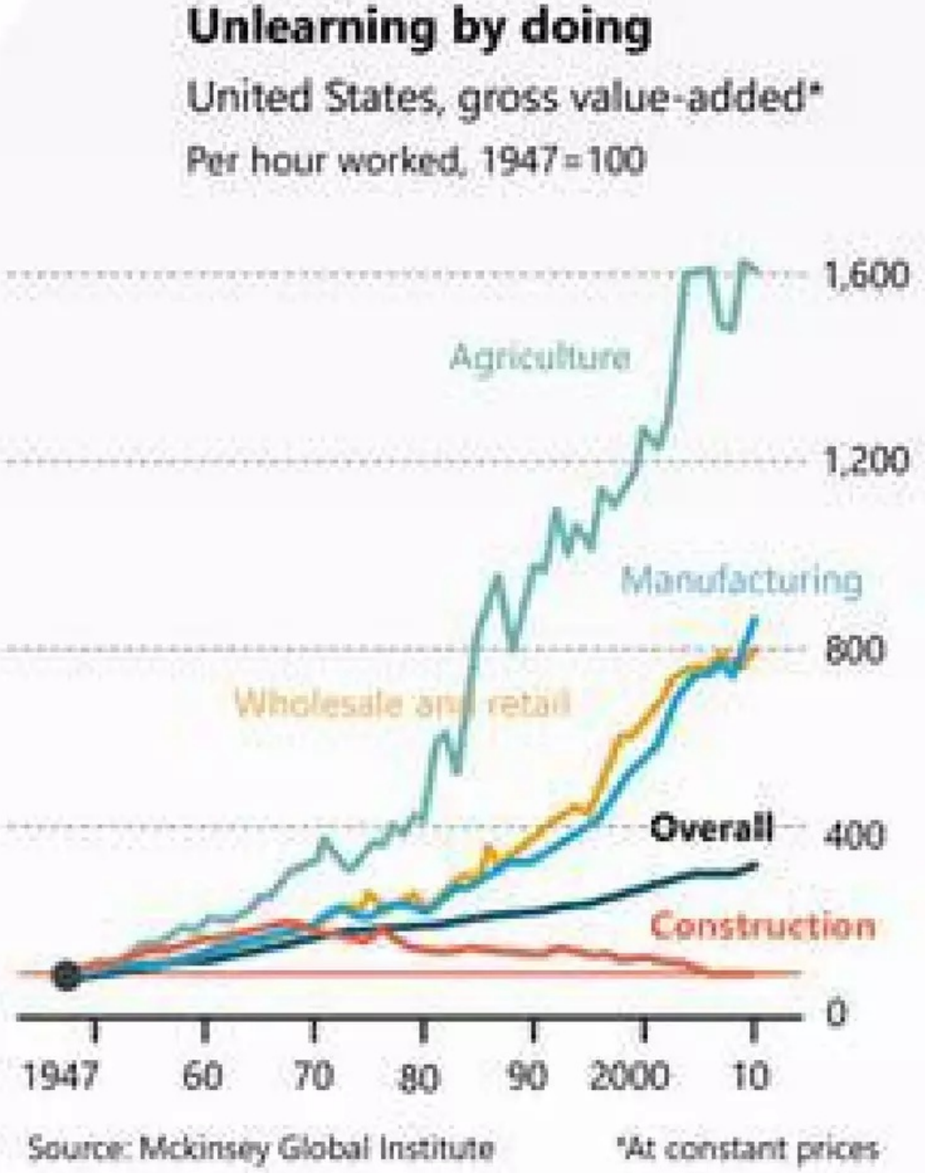

2020

Construction is an uncontrolled, fragmented, and unstructured **manufacturing process.**

$265B is left on the table by General Contractors every year (McKinsey & Company, June 2020)

Tech adoption accelerated!

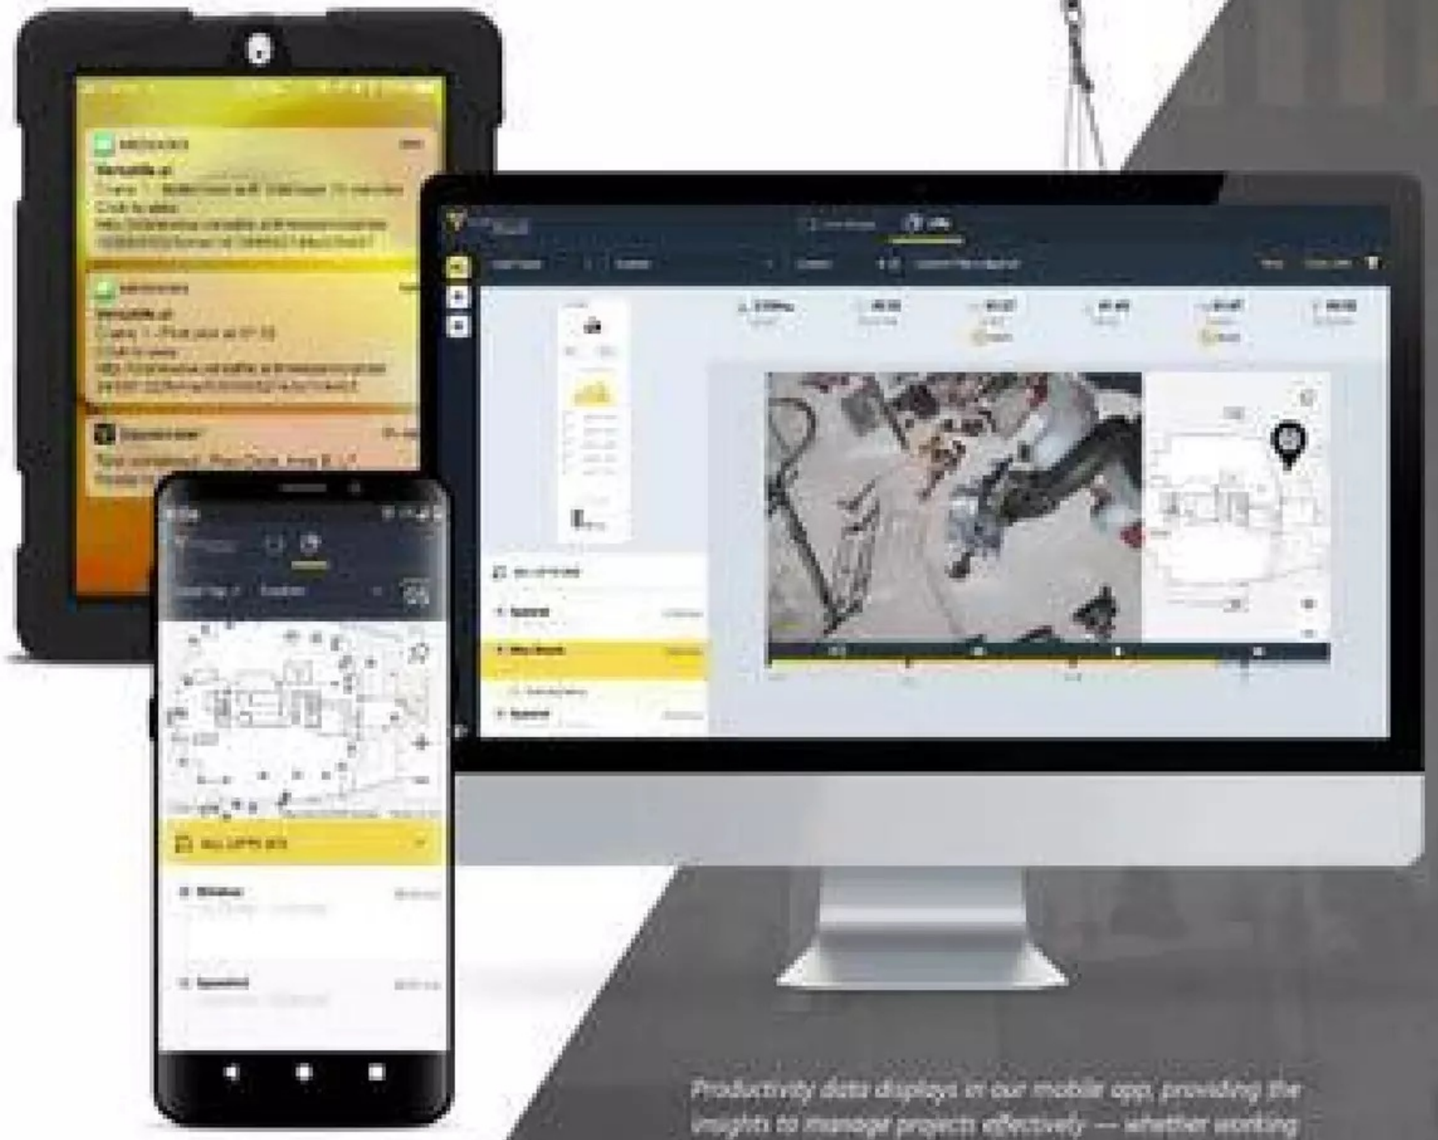

You can only improve what you can measure.

Versatile CraneView is the only way for contractors to collect accurate, transformational production data driving actionable & measurable improvement in productivity, predictability and safety.

Versatile is adopted because it naturally fits into GC's workflow.

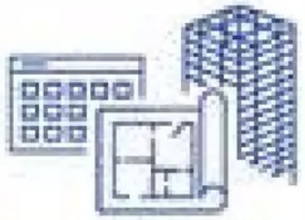

Every jobsite is monitored and improved from its center of productivity—the crane.

Productivity data displays in our mobile app, providing the insights to manage projects effectively — whether working onsite or remotely.

- Link to reports

Here's how it works:

Collect
Site plans, models, and schedules. (pre-onboarding)

1

Install
Versatile device integrates in 5 minutes

2

Begin collecting data

Interpret
We automatically generate performance reporting for the different users

3

Monitor
We automatically notify the user of opportunities in performance or schedule.

4

Update the plans, models & schedules with actuals

Our customers rapidly expand their contracts after first crane.

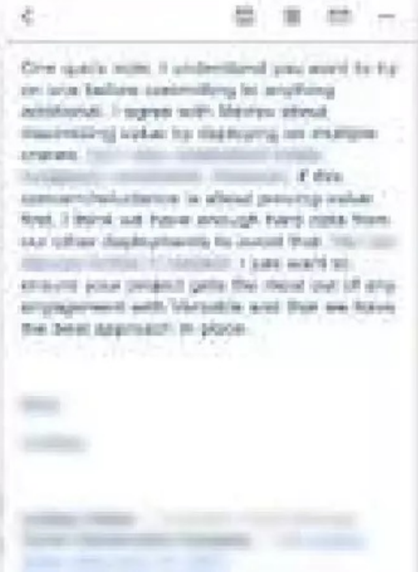

And new, larger deals landing as of March'2020

Our Land-and-Expand successful strategy is driven by the sticky, opex-heavy nature of the industry and the high ROI-seamless adoption of CraneView in the field

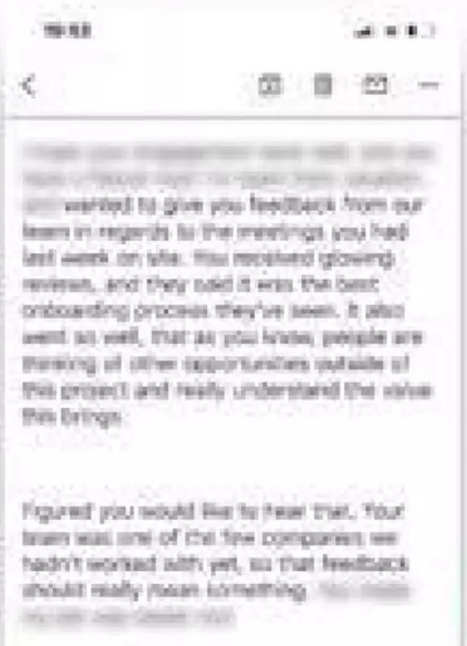

Our customers are our best salespeople.

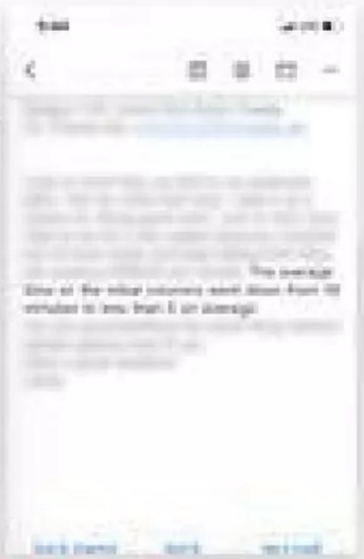

Versatile offers fast, proven value at zero effort or change

Up against stop watches to produce production rates

Our team has a history of executing in *Construction and SaaS*

What we learned from Shelter In Place -
Touchless deployments & users' interviews

- ✓ We used SIP to enhance our product by interviewing the (never-before available) superintendents
- ✓ **With a 100% remote, touchless deployment, we kept growing!**
- ✓ Promotions targeting active sites
- ✓ **Positive press driven by our happy customers**
- ✓ Immediately announced a "stop charge" for all SIP projects

5 Minute
Time-to-Value for General Contractors

Versatile deploys seamlessly and starts generating value in minutes.

$91.5M Annual Revenue GC, demonstrating Versatile
