

woven

Organize and optimize the world's time

November 2016

Founding Team

Tim Campos
Co-founder & CEO

Tim was Facebook's first CIO and served with the company for over 6 years during it's growth from 1,400 employees to its current size today. Prior to Facebook, Tim served as the CIO of KLA-Tencor and held engineering leadership positions at Sybase, Silicon Graphics and an Internet startup.

Tim holds degrees in Electrical Engineering and Computer Science as well as an MBA from UC Berkeley.

Burc Arpat
Co-founder & CTO

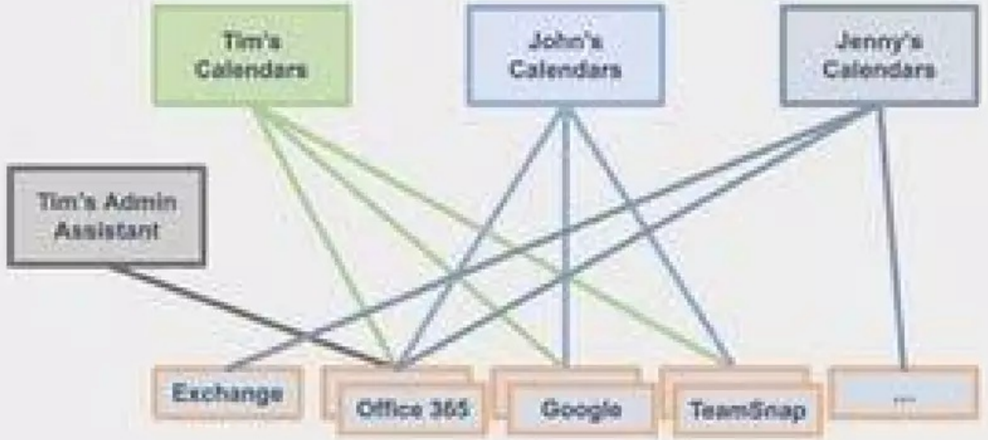

Burc served as a Sr. Engineering Manager at Facebook for 4 years, building products for sales, marketing and advertisers. Prior, he spent 3 years at Google's Search Infrastructure group as a Staff Engineer. Before Google, he was an Eng. Manager at a startup.

Burc holds a PhD from Stanford focused on spatial statistics and an MBA from UC Berkeley. He is an inventor on several patents related to ML, NLP and analytics.

CONFIDENTIAL – DO NOT DISTRIBUTE

3 Big Problems: Fragmentation + Intelligence + Sharing

Fragmentation

Even for a single person, time information is often stored in multiple disjoint calendars and other systems that don't interact with each other.

CONFIDENTIAL – DO NOT DISTRIBUTE

3 Big Problems: Fragmentation + Intelligence + Sharing

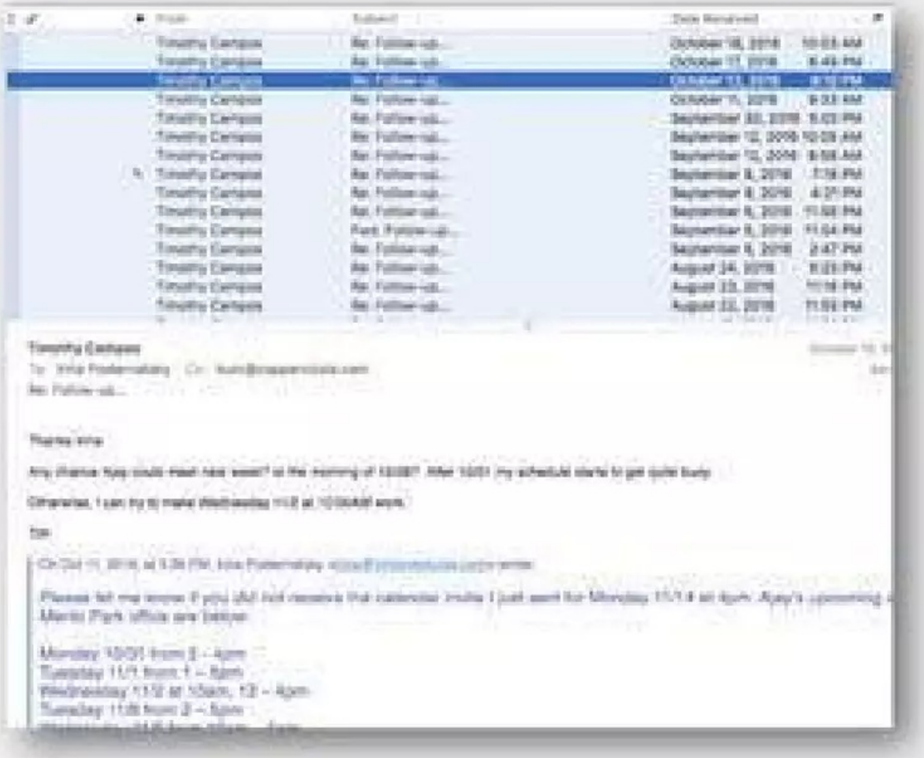

Intelligence

Calendaring systems don't have enough information and thus can't intelligently act upon different types of meetings and events.

CONFIDENTIAL – DO NOT DISTRIBUTE

3 Big Problems: Fragmentation + Intelligence + Sharing

Sharing

It is difficult to share time information with other people and across systems, as the choice is usually to share all, free/busy or nothing.

CONFIDENTIAL – DO NOT DISTRIBUTE

Solution

Redefine the calendar

"One" Meeting

Broker interactions between different calendars and systems to ensure the same meeting has only a single representation shared by everyone in a global system.

Enriched Data + ML & NLP

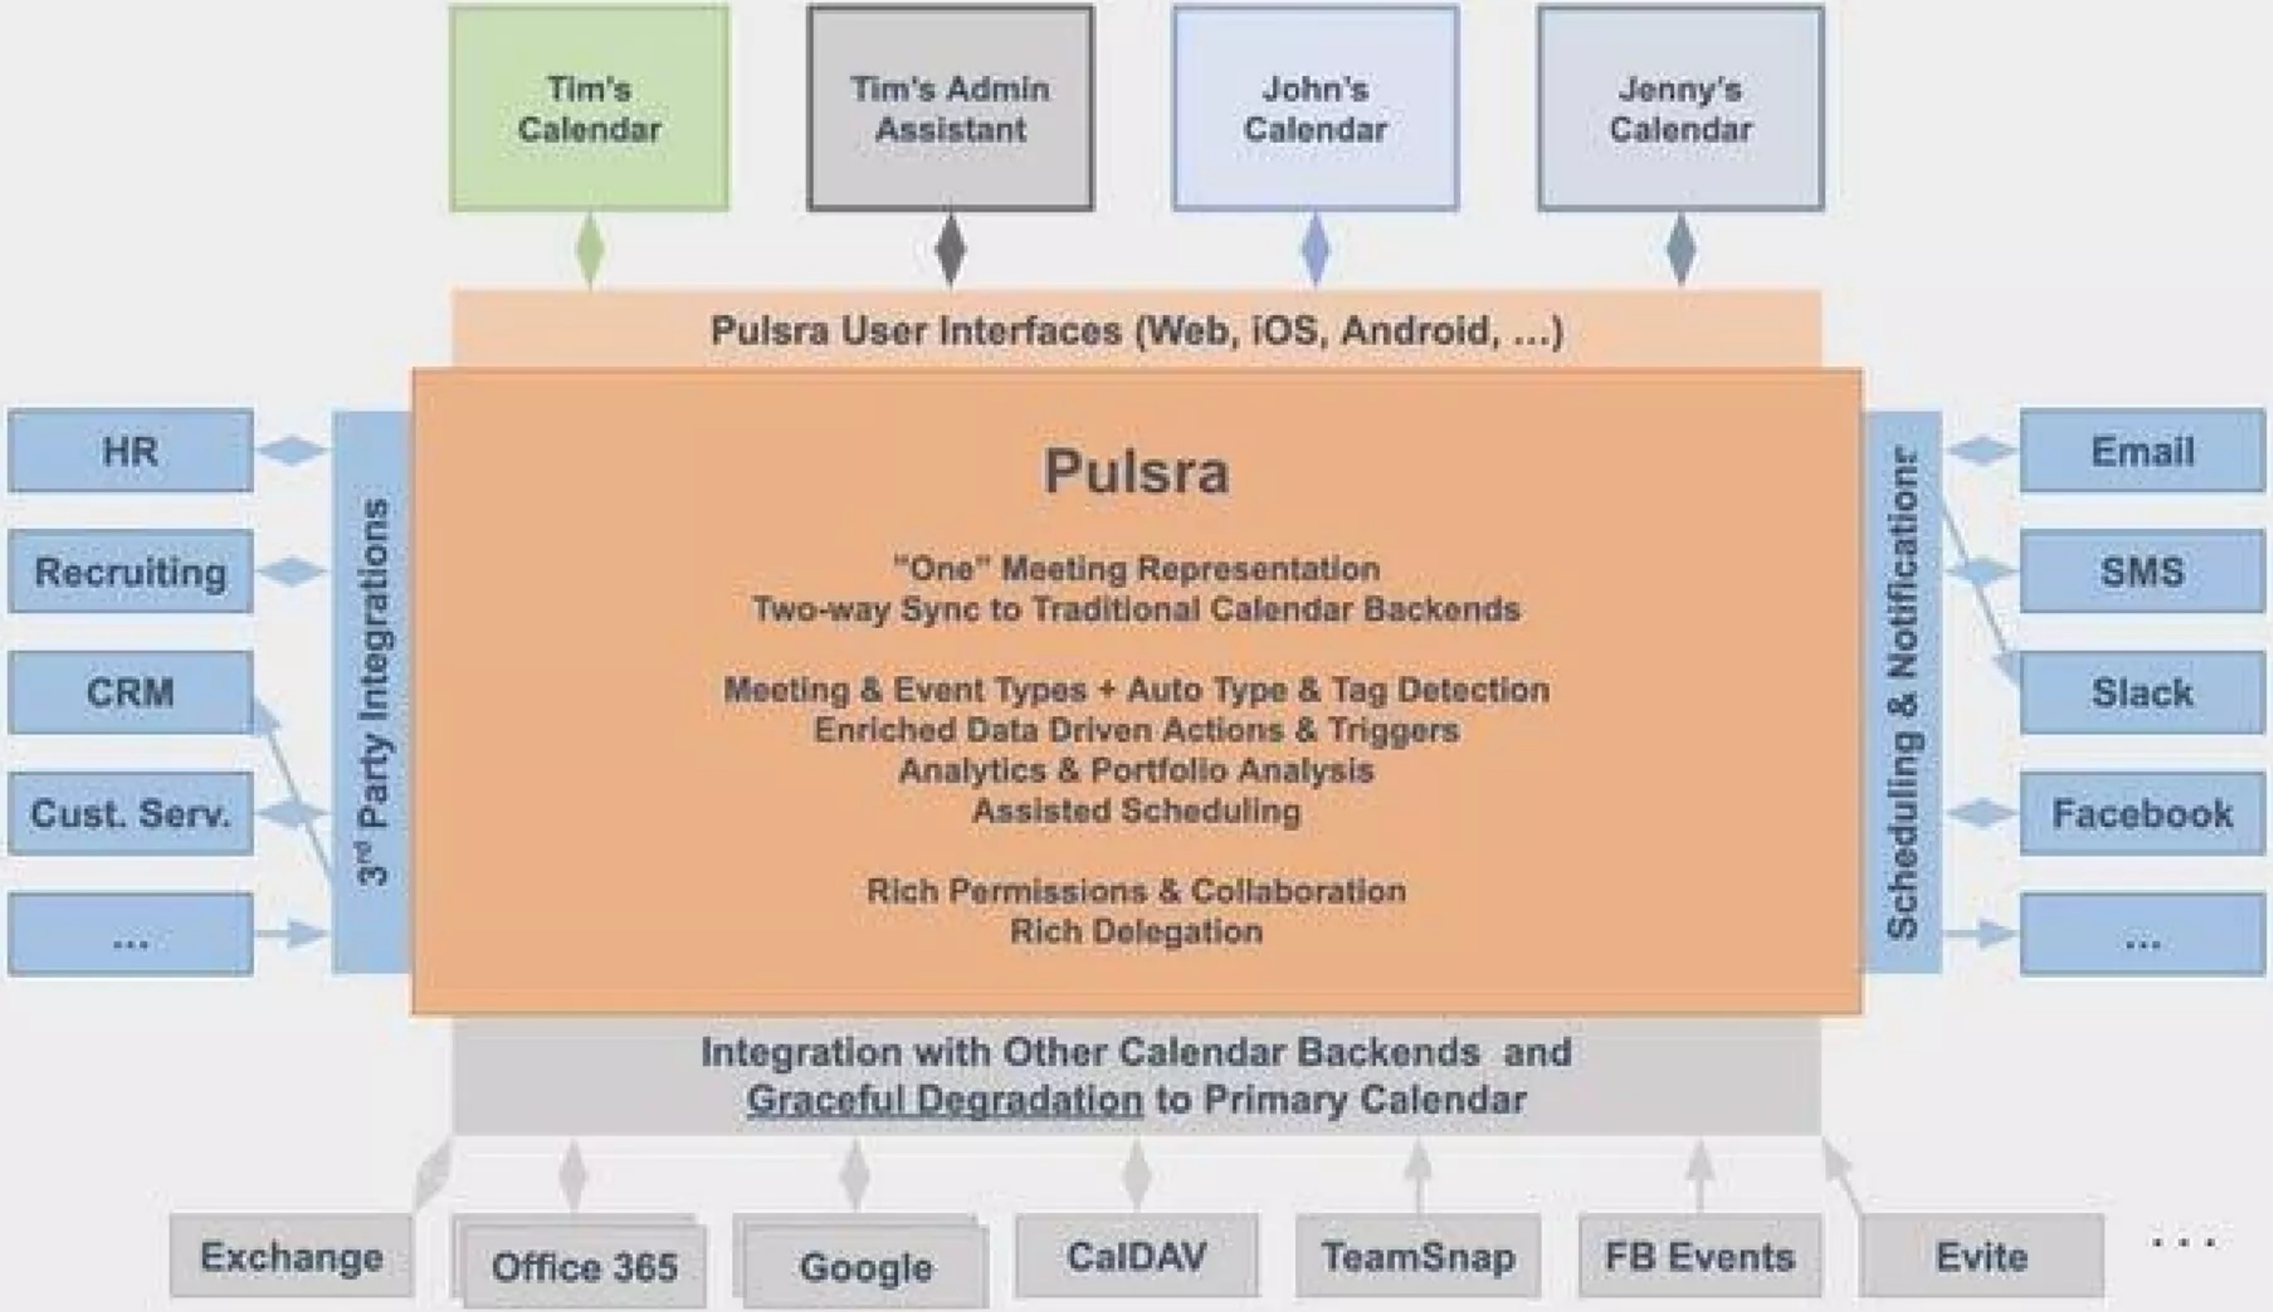

Understand different kinds of meetings and events and behave accordingly and intelligently when scheduling as well as before, during and after a meeting.

Rich Permissions & Collaboration

Granular and transient permissions and sharing capabilities to elevate scheduling and to enable new integrations not possible today.

CONFIDENTIAL – DO NOT DISTRIBUTE

CONFIDENTIAL – DO NOT DISTRIBUTE

See how you are doing against your goals

Same meeting from different calendars consolidated

Informational events taken out of the way

Notifications about updates to meetings and meeting materials

Warnings about at risk events, travel risk, etc.

Fully zoom-able and swipe-able interface

Customizable,auto-calculated details per meeting type

Links to important documents (resume)

Understanding of meeting context & continuity

Customizable actions per meeting types

Quickly reach out to other people

Exec. View

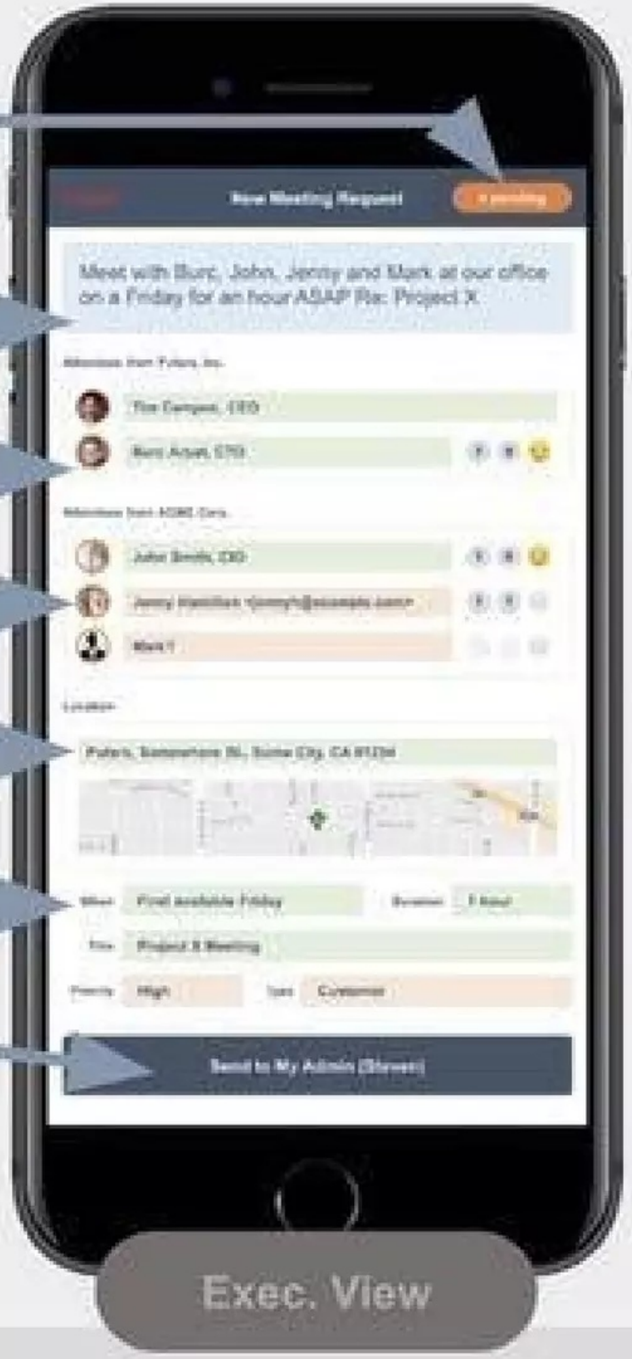

CONFIDENTIAL – DO NOT DISTRIBUTE

There is a "task list" for requests like this

Natural language input auto-parsed

Results of auto-parsing for verification & edits

Send to your admin for actual scheduling

Exec. View

Customizable actions per meeting type for before / during / after

Keep track of attendance & karma (private or public)

Check off agenda items or edit actions

Associate photos to this meeting

Directly work with your admin
