YAPILY

Connect to banks, easily

We live in an interconnected society

Feb 2020 - Private and Confidential

Yet financial services remains disconnected

2 billion

people globally lack access to financial products and services

43 days

on average to close a home mortgage

1 billion

current accounts in Europe are inaccessible and could be unlocked

$4.4 trillion

banking and payments well-protected yearly revenues

Building the future of Open Finance

Our Vision

To become the central nervous system of the global economy

Our Mission

Enable people around the world to share financial data and access payment infrastructure

Why now?

- **A shift in the payment and banking landscape** – The Payment Service Directive 2 (PSD2) is forcing banks to give non-bank rivals access to customer payment accounts via API

- **The walls are coming down** - Banks have been using customer financial data to sell their own products. Now they are forced to provide access to customer accounts, and competition will increase

- **Thousands affected, millions of opportunities** - 6,000 European Banks are already affected and 28,000 global banks in the coming years - having a knock-on effect to thousands of businesses and billions of people worldwide

- **Europe is paving the way for Open Banking** - the rest of the world will soon follow

- **Banking is just the beginning** - Pension, Insurance, Utilities will embrace the same open philosophy

With new regulation brings new challenges

Technical barriers

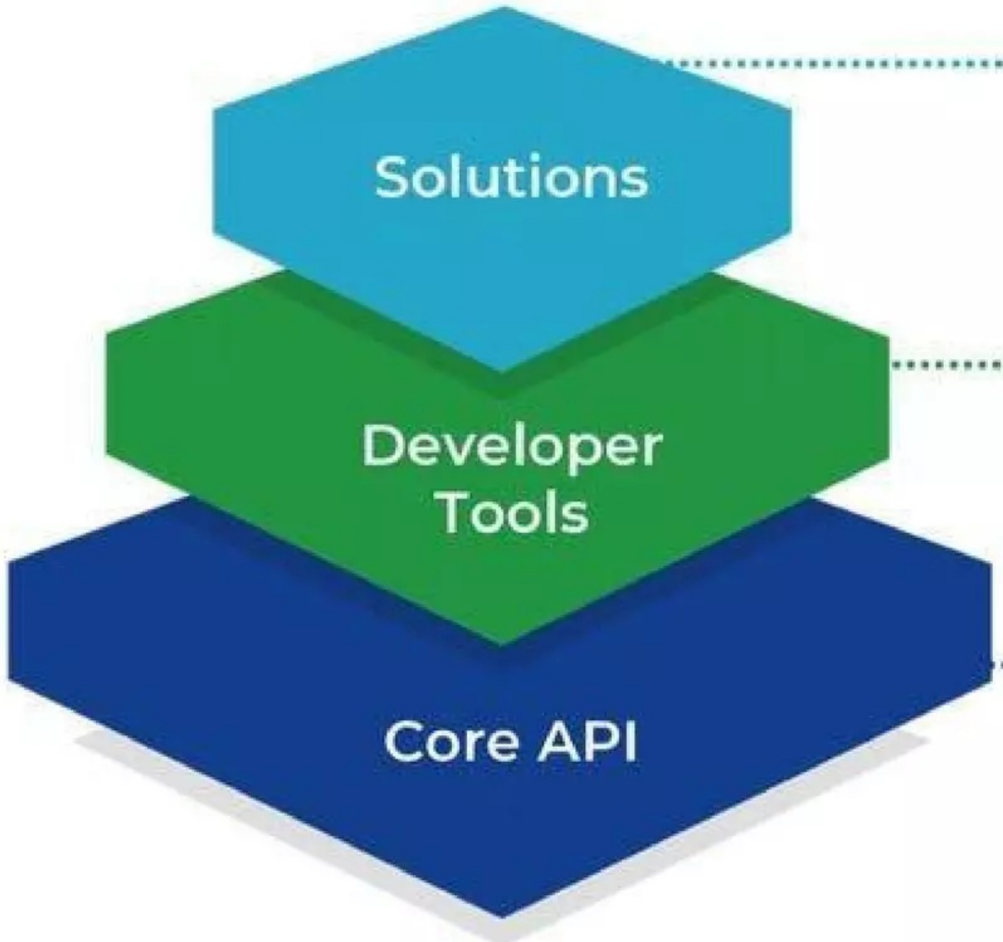

Bank friction

Regulatory fragmentation

Designed for Open Finance

Enterprise Solutions
Enabling customers to build solutions and overcome common digital challenges

Developer-ready
All the tools a developer could need in one console. From managing, building and monitoring API's, a developer can be set up within minutes

Secure and Scalable API Connectivity
Connect and manage the integration with all financial institutions offering Open API

How is our offering different?

Invisible enabler

Yapily powers business applications behind the scenes and is invisible to the consumer

Designed for Open API

Yapily is Open API-only. No scraping. No private API reverse engineering. This allows us to focus on superior quality and execution. We are more secure, performant and scalable than anyone else. We offer unique tools and technical possibilities

Security and data

Yapily uses data to continuously improve performance, security, service and experience without ever compromising on security. We never sell consumer data.

Deep-domain expertise

We create and evolve the standards together with regulators and banks. Yapily is part of OBIE's Technical Design Authority as well as the Berlin Group Advisory board.

Most trusted provider

Regulators and many Fortune 500 companies use Yapily to leverage Open Banking connections

Uniquely positioned to capture Open Finance going global
