SEMPRE HEALTH

1 in 3 Americans skips care because of cost.

This nonadherence has sweeping consequences.

Reasons for Nonadherence

Strategies to manage costs

- Stop taking medications
- Split pills
- Delay refills
- Skip doses
- Avoid new prescriptions
- Seek best price
- Increase debt
- Cut back on basic needs

$300B

Annual cost of nonadherence & suboptimal drug administration

1. Clinical side effects, polypharmacy issues, inconvenience, or untimely access to care

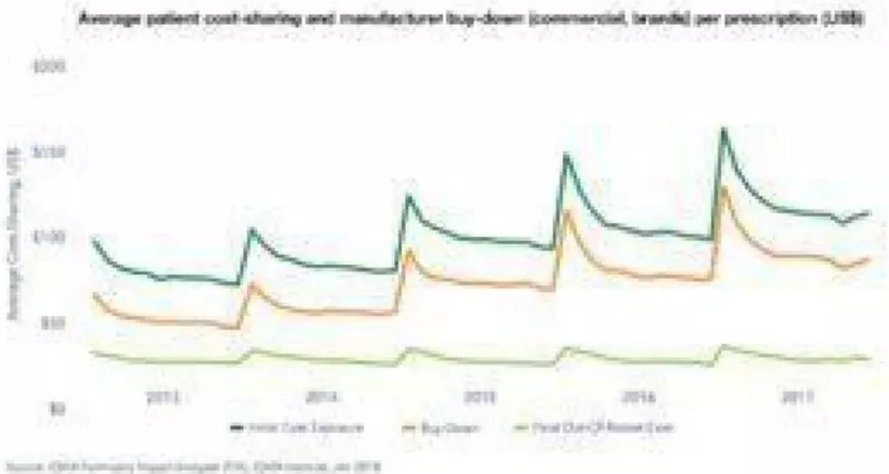

Brewster, G. A., Gerwitz, J. H., & Soumerai, S. B. (2007). Patients at risk for cost-related medication nonadherence: A review of the literature. Journal of General Internal Medicine, 22(5), 864–871.
The New England Healthcare Institute. (2009). Thinking Outside the Pillbox: A System-wide Approach to Improving Patient Medication Adherence for Chronic Disease. New England Healthcare Institute, (August), 1–21.

There are billions spent on pharma drug coupons each year.

But, they're not spent well.

$4B

Annual spend on drug coupons

Lack of payor visibility & control

One size fits all / little power to incentivize

Unsophisticated targeting & economics

Increasing regulatory scrutiny

Vitaris. (November 2016). "How Copay Coupons Could Raise Prescription Drug Costs by $30 Billion over the Next Decade."

What if payors were in the driver's seat?

Medication affordability is a budget redistribution problem.

Sempre allows payors to leverage manufacturer dollars.

We improve adherence and provide a personalized patient benefit over time, **for free**.

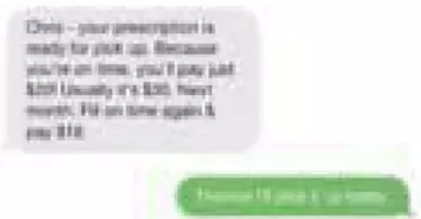

1

Sempre's two-sided marketplace matches the supply of brands & budget to demand from payors on the platform.

2

Sempre's proprietary technology ingests payor data, assigns pricing algorithms, and drives adherence with SMS + dynamic discounts at any pharmacy in the country.

3

Partners experience statistically significant improvements in adherence, engagement & downstream outcomes

Members love us.

What do you like most about this program? What do you like least?

I like saving the money and being reminded to pick my meds up on time. I don't see a downside.

I was thankful for [redacted] discounts I needed it to live without it after my stent I would have been in trouble I love this company

Saving money, & You always notify me, when they are due to be refilled, what I like the least is having to take them

I like that I get reminded and that it gets cheaper when I refill on time and there nothing I dislike about it

Obviously the discount is a nice benefit but so are the reminders. I can't think of anything that I don't like. Thanks.

Saves me money which makes me pick up my meds on time and I don't run out and there is no negative

Cost savings & reminders. There's nothing I dislike about this program

Best would be the savings... And don't really have anything bad to say... The staff that runs this has been helpful in answering questions and taking care of problems with the pharmacy...

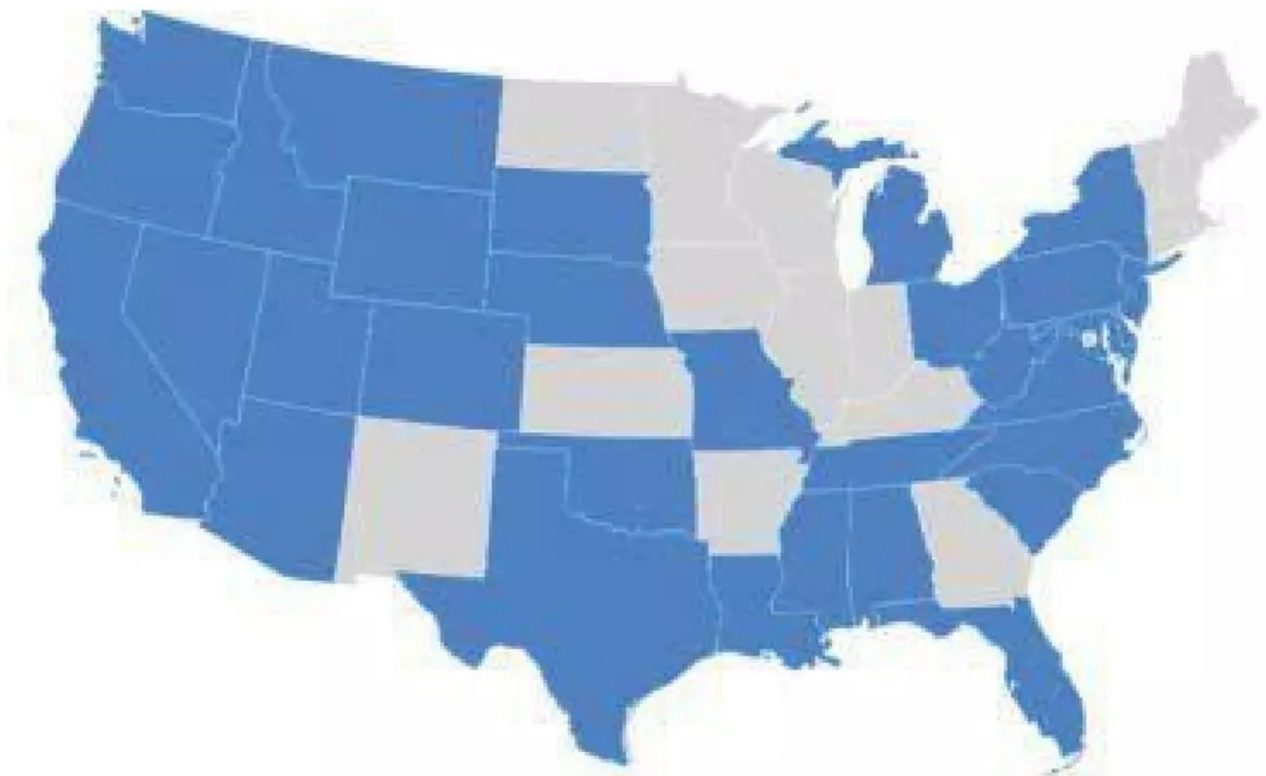

I like the savings. Don't like the fact u don't do it for all drugs.

I'm so happy just to save on these meds every thing helps in this expensive times all you hear is every thing is going up ! Tax gas etc !!! Makes me sad when do the middle class get their break ! Thank you for all you can do for me!!👍😎.

Saving money; least not saving enough money

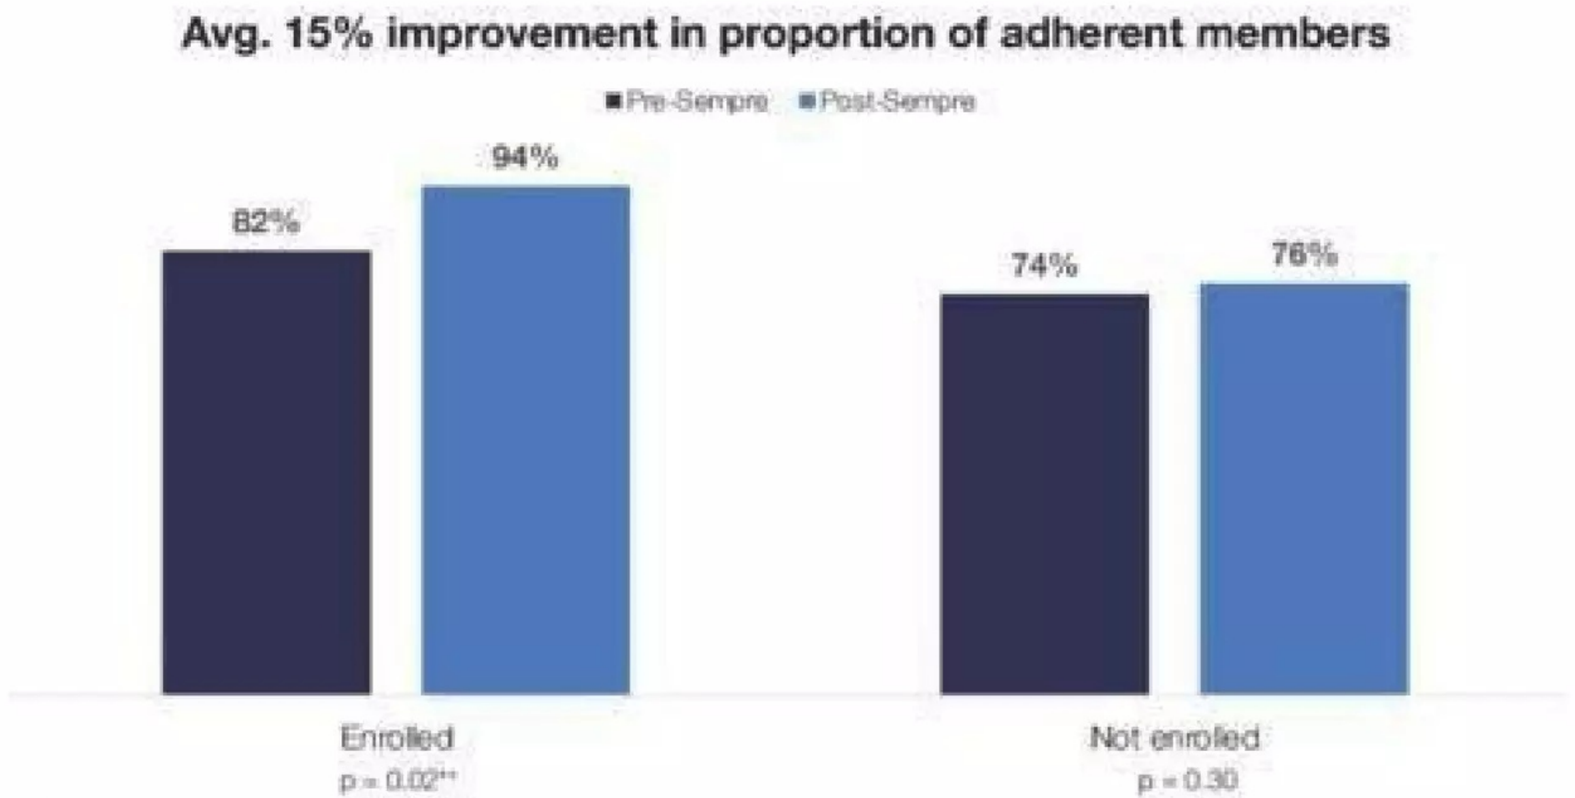

That u make it possible to continue to live by discounting my scripts. so there is nothing bad about helping people.

So do payors across the country.

Value to payor partners
Improved affordability & adherence
Differentiated member offering
Conversational SMS engagement
Real-time, real-world data
Supporting existing formulary
Free

It's because our programs work.

** Statistically significant, 95% CI

We see 8x higher enrollment than typical payor programs.

ENROLLED

35%

Member submitted phone number & provided explicit consent to enroll

ACTIVATED

92%

Member has filled at least 1 prescription with Sempre

~80% of members enroll without intervention

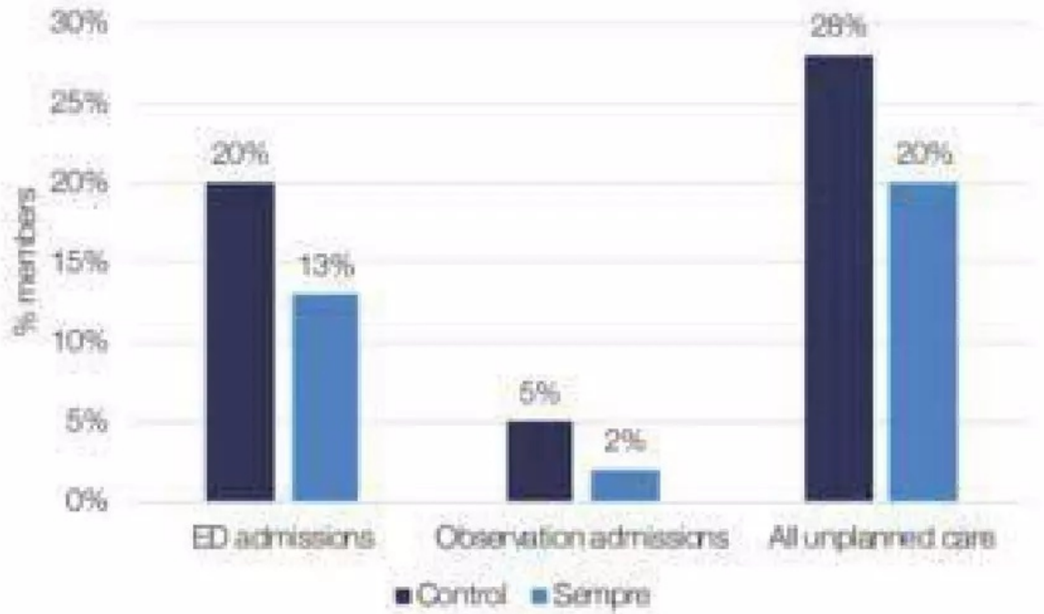

Our dynamic discounts change behavior.

- 86% of fills are on-time (within 3 days of the expected refill date)
- 30% of enrolled members were reactivated (had stopped filling more than 30 days before enrolling)
- 36% of members text 'thanks'

This translates to healthier and happier members.

Judy Miller
Illinois

"I signed up because of the financial payments, but I found that I really liked knowing that somebody out there cared whether I got my medication filled each month....by the end of the study I had lost 25 pounds and my fasting blood sugar dropped from 145 to about 100. So thank you for helping me to make these changes in my health."

Sempre allows members to share in the savings they generate when they make responsible decisions with their health.

We've figured out incentive alignment.

Create an immediate term benefit for patients when they do the right thing

Steer patients to good decision-making vs. expecting them to act like consumers

Create a product patients can't live without, which in turn delights our partners

Charge only those who have the most to gain immediately, while optimizing for adoption from others

Sempre's network effects create a strong & defensible business.

Avg. $250 annual savings per member per drug

I was thankful for [redacted] discounts I needed it to live without it after my stent I would have been in trouble I love this company

That u make it possible to continue to live by discounting my scripts. so there is nothing bad about helping people.

UPMC HEALTH PLAN

"We look forward to expanding this program. While chronic disease medications can sometimes place an ongoing financial burden on patients, with Sempre, members are empowered to drive down their costs and over time improve their health outcomes."

Chronis Manolis RPh.
Chief Pharmacy Officer
UPMC Health Plan

novo nordisk

"Looking at some of the metrics that Sempre has been able to provide in terms of how they reach patients, how many patients enroll, how many patients engage with their technology is what made them an attractive partner. This space is quite complex, and sometimes it's not easy to convey the information, but the platform and the ability that they have to engage those patients that opt into the program and doing it in a succinct manner and maintaining that engagement over time is one of the reasons that we're looking to pilot a solution with them."

Chris Leggett
Director of Commercial Innovation
Novo Nordisk

Extremely sticky product, simple user experience, solving an immediate & acute need → Clinically effective & configurable, free, high member loyalty / satisfaction → Improved economics & distribution, alignment with payors & members

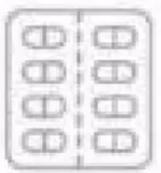

Delight the member → **Delight the payor** → **Delight the manufacturer**

The future is big and bright.

Specialty

$406B annual spend

Generics

$140B annual spend

Medicare

$129B annual Part D spend

POS rebates

$76B likely to be passed through to patients if safe harbor is repealed
