

SIGNAL

Be in the know.

Where Signal started

The world has changed forever.
Information production and accessibility is exploding.
Data, not instinct, is driving decisions at the highest levels.
Organisations are being exposed to critical risks every moment.

Imagine a world where a business leader

knows what their market will do next.

disrupts new competition before they become a threat.

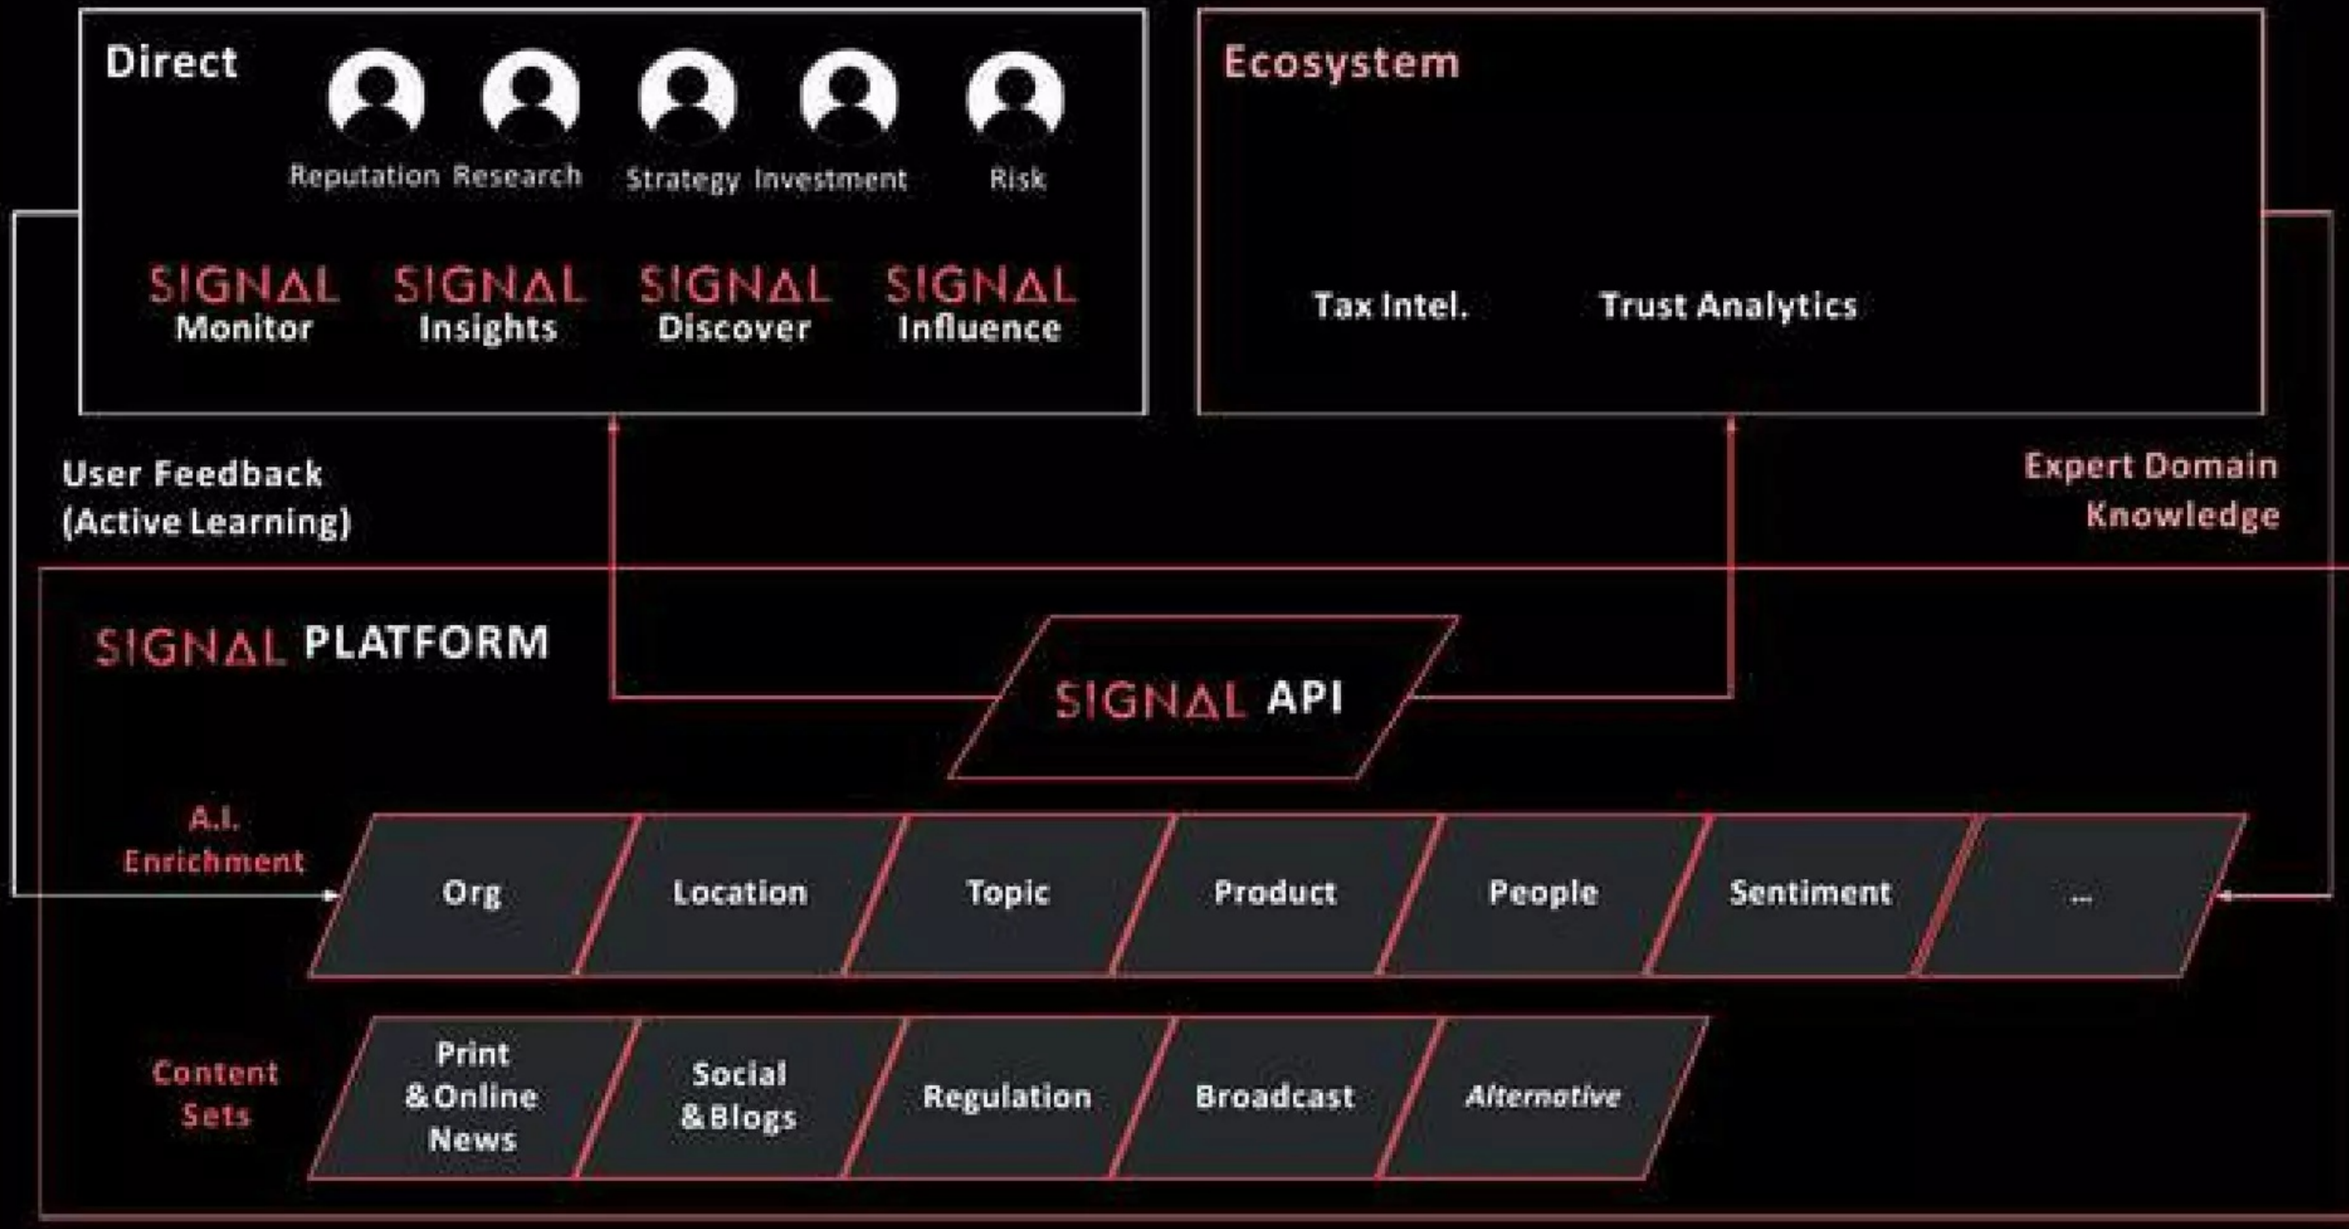

understands which actions will end a growing reputational crisis.

is always one step ahead.

Signal takes the world's data and turns it into actionable insights so business leaders make the best possible decisions.

We're building an A.I. driven platform with two routes to market

SIGNAL
MONITOR
See everything that matters in real-time
INSIGHTS
Assess your impact to drive the strategy
DISCOVERY
Surface the unknown unknowns
INFLUENCE
Uncover the individuals setting the agenda

Monitor

real-time, accuracy & search

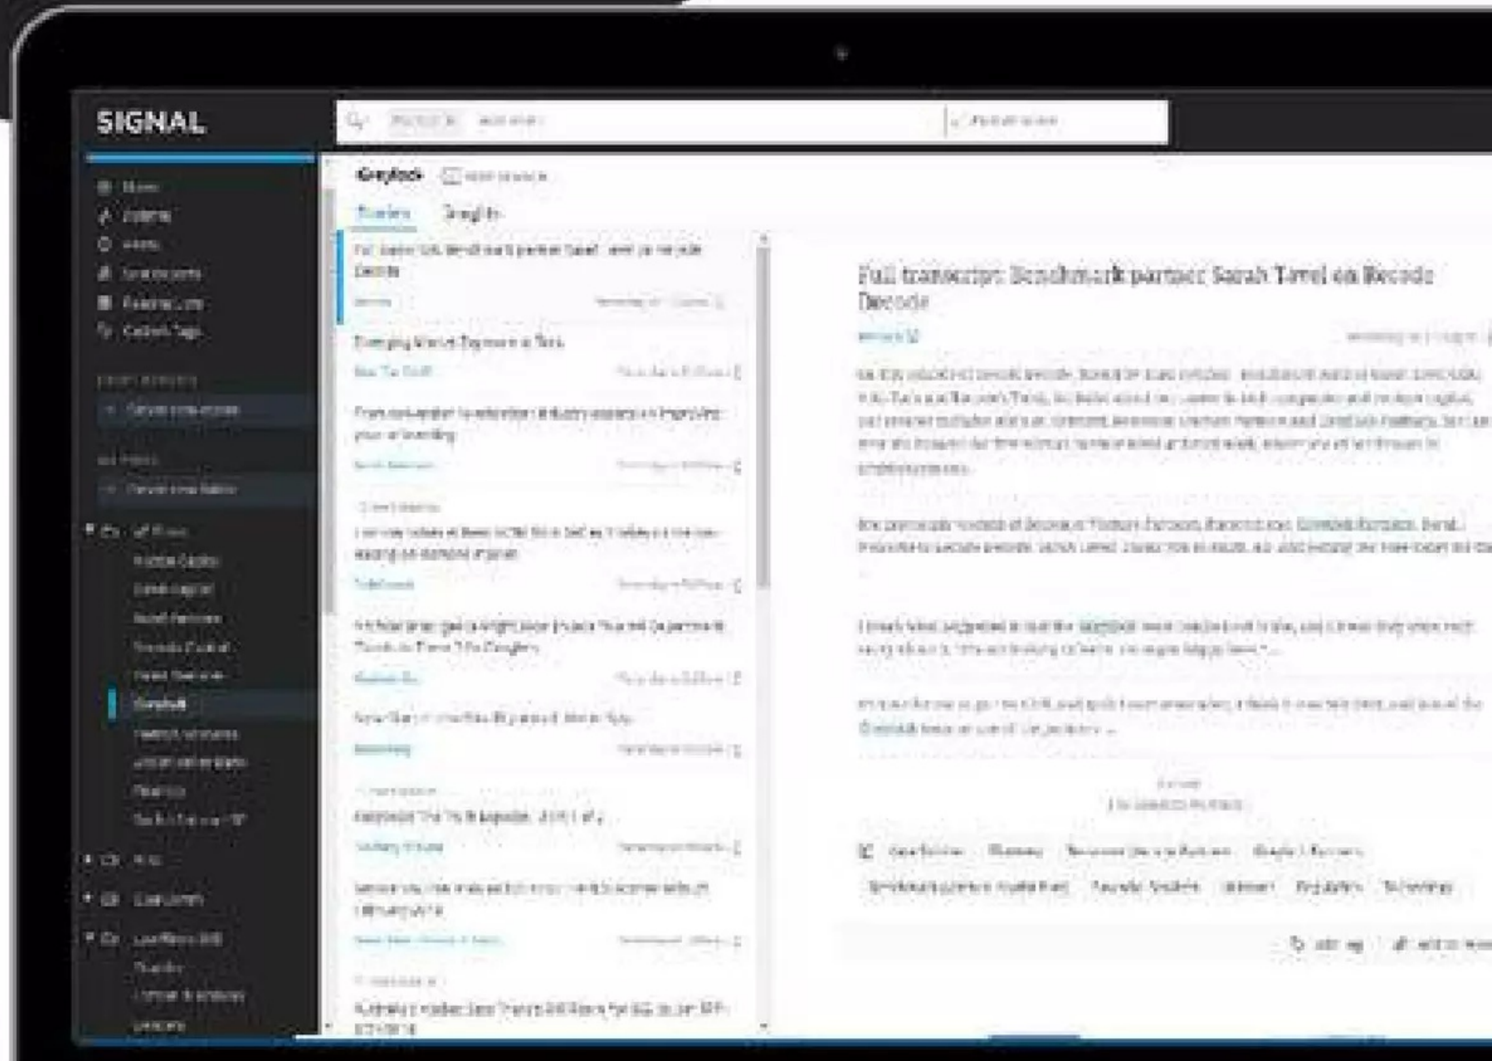

Monitoring helps clients understand the present at a story-level.

Real-time alerts on their on their known universe at feed and folder level.

Accurate information about their brand, market landscape, regulatory updates

Feed and Folder approach permits easy segmentation of information

Reporting function offering an easy way to distribute key content across an organisation.

Insights

Trends, snapshots, high-volumes

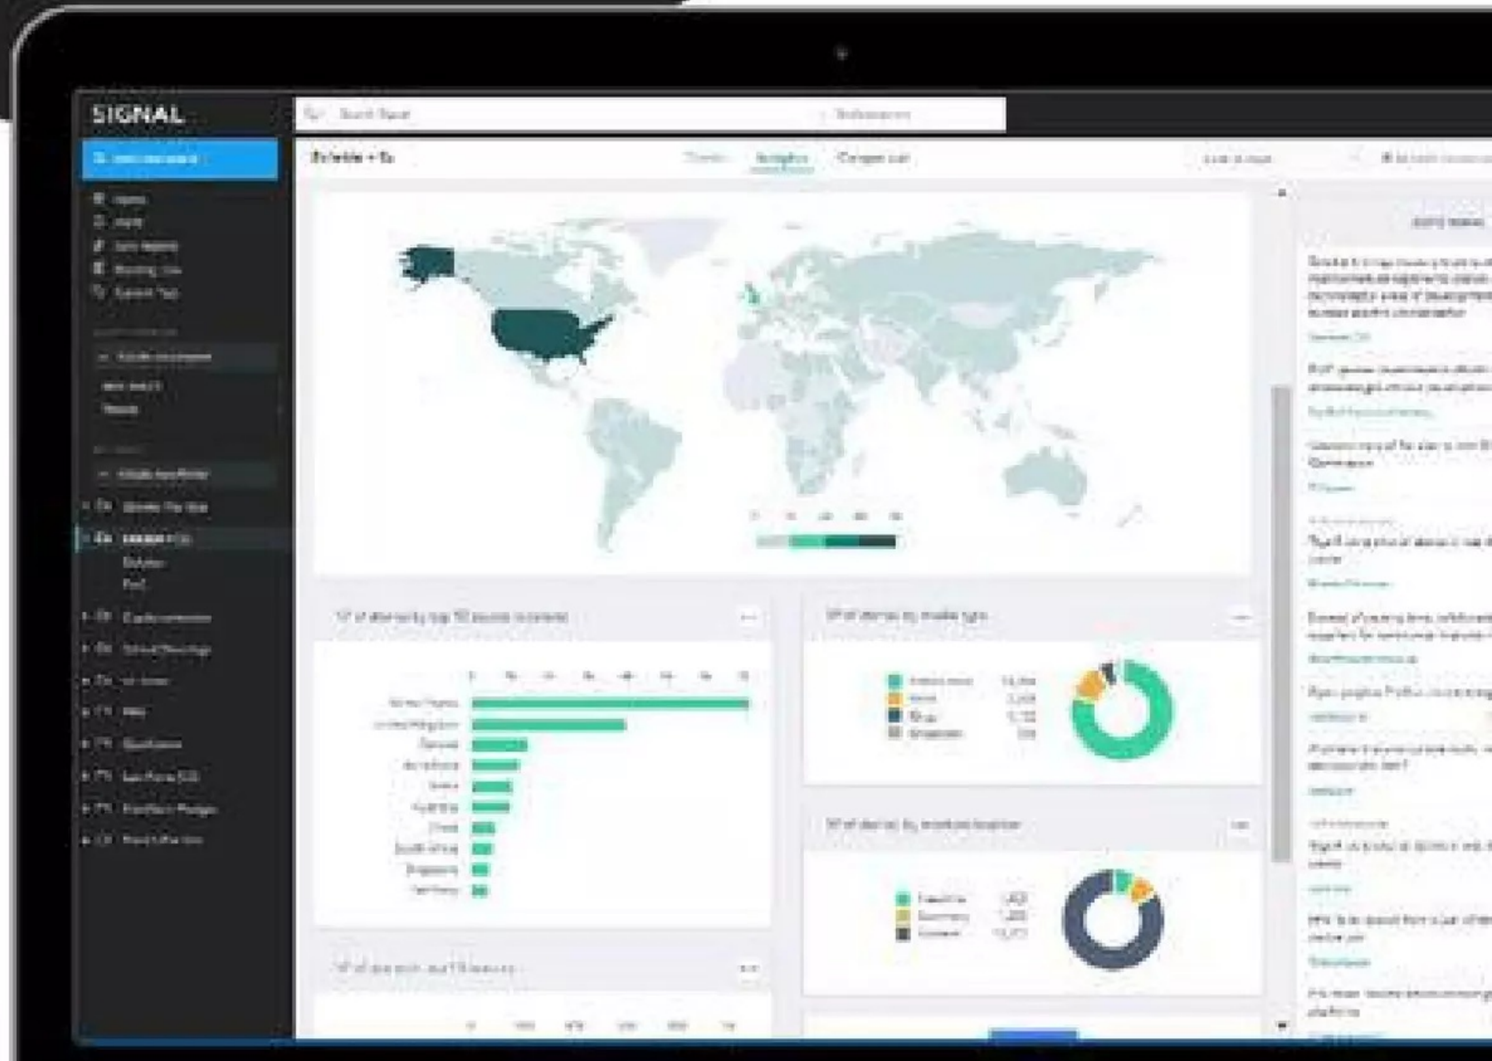

Insight helps clients understand past impact of information or decisions

We apply a level of **visualised analysis to** data we already calculate

Explore high-volumes of content quickly for key insights - perception, key competitors or publications.

See a snapshot, a report or or trend from multiple data points in aggregate to explore how your world is changing.

It **unlocks answers to *why* questions**

Discovery *(Future)*

Association, Detection, Suggestion

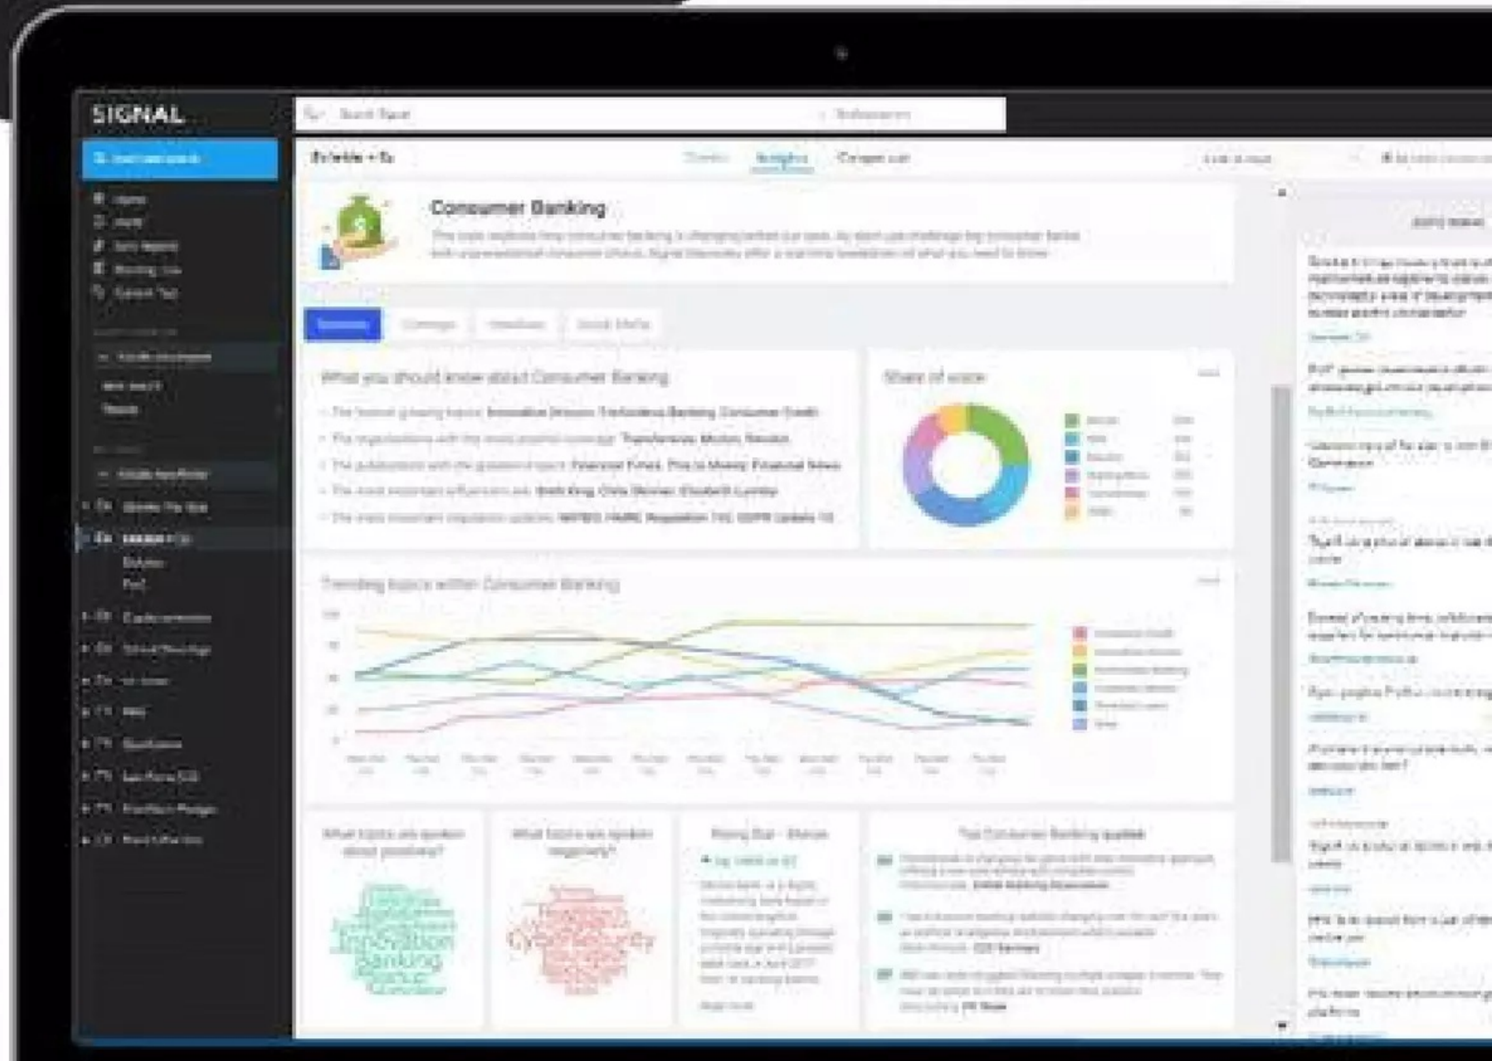

Discovery helps clients learn plan for the future and think strategically

It's **new information** created by Signal's A.I. offering, built on collected meta-data.

Detect new market entrants, new opportunities, new potential deals

Get summarised information on companies or people to get immediate insight into the unknown

Surface suggestions for key influencers, related organisations or similar topics.

Discovery *(Future)*

Association, Detection, Suggestion

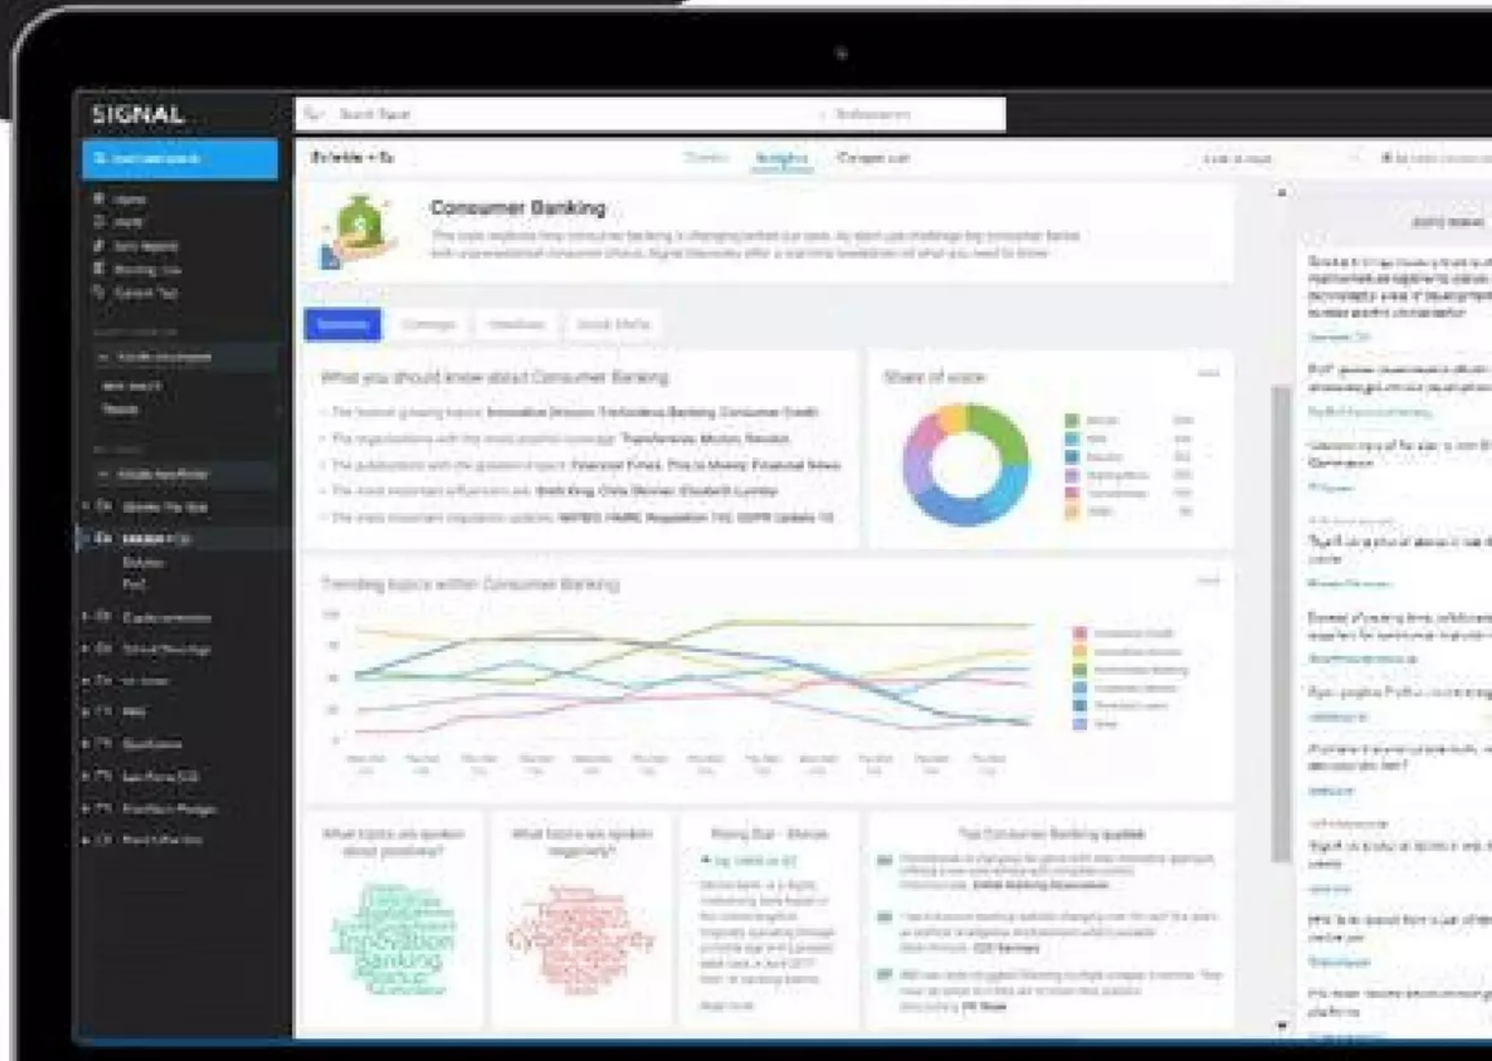

Discovery helps clients learn plan for the future and think strategically

It's **new information** created by Signal's A.I. offering, built on collected meta-data.

Detect new market entrants, new opportunities, new potential deals

Get summarised information on companies or people to get immediate insight into the unknown

Surface suggestions for key influencers, related organisations or similar topics.

Influence *(Future)*

Impact, Stance, Engagement

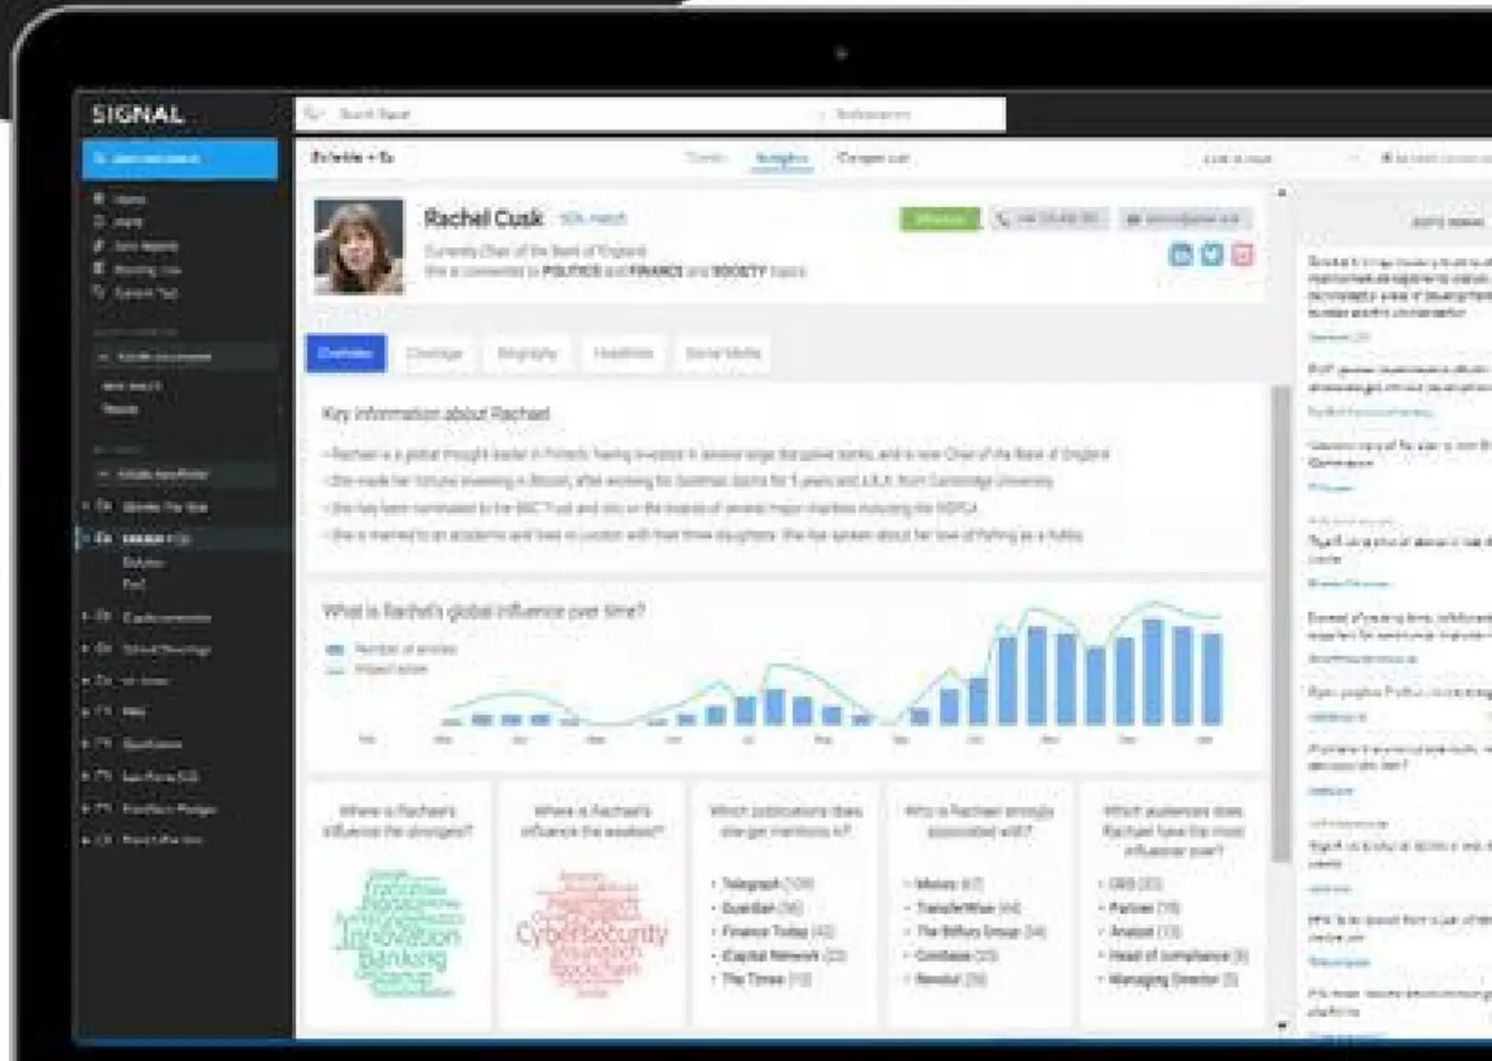

Influence helps clients engage with the right people to set the agenda

Insights into influencer perspectives on big topics, your brand and industry issues

Impact scoring for influencer on key audiences and particular topics

Summarised information with real-time events, updated biography, contact details

Suggestions on how to best engage and influence the influencer with relevant data or argument.

Agencies like [redacted]
