Mission

Skyflow is a privacy data vault for customer data

Payment Vault | Customer Vault | Patient Vault

Market: Building the Privacy Cloud Company

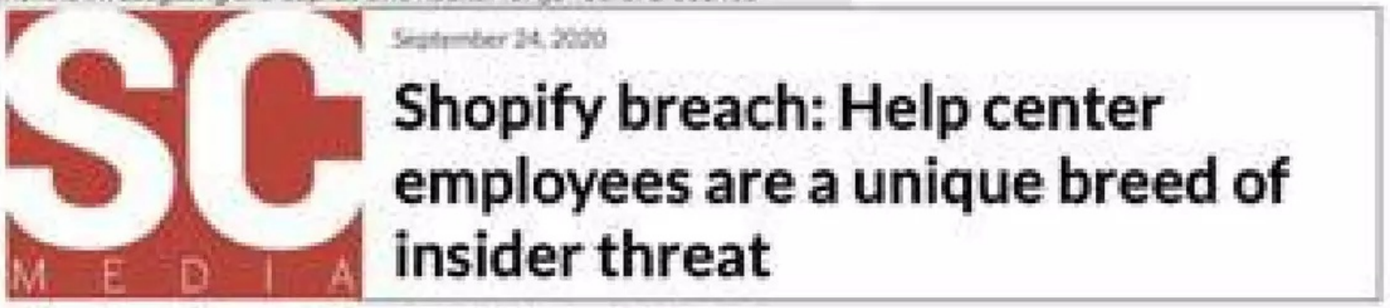

What is Skyflow?

Problem

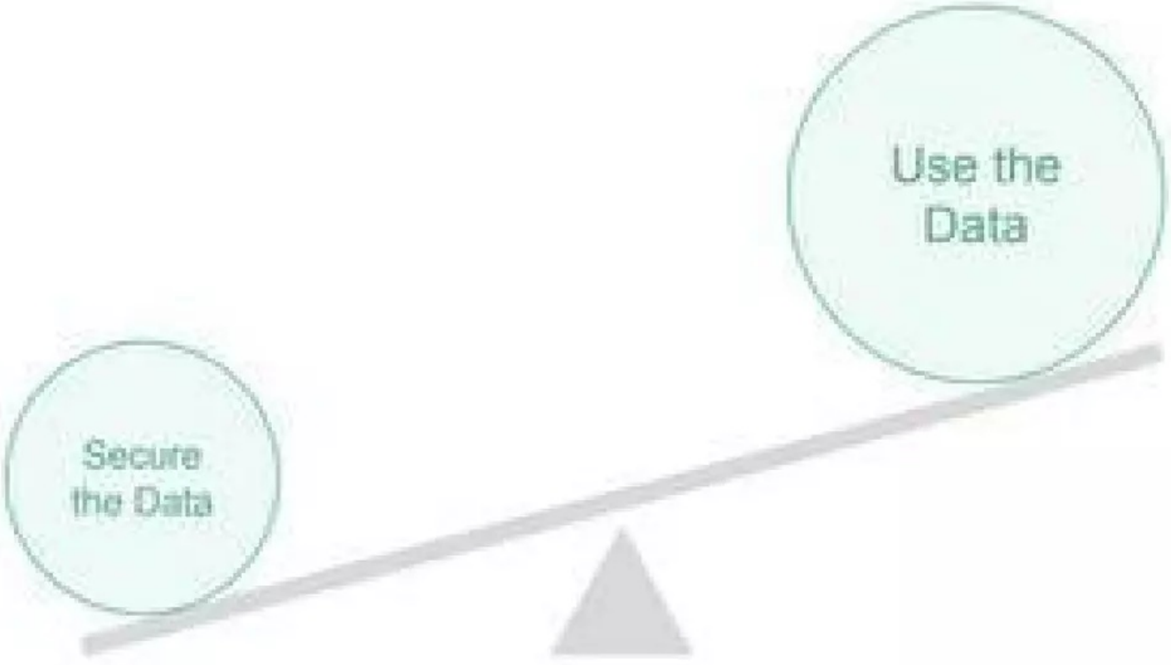

- Privacy, Security & Compliance are no longer fungible.
- Drivers: GDPR, CCPA, Data Residency & massive fines.
- How do I know I am not the next Equifax, Capital One?

Today, CTO's Face a False Choice

The Solution is Known: Zero-Trust Data Vault

Leading tech companies have had their own data vaults for years

The Solution is Known: Zero-Trust Data Vault

Leading tech companies have had their own data vaults for years

Google

Goldman Sachs

NETFLIX

CapitalOne

Others are catching on

Simple API's for Hard, Complex Problems

Card Processing	stripe
Telephony	twilio
PII Data Vault	Skyflow

Skyflow Confidential

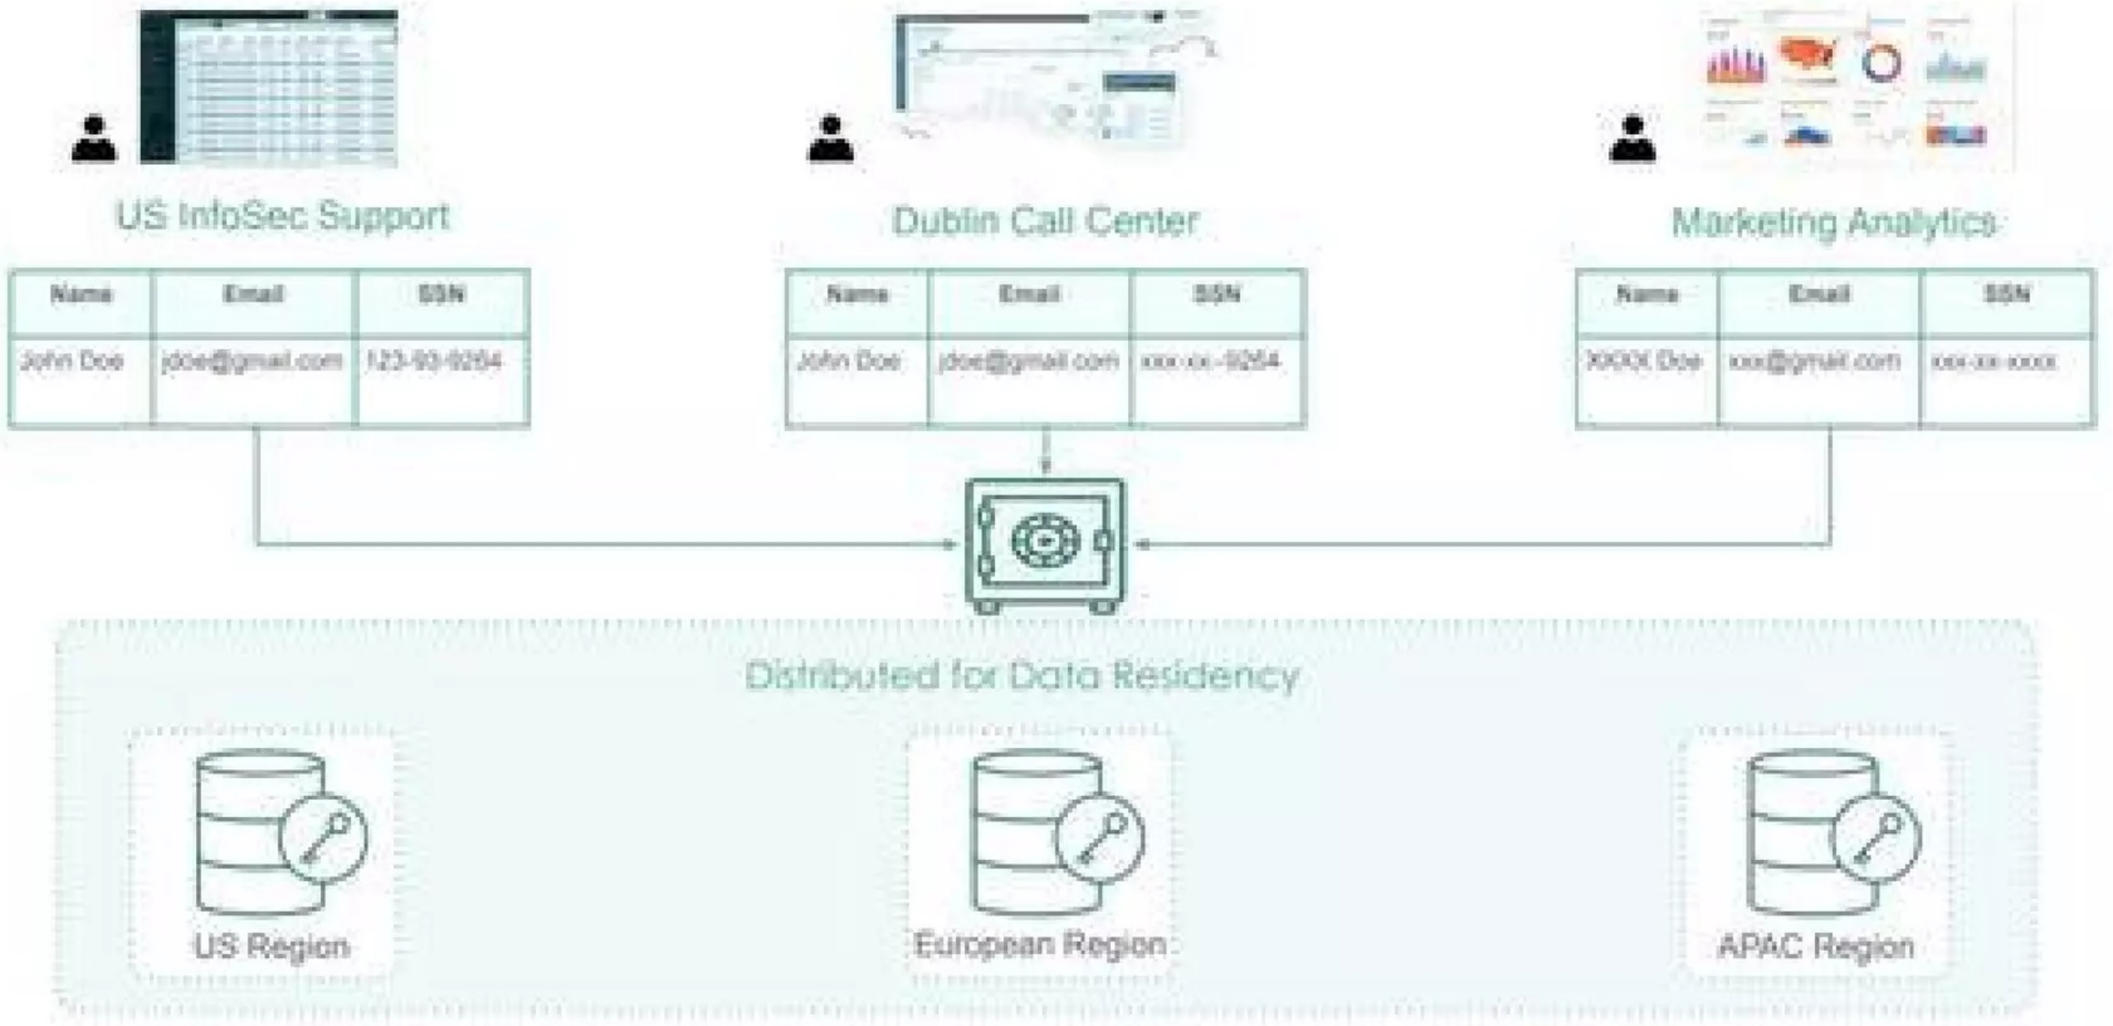

Building Zero Trust Data Vault for Everyone Else

Skyflow

- Run workflows & analytics on fully encrypted data
- Polymorphic Encryption - by leveraging more than one encryption and tokenization technique
- Data residency - plus access control, policy enforcement, auditable logging, and provenance.

Skyflow Confidential

Control Who Sees What, When, and from Where

Platform

Your App
REST & SQL API's
Platform Services
Data Modeling
Cloud Functions
Multi-party Data Sharing
Audit & Provenance
Privacy Preservation
Polymorphic Encryption
Access Control
Regulatory Compliance
Data Residency

How does Skyflow fit into the overall stack?

GTM: Multiple Entry Points

- I am no longer compliant
- I had a recent breach
- I had a recent internal incident
- I am moving to the public cloud
- I am building a new app
- I am rewiring my app for microservices

Skyflow Confidential

Key Benefits

Isolate & Protect

The Skyflow platform organizes sensitive data in a central infrastructure and protects it using zero-trust architecture, strong encryption and full regulatory compliance.

Analytics & Workflow

Leverage the power of your sensitive data for use in multi-party data-sharing, federated machine learning, and analysis to drive business growth.

Developer APIs

Aimed at developers, Skyflow Privacy Platform is powered by APIs and SDKs that allow developers to modularize, customize and extend solutions.
