We are creating an entirely **new way** for non-developers to build software.

As simple as **building lego**.

Prolific makers love Softr

"I love how easy it is to turn an idea into a functional web app with Softr."

Ryan Hoover, Founder

Product Hunt

"I was blown away by how user-friendly and well-documented the entire product was! I was able to create an app within hours without any external help."

Karthik Puvvada (KP), Program Director

On Deck

Our customers build Client Portals

To give their clients and third parties a secure way to access and manage their information.

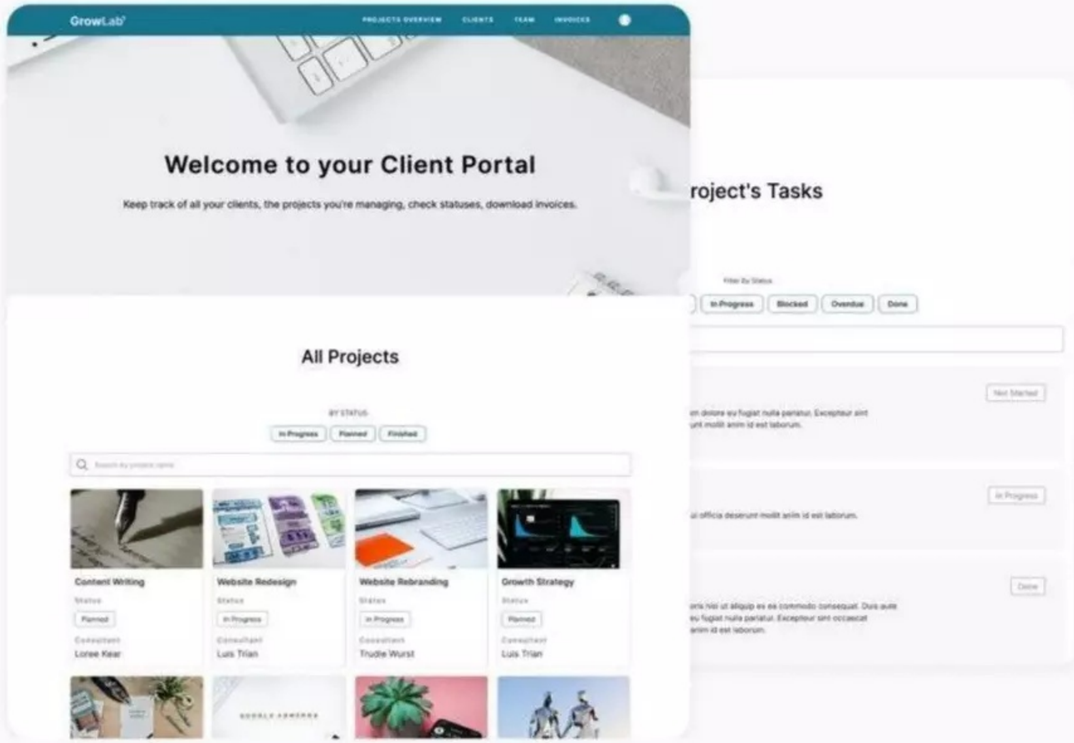

Untapped Capital VC firm keeps its LPs informed with investor portal built with Softr

I had already tried other tools, so when I started using Softr, it was clear immediately that the capabilities were beyond what I found elsewhere.

Yohei Nakajima General Partner, Untapped Capital

untapped

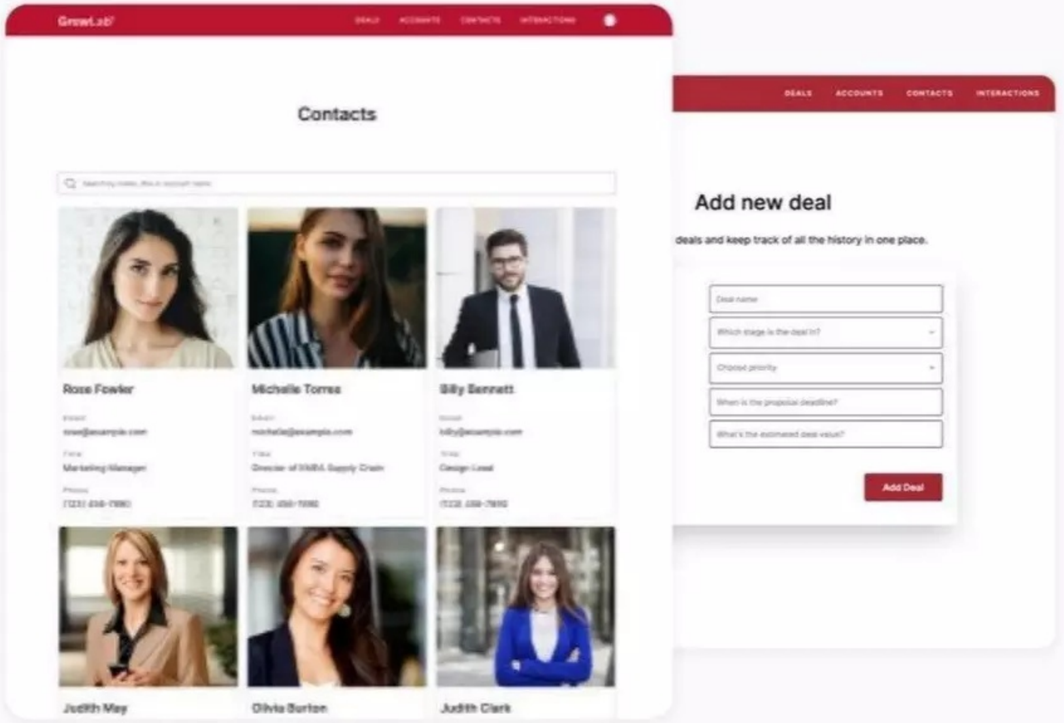

Our customers build Sales CRMs

To view and manage all their sales deals, sales activity & contact data.
All in one place.

"Softr allows anyone to create their own custom software without writing a single line of code. This tool allows YOU to fully customize your user experience by creating your ideal user experience within a simple drag and drop interface. With Softr, anyone can build their own app to organize and streamline their workflow - and that's an empowering reality!"

Gareth Pronovost
GAP CONSULTING

Our customers build Employee Directories

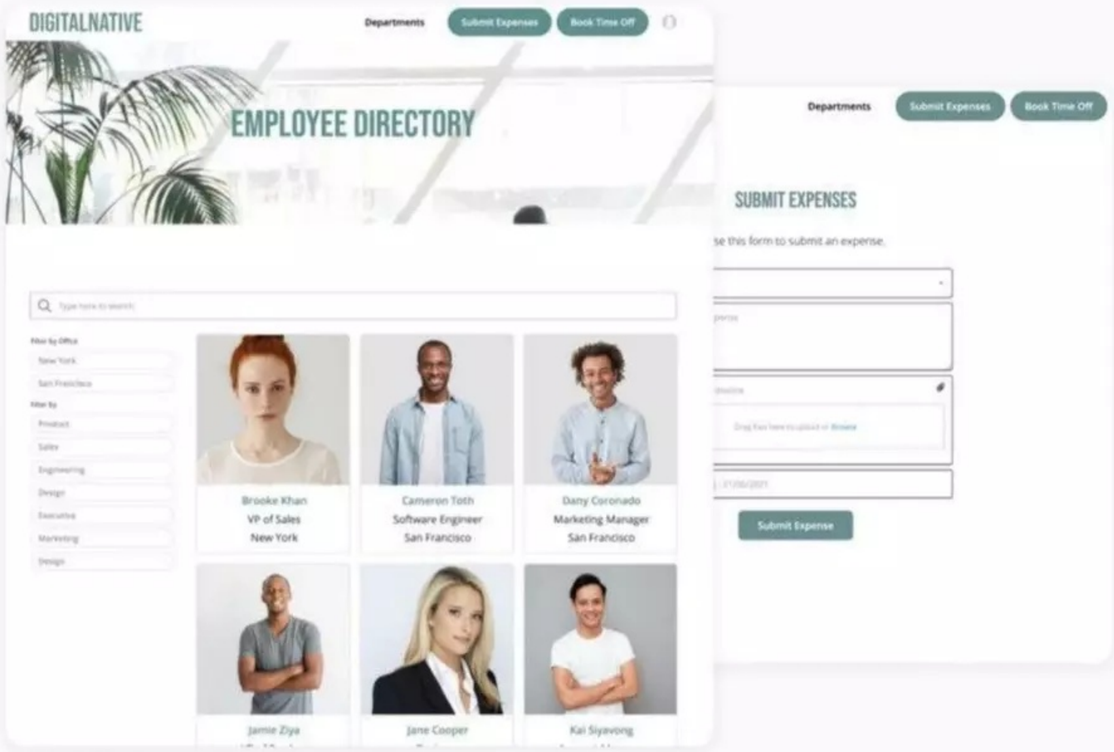

To view and manage all their company and employee information in one place (submit expenses, book a time off etc).

Making internal business processes more efficient with Softr

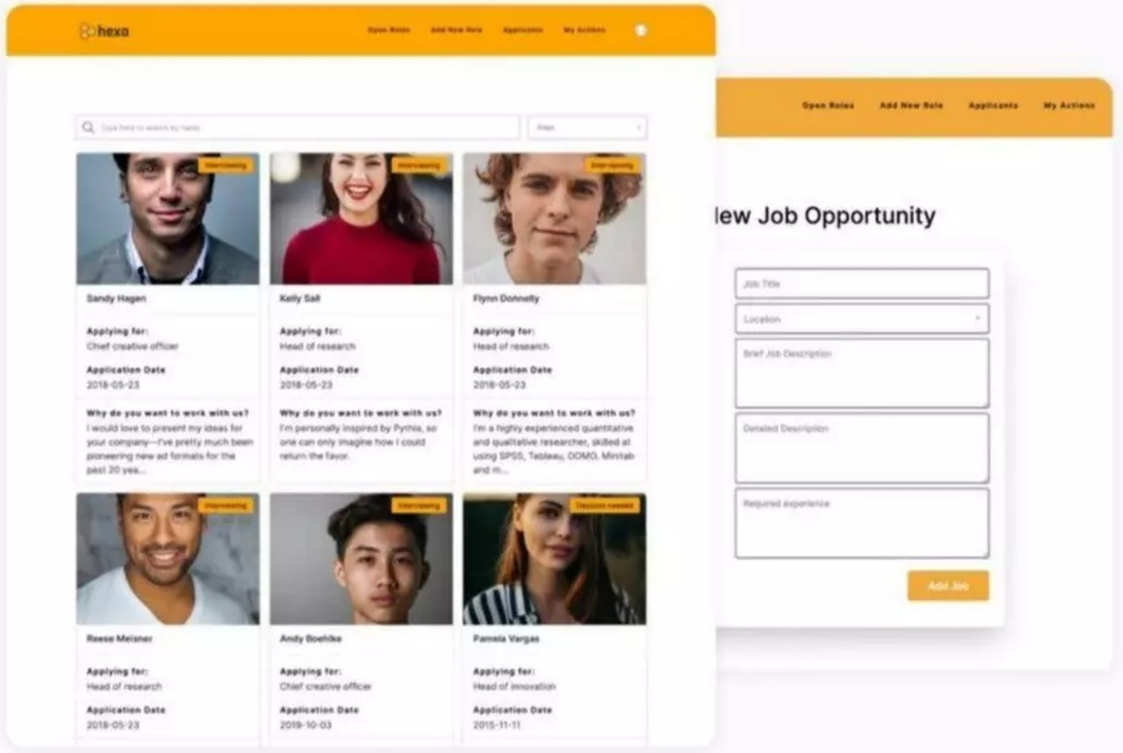

I have been impressed with the flexibility of Softr. The ability to pull data from different Airtable bases into different blocks and display them on one page was one of the main reasons I chose Softr.

Dan Smith Director, DS Automotive

Our customers build Applicant Tracking Systems

To manage their entire hiring process like jobs, applicants, hiring managers etc.

Our customers build Marketplaces

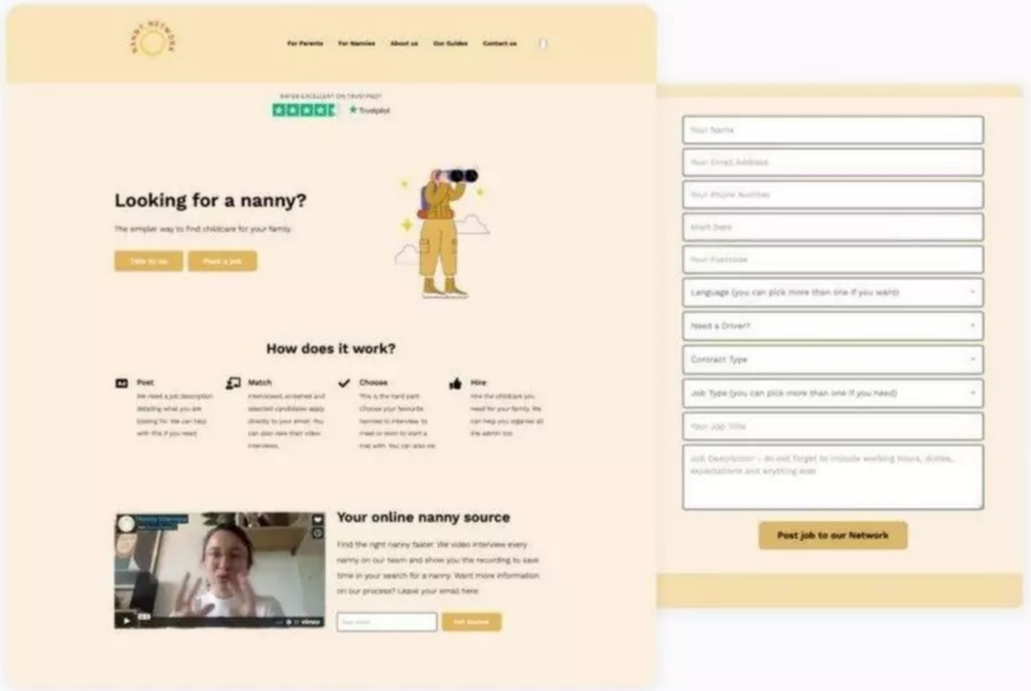

To launch two-sided marketplaces like Airbnb or Fiverr, and facilitate transactions with powerful search and user profiles.

How Nanny Network turned their service business into a digital platform for parents to source childcare

As a small business, we needed to use a tool that could grow with us, and we feel that this is what Softr offers us. After wasting time and money trying every web builder under the sun, Softr came to save the day. We cannot recommend this platform enough – it's perfect, easy to use even for a non-technical person like me.

Lucia Borraccino Founder, Nanny Network

Our customers build Online Communities

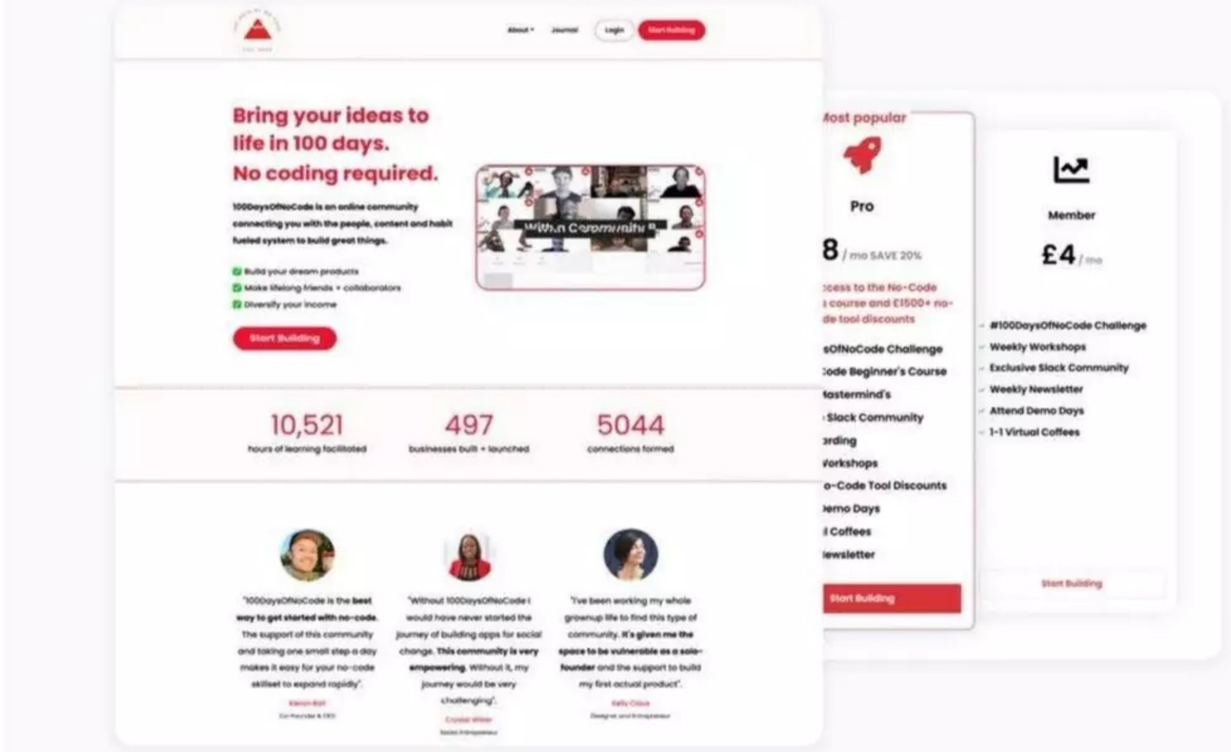

To run their community with free or paid membership.
To share gated content, sell courses and make connections, in a custom interface.

Softr's ease and speed of use is it's standout characteristic. No tool is faster to create with.

Max Haining

Founder, 100DaysOfNoCode

Our customers also build

Investor Portals	Inventory Tracking	Internal Dashboards	Editorial Calendars	Resource Hubs	VC portfolio communities

... and more

Softr gives business users superpowers

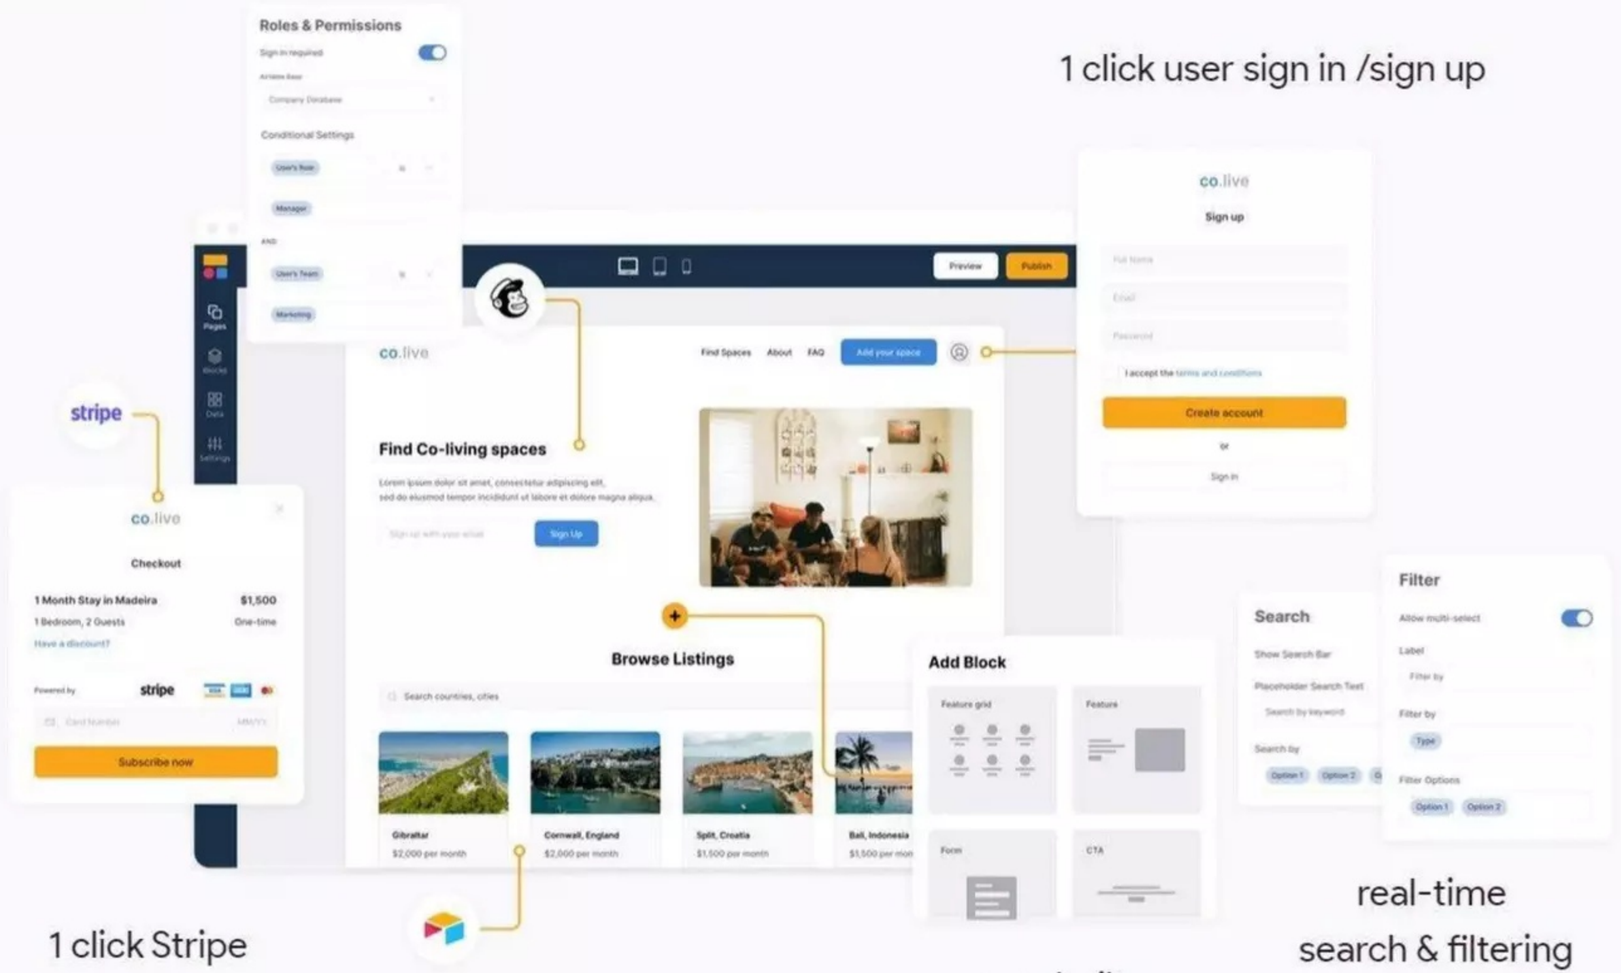

1 **Connect your data**
Start from a template or scratch

2 **Build your app with blocks (aka lego)**
Cutomize how your data in displayed, tweak styles & layouts.

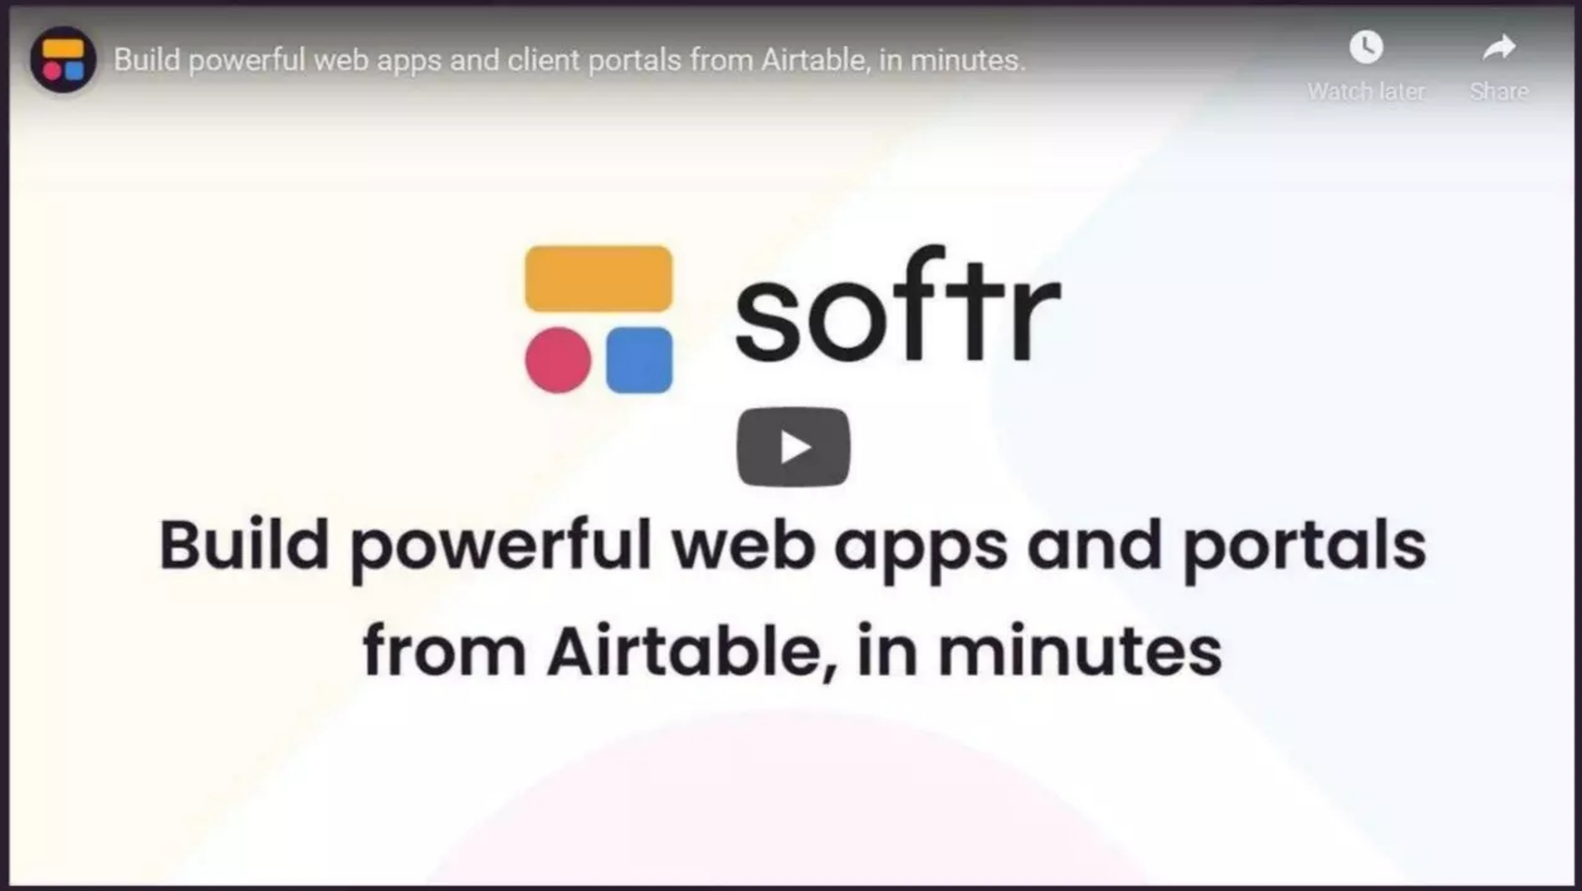

3 **Add user auth, payments, roles & permissions**

4 **Publish → your app is LIVE!**
Share the link with anyone.
