sorare

We can not collect **digital goods**

For the first 25 years of the internet,
we have had **no digital scarcity.**

You **do not own** your digital goods
(no tradability, no portability).

sorare

A new market is taking off

Blockchain Gaming

ERC721

New blockchain tech. (2018)

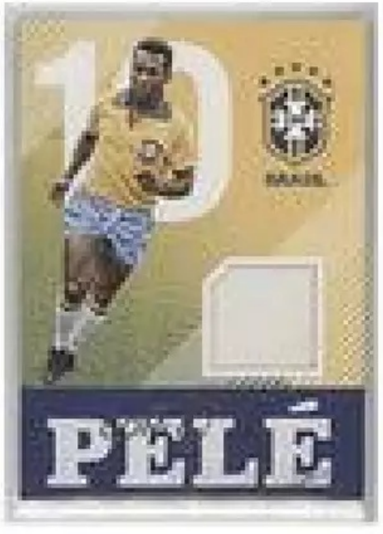

Sport leagues adoption (2019)

Early Traction

€1M of sales by Sorare (2019 and H1 2020)

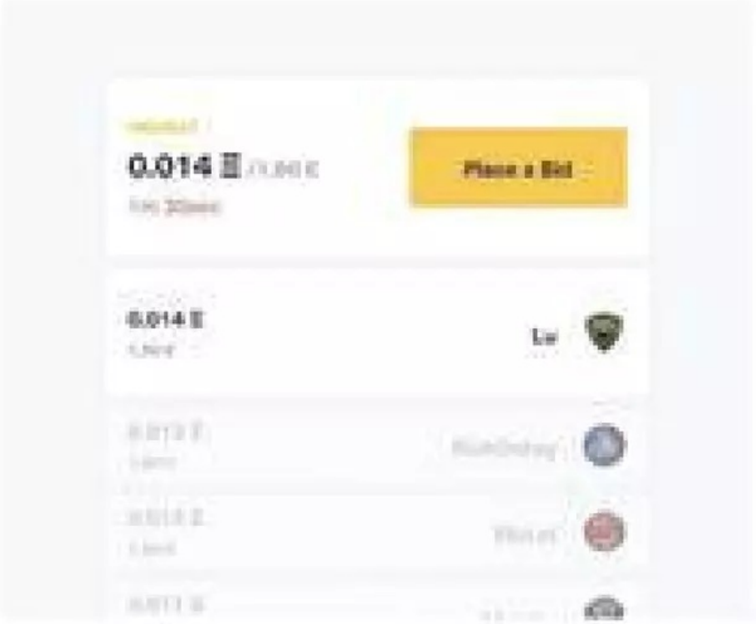

sorare

People love to
collect goods
-
We are buying **$370B**
of collectibles / year

sorare

Appendix

sorare

The opportunity for **clubs and leagues**

Market your players to a new customer segment
Develop your fanbase in strategic markets (USA, Europe, Asia) where blockchain adoption is high

Increase your revenues with little investment
Open a new merchandising revenue stream
Not time-consuming for your teams

Consolidate your position of digital leader
Offer to your fans worldwide an innovative way to engage with their favorite players

sorare

Why blockchain for Fantasy Soccer?

3 features that were not possible before

Get Digital Scarcity
You can collect digital goods for the first time

Enjoy Freedom over your game assets
Move them in different games, marketplaces

As a right owner (club), get paid on second-hand sales
We can pay royalties on the secondary market, a feature which was also impossible before

sorare

Community

They own the game. They love the game. They share the love.
