Q. Now you are going to see some statements that people have made about Frozen Foods. For each one please tell me which if any of these brands, shown, you think apply to that statement.

...NURTURED A GROUP OF LOYAL FOLLOWERS

"OBSESSED WITH YOUR PRODUCTS @STRONGROOTSIRL! OUR FRIDGE IS FULLY STOCKED EVERY WEEK"

"THE CAULIFLOWER HASH BROWNS ARE SOOOOO GOOD ☺"

"THESE ARE THE BEST OVEN SWEET POTATO FRY AVAILABLE, HANDS DOWN. A GAME CHANGER!"

"THESE ARE DELICIOUS, WITH REALLY GREAT TEXTURE. HEALTHY & VERSATILE, AND YOU GET LOADS IN A BAG"

"TOTALLY DELISH - A FREEZER STAPLE IN THIS HOUSE!"

ALL THIS...

...WITH JUST €100,000 OF START-UP CAPITAL.

WHAT COULD WE ACHIEVE WITH €15,000,000?

A MESSAGE FROM SAMUEL TO HIS TEAM

"It's hard to believe but I still feel we are only starting. I mean it. We have built a foundation to grow further, but it is not sturdy enough. If we really want the roots to bed in like a great oak which will never be uprooted, ever, we need to think about how we can be toppled, and support those weaknesses with the strongest strengths, supporting all opportunities & removing all threats."

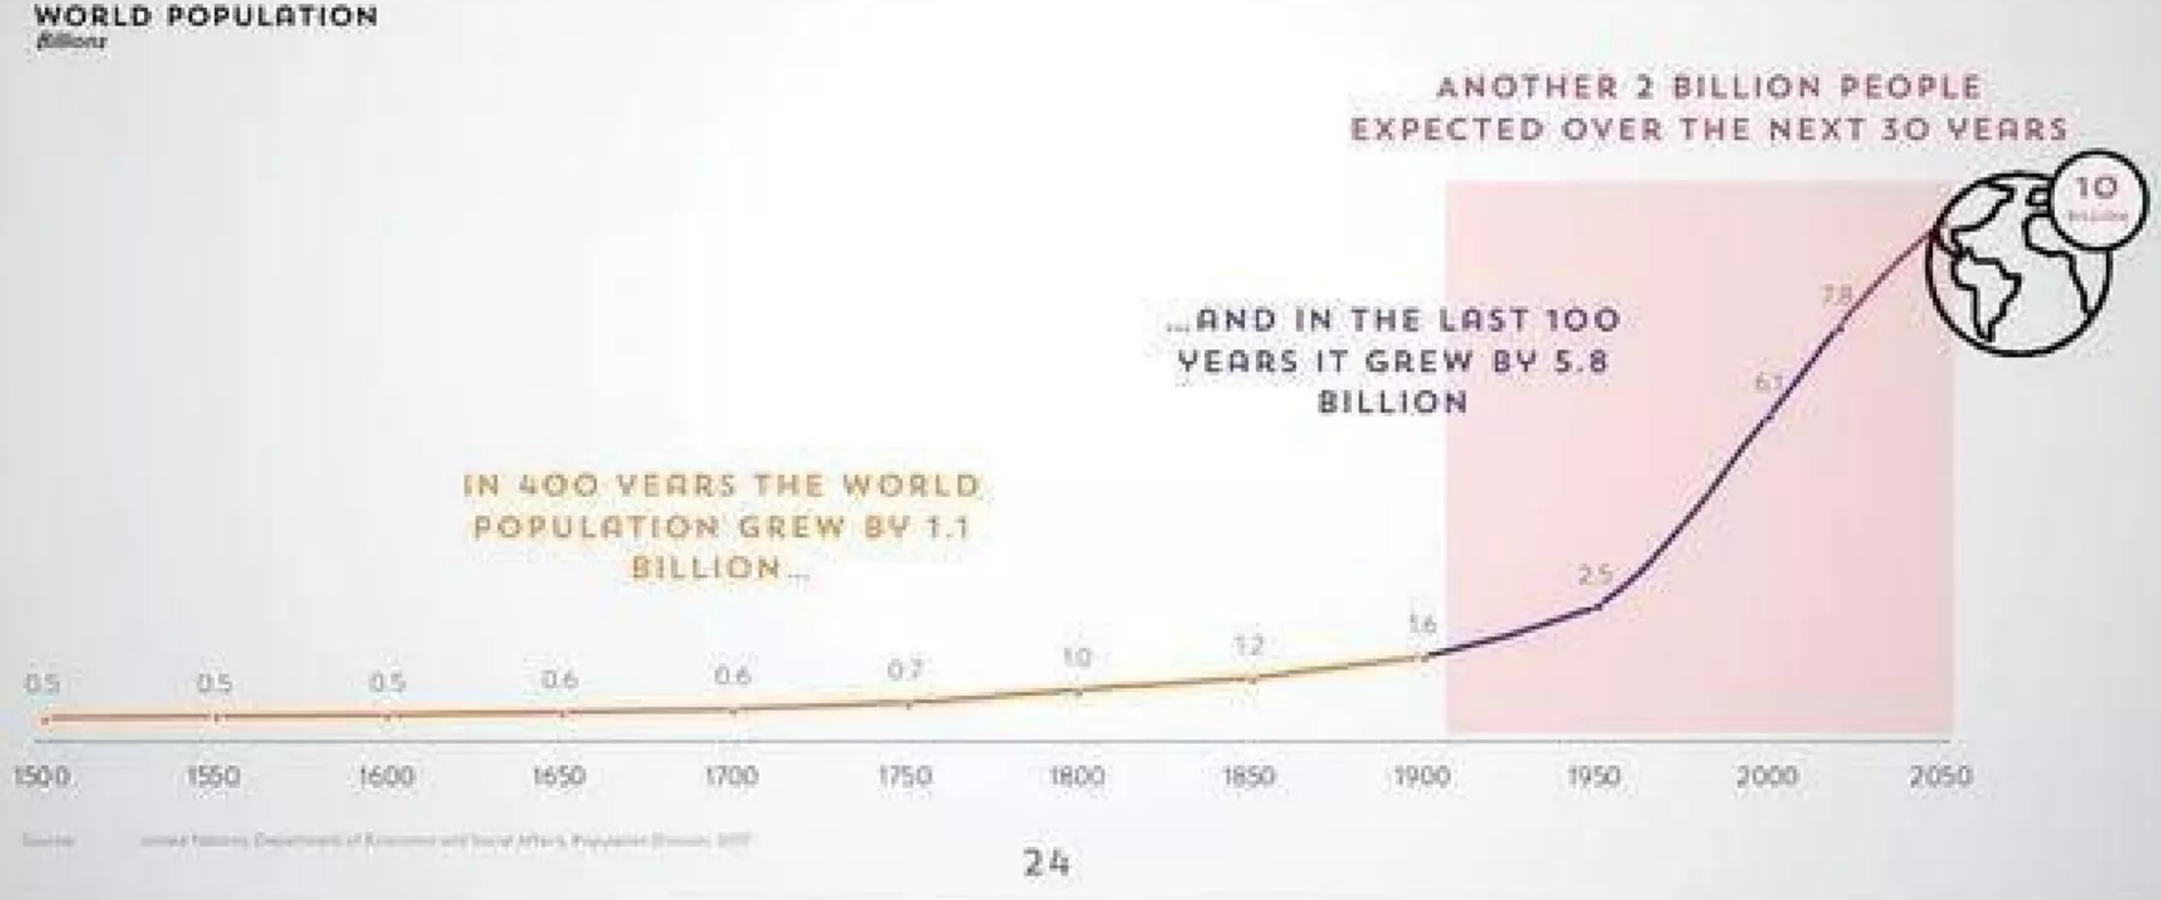
THE BACKDROP

CHAPTER 2

THE WORLD POPULATION IS GROWING AT AN EXTRAORDINARY RATE...



...AND PEOPLE ARE CONSUMING TOO MANY ANIMAL BASED FOODS...

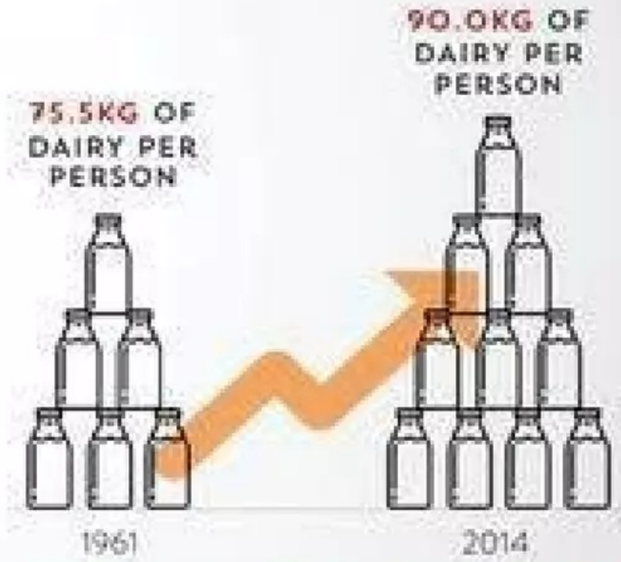
RED MEAT CONSUMPTION HAS SURGED...

Global meat consumption per capita[1]

+

...AND DAIRY HAS INCREASED SIGNIFICANTLY

Global dairy consumption per capita[1]



30% OF GLOBAL HUMAN CALORIE CONSUMPTION COMES FROM MEAT PRODUCTS

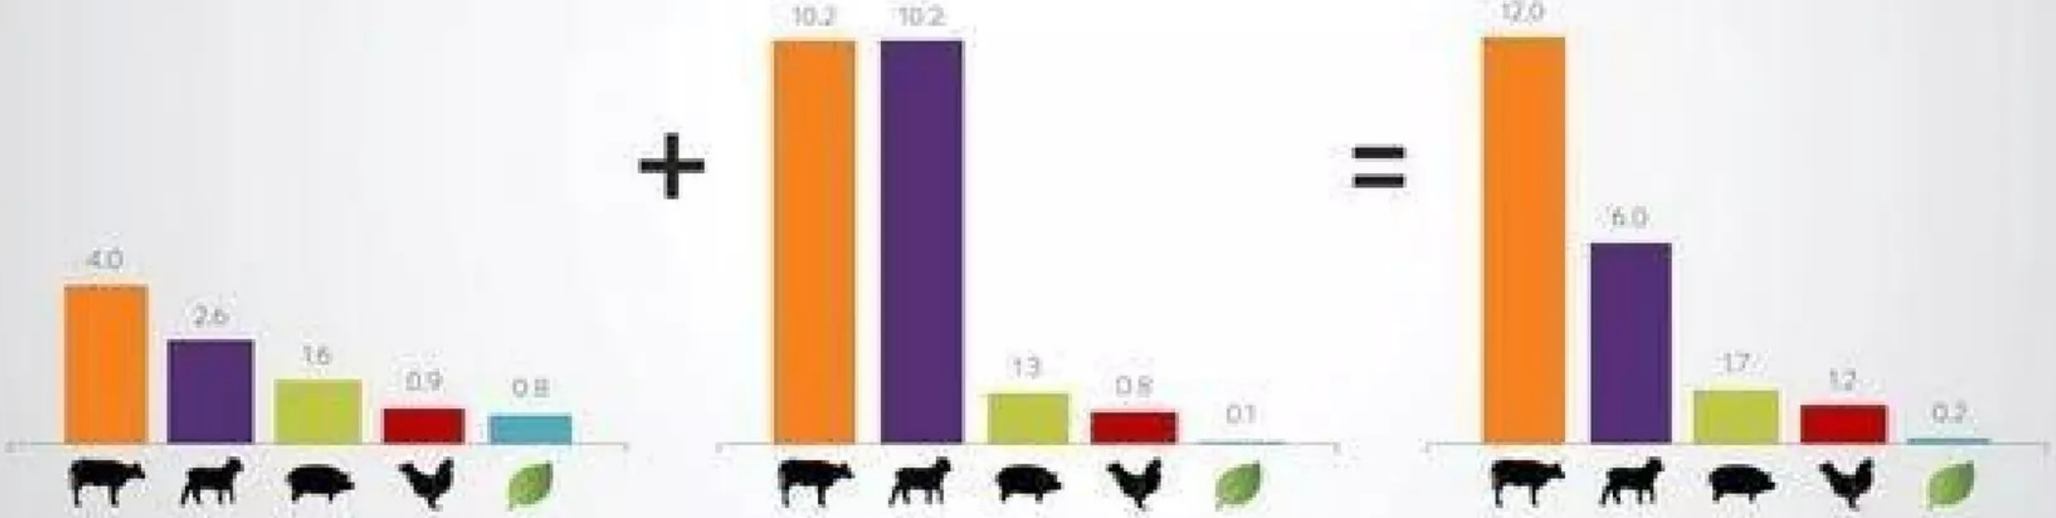
Source: [illegible]

THIS PUTS A HUGE STRAIN ON OUR NATURAL RESOURCES...

WATER USE PER KG OF PROTEIN
Water (m³) per food type

LAND USE PER KG OF PROTEIN
Land use (m²) per food type

CARDON DIOXIDE PER KG OF PROTEIN
Cardon dioxide (kg) per food type



LIVESTOCK ACCOUNTS FOR 15% OF GLOBAL GREENHOUSE GAS EMISSIONS

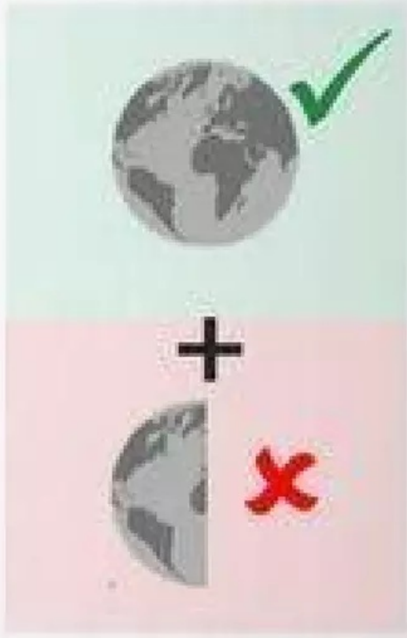
...AND BY 2050 WE WILL NEED 1.5 PLANETS TO MEET DEMAND

NOW

"As population growth, economic development, food consumption and waste continue to grow, the total food produced worldwide would need to increase by 107 million tons annually by 2050. This level of production would require converting more than a billion acres of forests and grassland into farmland over the next 30 years, resulting in the release of approximately 84 billion tons of carbon dioxide equivalent into the atmosphere."

CHAD FRISCHMANN
VICE PRESIDENT AND RESEARCH DIRECTOR
PROJECT DRAWDOWN

THE FUTURE

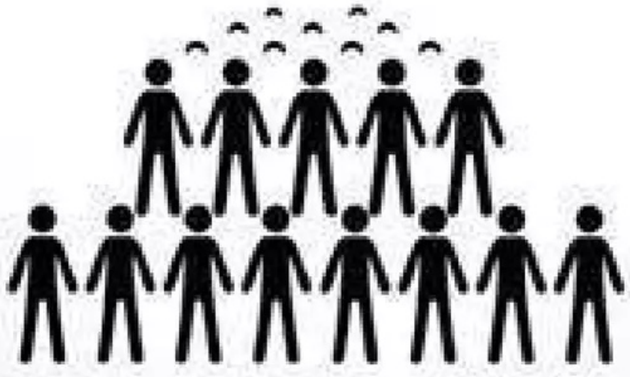


TO COMPOUND MATTERS, FOOD WASTAGE IS OUT OF CONTROL

We waste 33% of the food we produce. This amounts to 1.6 billion tons every year...

... which is equivalent to the weight of 19 million people...

...or every person in New York State



FOOD WASTE ACCOUNTS FOR 8% OF GLOBAL GREENHOUSE GAS EMISSIONS

...AND SO IS THE OUTLOOK

"Transformation to healthy diets by 2050 will require substantial dietary shifts. Global consumption of fruits, vegetables, nuts and legumes will have to double, and consumption of foods such as red meat and sugar will have to be reduced by more than 50%. A diet rich in plant-based foods and with fewer animal source foods confers both improved health and environmental benefits."

PROF. WALTER WILLETT MD
HARVARD T.H. CHAN SCHOOL OF PUBLIC HEALTH

THE RESULT = A GROWING AWARENESS THAT CHANGE IS NEEDED...

There is a growing awareness that the global food system is under increasing pressure

People know they need to change, for themselves and the environment

THE RESULT
A CONSUMER MEGATREND TOWARDS HEALTH & SUSTAINABILITY

42%
of shoppers globally think about the environment when they buy food

66%
of people say they are prepared to pay more for products from companies that are committed to positive social and environmental impact

70%
of consumers globally say they make dietary choices to help prevent health conditions

CHAPTER 3

OUR MISSON...

TO PROVIDE PLANT-BASED, ENVIRONMENTALLY RESPONSIBLE, POSITIVE FOOD CHOICES, FOR EVERYONE, FOR NOW.

...IS GUIDED BY A SET OF KEY VALUES...

"PLANT-BASED"	Simple, honest and real food, always from vegetables, grains or fruit. A gateway into plant-based eating for the modern, mass consumer
"RESPONSIBLE"	Planet friendly sustainable agriculture. We understand the link from the farm and raw material crop cycle, through to the finished product and supermarket
"POSITIVE FOOD"	Always made from the best quality ingredients, with no artificial colours, no artificial flavourings and no GMOs. Always natural, healthy and tasty
"FOR EVERYONE"	Convenient solutions, accessible to people from every walk of life, at every stage of the healthy eating journey
"FOR NOW"	Consumer needs are ever changing. We monitor, understand and deliver for today's consumer. Our role is food innovation and marketing – we have no hidden agenda

OUR CONSUMERS ARE AT ALL STAGES OF THE HEALTHY EATING JOURNEY...

LIGHT USERS — HEAVY USERS

SQUIRREL

Less likely to purchase products regularly but always like to have something in the freezer... just in case

NEW TO COOKING

New to cooking and still getting the hang of cooking meat and preparing veg. Cooking an entire meal can be a bit overwhelming

MOTHER

Don't always have time to cook home made meals for the family, but still want their children to eat well

POSITIVE EATER

They want to eat healthily whenever possible and walk to work. Products generally form a smaller importance in their meals

CLEAN & GREEN

Eat-Sleep-Train-Repeat. They plan before shopping and bulk cook meals. Nourishment & exercise = looking after themselves
