Millions of business decisions are made everyday based on assumptions.
That's why we created Suzy.

Suzy is a human intelligence platform that helps organizations make better, more informed decisions...faster

- powered by an on-demand network of more than a million consumers
- target and retarget granular consumer segments
- Get answers to questions in minutes

Use Suzy to develop ideas, screen concepts, and instantly validate ideas.

SUZY

P&G Nestlé Coca-Cola ... and 150 other major brands!

Ask Suzy anything!

Screen, sort, segment however you want

Where do you buy your coffee out-of-home?

What package design do you like best?

Watch this video and tell us how the ad makes you feel.

Where do you buy your groceries?

What health benefits do you look for in functional foods?

What brand of bacon do you purchase?

What does "packaging that meets my needs" mean to you?

What makes us different?

Tap into first party data from Suzy's proprietary database of 1MM+ U.S. consumers

Unparalleled speed

Expect 500 responses in less than an hour; same meeting results

Granular screening and segmentation

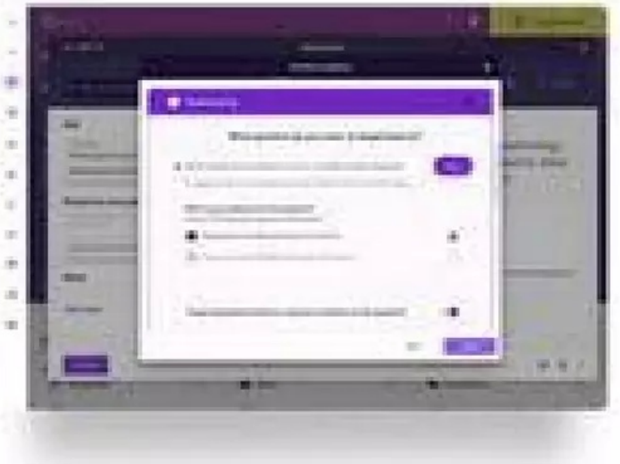

- Quickly and easily reach granular, custom hard-to-get audiences
- Mimic internal consumer segmentation
- Invite your own CRM and loyal fans to the platform
- Anonymously engage competitive consumers

Retarget

- Follow-up with respondents instantly and over time
- Dig deeper into findings and sentiment
- Iterate alongside your consumers

SUZY

Quality members. Quality responses.

Fully managed and constantly growing panel of opt-in consumers

Members are incentivized for quantity AND quality of responses

Different ways to engage to appeal to different customer needs (desktop, mobile, app)

Verification at 3 steps along the way to ensure authenticity of panel and quality of members (via Twilio, Trulioo, and member moderation)

twilio Trulioo

Wide range of use cases

Exploratory idea testing

explore ideas, assess flavors, identify trends

Concept feedback

cut back the number of concepts/insights/RTBs before a formal concept test

Shopper insights

support B2B recommendations, gain shelf space, and demonstrate expertise

Creative testing

engage with rich media such as videos, on-shelf images, promotions, websites, etc.

Post launch assessment

early read on awareness/usage/PI of a new product or campaign

Packaging & design

cut back the number of designs before conducting a formal package test

Product sampling

get product in the hands of target consumers to get feedback and understand usage

Claim & communication testing

see what best resonates with your target consumer

Online moderated discussions

identify white space, co-create new products, and explore trends with interactive, moderated discussions

Toolkit of actions

You can use Suzy to engage directly with consumers both qualitative and quantitatively using the following functions:

Get quantitative results via our multiple choice feature.

Unearth new ideas from consumer qualitative responses.

Have an in-depth, interactive conversation with consumers.

Evaluate consumer preferences via scaled responses.

Keep the conversation focused on a topic via long form surveys.

Screen for consumer profiles and save segmentation for easy targeting

Put product in the hands of target consumers to get feedback and understand usage

New to Market Innovation

A major beverage company used Suzy to support the entire development process from idea to product of a non-alcoholic beverage in the alcohol space.

PHASE 1

VALIDATE NEED AND MARKET

- Validate interest and understand opportunity for a non-alcoholic drink during typical alcohol occasions

PHASE 2

ATTRIBUTE REFINEMENT

- Identify beverage attributes that best resonate with product's positioning
- Test preference for flavors, appearance, and ingredients

PHASE 3

CONCEPT TESTING

- Test 8 different concepts to determine which would drive the most purchase intent, appeal and excitement

PHASE 4

CONCEPT REFINEMENT AND RETAIL POSITIONING

- Refine the final concept to arrive at the beverage name and package design that best aligned with product description
- Optimize final product positioning for sell-in to retailers

RESULTS

Multi-phase research that would normally be very expensive and time consuming was conducted quickly and iteratively alongside target audience on Suzy. The result was significant time and cost savings, as well as a confident, successful market launch.

PROJECT TIMELINE

End-to-end : 10 months
Each phase: 1 week

Tracking Competitive Purchases

Background

A leading spirits company wanted to get an understanding of the brand perception of a competitor and why consumers decide to purchase it.

Objective

The team used Suzy to understand why, the primary motive, and if they would continue to purchase this competitive brand in the future.

Outcome

Thanks to the Suzy, this leading spirits company was able to gain key insights on its competition and learn that a majority of consumers found their competitor's flavors appealing (42%) and that they would continue to purchase this brand in the future (65%).

Taking a consumer-centric approach to product development and positioning

Challenge

CPG partner needed to develop an innovation pipeline for a new-to-market healthy snack brand they were launching to new consumer target.

Approach

After viewing the brand logo on Suzy, 300 millennial female consumers were prompted to shared creative, open-ended stories of friends they'd imagine eating the snack, potential consumption occasions, and flavors/ingredients they'd expect to see from the brand.

Results

These insightful responses reached beyond the research team's original product development needs and ended up playing a significant role in marketing's work on brand communication, marketing content, social campaigns, and more.

Time

36 Hours

SUZY

SUZY

Ingredient & Package Design testing

Challenge

A healthy bread brand wanted to see if the inclusion of canola oil in a new product would deter their target consumers from purchasing.

Solution

Using Suzy, the team monadically tested different package design graphics that each featured a different type of oil to see what effect (if any) each had on purchase intent and other key attribution measures.

After ranking PI and attributes on 5-point scales, participants shared open ended feedback explaining exactly what they did and didn't like about each package, helping the brand to understand the impact of the oil vs other elements.

Total Time: 3 hours

Shopper insights/category

Background

A CPG Category Management team was pitching an idea for a snack cooler in a meeting with a major grocery customer and needed shopper insights to support their recommendation that same day

Solution

The team identified the customer's shoppers on Suzy, then carved out "Non-Food & Beverage Purchasers" from this group to gauge interest in the cooler idea (equipped with mock-up image)

Outcome

Within an hour, the team had results to show the customer that reaffirmed that the cooler was a good way to grow sales and convert new food and beverage purchasers. The customer was excited about the idea and even suggested they scale larger!

Time

1 hour

Test Language That Resonates With Consumers

Background

A cookie company was launching a new cookie flavor and was stuck between 2 names to give the cookie. One of which was more premium, where the other was more universal.

Objective

The cookie company identified cookie purchasers in Suzy, showed a picture of their new cookie to consumers, described the ingredients in the cookie, and then asked them to select between the 2 names.

Outcome

The team determined the clear winner and was able to select the name that resonated best with their core audience, but also had the largest reach across any consumer.

Gauge Consumer Sentiment

Background

A leading insurance company wanted to quickly gauge consumer reaction to a new insurance policy under consideration focused on car rider/passenger coverage.

Objective

Engage with consumers who are either primarily responsible or share responsibility for insurance related decisions and regularly use a ride sharing service (like Uber or Lyft). Once identified, consumers were shown a description of the potential policy and asked questions to gauge initial feedback, such as:

- Understanding
- Appeal & Purchase Interest
- Price Expectations
- Expected Retailers
- Sources to Learn More
- Interest in Additional Features

Outcome

Within 48 hours the insurance company was able to quickly understand & react to consumer perceptions on their new offering, giving teams a clearer understanding on how to optimize their offering & best practices to succeed in a potential market launch.

Advertising Testing

Background

A top-performing frozen food brand needed to choose between 2 commercials to be aired during 2019's Super Bowl.

Objective

Using Suzy, the team ran a monadic test of each commercial spot to both core target consumers and Gen Pop to understand which commercial performed best across both consumer groups.

Outcome

Information was shared with the company's CMO and a clear winner was chosen, which aired during 2019's Super Bowl. The ad was one of the most talked and written about ad in the weeks after. The team saw a 70% increase in brand recognition.
