HappySignals

Employee Experience Management Platform

“Make enterprises experience data driven, leading to more smiles and less time wasted”

Vision

Happiness drives us.

We make experience data visible, understandable and connected to operational data in IT, enabling enterprises to change their culture to be more open, outcome focused and data-driven. This saves time and money.

Our customers have been able to make employees happier and increase productivity by 26%. This is why we exist.

Challenges IT is having today

"Watermelon" (green on the outside but red on the inside) effect means that Service Desk providers metrics are meeting defined targets, but the end-users are dissatisfied with the service received.

Focusing on output of IT leads to

- Bad reputation of IT experience
- No central view of IT happiness
- No common focus for IT
- Lack of control with Partners
- Unable to quantify end-user Happiness and Productivity
- Making decisions on Gut Feelings

HappySignals

Chris Woods, CIO,
Campari Group

“A CIO without Experience Data is like a Sales Manager without CRM data”

Our customers have been able to increase productivity by 26%

Happiness Score ™ data reveals IT end-users happiness and productivity

Happiness Score™ Benchmark is the benchmark data compiled from the continuous measurement of all HappySignals customers comprising of over 2 million end-user responses across 130 countries

1. Measure

Knowing what experiences your employees are having already today, is critical. Getting high volumes of Experience Data continuously and combining it with your Operational Data is the key.

2. Share

Sharing Experience Data with colleagues, partners, vendors and stakeholders in real-time, will help you to co-operate to reach common goals.

4. Improve

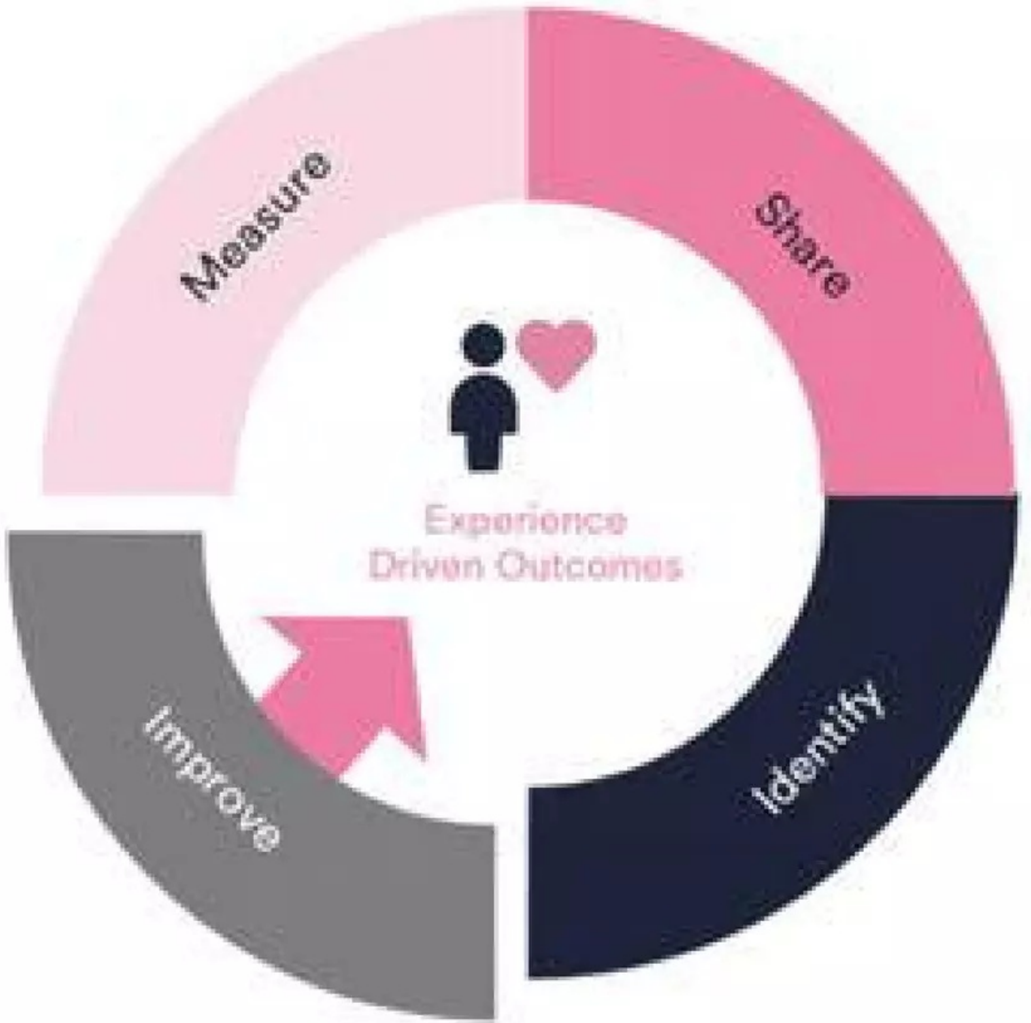

With everyone focused on the same goal, outcomes can be achieved and success celebrated. Our customers have been able to improve productivity by 26 %.

3. Identify

From gut feelings to data-driven decision making, an experience-driven IT department is created. From SLAs to XLAs.
