How we do it

Liberate doctors to be doctors—free from the bureaucratic trappings of an old-school office.

Enable patients to get timely, quality frictionless care tools that remove all the "hassles" of healthcare.

Empower a deeper doctor-patient relationship built in the private and informative context of the home environment.

Leverage real-time data for increasingly precise, proactive care.

Coordinate full-spectrum care and wellness for optimal results.

Every dollar invested in effective primary care saves **$13 in total healthcare costs**.

Payers choose Heal to improve member outcomes

> Heal can improve patient compliance and drive cost savings by keeping people healthier by monitoring them more closely and cutting the high cost of emergency visits. We want to provide services closer to the consumer and Heal is a trend in health care that will continue and gain momentum.
>
> **Frank Ulibarri** Former Market President — aetna

> Heal has been a healthcare partner of Activision Blizzard for four years, providing exceptional care for our workforce and their families around the country. Heal quickly expanded their services and reach to ensure priority access as well as facilitating testing seven days-a-week; a great comfort to those in need. Heal continues to be an invaluable resource to the Activision Blizzard team.
>
> **Bobby Kotick** Chief Executive Officer — Activision Blizzard

A delightful experience that delivers peace of mind

> This was just what we needed for my 97 year old mother... Anybody who has a loved one in a situation where it is difficult to get them to medical appointments, or needing appointments in a reasonable time period, needs this service.

W.P.
San Diego, CA

> I last saw [a primary care] doctor in 2011. I hate the doctors in the south, none of them care about you. I had doctors that cared before I moved, finally I found another with Heal.

Laura M.
Atlanta, GA

> Every doctor we have seen has being caring, professional, qualify, dedicated and have provided exceptional care and suggestions. Love to be able to avoid the waiting rooms crowded with sick people. Love Heal.

Liliana P.
Los Altos, CA

Primary care belongs at home

Remove barriers to care—distance, disabilities and demographics no longer stand in the ways of quality care.

Assess social determinants of health —first-hand view of fall risks, substance abuse, medication adherence, food insecurities and more for a personal, effective care plan.

Build an omnimodal patient-doctor relationship including real-time remote monitoring.

Scale quickly without limitations of radius and effectively without large-scale infrastructure investments.

80% of health outcomes impacted by social determinants

The best care starts with the best doctors

- To fix medicine for patients, we fixed it for doctors first.
- Heal hires **only 14%** of applicants—selecting only the most qualified, caring and tech-savvy professionals.
- Yet, Heal isn't for every doctor—hospitalists, private practice doctors and those who prefer offices don't join Heal.

Meet the Heal Providers

Traditional office-based providers

Rushed, transactional, incomplete care for **40 patients/day**

"[Providers waste] over two-thirds of their time doing paperwork."

VS

Liberated Heal providers

70% less patients, 90% less bureaucracy = **550% more time per patient**

21 minutes of commute time for charting, coding and revenue-generating telemedicine

Heal creates engaged members who avoid the ER

As part of the first in-home wellness assessment, Heal providers may prescribe the Heal Hub

↓

A care coordinator comes to the home to help install the Heal Hub

→

Digital Tracking

- Real-time remote monitoring for chronic patients
- Weekly interdisciplinary rounds to optimize patient outcomes and close care gaps

→

Diligent Member Engagement

- Regular phone calls to check in with members' progress
- Home visits by social workers to support social barriers to overcoming care gaps
- Identify changing needs before worse issues arise
- Prevent reactivity and support members to be proactive in their healthcare

→

Intervention Before Emergency

- Doctor-driven telemedicine and house calls intervene before symptoms worsen
- ER visits are diverted
- 24-hour telephonic triage and remote patient monitoring
