Changing the way the world gives and receives help
with virtual expertise software

Virtual Expertise SaaS

HELPlightning

Help Lightning's Virtual Expertise solution uses Merged Reality to blend two real-time video streams, that of a remote expert and an onsite technician, into a collaborative environment. This Virtual Interactive Presence allows an expert to virtually reach out and touch what their service tech or customer is working on.

Using existing mobile devices (iOS, Android), a web-browser, or smart glasses, Help Lightning allows you to visually collaborate with a colleague or customer as though you were working side-by-side.

The Market and Focus

Field service organizations and call centers across a variety of industries rely on Help Lightning's virtual expertise software to improve first-time fix rates, extend the workforce capacity and improve customer satisfaction.

Unlike other remote technology solutions, only Help Lightning combines easy-to-use software with industry-specific expertise and a partnership approach to make sure you are getting the most out of your investment.

Whether you are facing workforce attrition, quality and responsiveness issues, or the inability to access customer site equipment, Help Lightning will enable you to do more with less and accelerate the transformation of your field service organization from a cost center to a profit center.

A Few of Our Fans

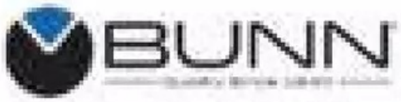

HELPlightning

A World Class Team

HELPlightning

Gary York, Ph.D.
CEO

Gary is a serial entrepreneur with four successful software and services exits: three private sales and one IPO. He has held technical and executive positions with leading technology companies in Boston, Silicon Valley, and Alabama. He is a winner of the Smithsonian Innovation Award and an EDPA Lifetime Achievement Award for Innovation. He holds a Ph.D. from Carnegie Mellon and was a visiting fellow at UC Berkeley.

Marc Guthrie
COO

Marc is an experienced entrepreneur who has held leadership roles at ComFrame and Influence Health. He has extensive experience delivering software and services across a wide range of industries.

Neal Evans, Ph.D.
CTO

Neal is a veteran of two successful startups. He was previously CTO of PointClear Solutions, which specializes in application development for healthcare companies.

The Pandemic Inflection

Help Lightning's Virtual Expertise has become a must have tool due to the inflection point driven by the pandemic and lockdowns. Help Lightning usage grew 417% in March over February 2020 as new and existing customers turned to us to deliver mission critical services. Leads have doubled. Revenue is ahead of plan. Customers tell us the changes to service delivery are permanent. No Going Back.

Help Lightning is positioned to outperform the market.

"Help Lightning puts RICOH in a completely different category from their competitors and is a key offering that clearly differentiates them."
- Industry Analyst

"We are seeing huge internal efficiency gains when it comes to fixing complex problems the first time, avoiding dispatches altogether"
– Becton Dickinson

"On-site Virtual Assist has been a priority of ours for quite some time, but the rapid escalation of COVID-19 accelerated our push to make this available to our customers now"
– Cox Communications

Early Growth Stage

HELPlightning

ARR

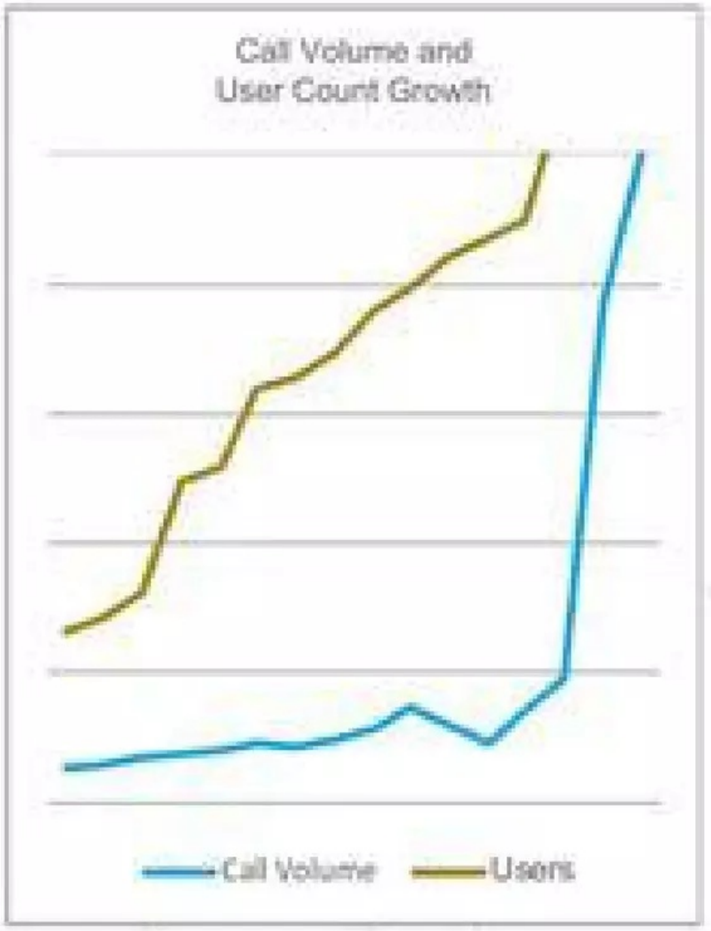

net retention

2020 growth

- Projected 2x ARR growth goal in 2020
- 5 patents in 8 countries
