We now live 20 years with disease

£50 billion

the annual cost of chronic disease on the UK

£40

Average monthly cost of existing health behaviour change services

30%

sick days are caused by avoidable lifestyle health issues

We know that healthy behaviours can help us turn this around, but we're too burned out and unsupported to achieve changes

- Between **30-80%** people with a mental health condition never get professional support
- People are waiting 4+ months to get basic support for weight management, disordered eating, and mental health
- Even private providers can no longer keep up with demand

The Holly Health service

ORCHA Accredited

I'm the Holly Bird.
I coach people to achieve the right changes for them

Behavioural science

Nudges, motivation, CBT, mindfulness

Supportive AI coaching

Fully digital. personalised, scalable, light hearted, adaptive

Health outcomes

Consistent health behaviours, lower stress, weight management, fitness, confidence

Health continuum

Severely unwell

Diagnosed ongoing condition

Struggling day to day. Physical and/or mental health is gradually declining. Has some motivation to change but lacks the appropriate, personalised support

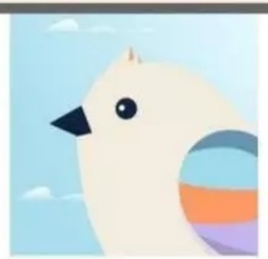

Health optimisation

★★★★★

App Stats (after 5 months)

📱 **>12,000** downloads

🤗 **>2000** Monthy active users

Wk 4 Retention = 4x higher than market benchmarks

Main outcomes = Reductions in problematic eating behaviours, increased confidence, reduced stress

'It's life changing and for some people could be life saving'

'This considered and sustainable approach is exactly what I needed'

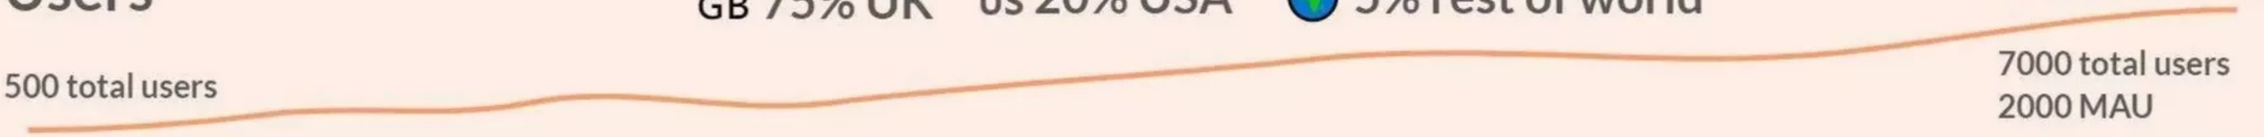

'It's helping me to defog my brain'

App metrics

Once users complete onboarding, engagement is good. 6 month retention of 13% is very high for a fully digital service. We're actually seeing a slight increase in retention between month 5 and 6, suggesting users come back after time out (based on user health priorities etc)

Users

GB 75% UK us 20% USA 🌍 5% rest of world

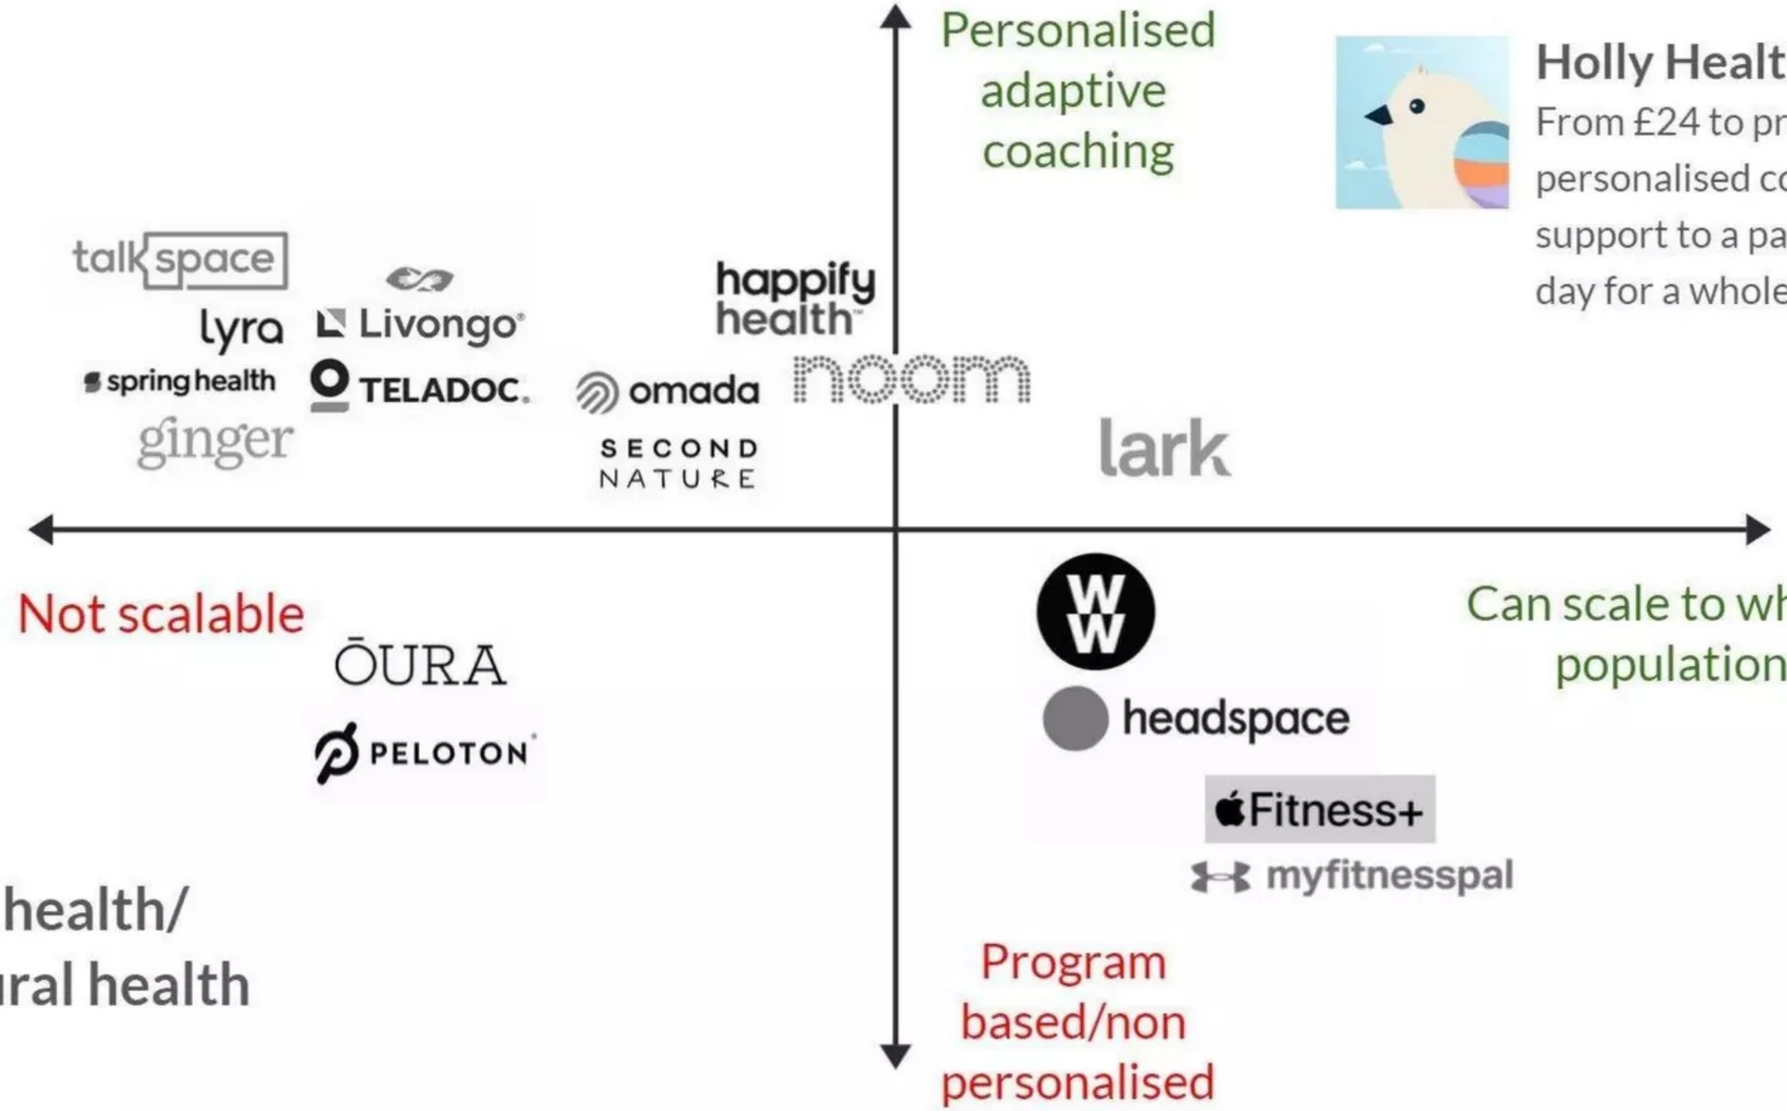

Aug 2021 — Jan 2022

👩 70% women 👨 30% men 🏥 >40% with pre-existing medical condition

8 week outcomes from survey respondents	35% improvement in problematic eating behaviours	10% improvement in self confidence	Average of 2 new behaviours incorporated to life
Engagement Jan totals	MAU: 2000	WAU: 1000	DAU: 250
Engagement after finished onboarding	DAU/MAU: 32%	DAU/WAU: 40%	Average daily app opens per DAU: 5
Retention after finished onboarding	30 day: 40%	Month 3: 15%	Month 6: 13%

Differentiation

Holly Health =
From £24 to provide personalised coaching support to a patient every day for a whole year!

Lifestyle health/ behavioural health services

Scale of the opportunity

People who are 'unhealthy', by government guidelines, but not hospitalised, seeking to look after themselves better = 65% population £24 per person

£1.5billion

U.S.A
(2022)

£30billion

International
(2023)

Licensing Holly Health

Provide your clients or local population with personalised support to achieve healthy weight management, lower stress and permanent lifestyle behaviour change, from just £1 per person per month.

The Holly app becomes an extension of your healthcare team, nudging, motivating and coaching users to towards their goals, increasing daily engagement and long term outcomes.

Available 'off the shelf' or with a tailored offering.

Medically accredited by ORCHA

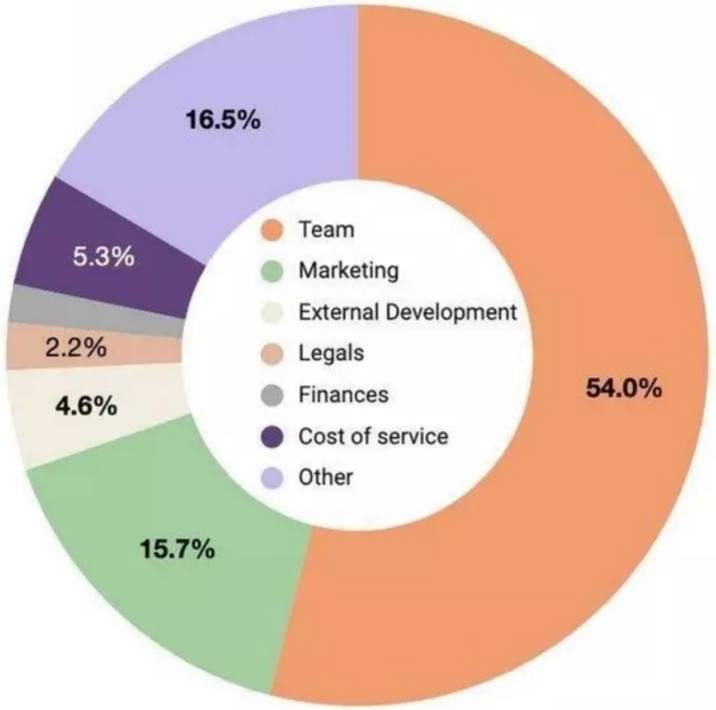

3 x NHS pilots are now live (scaling to 20 by summer) and Holly Health is in contract negotiations with one of Britain's biggest gyms, multiple health insurers, and private wellbeing providers

Targeting £14 mil ARR in 2025

Raising £1.2 million to

- ✅ Kick off 'population scale' health provider contracts
- ✅ Expand the team to 18 (33% product/33% sales & marketing/33% ops & research)
- ✅ Further enhance the evidenced coaching experience
- ✅ Achieve >£1,600,000 ARR
- ✅ Develop a slick, replicable, biz dev funnel
- ✅ Achieve household brand awareness amongst UK healthcare pros
- ✅ Develop clinical outcomes evidence in primary care environments

over the next 18 months

We just secured a non-dilutive government grant of >£440,000 to continue with service enhancements (on top of the £1.2 mil)

Already backed by Paul Forster (founder of Indeed.com), Ed Cooke (founder of Memrise) and Kima Ventures

What users say

Trustpilot

Product Hunt
Top 10

'I've found the approach to health and well-being promoted by the Holly Health app to be wonderfully and refreshingly balanced. After years of being bogged down in guilt and feelings of self-doubt every time I gained a single pound (and elation every time I lost it again), this **considered and sustainable approach to living and eating happily** is exactly what I needed'

'**Holly Health is a service for anyone who's feeling a bit out of control** or they don't have any time to themselves, they're always playing catch up. **Small habits that build routines give a sense of being more grounded and in touch with ourselves**, less pulled along by outside forces - chores, family commitments etc. If you have a framework of stability around your own routines you can prevent the feeling of being overwhelmed'

'Thank you for developing this tool. **I find it way more effective than anything else I've tried because of how small and reasonable the chunks of change are**. It feels more positive and attainable to add small habits than a behaviour overhaul'

Example user journey: Sarah

Felt lethargic and had low feelings of control over health. Was clinically overweight and did little exercise

Starting point

Wanted to make changes which would last and which felt appropriate to her age and ability

Changed Mindset to focus on small daily changes

Built consistent routine

Experimented with 8 different healthy habits

Has new automatic behaviours in exercise (especially walking more), mental health and nutrition

Has lost 3% bodyweight

4 months later

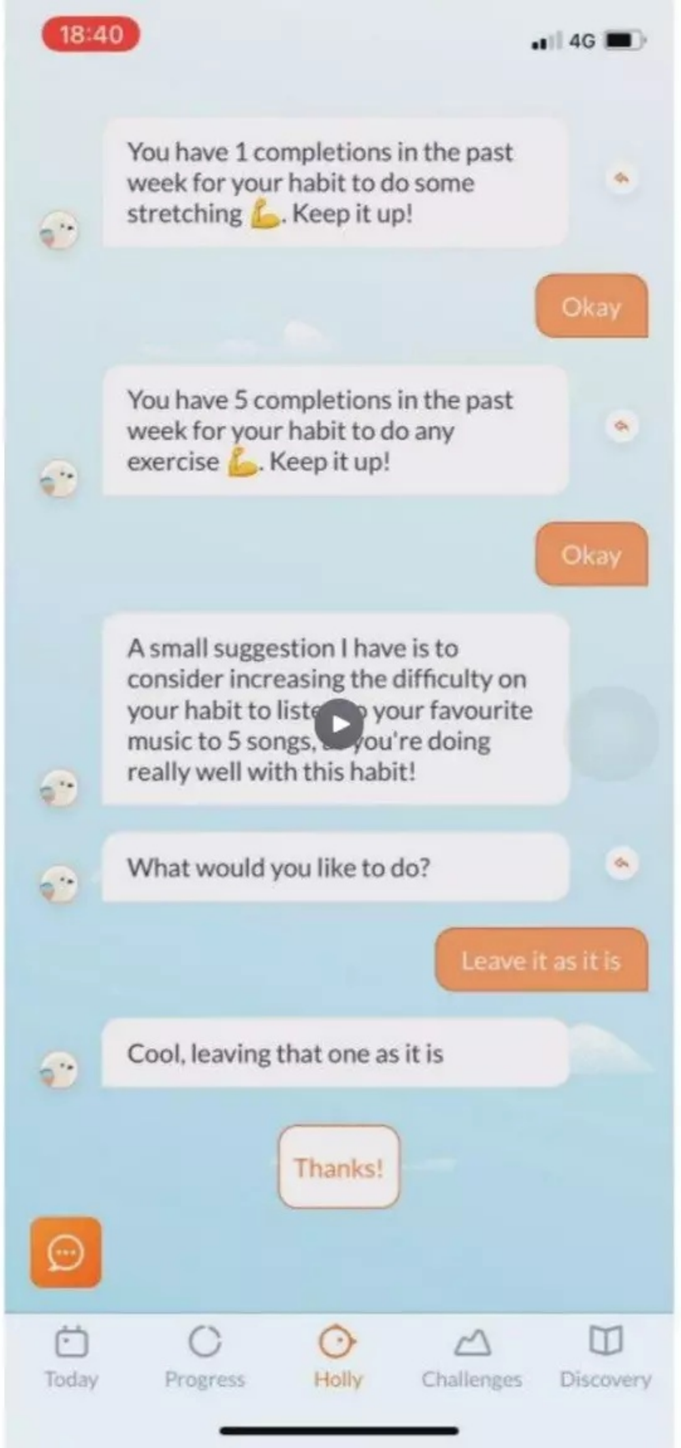

Motivation & feelings of control = up by 25%
Does >150 mins of moderate activity each week

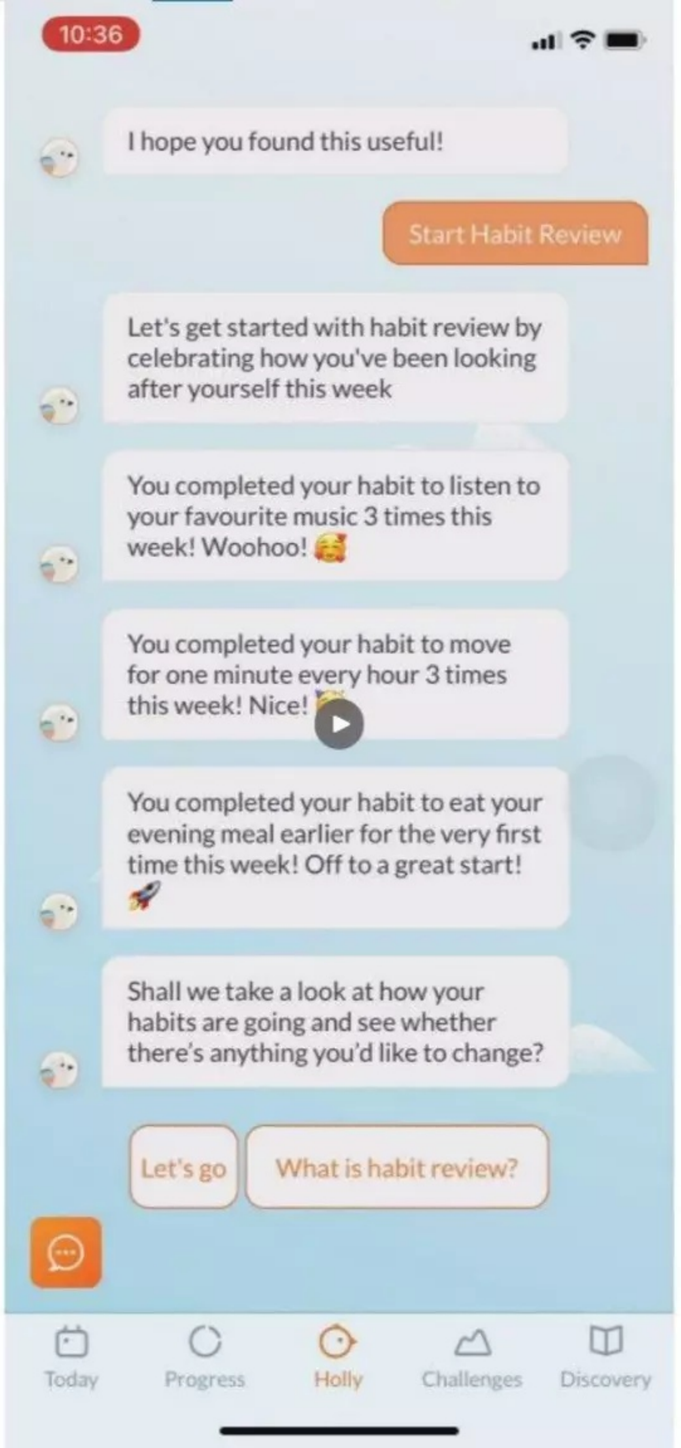

Sarah's top habit completions

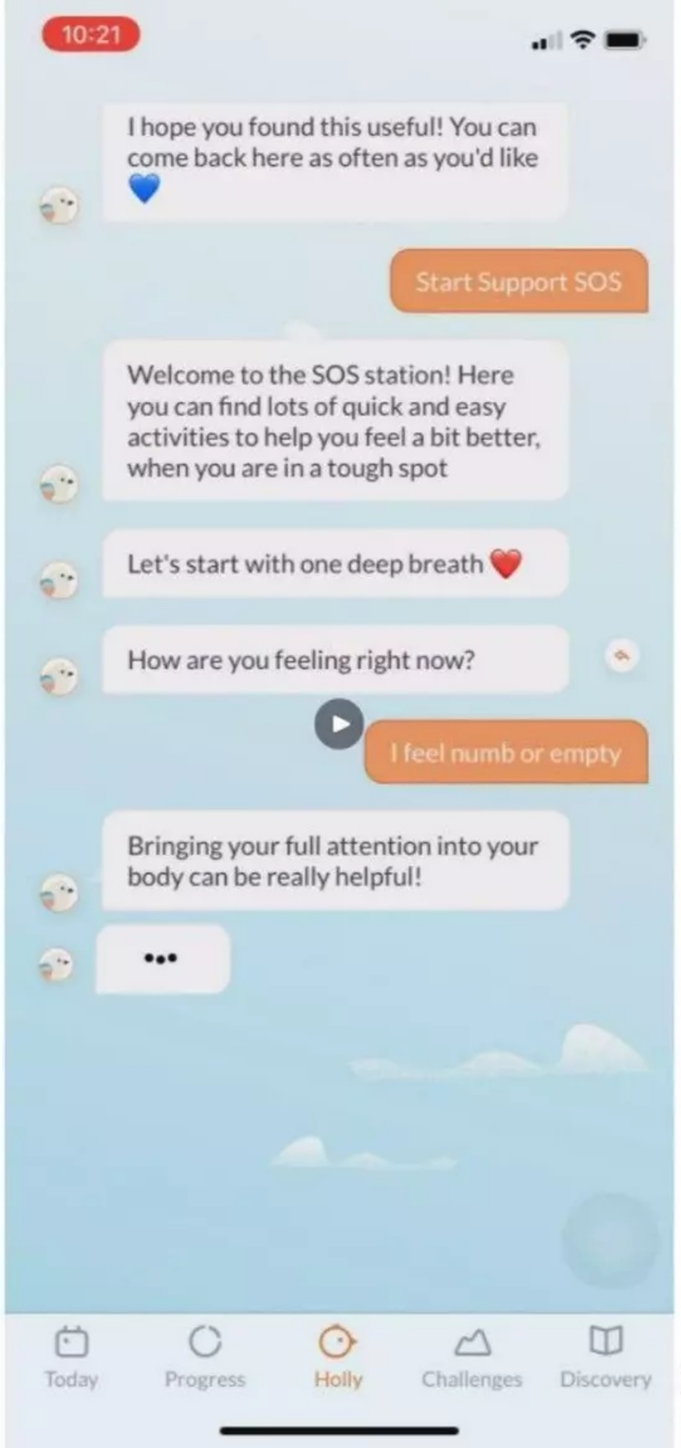

- 72 additional miles walked
- 122 additional portions of veg eaten
- 48 additional stretching sessions
- 63 evenings of calming bedtime routine

In-app coaching from the Holly bird
