PROBLEM:

In 2014, ***163.2 million*** online shoppers encountered this question while checking out. Many of them left merchants' sites to search for a coupon, resulting in cart abandonment.

691 MILLION

RetailMeNot
(NASDAQ:SALE)

SOLUTION:

Take away friction and pain, add ease and fun. Honey's automatically applies coupon codes for online shoppers at checkout in a game-like interface.

BUSINESS MODEL:

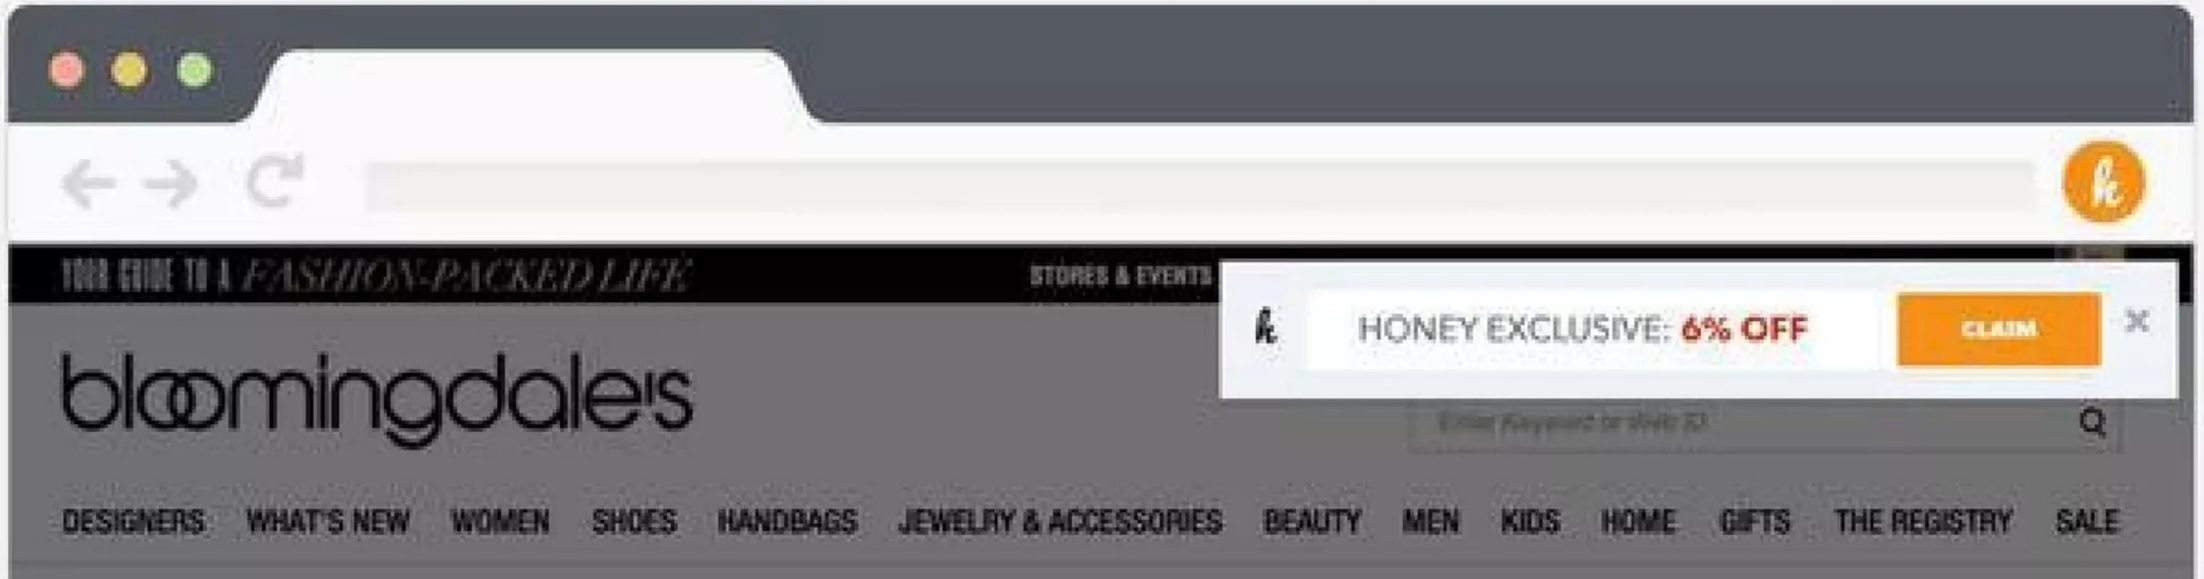

Take a commission from transactions Honey helps close (similar to Ebates).

1

Keep shoppers on merchant site by integrating coupons into checkout

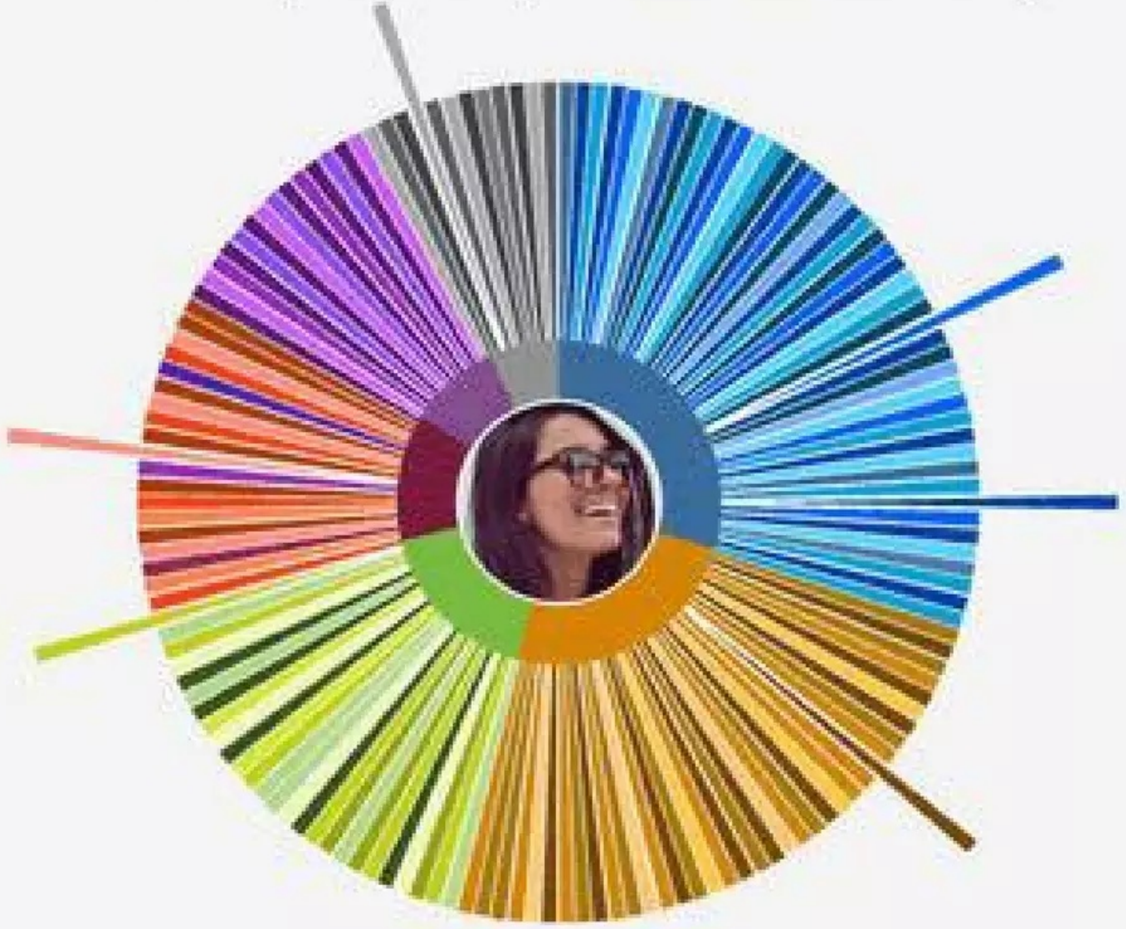

2

Personalized offers to consumers based on cross-site shopping data

OUR UNFAIR ADVANTAGE:

Honey's unique data allows us to predict ***what*** each user is about to buy, ***when*** they intend to purchase, and ***how much*** they are willing to pay.
