JOBSITE INSPECTION CHECKLIST

Safety items

- ____ Clean drinking water with plenty of cups
- ____ EM 385 present on jobsite
- ____ Power tagged with safety color of the month
- ____ Power sources tagged reflecting re-certification within the last month
- ____ Fire extinguishers staged and checked within the last month
- ____ Welders or light plants not used as power source
- ____ GFI's/spider boxes in use
- ____ All rebar is capped
- ____ Scaffolding has handrails, toeboards and bracing
- ____ Project site roped off
- ____ All vehicles have wheels chocked

Housekeeping

- ____ Jobsite should be spotless for inspection
- ____ Conex boxes and kits neat and orderly
- ____ Vehicles clean and pre-started
- ____ Excess material removed from the jobsite
- ____ Professional project sign with current info

Crew members

- ____ Must know who the project safety petty officer is
- ____ Must know the safety color of the month
- ____ Must ear hard hats at all times
- ____ Must know who the QC inspector is
- ____ Must know the information on the CAS sheets for the next several activities
- ____ If current project will be finished before end of deployment, they must know where they are going when the project is done
- ____ Must know timekeeping procedures
- ____ Unit integrity should be maintained to the maximum extent possible.
- ____ Military organization = construction organization = berthing arrangements
- ____ Strict adherence to daily routine
- ____ Assistant crew leader designated

Project Management

Event Name:				Civil Servant Sponsor Phone:	ORG Code:			
Event Building/Location:				Date:				
Item	Yes	No	N/A	Date Fixed	Item	Yes	No	N/A	Fixed Date
Pre-Event Planning and Management					**Material Storage/Handling**				
Safety Notification Checklist (Form 847) Completed					Materials properly stored/stacked				
Emergency numbers/contacts posted & distributed to staff and volunteers					Dust protection adequate				
Event Safety Plan Prepared					Loads lifted correctly				
Safety Briefing Prepared					**Poster Boards or Displays**				
Housekeeping/sanitation					Secured from falling				
Road closure and traffic control plan prepared					Placed on a level surface				
Size and type of crowd analyzed					**Compressed Gases**				
Hand washing/toilet facilities					Cylinders secured				
Clean eating/drinking area ADA					Valve cap in place when not in use				
Fire Prevention					MSDS posted at use location				
Fire extinguishers available					**Ladders**				
Correct extinguishers for the type of fire anticipated (ie: paper, chemical, electrical, etc.)					Ladders in good condition				
No smoking posted and enforced					Side rails extend 36" above landing				
Stages/Speakers Platforms					Proper for job & secure				
Level					Inspected prior to use				
Free of trip hazards					**Scaffolding**				
Tents					Equipment in good condition				
Support poels erected safely					Scaffold is tied to structure				
Poels tied down and secured by water barrels. Note: ground stakes are not permitted					Guardrails, top, mid, toe boards in place				
Pole support lines do not present a hazard					Connections sound & secure				
Hand & Power Tools					Planking cleats in place				
Hand tools in good working condition					Worker protected from falling objects				
Cords in good condition					**Welding & Cutting**				
All mechanical safeguards in place					Screen & shields in place				
Proper tools utilized for each job					Electrical equipment grounded				
Tools grounded or double insulated					Compressed gas cylinders secure/upright				
Heavy Equipment					Proper personnel protection utilized				
Certified/Trained Operator					Fire extinguishers immediately available				
Brakes, lights, signals & alarms operable					Welding cables in good condition				
Wheels chocked when necessary					**Personal Protective Equipment**
