# iPlaySafe App Pitch Deck 2020

contact@iplaysafe.app

# 1 Million

Every day, one million sexually transmitted infections (STIs) are acquired worldwide and this number is rising.

# Stigma

The stigma surrounding the conversation with a potential partner about their sexual health status is still the key reason people avoid asking.

Conner and Eliza met on a dating app and agreed to go on a date...

There are now over **1,500 dating apps** or websites to match them with one another.

# The date went amazingly, and Conner and Eliza were keen to meet again...

Eliza knew she wanted to be intimate with Conner, however she was faced with the same old dilemma...

'How do I ask him about his sexual health?'

Asking about a potential partner's sexual health is incredibly awkward...

# The Problem

## The rise of STI's

Every day, one million sexually transmitted infections (STIs) are acquired worldwide and this number is rising.

## Shame

People avoid getting tested because they feel embarrassed there is still stigma and awkwardness attached to STI testing.

## Existing brands aren't designed for sharing status

Consumers have results but don't share with potential partners because there is no platform to do so.

# The Landscape

## Sharing Generation, the most important trend

"The amount a user shares today is twice the amount they shared a year ago."

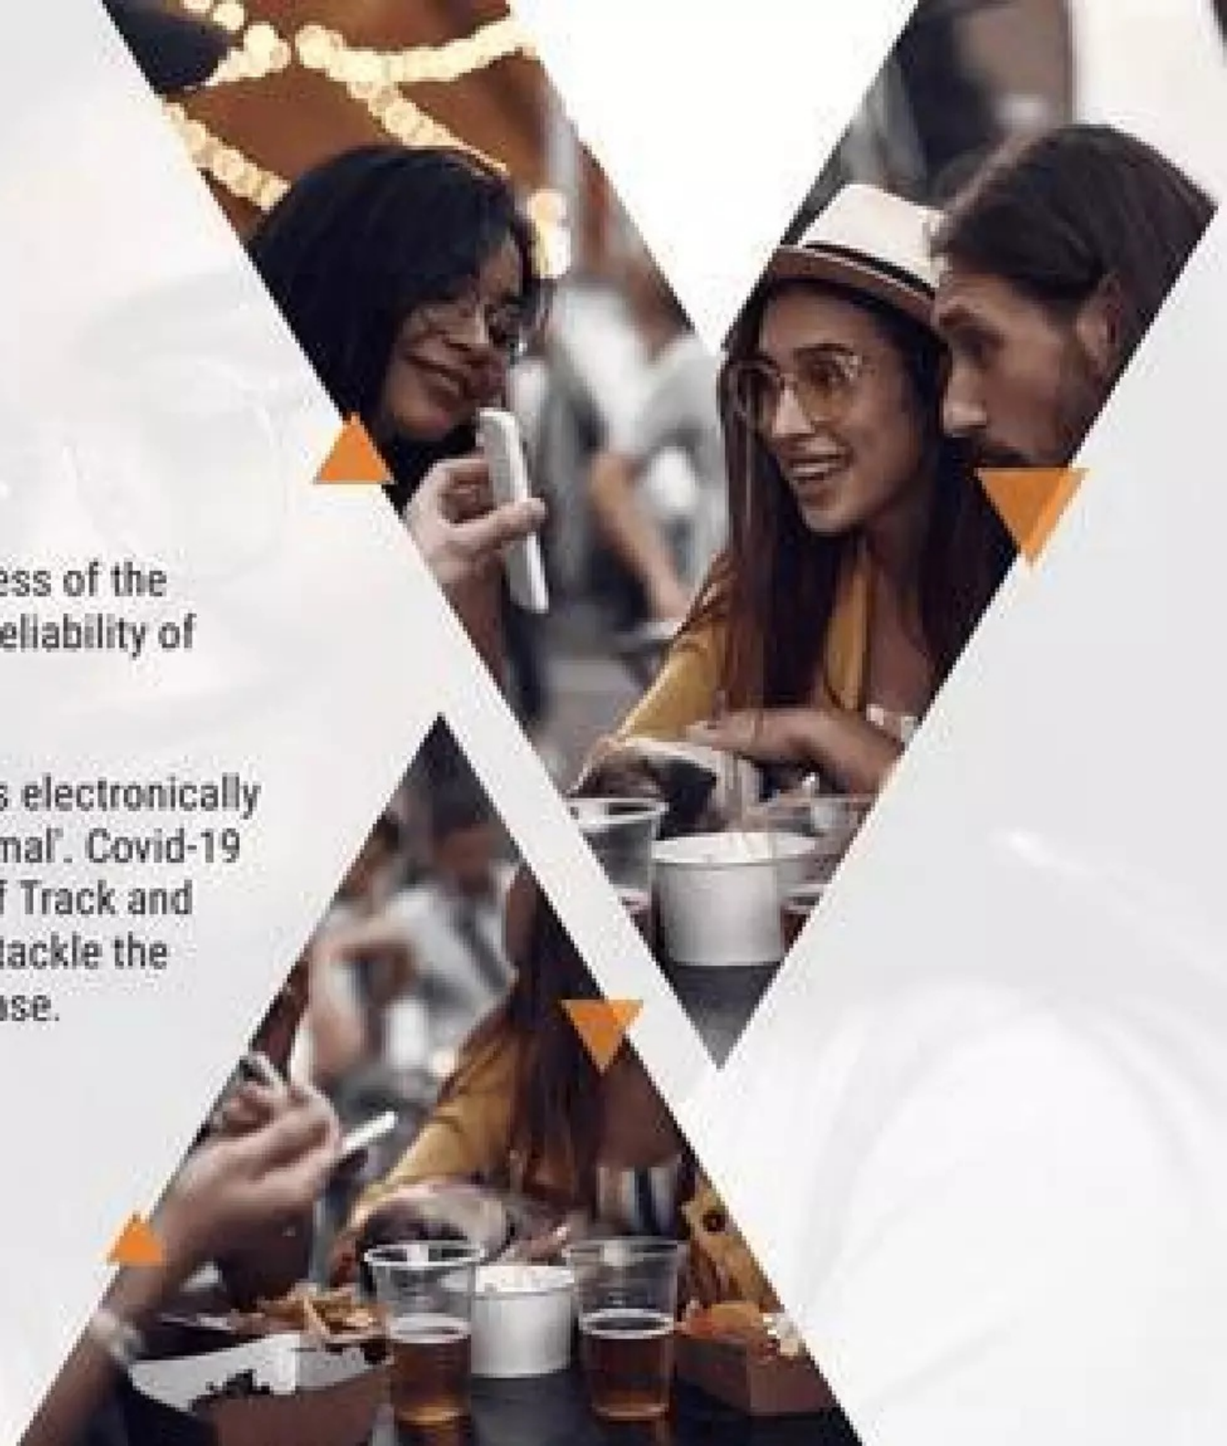

*-Zuckerberg's Law*

## COVID-19

- Covid-19 brought awareness of the convenience, safety and reliability of home testing kits.
- Sharing your health status electronically has become the 'new normal'. Covid-19 has normalised the use of Track and Trace technology to help tackle the spread of infectious disease.

## Dating Apps + Hookup Culture

There are over 1,500 dating apps or websites looking to draw single people to their product, and to match them with one another.

# Our Solution

### Gamifying sexual health

Motivating user to get tested frequently and keep on top of their sexual health.

### A simple sharing solution

Quick and easy functionality to request or share status between users that will change the dynamic of the conversation about sexual health.

### Seamlessly integrates with existing dating apps

Partnering with iPlaySafe allows dating apps to give users the option to share their status on their profile.

# Our Products

# Financial

**We are looking for 12 months financing to reach 20K transactions.**

**Angel Round**

**Boxes sold**

*avg. fee £99 per box*

**Revenue** over

12 months

# Competitive Advantages

## Market Disruptor

iPlaySafe is the world's first testing and sharing platform **and will be first to market!**

## EU-MDR Ready

In May 2021, any health app in the EU market that is interventional will need to be classified as a medical device as a result of EU Medical Device Regulation (MDR). **iPlaySafe is at the forefront.**

## Design to Scale

Our solution is highly scalable and can be rapidly integrated with other home testing kit suppliers. **(e.g. Covid-19 tests)**

## Medical-Grade

We take sexual health and privacy seriously. Our solution is compliant with medical device regulatory standards ISO 13485:2016 and IEC 62304. **Takes 1.5 years to achieve.**

## Marketing Strategy

Marketed as proactive, not reactive. **No need to feel "sick" to get tested.** Existing brands use fear mongering images where consumers are asked to get tested if they are feeling some sort of symptoms or have been exposed.

# Our Partners

At iPlaySafe App, we know we cannot end the cycle of sexually transmitted infections alone, which is why we partner up with world-leading suppliers to achieve our goal.

## Lab Integration

Viapath comes with a unique partnership of clinical, scientific and operational expertise

## Medical App Developers

Medical-Grade Software Experts partnered on the design of the iPlaySafe App

## Distributor Integration

MedDX will work with iPlaySafe App to supply the very best solutions available.

# Revenue Stream

**B2C**
Selling our product and subscriptions to users

**Affiliates**
Pharmacies, where users have easy access to medication if results are positive

**Partnerships**
Dating apps where users can link to their profiles and visually display their sexual health status

# We are changing the way people share their sexual health status

## 2011

VS

## 2021

# The Sharing Platform

## Gamifying Sexual Health

Motivating user to get tested frequently and keep on top of their sexual health.

## The Badge Concept

Subscribers badge. Automatically sent a test kit every 6 months and have tested negative within the last 6 months.

Indicates a one-off test kit with negative results within the last 6 months.

Indicates 6 months+ since last test, encouraging users to get tested regularly.

# Tracking Test Results

01 Accurate results from a certified lab and reviewed by a physician on iPlaySafe team.

02 Dashboard design to give users a quick and easy understanding of results with actionable data if necessary.

03 A dedicated medical team to give support every step of the way.

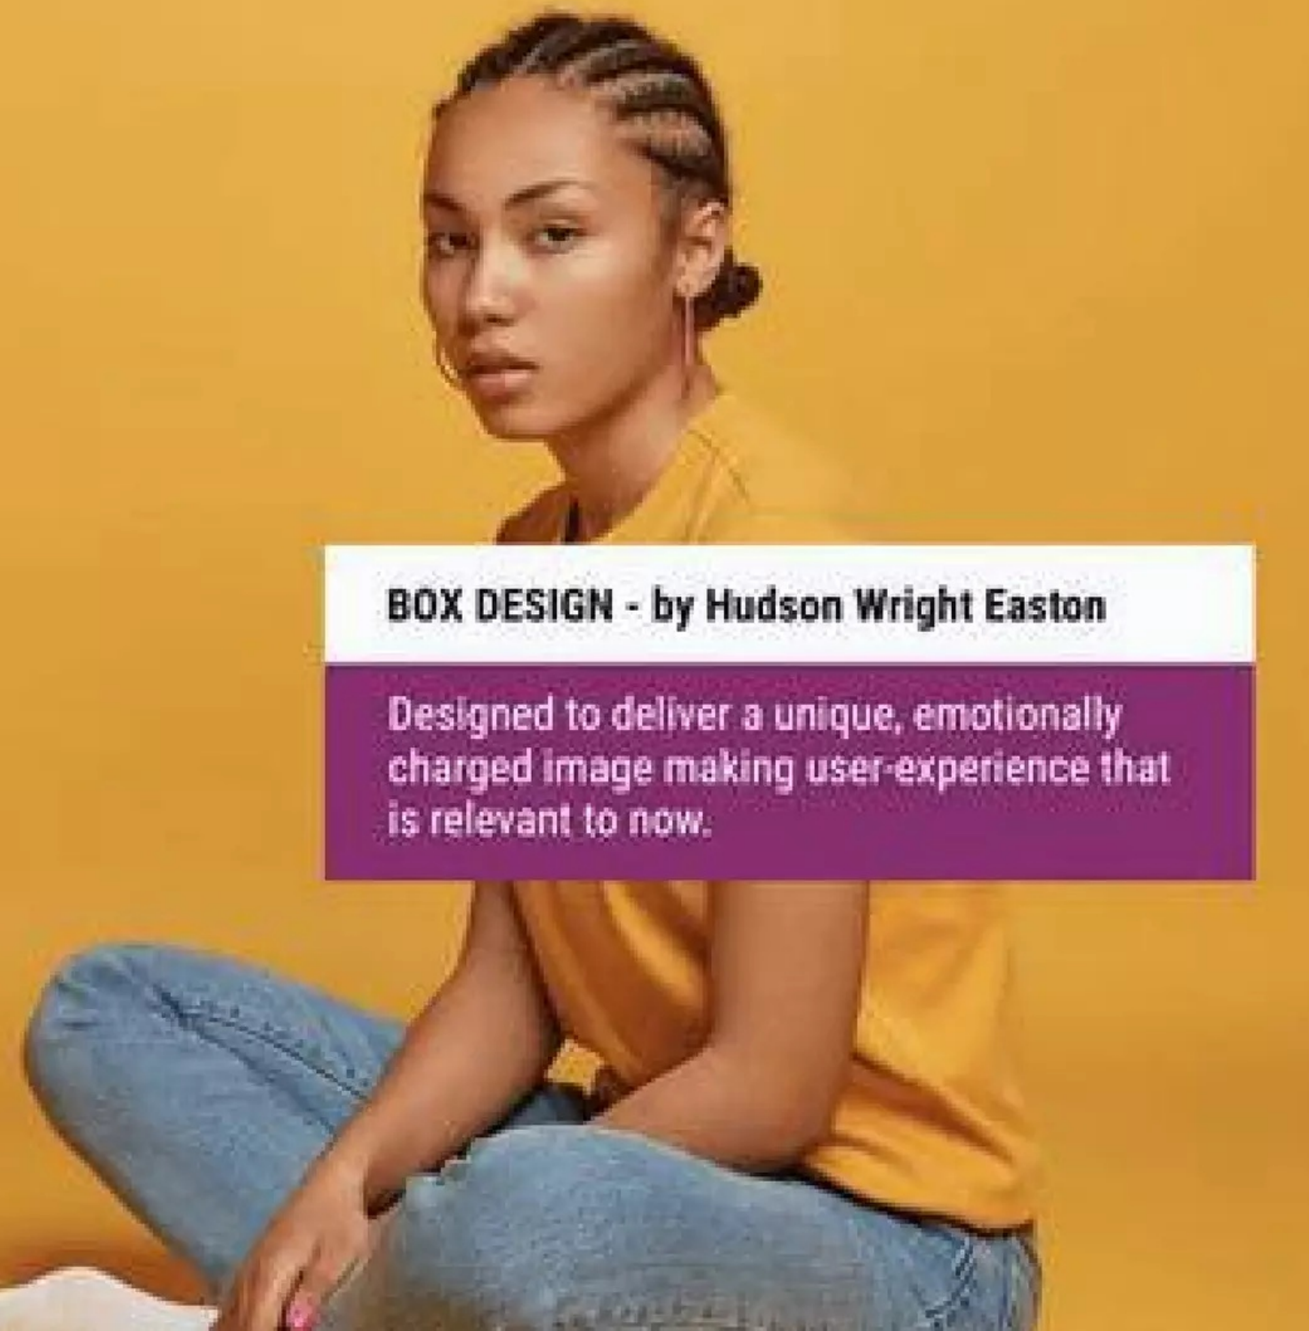

# Sample Collection

01 Well-established and effective collection methods and easy to follow instructions

02 Pre-paid return shipping

03 Conveniently collect sample whenever and wherever

**BOX DESIGN - by Hudson Wright Easton**

Designed to deliver a unique, emotionally charged image making user-experience that is relevant to now.
