kaia health

Kaia's mission is to become the biggest platform for chronic disease management

I've tried everything – massages, vibration tools, yoga, you name it. Nothing helped. [...] I know it's hard to believe, but it's an incredible app and it really changed my life.

I can actually walk and golf again.

3 digital therapies

50 B2B customers

$50m raised

The Problem

Chronic pain is often in-effectively treated with acute pain treatments, such as...

Pain Killers

Physical Therapy

Surgeries

This contributes to a high MSK spend for payors

Huge direct medical spend, PMPY

$300-500 By major diagnostic area or up to 16% of total medical spend

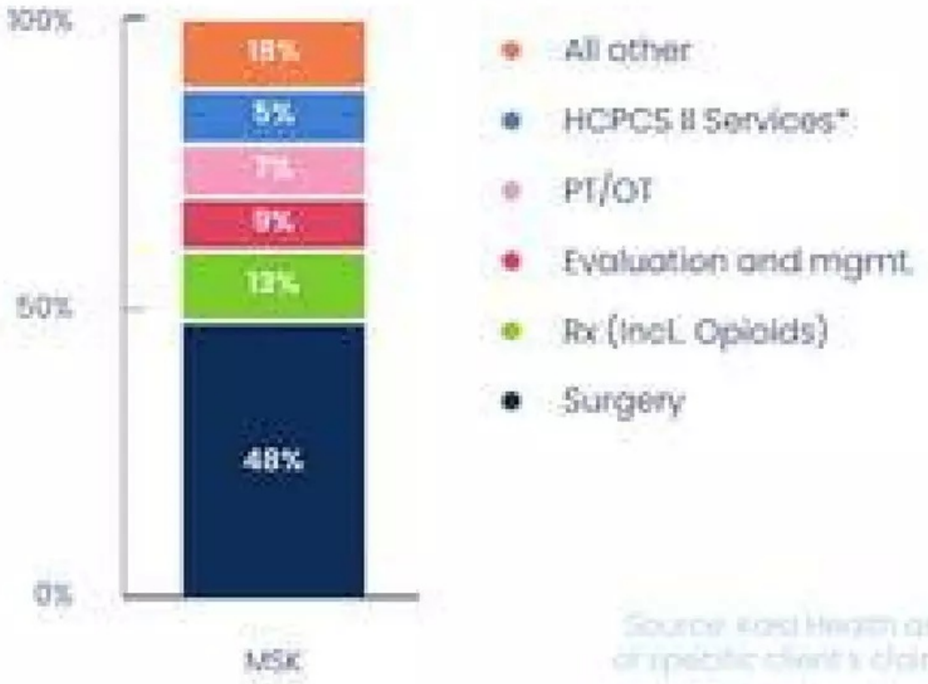

Huge indirect costs for the payor

11.4 Average number of workdays lost per person per year

Largest driver of long and short term disability claims

Disability claims

Spending by category

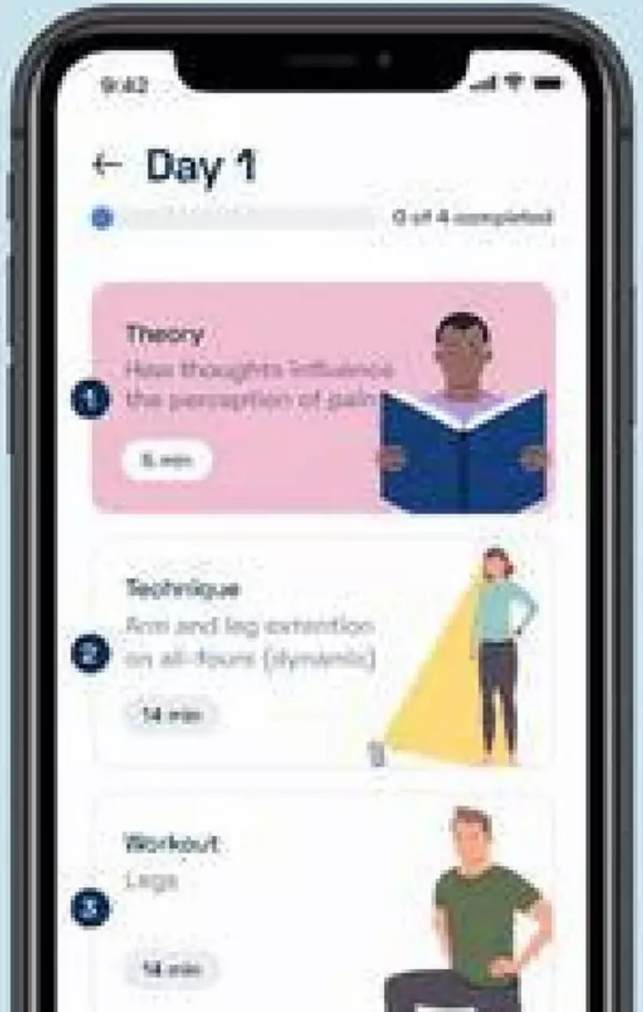

Source: Lead Health analysis of specific client's claim data

Our Solution

Comprehensive back pain education

Customized daily training sessions

Mindfulness and stress relief

Access to our certified health coaches

Maintain Adherence

- Establish goals & accountability to foster long-term habits in the Kaia app through these themes:
  - Self-discovery
  - Releasing Limiting Beliefs
  - Identifying Triggers
  - Overcoming Obstacles
  - Buildable Habits
  - Reflection
- Provide ongoing technical and emotional support, and assistance with in-app features

Accreditation

- National Board for Health and Wellness Coaching approved certification
- Coaching Certified (by a NBC-HWC accredited program)

Requirements

Registered nurse, and/or:

- 4-year degree in a health-related field
- 2 years of coaching experience
- Certified Health and Wellness Coach trained in Intrinsic Methodology

Handoffs and transfers

Coaches enable users to get connected to other care resources they might need

Training & Onboarding

- Intensive 30-day onboarding
- Monthly coaching evaluations
- Monthly skills training
- Ongoing coach mentorship

Introducing in 2021
Kaia is the front door for all pain cases

All MSK Patients

Preventative, acute, and chronic care for total spine, knee, hip, shoulder, hand/wrist pain

Kaia MSK Therapy

- Health Coaches
- Motion Coach
- Escalation Algorithm

Kaia Care Compass

Expert Medical Opinion & Triage Algorithm

Premium Partners

- Specialty Care
- Digital Programs
- Telemedicine
- Care Management

Motion tracking deep dive

Global market leader in motion tracking using the smartphone camera - no hardware necessary.

With four patents pending...

Kaia's Motion Coach™ supports participants with exercises, with no hardware or real-time person interaction required

Objectives

- Ensures that the user is doing the exercises safely and correctly
- Increases adherence by improving the user experience when doing exercises

Motion Coach™'s lack of sensors poses multiple advantages

Motion Coach enhances the patient journey by guiding the user through interactive experiences

Learning Mode
Teach new exercises

Assessment Mode
Measure fitness level

Training Mode
Count repetitions and hold times

Game Mode
Interactive warmups

The Kaia approach

	Kaia	Competitors	Why
Program Delivery	"Use on your own device" model	Additional hardware required	Scalable "out of the box" delivery with easy patient adoption
Pricing	Monthly active user charge only	Flat up-front fees + telehealth fees	Lower price point and only pay for value provided
Integration	Kaia implements into existing network with Health coaches navigating care experience	Fragmented care delivery managed by their own remote PTs (not vetted by BCBS)	Network non-redundancy with no financial conflict of interest = lowering overall cost of care

Clinical Evidence

Kaia has published 6 clinical studies

“

App-based multidisciplinary back pain treatment versus combined physiotherapy plus online education: a randomized controlled trial

“

Implementing Systematically Collected User Feedback to Increase User Retention in a Mobile App for Self-Management of Low Back Pain: Retrospective Cohort Study

“

Less Pain, Better Sleep? The Effect of a Multidisciplinary Back Pain App on Sleep Quality in Individuals Suffering from Back Pain – a Secondary Analysis of App User Data

“

Treatment of Low Back Pain with a Digital Multidisciplinary Pain Treatment App: Short-Term Results

Clinical outcomes

After 6 Weeks

Both Kaia App and control group of physical therapy & education see decrease in pain (no significant difference between both).

After 12 Weeks

Kaia users report less pain compared to the control group: 2.7 vs 3.4 on a numeric scale ranging from 0 to 10 (clinically relevant difference).

After 12 Weeks

Kaia users continue to see their condition improve as pain level further decreases to 2.5, demonstrating that users continue to see the benefits as they use the therapy over a longer time period.

Kaia shows twice the pain reduction compared to standard-of-care treatments in biggest randomized controlled trial

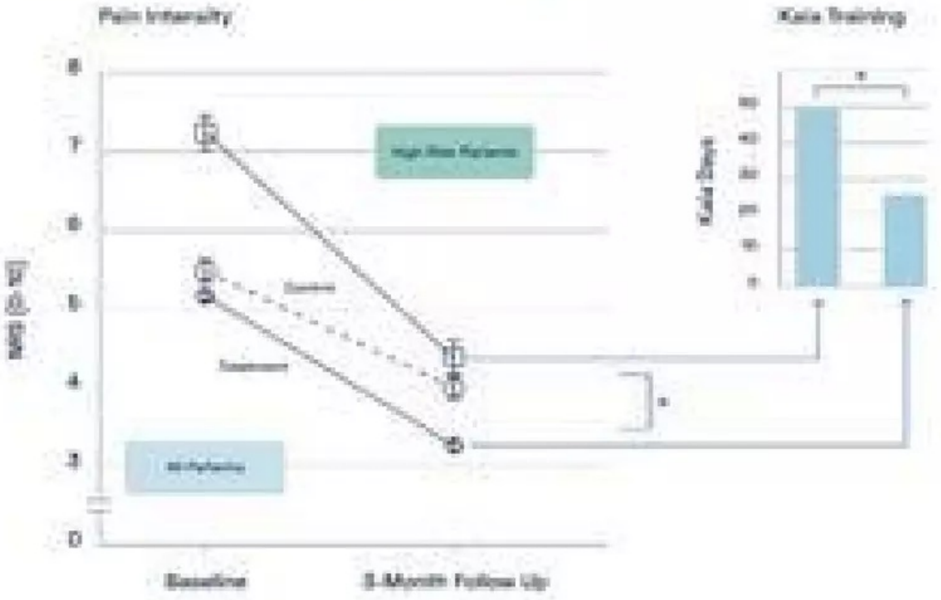

Published in:
Journal of Pain Research
Accessible here

-33% pain change

Kaia users experienced a **significant pain decrease at 3-month follow-up compared to traditional PT.**

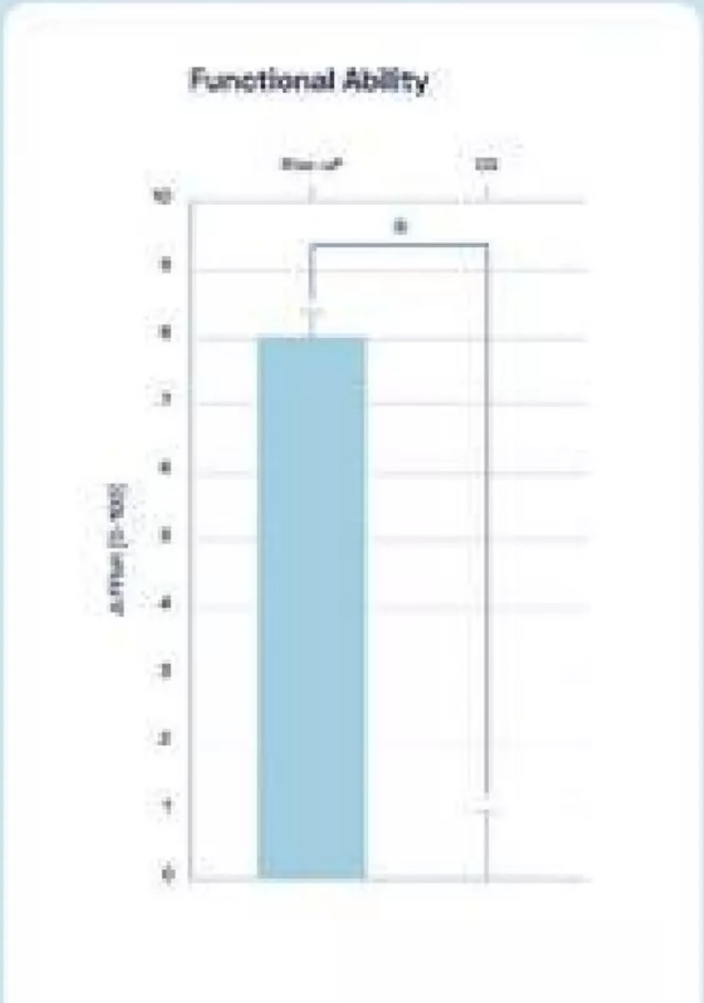

-43% Pain change in high-risk patients

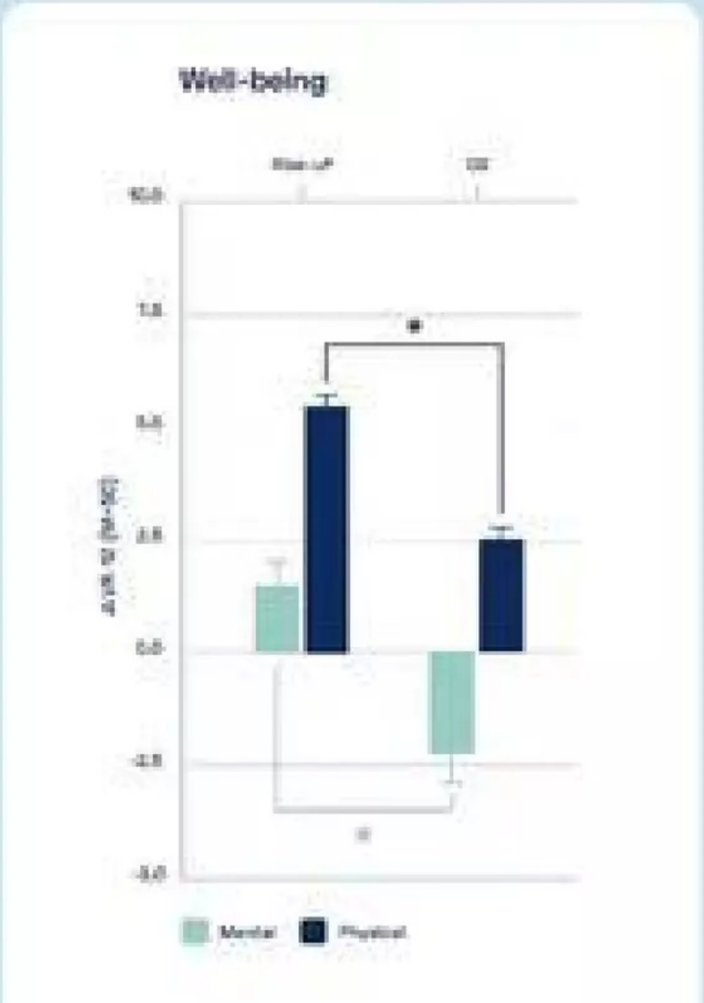

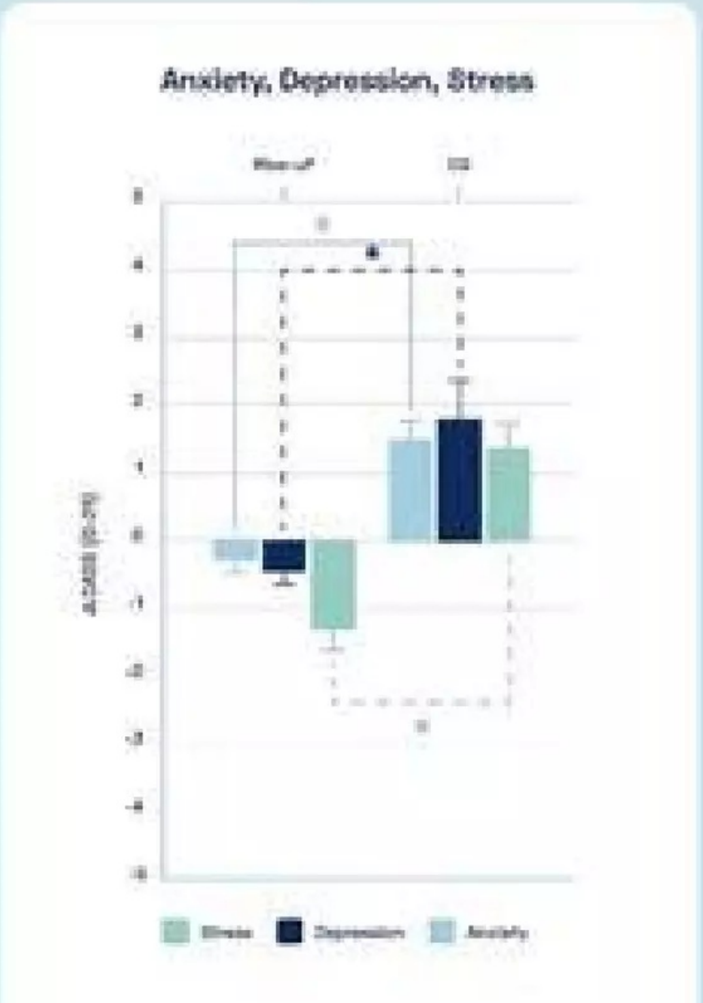

Outcomes were even **greater among high-risk patients** (using the Kaia app)

All secondary outcomes are significantly better for Kaia than for standard-of-care treatments

Secondary outcomes are functional ability, well-being and anxiety, depression, stress

Customer Success

What Customer Success is all about

Driving customer value
(value for our customers)

We believe Kaia customer value comes first from the value our patients/users get from the Kaia app, plus coaching.

Our core principle is:

A Engagement

Kaia customizes multi-channel marketing campaigns to the employer's needs

- Ongoing marketing support
- First campaign duration: 12 months
- Campaign evaluation and adaptation based on performance for different channels

A Engagement

Kaia Workout Kit

A Engagement

Activation and utilization

Account creation

% of eligible population that creates an account. Varies depending on MSK prevalence and communication plan

7%

Acceptance

% of users accepted into the program. Users can get screened out based on medical conditions that are reviewed in self-assessment and onboarding call

90%

Utilization per week

Average # of times a user is active per week

3.2x

Utilization over time

% retention since starting the program. As the member's condition improves, the need to use Kaia regularly diminishes, retention is not a goal by itself and we are not charging employers for users who are not active

80% therapy success

B User Satisfaction

93% user satisfaction

Robert - 62

"Have had off and on back problems for 30 years. A few months ago I went through PT. The drive was 30 min and the session was 45 min. I learned the exercises and had to remember them at home.

The exercises helped a lot. Recently I hurt my back doing deadlifts (never again). Versus going back to physical therapy I tried Kaia. I felt relief the very first time. By the third day I am walking very near normal. A normal walk looks youthful. When my back is out my walk looks like an old man. My wife does not like it when I walk like an old man. **Kaia is like having a physical therapist 24 hours a day.**"

Gary - 56

Because of Kaia and the entire program I am able to hike in the beautiful Sierra Mountains which I am not able to do when my back is in spasm.

Angela - 43

I have had a bad back for over 10 years. I have used inversion tables, physical therapy, cortisone shots, massage, and every gadget I could. **Nothing has helped as much as Kaia.**

C Clinical Outcomes
