NOTICE OF CONFIDENTIALITY AND DISCLAIMERS

The information contained in this deck ("Confidential Information") is highly confidential and is the proprietary information of Knowledgehook Inc. ("Company"). The taking and review of this deck by a prospective investor or other reader constitutes the agreement on the part of such person to keep the Confidential Information strictly confidential and not to use or disclose the Confidential Information in any manner without the Company's prior written consent.

Any reproduction of this deck, in whole or in part, without the prior written consent of the Company, is prohibited. This deck does not constitute an offer to sell any securities. Any such solicitation will be undertaken only under appropriate documents and pursuant to all applicable securities laws.

Projections set forth herein are believed by the Company to be reliable to the best of its information. It must be recognized, however, that projections and predictions about the Company's future performance are necessarily subject to a high degree of uncertainty, and no warranty, expressed or implied, is made that such projections will be achieved.

Knowledgehook

Committed to inspiring tomorrow's problem solvers

Forbes · BNN Bloomberg TOP DISRUPTOR · Google GAME CHANGER · World Education Congress EDTECH LEADER · FP FINANCIAL POST

Knowledgehook

The first technology platform that education systems trust with analyzing student data to teach the teacher.

> Learning online is vital which is why we're proud to partner with Knowledgehook, an Ontario-based company trusted by many educators and school districts.

Current EdTech solutions are missing the mark

The biggest problem with EdTech?

Study analyzing **usage** by 390,000 **students** across 48 **U.S. school districts*** concluded:

KEY FINDING

For EdTech to be effective it must have:

1. Professional Development for teachers
2. Thoughtful implementation
3. Consistent engagement from all stakeholders

Instead of empowering teachers, current EdTech solutions try to replace them

"Tech not easy to set up or use"

"I struggle with preparing and applying formative assessment results"

"Parents complain report cards are reactive, and want more interim updates"

"EdTech providers are not explanatory enough"

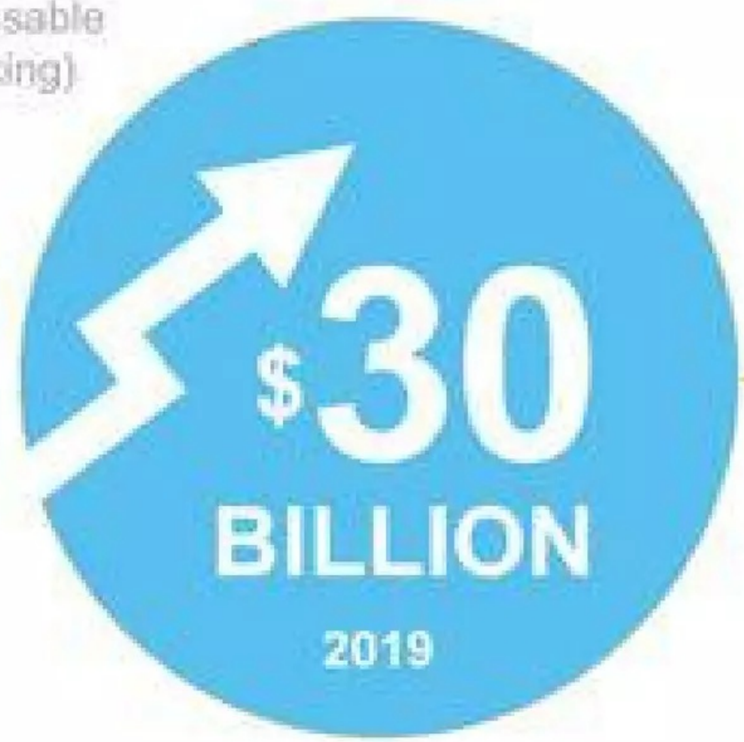

"Good Internet connection is a great challenge"

"Lesson Plans accompanying the apps are missing!"

The need for a scalable math solution is accelerating globally

The EdTech market will grow at a CAGR of 15.4% from 2018 to 2024. Math is the fastest growing segment within EdTech with an addressable market size of $30 billion in 2019.

Current addressable (English Speaking) Math EdTech market
