We enable anyone to buy, collect and trade fractions of iconic assets

KOIA

Everyone has a passion, whether that's watches, music or Pokémon cards.
Passion assets and other alternatives are only accessible to the wealthiest 1%.
That's about to change.

KOIA

Mission

Open up access to alternative assets. We're breaking down traditional barriers and enabling a fractional economy.

KOIA

Solution

Platform to buy, trade & collect fractional real-world assets

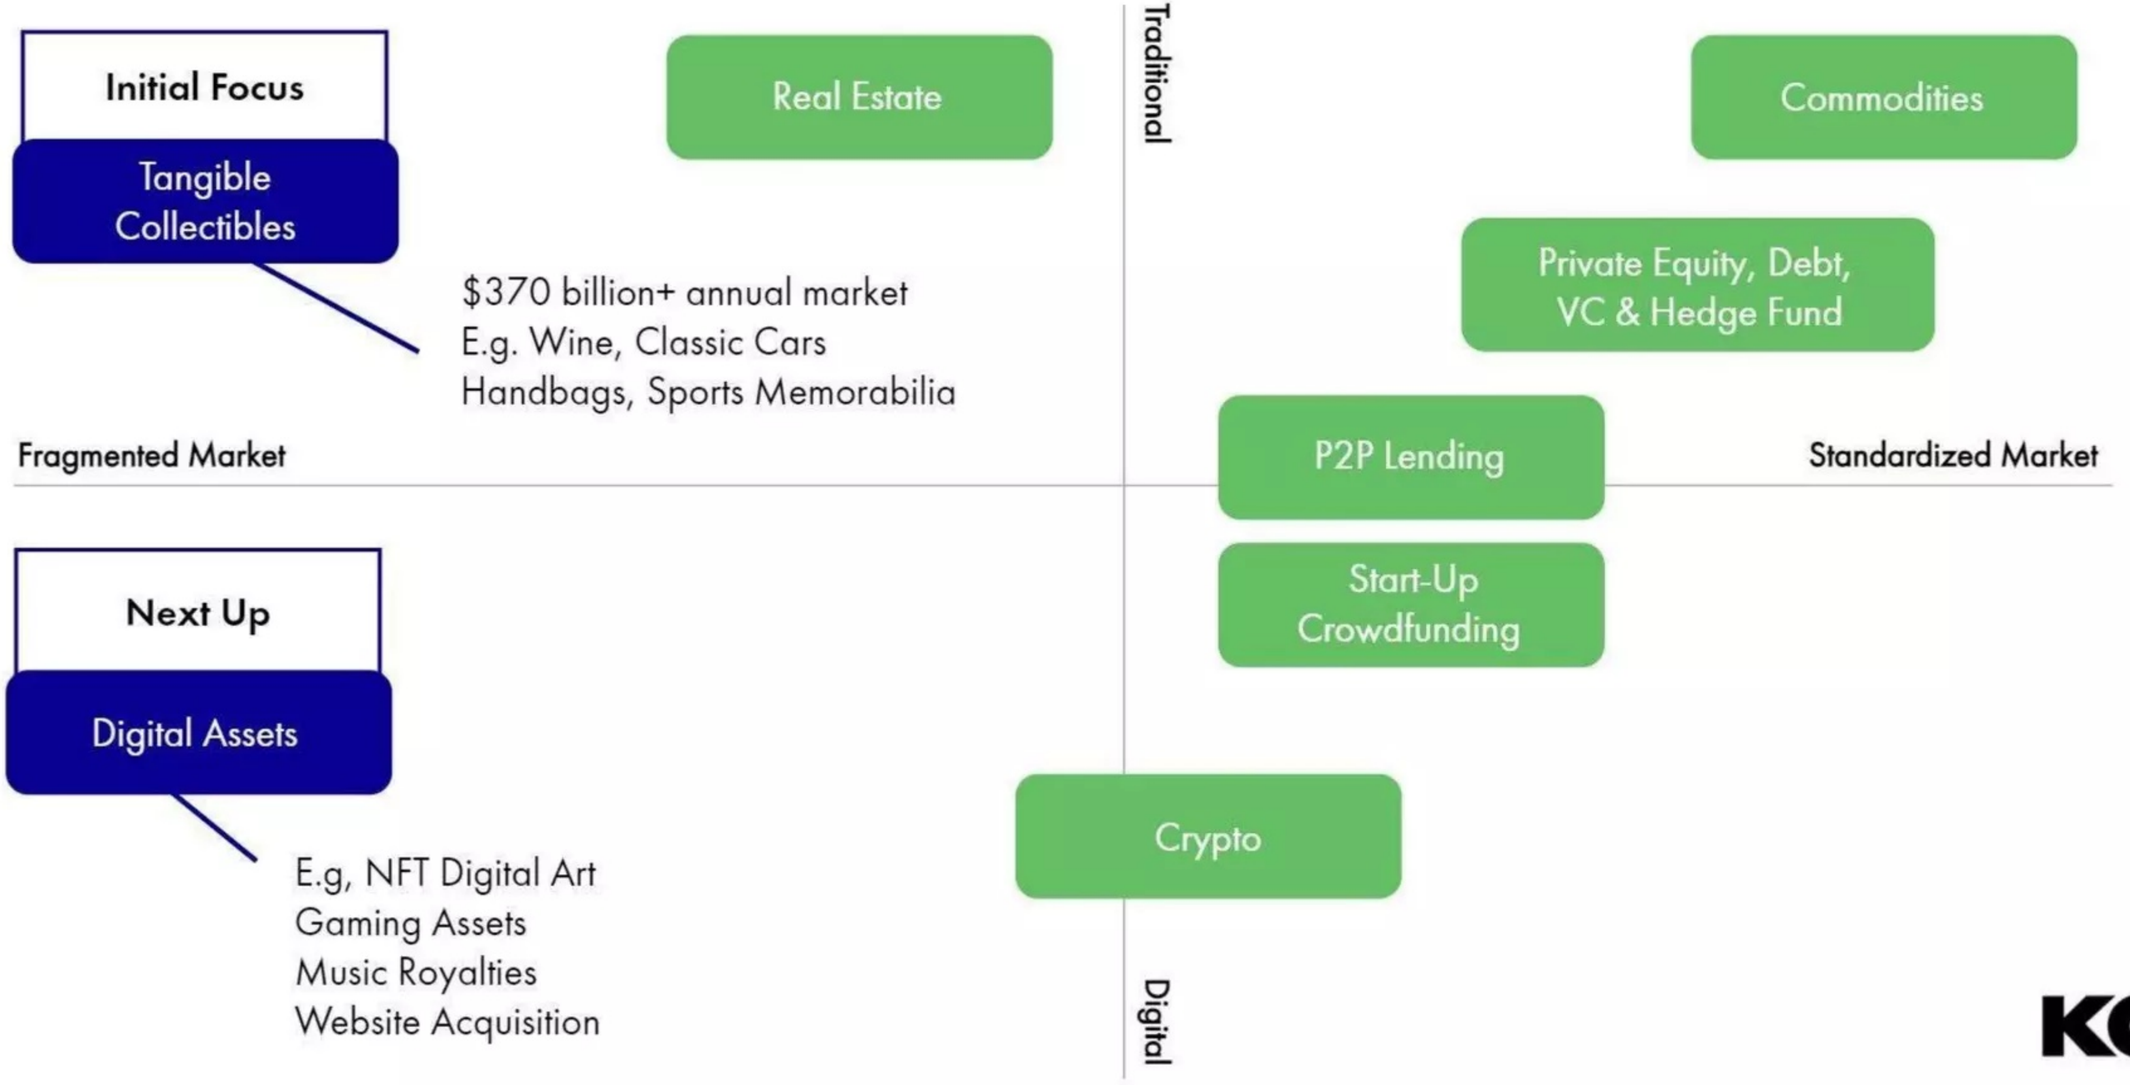

Collect Iconic assets & use their **digital twins** in the metaverse

Trade fractions via Koia or NFT Marketplaces

Zero hassle. Storage, insurance and authentication sorted.

KOIA

Starting with passion assets...

How it works

1 Acquire

Koia identifies and authenticates iconic real-world assets to buy or consign. We then store each item in safe locations.

2 Fractionalize

We mint NFTs ('Fractions') which are linked to the real asset. Each asset can have hundreds or thousands of unique Fractions.

3 Trade

Fractions can be bought and sold via Koia's secondary market or on NFT marketplaces

4 Returns

Fractional owners vote on key asset-related decisions. When asset is sold to 3rd party the NFT is burnt and pro-rata proceeds returned.

KOIA

Physical asset held in custody by Koia via storage partners

Multiple NFTs minted - 'Fractions'

Fractions traded

Asset sold following vote. Tokens 'burnt' in exchange for proceeds

Koia Secondary Market

NFT Marketplaces

$

Bank Account

Crypto Wallet

KOIA

Product Vision

Social Commerce

- Live video asset drops with experts
- Live group bidding for real-world auctions
- Designed to educate & entertain

Secondary Market

- Buy & Sell in real-time
- Users can provide liquidity and earn interest
- Users can trade on NFT marketplaces or Koia dApp

Digital Twins

- Use, share and show off in the metaverse
- Seamlessly bridging real-world assets to a digital future

KOIA

Competitive Advantages

- DeFi solution creates more trust, more secondary market liquidity, digital twins, collateralized lending and much more vs. Traditional competitors such as Masterworks or Rally
- Significant economies of scalein sourcing, logistics & distribution
- Legal and corporate setup combining NFTs and DeFi with “real” world counterparts such as insurance companies, auction houses and storage facilities
- Marketplace for authorized sellers and influencers to list and sell fractional assets

KOIA

Competition

	KOIA	Rally / MASTERWORKS / Otis / vincent	PartyBid / fractional	ebay / catawiki / stockX

Marketplace for 3rd Parties to List Assets	✓			✓
Decentralized / Web3	✓		✓	

KOIA

Progress

MVP	Asset Sourcing	Investment	Structure
Legally compliant TradFi iOS app released, >1k users and first fractional asset sale completed	Physical infrastructure, partnerships & asset sourcing networks developed	Raised ~$1.4M pre-seed round from investors such as Seedcamp, RTP & prominent fintech angels	Set up a legally compliant structure to fractionalize real-world assets via NFTs

KOIA

Product Roadmap (Year 1)

Q1 2022

- Fractionalize >$200k of assets within our first three asset categories
- Phase I Koia Kollector PFP Whitelist and pre-sale
- Develop our community with content, IRL events and lots more relating to alternative assets
- Launch Koia Web3 app

Q2 2022

- Fractionalize >$500k of assets and continue to add additional asset categories
- Phase II Koia Kollector PFP sale
- Launch secondary market trading on Koia app
- Early access to token sale or crowdfunding campaign

Q3 2022

- Close new funding round with community participation
- Fractionalize >$1m of assets and continue to add additional asset categories Launch
- Announce partnerships with non-fractional collectible marketplaces
- Improve liquidity on Koia secondary market with Koia & third party guaranteed liquidity mechanism

2023+

- Fractionalize 'grail' assets, ultra-rare or one-of-a-kind million dollar assets.
- Expand collateral and lending options for users and asset sellers
- Launch phase I community- led asset authentication mechanism

KOIA
