NO ONE LEFT BEHIND

We believe in digital skills as tools of empowerment. That's why it's critical that all adults, especially those who have been traditionally underrepresented in tech —namely women, low-income Canadians, people with disabilities, LGBTQ2 communities, Indigenous peoples, Black Canadians, other racialized people in our country, and people living in rural and remote areas—have the opportunity to learn foundational skills and competencies to meet the needs of this time. We offer workshops, courses and meetup experiences for adults of all ages and genders, but designed to be a space for women.

Only 26% of all ICT professionals are women in comparison to 47.7% of women in the Canadian labour force.

And the tech sector in Canada has one of the lowest percentages of women in director positions, at 19%.

*StatsCanada identifies **lower-wage workers, youth, and women** as being the hardest hit demographics of the labour force affected by the Covid-19 economic shutdown. While **unemployment is at a record high** among these groups, employment opportunities continue to increase in the digital and technology-based sector, further highlighting a gap and opportunity to ensure these groups are not left further behind.*

A PLACE TO START

※ladies learning code

Our learning experiences provide ***crucial early exposure learning*** *on technology and coding that* ***lay a foundation of knowledge*** *and build confidence.*

These workshops provide ***broad based digital skill development*** *for individuals to leverage in their current roles or* ***help inform*** *those unemployed about particular areas of the technology sector they may be interested in pursuing further development in. Ultimately with the* ***goal of finding employmen****t in the tech sector or in tech-enabled roles in other sectors.*

"I only started learning SQL and a live workshop on this language was really important to me. I loved the atmosphere the mentors created. Even though it was online, it was a lot of fun, there was an opportunity to ask questions and get some hands-on experience. I loved the flow of the workshop, and also that we got to code! It was great and really useful! Will definitely recommend CLC to my friends!"

- SQL workshop Participant

THE IMPACT

※ladies learning code

Based on our most recent survey data it's estimated that 2,268 individuals have pursued a new job opportunity using coding/tech as a result of their CLC learning experience.

After completing at least 1 CLC learning experience, adult participants indicated that because of CLC:

- 46% took on a new coding/tech task at work
- 78% felt more confident and interested in using coding/tech in their jobs
- 77% went on to learn more about tech and code through self-directed learning
- 1 in 5 took on a new job opportunity using coding/tech

THANK YOU FOR CHANGING THE FUTURE

※ladies learning code

*We hope we've sparked your interest in partnering on **our shared vision**. We know that contributions and collaboration with organizations that share our hope for the future are essential to the success of our mission.*

We are looking for sustainable, mutually-beneficial partnerships for the long-term. We look forward to working together and welcome the opportunity to discuss this proposal in more detail.
