Lago

Product growth made easy, for Fintechs

TLDR

- Lago: Product Growth made easy, for Fintechs
- Founded in March 2021
- HQ in the US
- Team: ex founding team at Qonto (Brex for EU, 🦄)
  - Took MRR from 0 to tens of millions in 2 years
  - Built the internal customer data tool to serve all business teams: Growth, Marketing, Sales, Ops
- Investors: *Y Combinator, Lee Fixel's Addition, Bond Cap, 122West, fintech operators (Stripe, Square, Robinhood) and data operators (Confluent, Hugging Face).*

Fintech is about winning distribution

Problem

Number of Fintechs in the past 2 years increased threefold*

Challenge

With an ever-growing fintech offer, it's becoming all the more harder to win the users' attention

Impact

Increasing cost of acquisition
Low activation
Passive churn.

* Source: Boston Consulting Group, 2021

Typical fintech pitfalls

- Focusing on the number of new signups vs new MRR
- Taking every drop at KYC as a fatality or throw a customer success team at it
- Spending high fix costs on delivering cards that are seldom used
- Pitching investors about indirect sales (e.g., via accountants) without engaging partners properly
- Letting business teams (ops, sales, marketing) fly blind, without actionable data on product usage
- Giving up on mainstream and automated engagement channels (e.g., emailing) without testing or personalizing the experience based on product usage

Passive churn **Increasing CAC** **Slow growth**

We won that race before at Qonto

Anh-Tho (Co-founder, Business)
1st employee, ex VP Growth @ Qonto

Raffi (Co-founder, Product)
ex Head of Growth & Data Ops @ Qonto

Took **MRR to tens of millions euros in less** than 2 years

Latest valuation: $5b

We productized our secret sauce...

Built for engineers

- Fits into the existing data stack: db, warehouse
- Built-in data transformation into Fintech data objects: cards, transactions, invoices, trades, etc.
- Orchestration, ETL/reverse ETLing

Loved by business teams

- Pre-built product growth, marketing, bizops templates
- Access to everfresh, curated customer data
- Syncs to business tools (e.g., Salesforce, Ads, Customer success tools)

... to make other fintechs win

'With Lago, we've put a 'product growth' machine in place in 2 days: it took me 6 months in my previous company.

A week after launching our 1st campaign, our card activation rate was already up by 20%.'

Djamo CEO

YC-backed Djamo is building a financial super app for consumers in Francophone Africa

And many more to come!

Typical use cases

Maximize interchange revenue

Through combined automated campaigns (messaging x ads, x customer success), to target users:

- Without cards
- With unactivated cards
- Who have never made 'meaningful' transactions
- Who stopped making transactions
- Who could switch all their online spendings (e.g., SaaS, ads) on payment cards

Reengage and 'close' KYC drops

Team coordination and re-engagement campaigns:

- Sync real-time KYC status to customer success tools (e.g;, Zendesk, Intercom)
- Automate emailing, and ads campaign to win back dropped users
- Automate alerting in customer success or Sales CRM tools

Product Growth Made Easy, for Fintechs

We'll work with 2-3 Fintechs to provide 'Product Growth as a Service', combining:

- Our product: the one we'd would have loved to use at Qonto
- Our experience with Fintechs to leapfrog your team to best practices
