- IBAN inspection
- Strong security processes

## Efficient control

- Control on costs
  - vs. current automatic payments
- Smart scheduling
- Consolidated and smart vision on cash at banks
- Financial data and analytics

libeo

Opportunity

# Accounts Payable SaaS are booming.

## In Europe, no player has emerged, yet.

**€25 trillion**
amount of payments between companies in Europe.

**Low equipment rate**
in France, over 19 billion invoices issued in 2018, only 4.2% were digitized

**€60bn payment fees**
total commissions to payment processing players (⅓ in Europe, ½ for SMEs vs large).

**67% of SMEs**
still use Excel to monitor their cash flow.

Source: McKinsey, Global Payments 2016.

Pain

# Accounts payable cost a lot to SMEs

## 10 hours lost per week in avg.

manually entering invoice data
= **waste of time**

## ¼ of bankruptcies

caused by payment delays
= **financial cost**

## 84% of unsatisfied companies

inability to forecast
= **lack of visibility**
