Vision

WE ARE BUILDING THE FIRST FINANCIAL SUPER APP TO SHAPE THE FUTURE OF BANKING

LUNAR

WHY THE NORDICS?

The Nordics is the most profitable banking landscape in the world - yet extremely defensive from outsiders.

Nordic banking customers traditionally only have one bank throughout their entire life - and get all financial services from one provider.

That’s why Lunar’s national focus on products and accounts will impact our unit economics.

The irreversible tipping point is near. Populations are fed up with big banking behaviour and we are building the first pan-Nordic dominator to tip the scale.

WE ARE BUILDING A BANK FROM SCRATCH

Unlike almost all Nordic banks, we have built our own technology stack giving us the edge to react swiftly to ever-changing user expectations. We listen, we build and we ship it - hundreds of releases every week.

We are the first Nordic bank with a regulatory approved cloud solution. Our open API gives us the opportunity to integrate with 3rd parties quickly, but still gives us the freedom to innovate independently of their limitations.

It's the perfect starting point for becoming the most compliant bank in the Nordics and scale quickly. Our microservice architecture makes it easy to amend functionality, apply new compliance rules, and integrate with partners.

LUNAR

HOW WE WILL CATCH A MILLION USERS

Lunar's growth tactics

- → You can try us out for free. That’s not seen before in the Nordics
- → We are open - you don’t need to breakup with your other bank, just link it and use it in our app
- → We are moving ahead of our future customers testing and exploring new channels, recognized as “best-in-class”
- → We are the favorite app of most authentic influencers and exploiting vital strategies as thought leaders
- → We can move your full account to us with one click due to Nordic infrastructure
