MAMBU

The world's leading cloud banking platform

Cloud native banking platforms: from powering neobanks to transforming all FIs

Today

Before 2015

Traditional FIs relying on legacy technology

- High TCO of legacy technology
- Inflexible and slow tech & operations
- Low growth, low profitability, low ROI

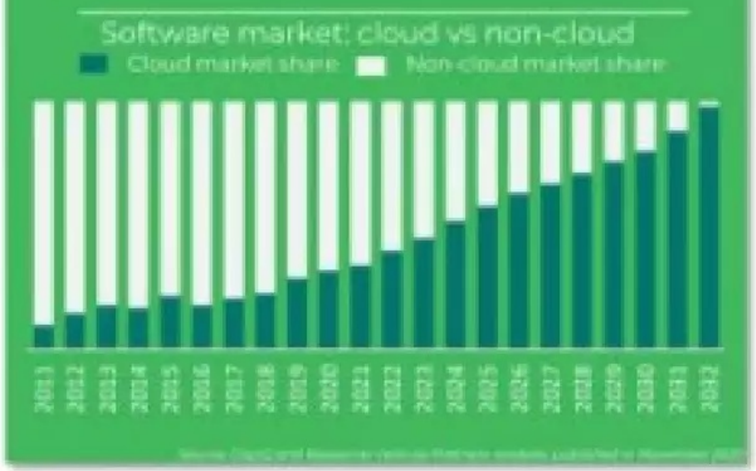

2015-20

New digital banks adopting cloud and SaaS tech & operating model

- Exceptional service
- Frictionless banking
- Anytime & anywhere

2020-25

Traditional FIs mass adoption of cloud and SaaS banking platforms

© Mambu

Cloud banking platforms outperform traditional banking tech on all metrics

Agility	95%+ of customers go live within 2 months of target date[1]
Predictability	98%+ project success rate[1]
Productivity	25%+ boost in productivity in the first 6 –18 months[2]
Speed	Up to 95% faster delivery of functionalities[2]
Resilience	99.99% uptime[1]
Scalability	Scale up and down in seconds[3]
TCO Total Cost of Ownership	70+% reduction in operating cost per user vs. traditional banks[4]

SaaS is the **future** of banking tech

(1) Mambu statistics (used as a proxy for the industry)
(2) McKinsey Next-gen Technology Transformation in Financial Services
(3) McKinsey Digital research
(4) Accenture research

Composable banking is the new best-of-breed cloud banking methodology

Scalability

Flexibility

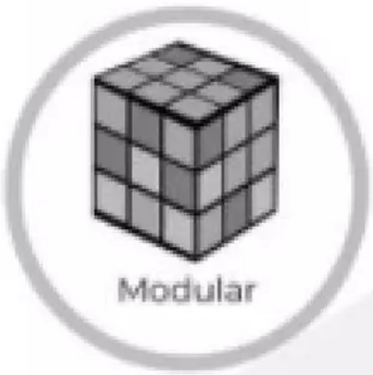

Legacy vendors / in-house solutions

Monolithic

- **Inflexible**, slow to evolve, and difficult to scale
- Tailored to **one need**
- **Locked** into one vendor

Modular

- Combine pieces into one, **pre-set** picture
- Hard or **impossible** to swap out pieces for better ones
- **Locked** into one vendor
- **High failure** rate

MAMBU

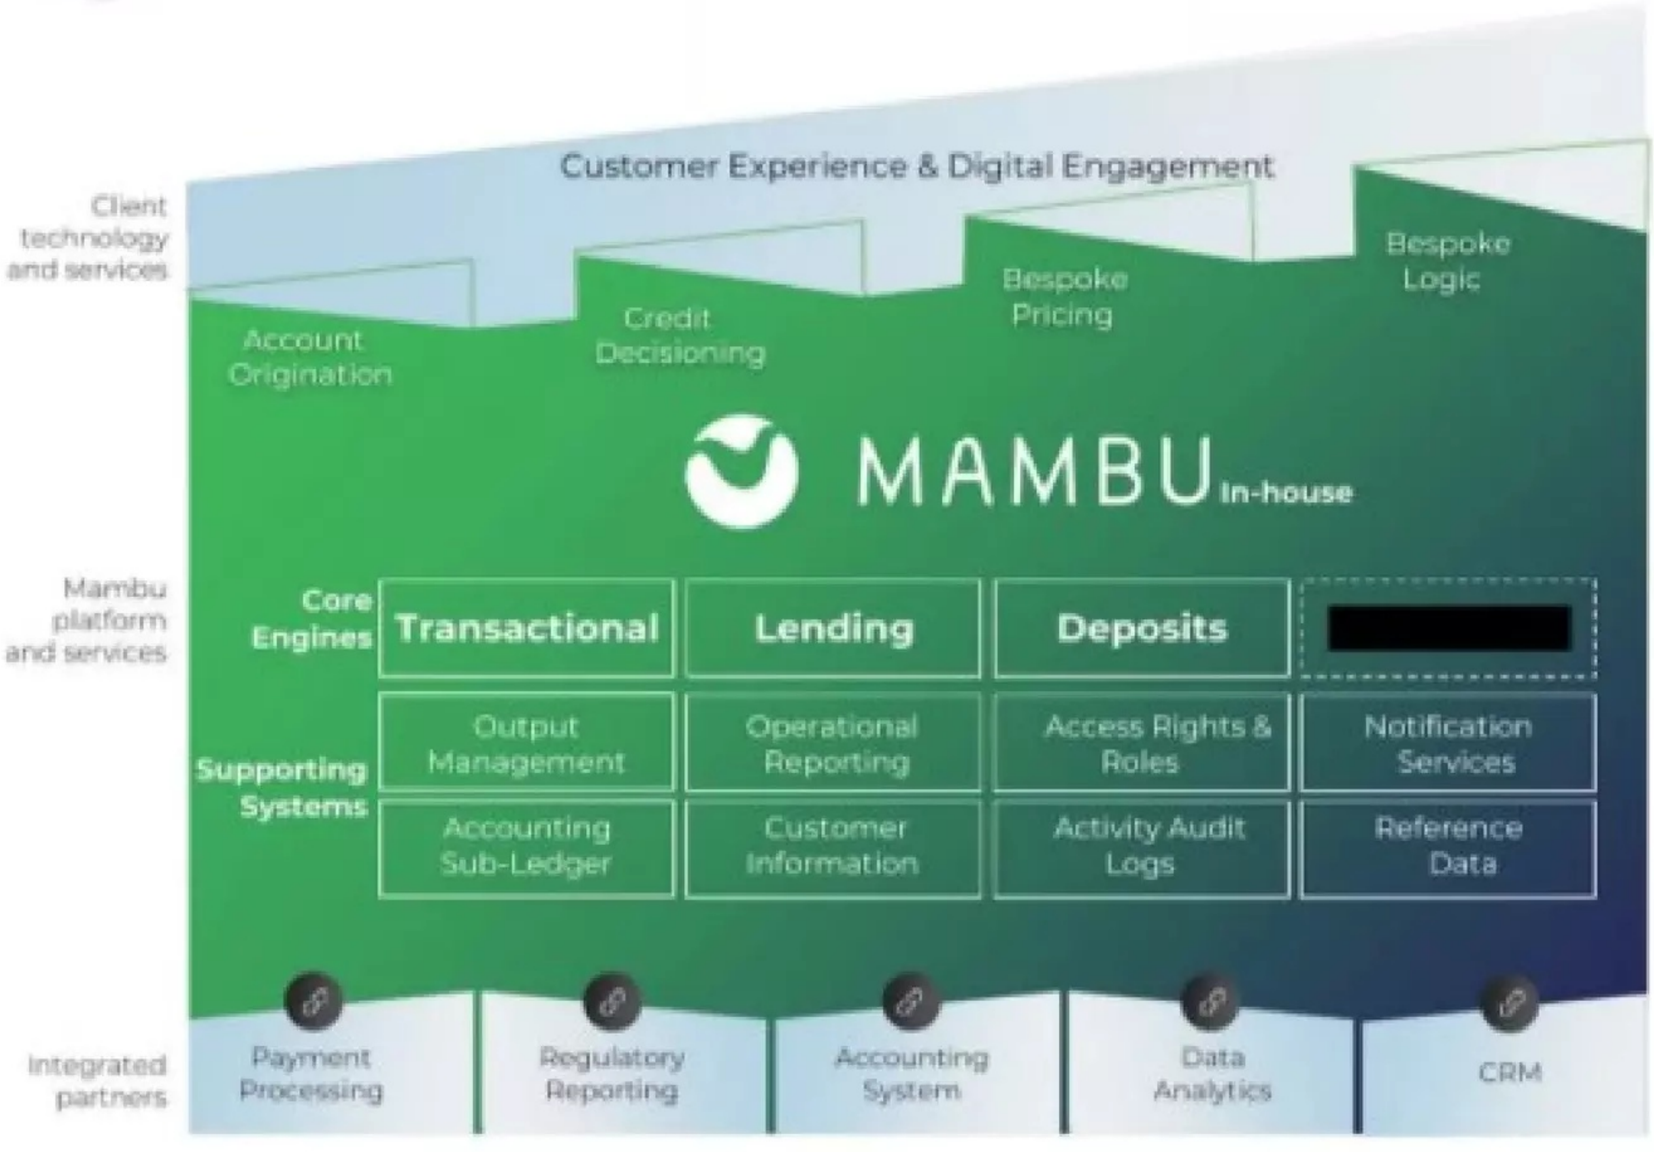

Composable

- Combine independent components to make anything
- Re-use, swap in or swap out any component
- No vendor lock in
- 98%+ project success

Composable banking **is an approach to the design and delivery of banking services that prioritizes the** rapid, flexible assembly of independent, best-for-purpose systems.

2a In-house state-of-the-art cloud native tech stack

[redacted]

Our platform is based on 4 core product principles

Cloud-Native & API-First
- Designed for the cloud-first world
- Native scalability and resilience
- API-first ecosystem enablement

SaaS Servicing Model
- Managed app & infra services
- Minimal professional services
- Continuous enhancements

Config. vs. Customization
- Single-code base for all clients
- Zero-code configuration
- Instant API accessibility

Singular Product Focus
- Superior core & supporting capability
- Best-for-purpose ecosystem
- Enabling clients to be nimble

2b Our composable approach enables banking like a modern tech company

Key advantages

Revenue growth while optimising costs

Business agility & flexibility

Rapid reaction to market threats & opportunities

Rapid adaption to regulatory & technological changes

Composable architecture

Multi-vendor cloud ecosystem of best-of-breed provides rapid access to new markets, new products and new technologies

2C Integrated with leading ecosystem of partners

Business Partners

Big 4

pwc, KPMG, Deloitte., EY

Tech Consulting

accenture, Atos, NTT DATA

Customer Channels

Andersen, 10CLOUDS, mobiquity

Others

ABC TECH, ELCA, etronika, FIRST LINE SOFTWARE, flexibility, HCL, metasite, Specific-Group Software Solutions

Technology Partners

AML & Compliance & KYC

Comply Advantage, onfido, kompany, ondato, SALTEDGE, IDnow, In Country, FEATURE SPACE

MAMBU

Pick and choose best for purpose

Payments Processing

ClearBank, GOCARDLESS, TransferWise, Currencycloud, MARQETA

Accounting

ORACLE NETSUITE, Microsoft

Digital Engagement

BACKBASE, ebankIT, outsystems

Others

CENTROlink, experian., salesforce, Stitch, Incino, collectAI, talend

And many more...

Note: Headcount as of October 2020; Office headcount excluding permanently remote working employees
(1) Count based on live customers' home countries. For example, we only count N26's home country (Germany), although we power N26 platform in 23 countries
(2) Amsterdam, Berlin, Iași, Singapore, Miami, Vilnius

3 Our customers and partners love us

MAMBU

N26

"Mambu's ease of integration, flexibility and time to market has helped us to give our customers an unrivalled, technology-driven mobile banking experience"

Gino Cordt | CTO

ABN·AMRO new10

"Bringing a fully digital approach to life meant an entrepreneurial approach and a fully cloud-native environment. As lean and agile as the business itself."

Jaap Boersma | CTO & Co-Founder

TransferWise

"Mambu is a game changer in a market that seeks modern solutions to the problems faced by traditional banks"

Kristo Käärmann | CEO & Co-Founder

OakNorth

"Mambu is enabling us to rapidly bring new products to market and focus our innovation around giving our customers great service"

Rishi Kohsla | CEO & Co-Founder

Santander asto

"We chose Mambu because we needed a reliable system that is in-line with our ideas of how to build software, and a partner who can and will move fast with us in the same direction."

Thomas Boltze | CTO, Asto

MARQETA

"Mambu is providing a world class platform addressing key challenges around how to continually deliver and accelerate innovation ..."

Ian Johnson | Head of European Growth

Further penetration in each of our existing markets

What we plan to do:

Our cloud banking platform is proven in 50+ countries...

...we will now strengthen the local features of our platform...

...while focusing on commercialisation through deploying 50+ local / regional GMs globally ...

...in addition to building out local sales teams

Note: KPIs as of September 2020
(1) Count based on live customers' home countries. For example, we only count N26's home country (Germany), although we power N26 platform in 23 countries
