Custom maps are hard

```
function createMarkers(places) {
  var bounds = new google.maps.LatLngBounds();
  var placesList = document.getElementById('places');

  for (var i = 0, place; place = places[i]; i++) {
    var image = {
      url: place.icon,
      size: new google.maps.Size(71, 71),
      origin: new google.maps.Point(0, 0),
      anchor: new google.maps.Point(17, 34),
      scaledSize: new google.maps.Size(25, 25)
    };

    var marker = new google.maps.Marker({
      map: map,
      icon: image,
      title: place.name,
      position: place.geometry.location
    });
placesList.innerHTML += '<li>' + place.name + '</li>';
```
