crunchbase

# Private companies are a massive opportunity

**Public company opportunity is shrinking:**

- 46,583 public companies
- Half as many compared to 10 years ago in the US

**Private company opportunity is growing:**

- Millions of private companies
- Over 200k new companies each year in the US
- $3T in funding and many times that in revenue
- 124M employees in the US

# Millions of professionals desperately search for those opportunities

# Prospecting for those opportunities is slow and frustrating

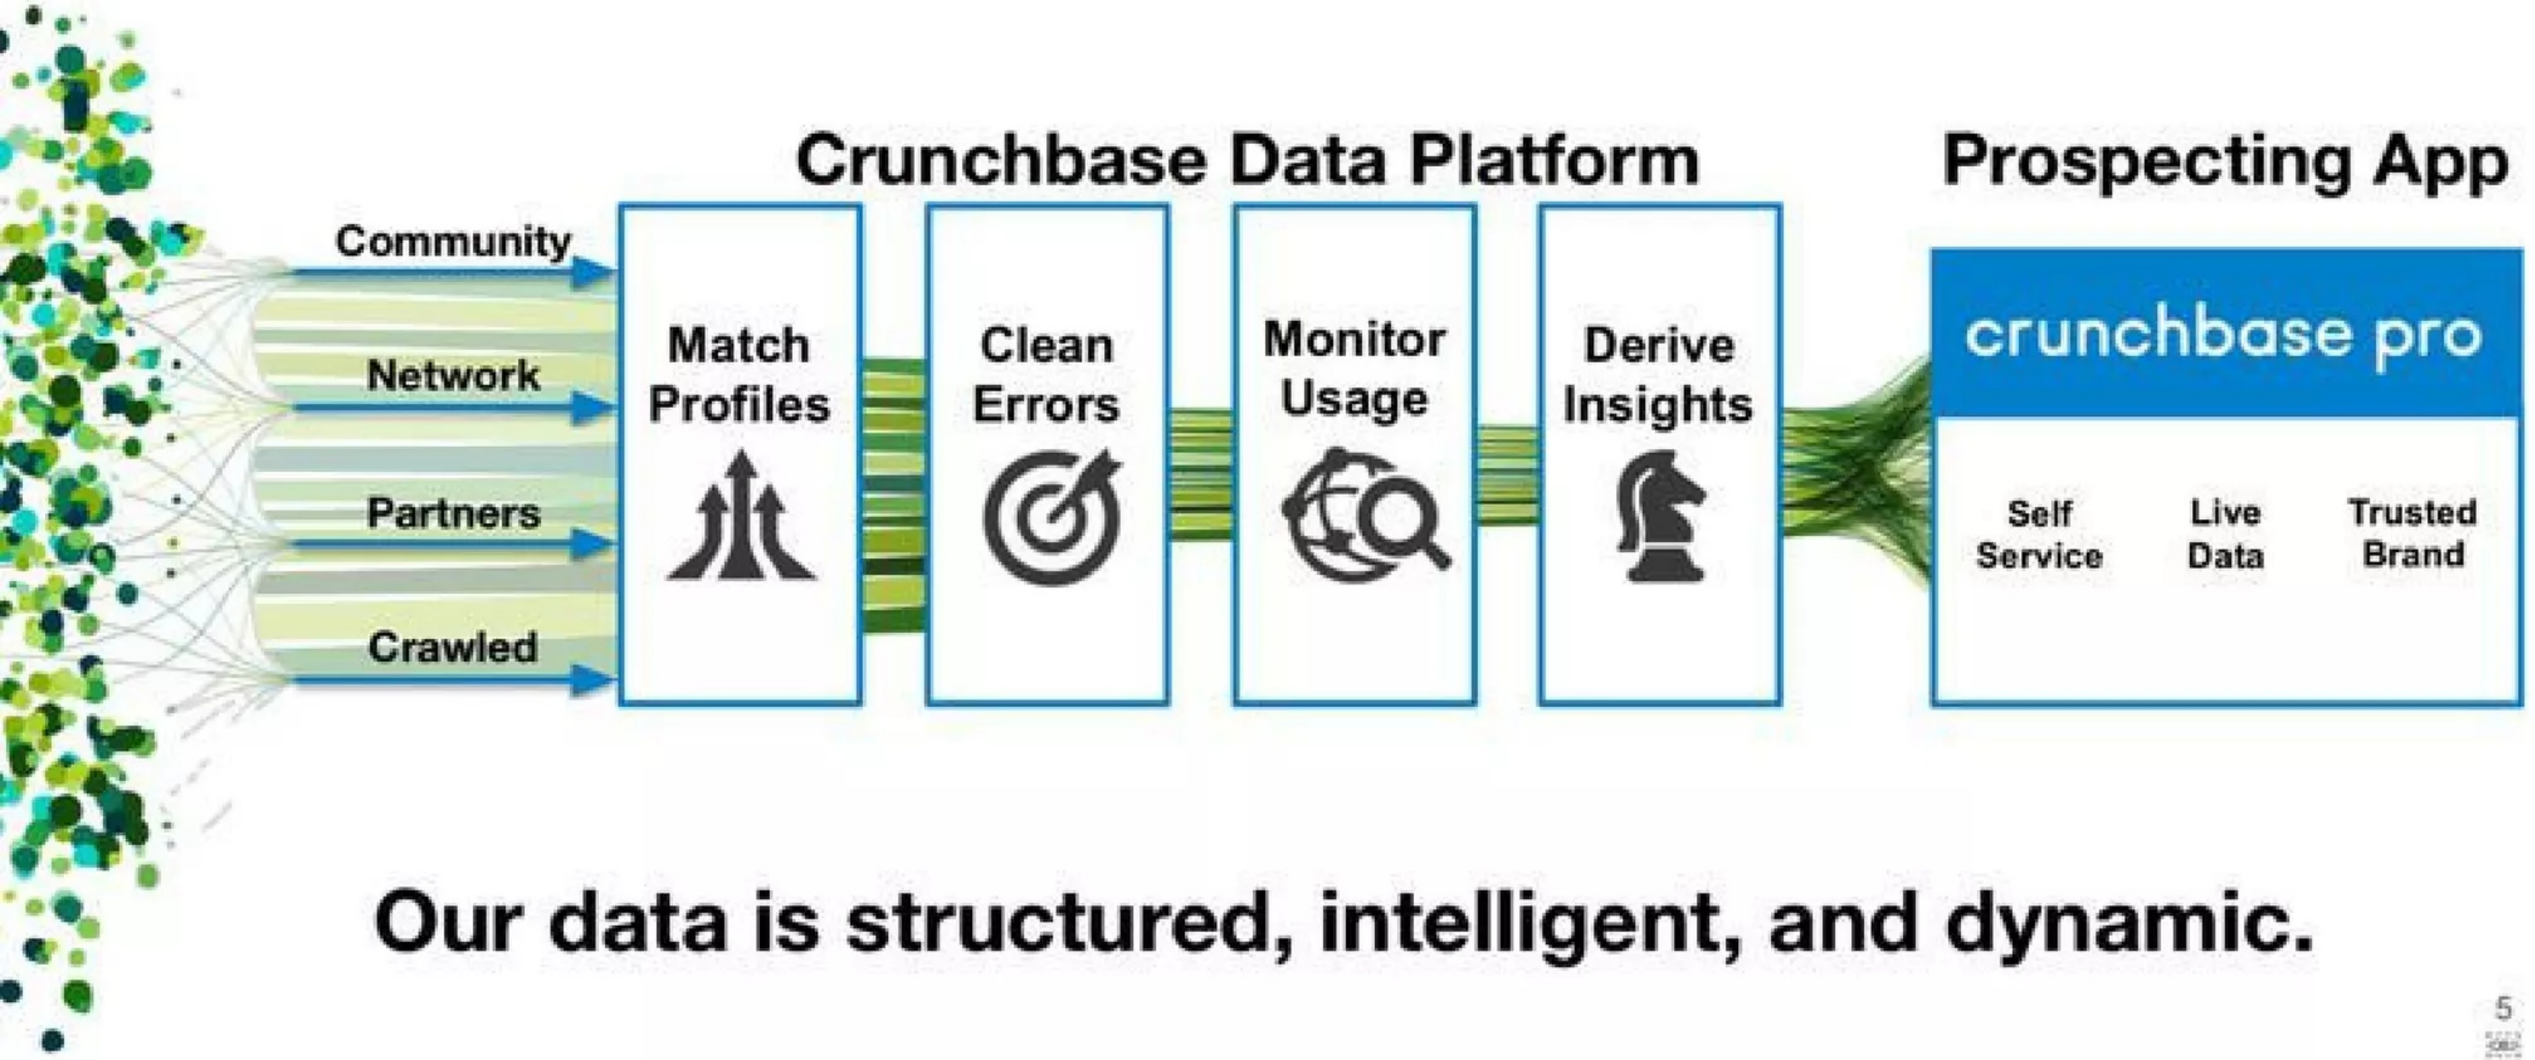

## Private company data

- Opaque
- Unstructured
- Unreliable
- Quickly out of date
- Expensive
- Not a graph
- Not easily monitored

## Existing solutions

- Typically focus on productivity
- Track progress - not fill pipeline
- Built on top of empty databases
- Rely on you to provide the prospects
- Go stale after import of data
- Don't track buy signals
- Don't suggest new prospects

# Crunchbase unlocks those opportunities by offering a world class prospecting tool on top of our proprietary data platform

## Our data is structured, intelligent, and dynamic.

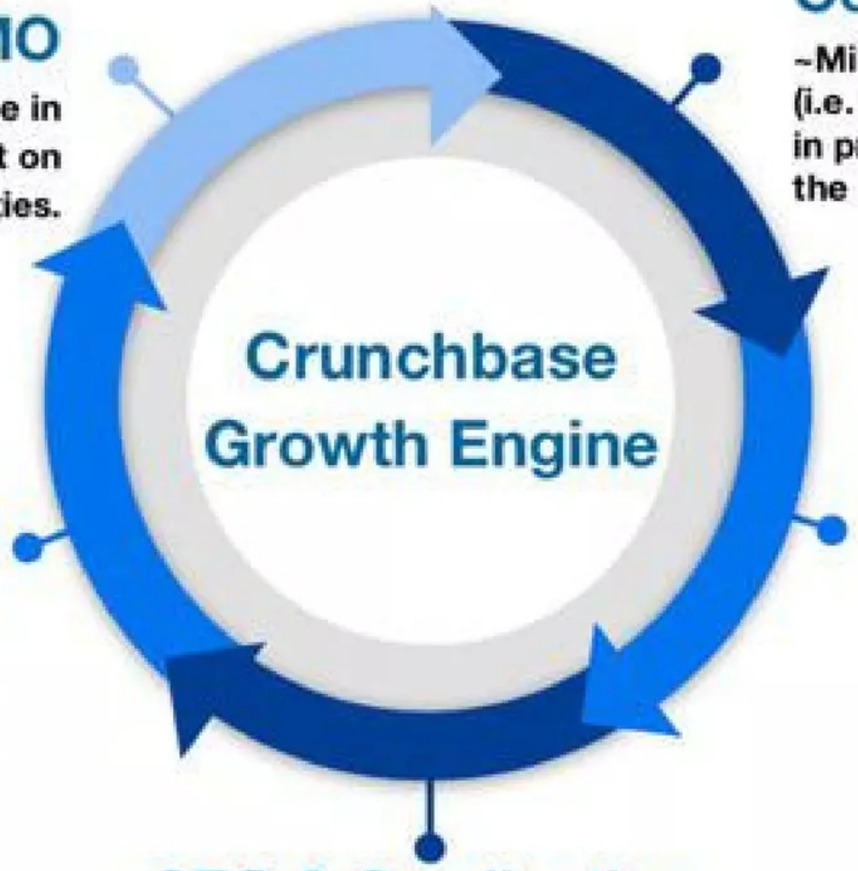

# Our unique dataset drives our growth flywheel

## FOMO

Data owners realize that they need to be in Crunchbase, or they will miss out on potential opportunities.

## Community & Partner Data

~Million community members and 4000 partners (i.e. governments, VC's, accelerators, events) add in proprietary primary source data to be part of the best company data platform.

## User and Prospect Engagement

People searching for company information discover Crunchbase. And once inside our ecosystem, they find more value through adjacent data and similar companies.

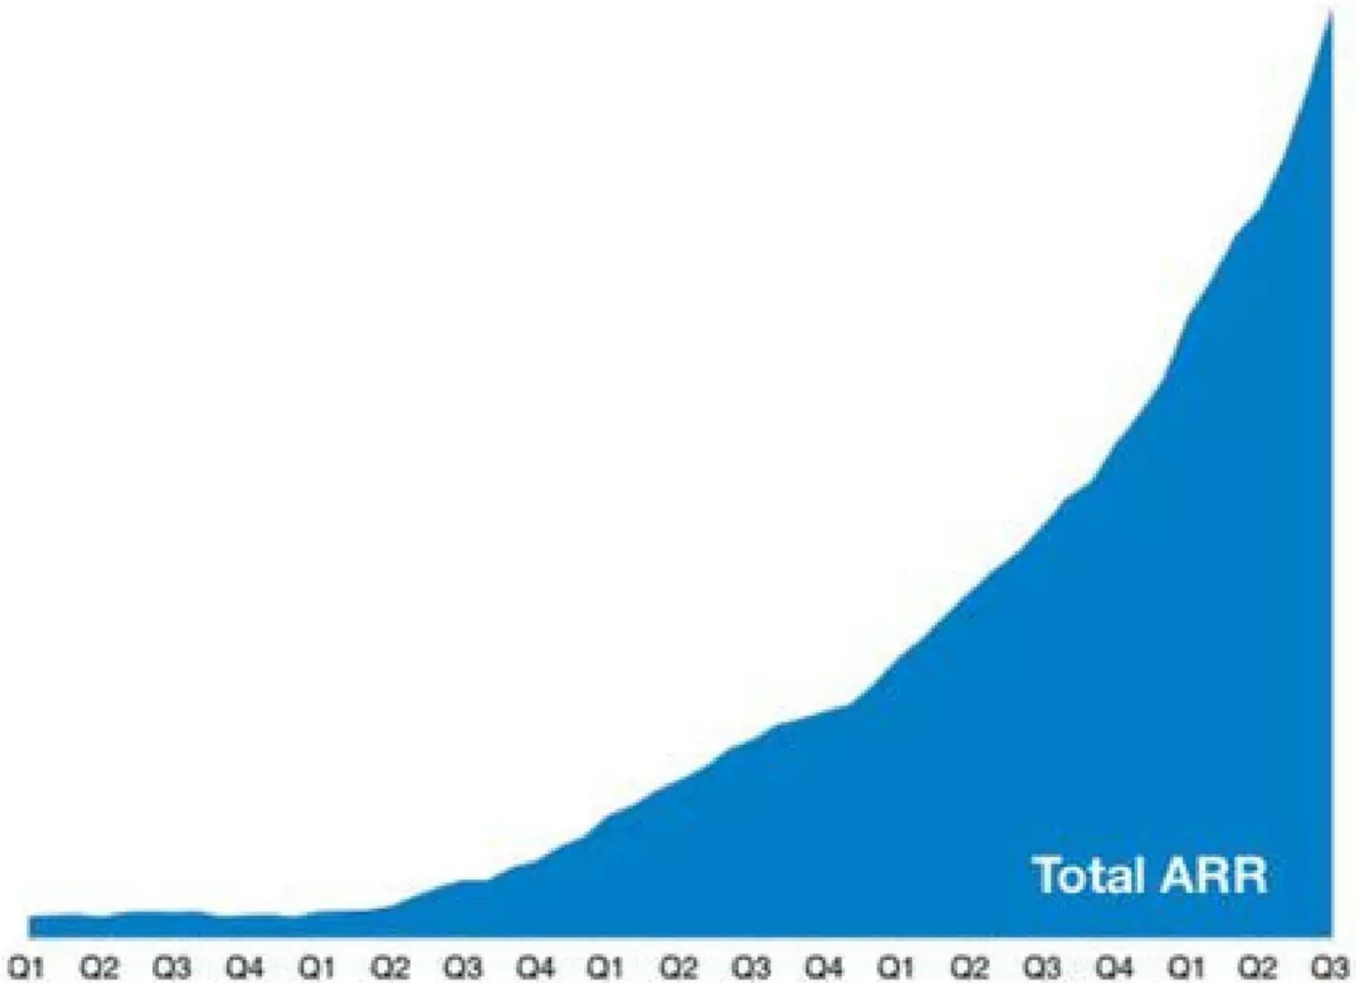

## Intelligently Enhance & Derive Data

Automatic routines within Crunchbase derive, supplement, and build upon source data and usage data. These updates trigger new promotion events from automatic sources (news, twitter, etc), partnerships, and the community.

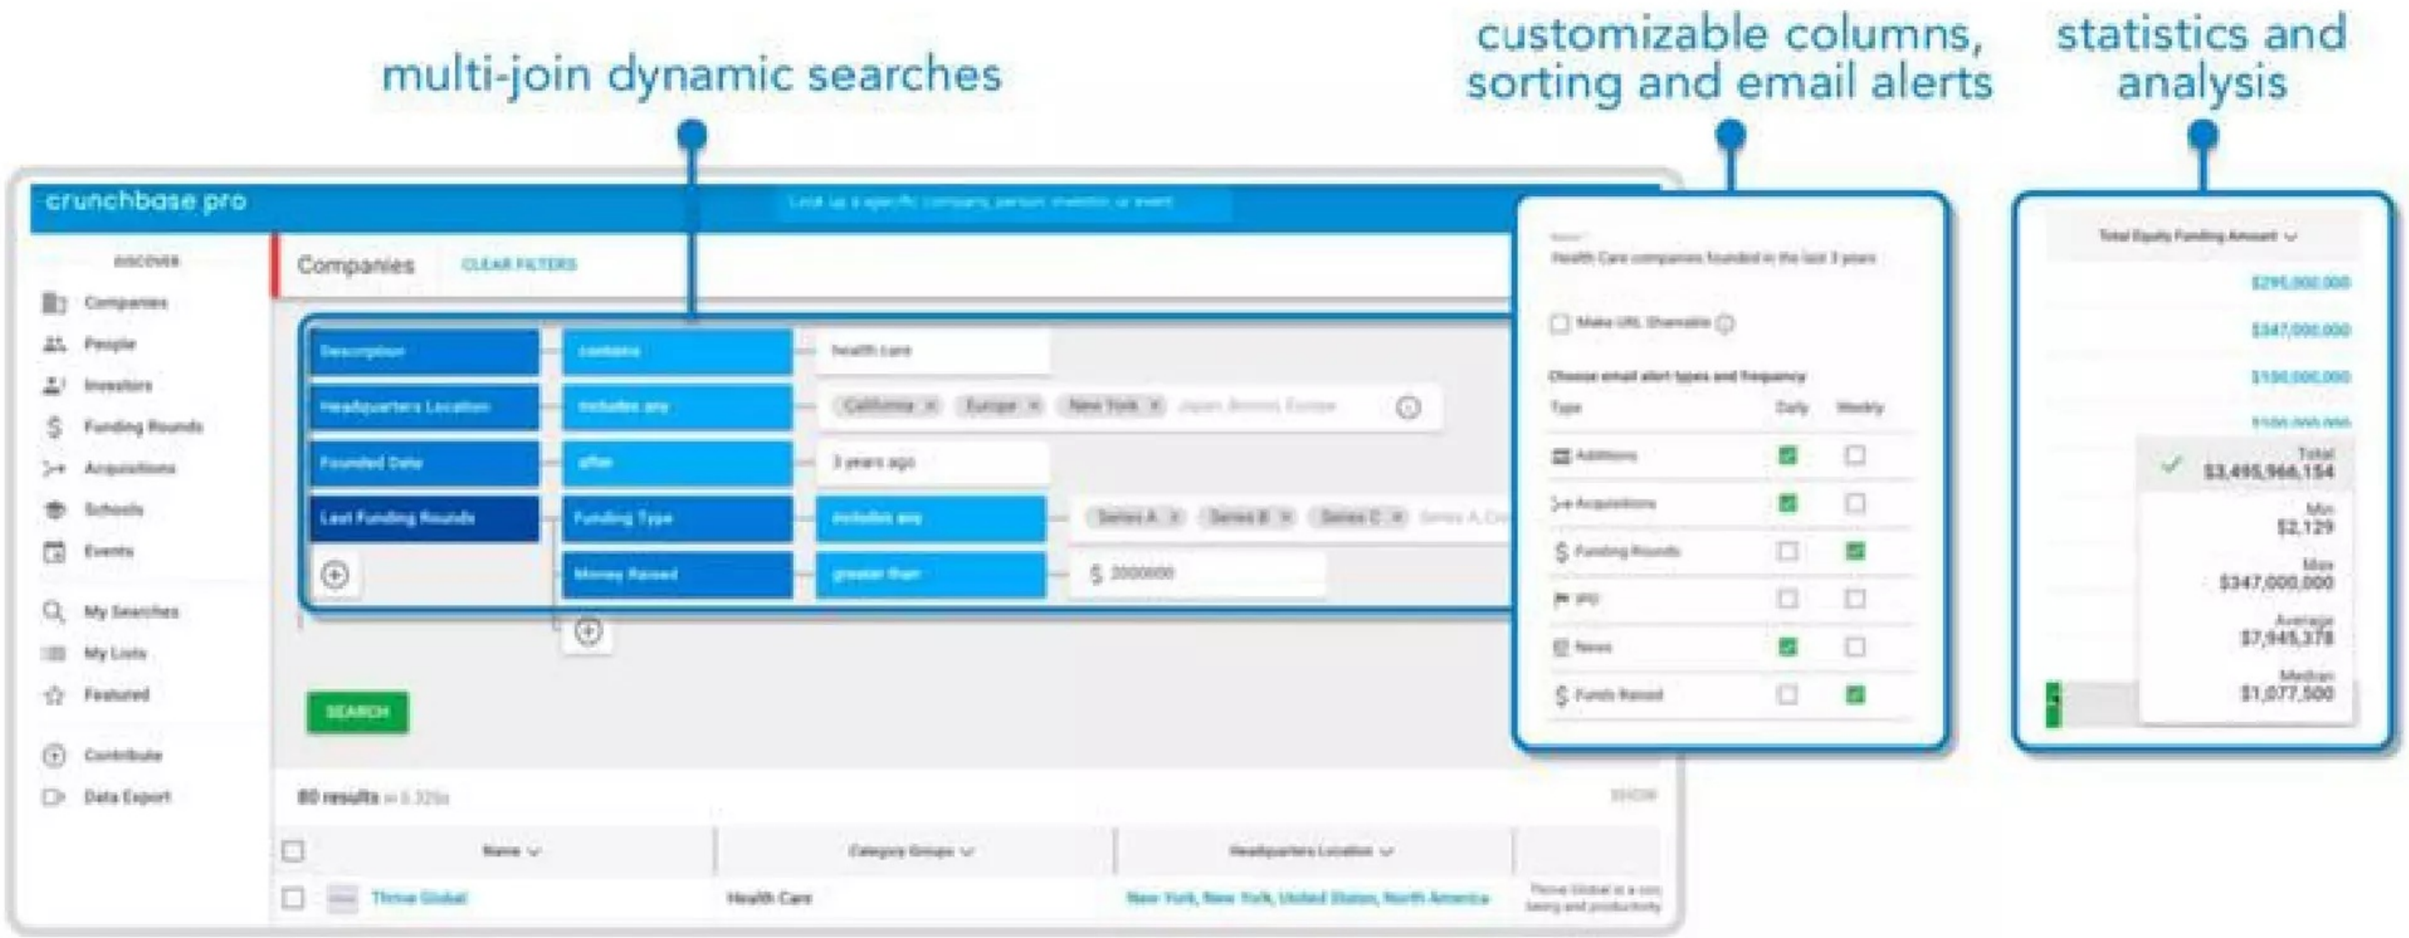

## SEO & Syndication

Data is syndicated to our partners while search engines crawl the latest updates. They re-engage with us regularly as we update information. This leads to higher relevance and more first page SERP keywords.

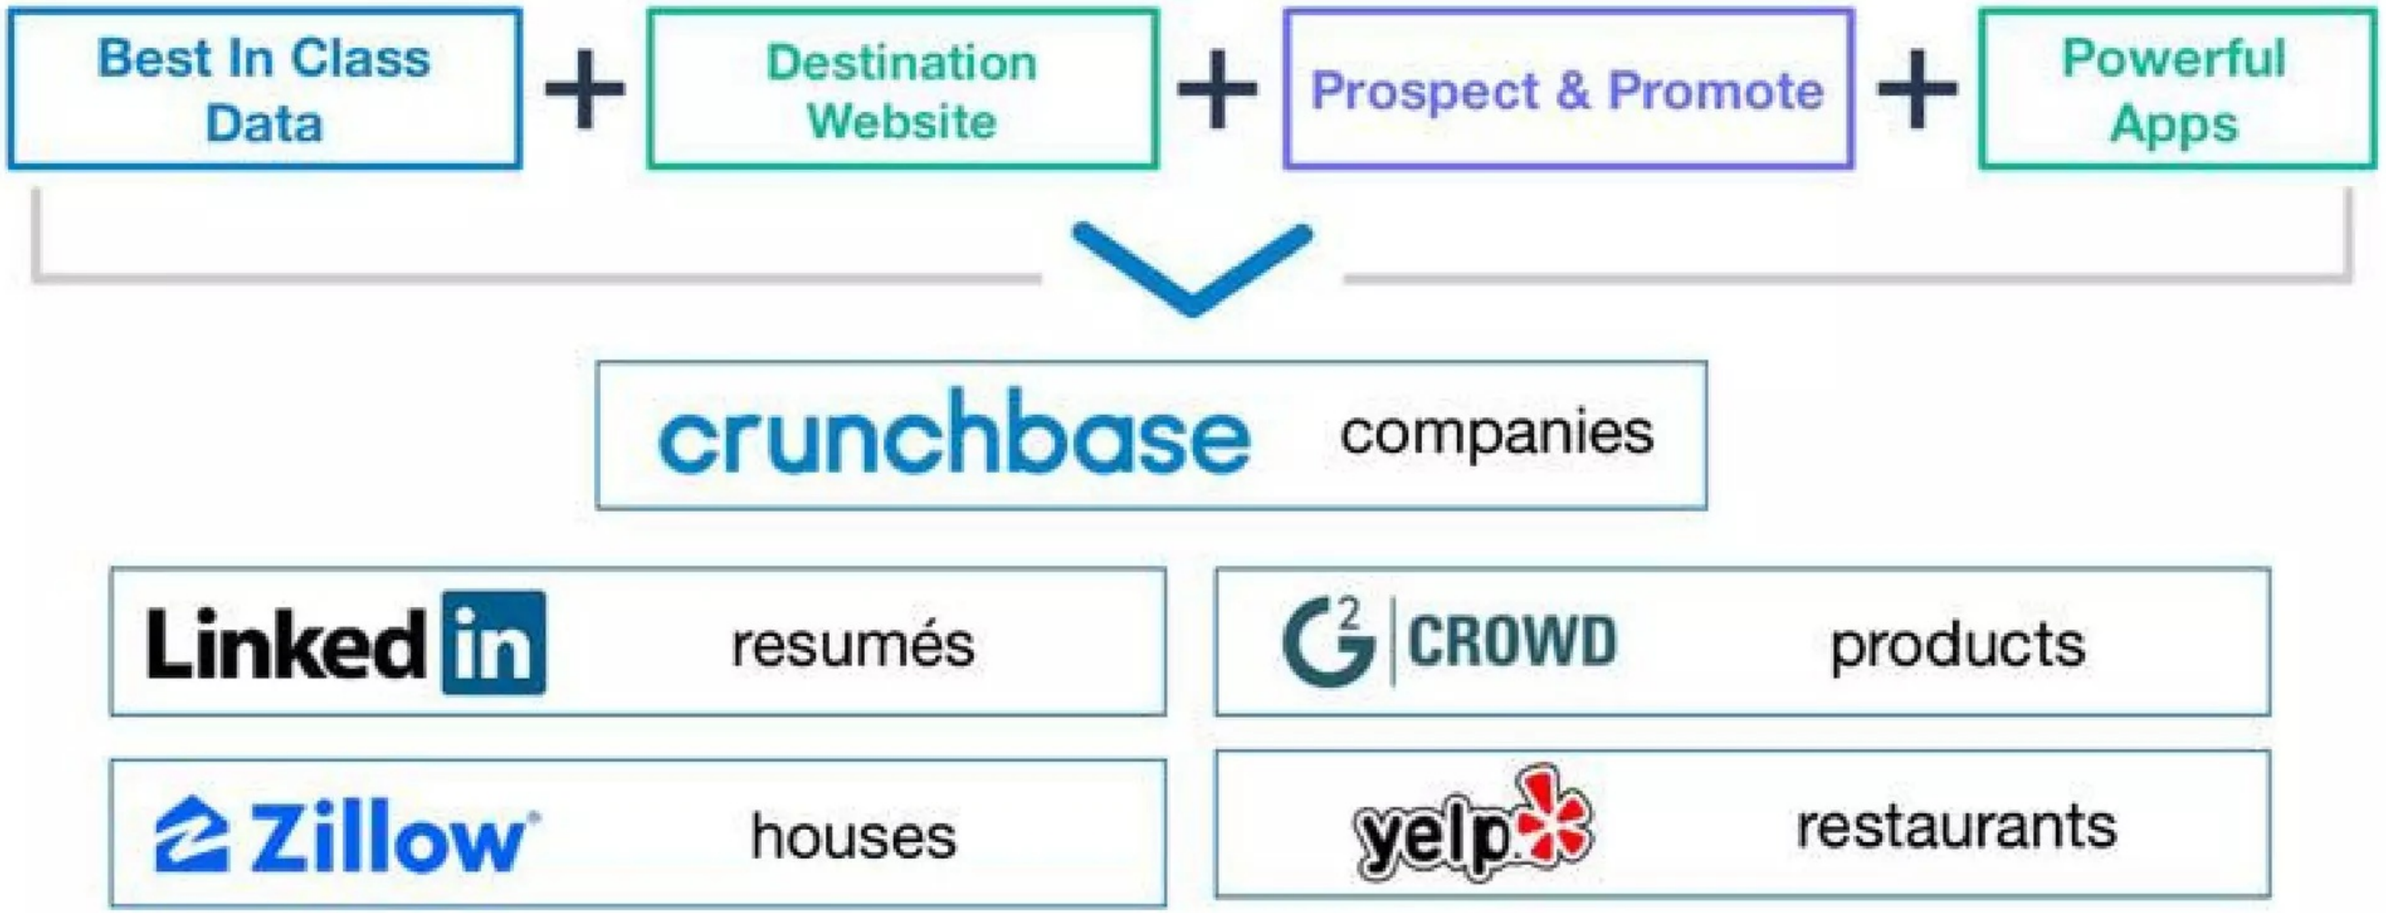

# And it's paying off: we make money quickly and efficiently

# Over xxk professionals pay us for prospecting tools

# This is a proven model that works

# Massive $35B market in private company prospecting space

# We know what we're doing and we are here for the same reason
