**Gernot Höflechner AT**
CTO

- CTO at Small Improvements
- Co-founder of Affillimate
- Creator of award-winning education and analysis tools for Latin and Ancient Greek

**Gabriel Lovato BR**
Design/Product

- Lead Product Designer at Small Improvements
- Lead Product Designer at Klarna
- Product Designer at Zalando

**Employee experience is scattered across journeys and tools.**

This negatively impacts both HR teams and employees.

**For HR Teams**

- Administration time sink
- Prone to human error
- Missing data for decisions

**For Employees**

- Confusing & disjointed experience
- Anxiety or ambivalence
- Feel like HR 'nags' them

dado

## Give every employee a clear and coherent experience for every moment that matters.

Design the holistic employee journey in Dado and let the data flow to the systems and tools where you need it.

- Deliver consistent and equitable journeys for all
- Automate emails, data input, reminders, and more
- Sync data from and to HRIS, ATS and other systems
- Monitor employee progress and identify issues
- Manage expectations, create security and excitement
- Simplify the involvement of managers, IT, and more

dado

# Why that's important

**Over 3% of all US employees quit their job in 2021**
Finding and replacing highly skilled workers costs ~100-200K per departing employee

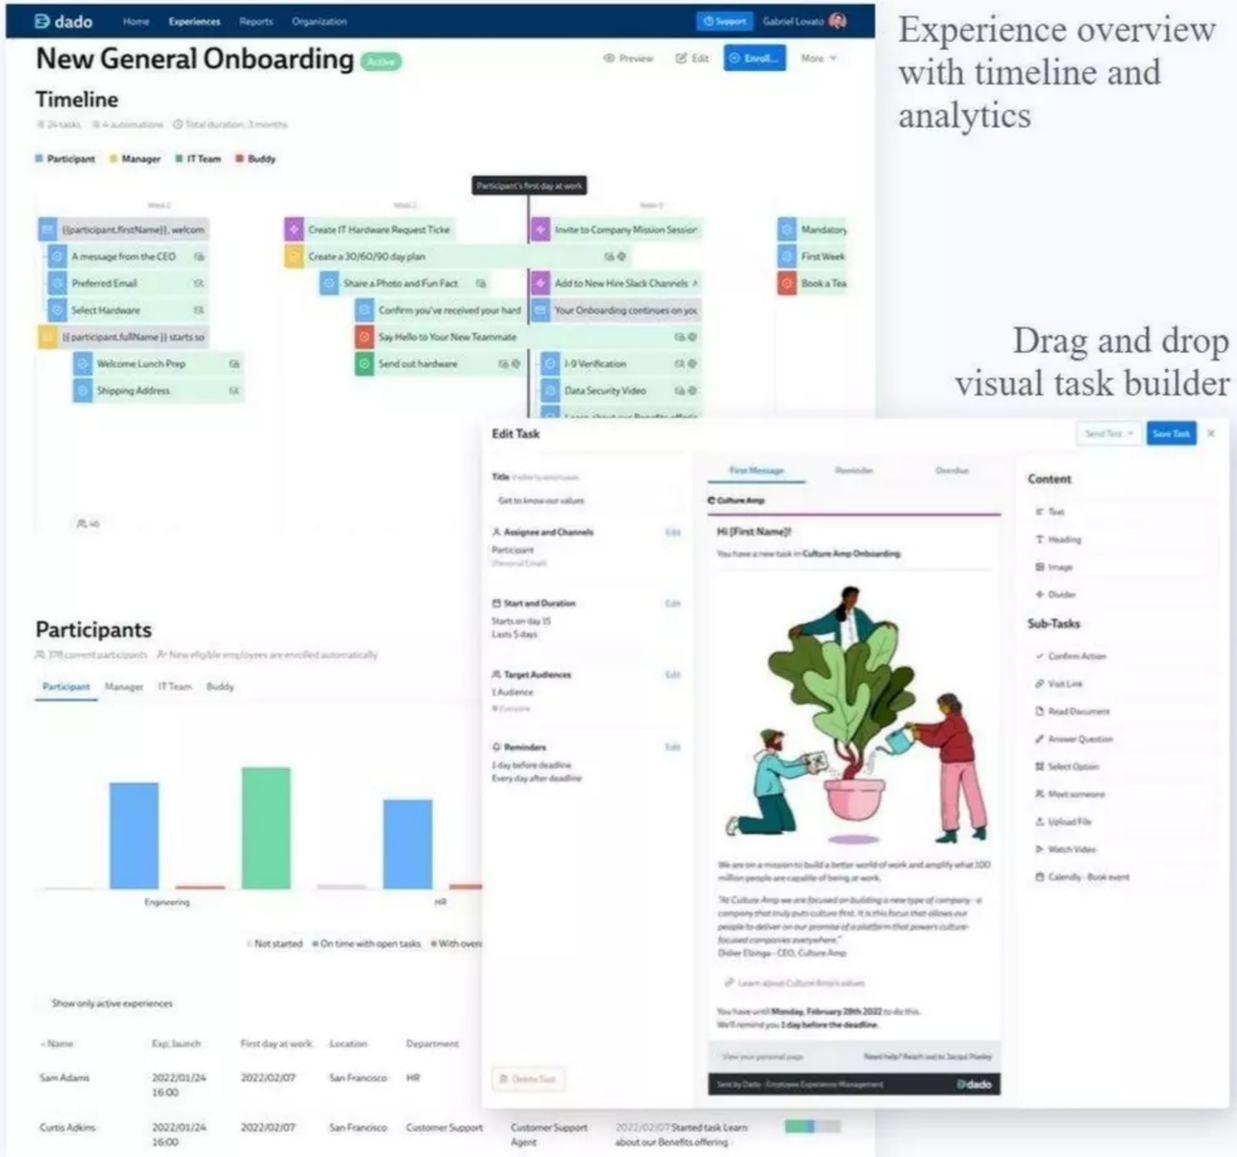

**Managing employee experience is a time and money sink**
E.g. manually onboarding a new hire takes 10h+ of HR work, incurring costs of around $10K *per new hire*

**People Teams are flying blind.** Employees' experiences generate no data that can be used to iterate, optimize satisfaction and reduce costs.

# Admin App

Experience overview with timeline and analytics

Drag and drop visual task builder

HR Admins can plan experiences from scratch or use templates

Auto-enroll employees from HRIS, ATS to experiences based on profile data

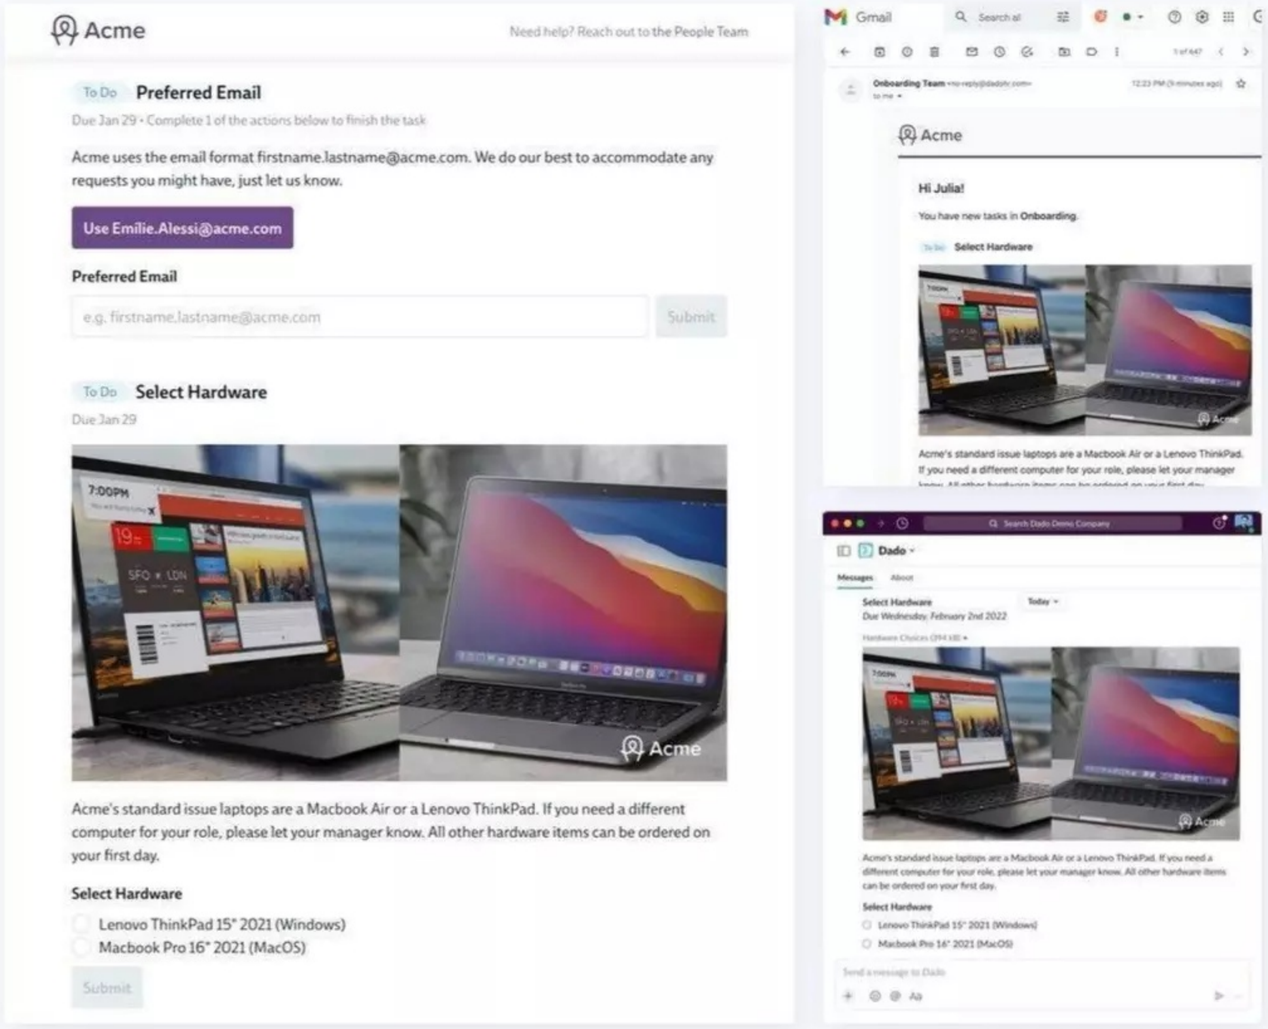

Assign different tasks based on employee role and profile

Track completion rates, find issues and bottlenecks

Drill down from company wide to employee level analytics

dado

# Employee App

A Dado task viewed in the Employee Page, email, and Slack

Branded and personalized employee page: a single source for comms, documents and tasks

Slack integration allows to receive content and complete tasks directly in the flow of work

Each task has actions that must be taken to be marked as done – no self-reported checklists

Multiple task types: question, select, send file, read document, etc. + more through integrations

dado

## Enterprise

1500+ employees

- Competing with smaller orgs to keep and attract talent
- Has implemented Workday or similar
- Feels need for more employee-friendliness

## Scale up

~500+ and growing fast

- Needs to onboard a lot of people fast and well
- Iterate people processes without slowing down
- Keep employee experience stable while HR tool stack changes

## Small + visionary

50-250 employees

- Culture-focused – get process out of the way
- Wants to quickly spin up new initiatives and test them out
- Can't throw headcount at a problem

dado

# Customer Feedback

Looking at the picture where all the different workflows appeared in the system, *I felt like my HR brain was visualized.*

-HR

Keep with Dado - it was really easy to follow

-New Hire

I thought Dado is a great addition and helps bring consistency to our onboarding process.

-Manager

I really think this product can help *reimagine what employee experience is* and what it feels like.

-VP People
