

DivvyCloud

WHY: Empower customers to realize the benefits of open and accessible software defined infrastructure

HOW: **DivvyCloud** provides enterprises with an extensible platform that autonomously enforces governance, security, and compliance policies

Who is DivvyCloud

XXX ARR

XX

Fortune 500

Of our 34 customers 12 are in the Fortune 500

50 Employees

Majority of the company is based in Washington D.C.

Low churn

We have only lost 1 enterprise customer in 6 years

Capital Efficient

We have raised $10M over the life of the company

Strong ACV Growth

Across all customers we have 173k ACV

twilio · Discovery Communications · NIKE · GE · Kroger · Fannie Mae

ancestry · AUTODESK · Fidelity Investments · Turner · Adobe · 3M

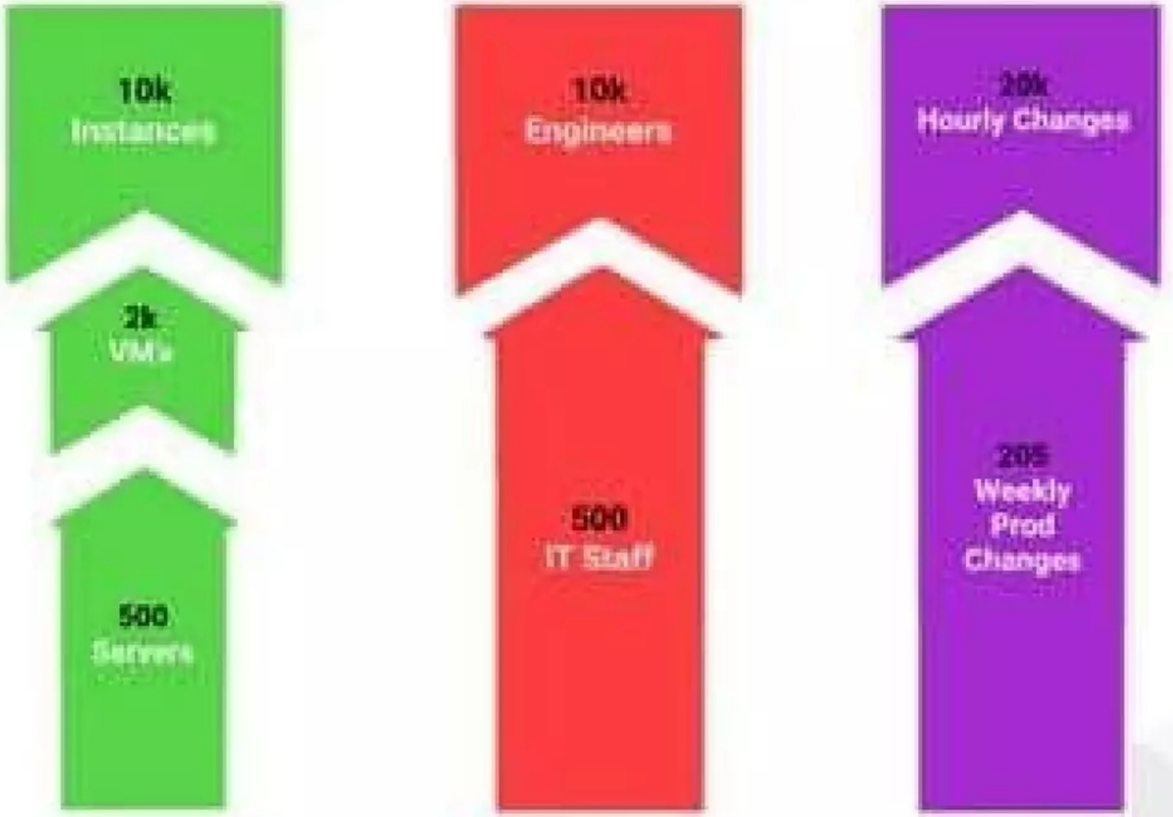

Leadership

- 01 **Brian Johnson** – CEO/Co-Founder
- 02 **Chris DeRamus** – CTO/Co-Founder
- 03 **Peter Scott** – COO/CFO
- 04 **Chris Hertz** – CRO
- 05 **Jeremy Snyder** – VP of Sales
- 06 **Scott Totman** – VP of Engineering

Business transformation problem

Operating at Scale is not just a technology problem.

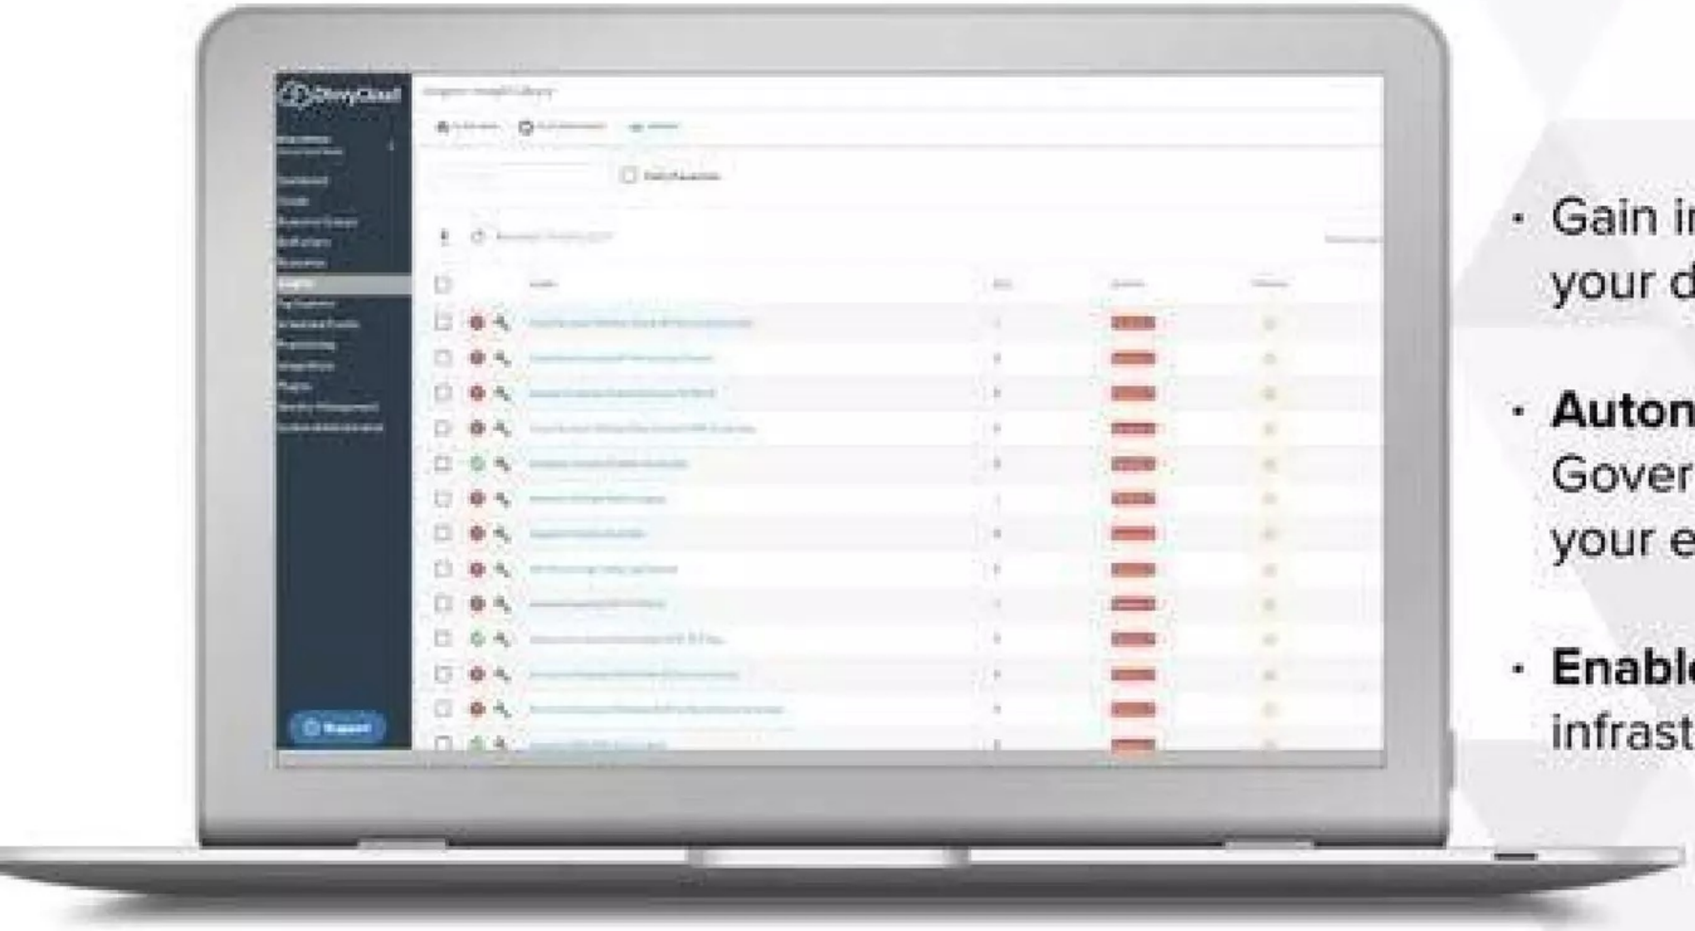

Freedom is Good -||- Chaos is Bad

The rate of change and the dynamic nature of cloud infrastructure has outstripped human capacity to analyze and react.

Today's Infrastructure monitoring and reporting tools just don't cut it anymore

Proprietary & Confidential

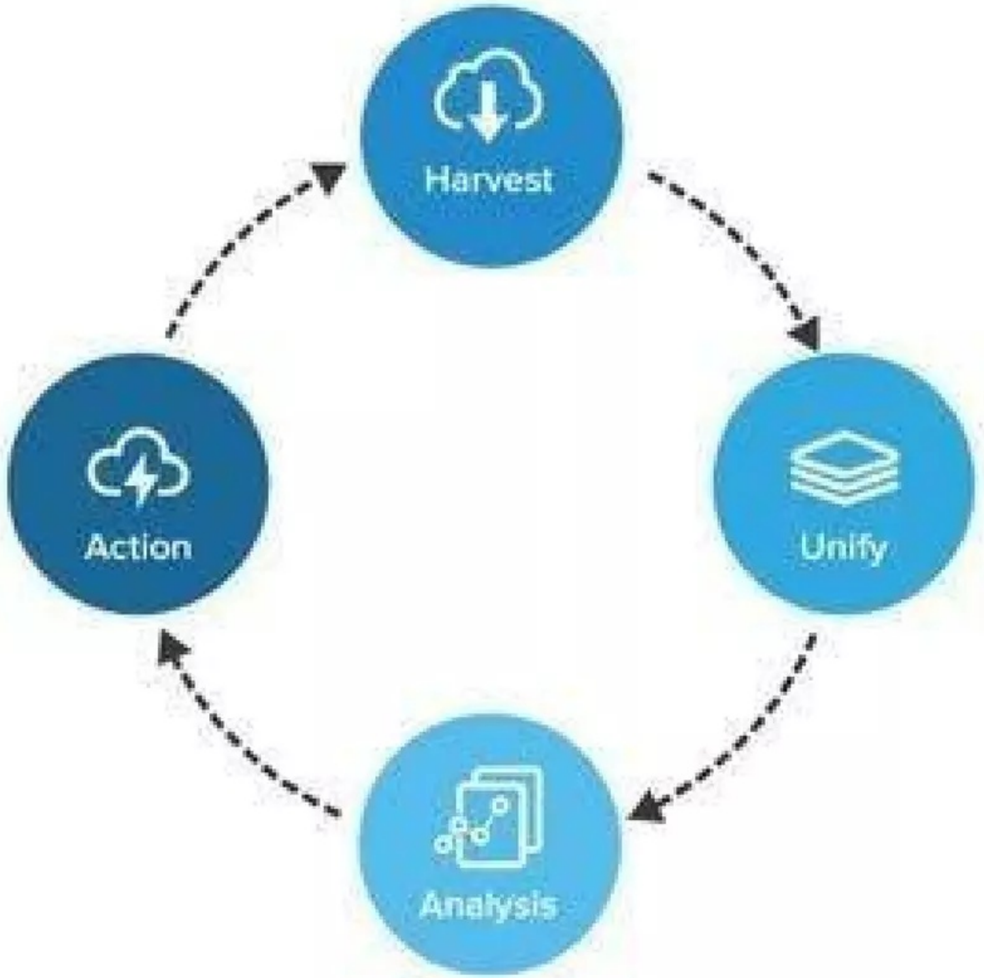

Automated Guard Rails for your Cloud Environment

- Gain in-depth, realtime **visibility** across your dynamic cloud infrastructure
- **Autonomously** enforce security, Governance, compliance polices across your entire environment
- **Enable productivity** of self-service infrastructure, while remaining in control

Proprietary & Confidential

How does it work

Analyze cloud infrastructure in real-time and react to change based on enterprise defined policies (Bots) that are built using BotFactory

Harvest
Pervasively harvest data using cloud native API endpoints.

Unify
Convert infrastructure data into standardized data model

Analysis
Analyze unified data and identify change in cloud infrastructure

Action
Take action to notify, record, and ultimately correct non-compliant resources

Use Cases

Governance

Single Pane of glass
Unified Data Platform
Data Export
Unified control plane
Tag Policy

Security

Network security
Identity Access Management
Data Protection
Data Leakage Protection
Resource/Region Whitelist

Compliance

PCI-DSS
HIPAA
CIS
NIST 800-53
More..

Differentiation

Action

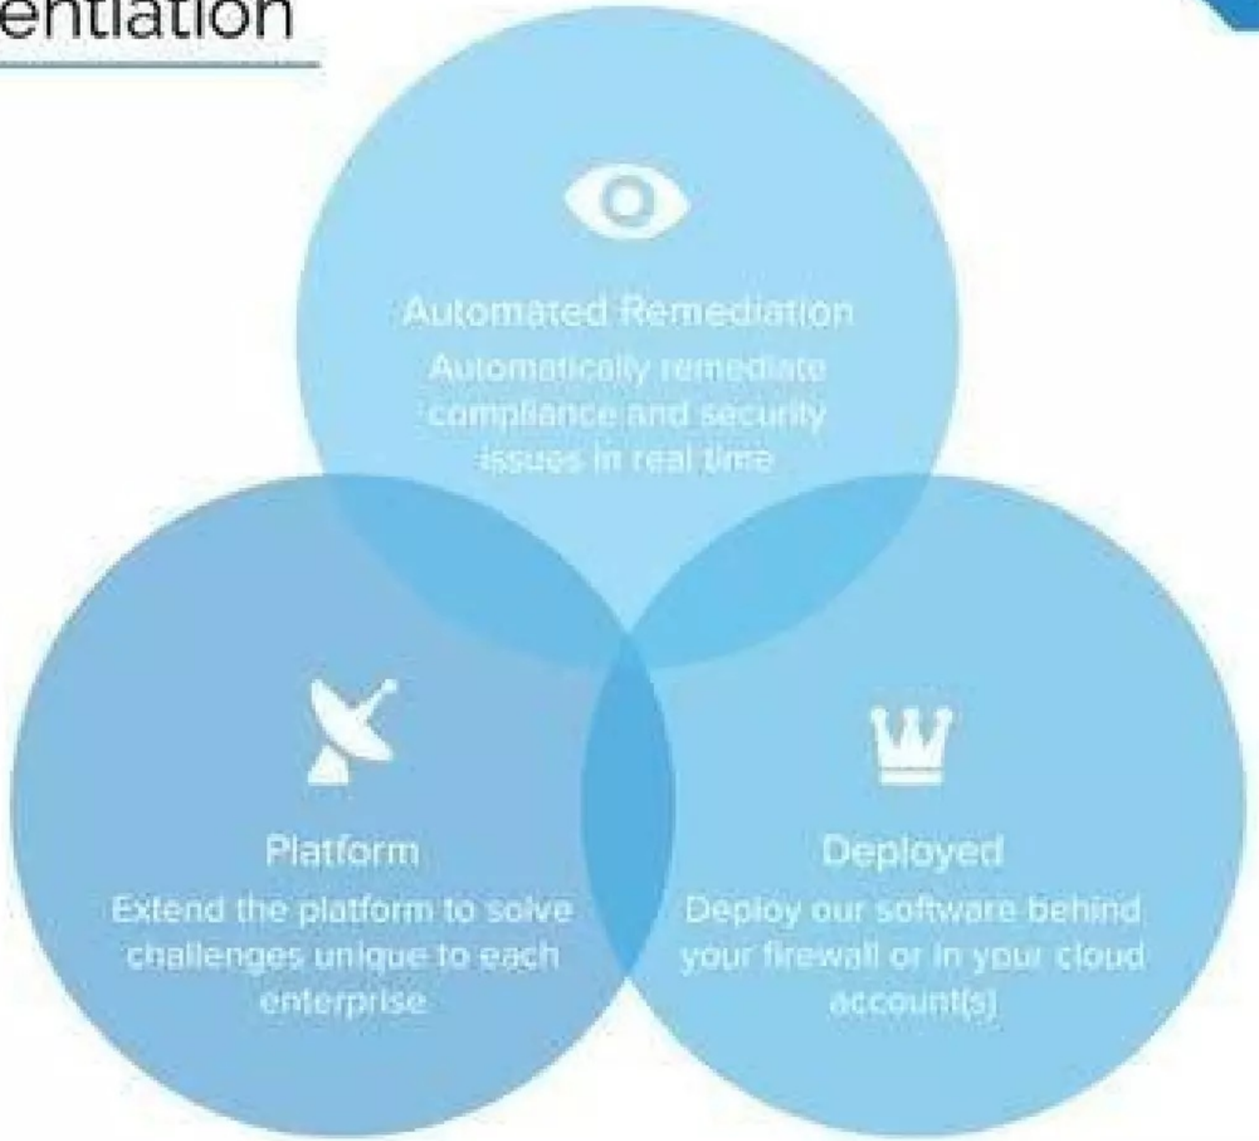

User defined policy and **autonomous remediation** allows our customers to keep up with the rapid pace of change in the cloud

Platform

Extensive platform first approach provides our customers with the ability **customize** the software to meet the unique challenges of each enterprise.

Deployed

Our solution is containerized and easily deployable, providing our customers with a **secure**, extensible, and **flexible** solution.

We are Just getting Started

Cloud Control Plane
Build an expert cloud system that is used by all of IT Ops, Sec Ops, and DevOps to orchestrate and automate cloud environments across the entire enterprise

Unified Visibility
Build a cloud agnostic bi-directional data model that provides deep, real-time visibility into cloud resources

Contextual Intelligence
Make the system contextually aware by adding data from up the stack such as containers and identity.

Automation Engine
Create a generic automation platform that can be used to remediate issues across multiple software defined infrastructures

Our Raise

Enterprises Sales
Continue to grow direct and channel sales

Innovation
Add more data to enable platform to be contextually intelligent

Marketing
Increase customer awareness through ABM, events, and brand

Product
Focus on productization of known use cases
