DEEP TECH AWARD 2021 FINALIST

Company purpose

Domi Labs is developing a solution that **bridges the gap** between **identity management** and **workflow automation.**

We're using verifiable credential technology to streamline business-customer interactions and introduce truly end-to-end digital business processes.

Our **first use case** is the **housing rental market.**

Renting today

domi

01 Applications & tenant selection are **still paperwork heavy**

02 Inspection of paperwork is **highly time consuming**

03 **Sensitive personal data** is regularly shared

04 Data regulations pose **risk of high fines** for non-compliance

Facts

domi

Workload

12

work hours to close a contract

Viewing requests

300+

per listing in capital cities

Germany’s 2nd largest GDPR fine

€14.5M

issued to a prominent housing company

domi

Rental applications are the most **time-consuming** and **inefficient** part of renting out properties.

We want to change that.

Solution

domi

domi

Mobile app& software platform that supports the secure exchange of **pre-verified identity, financial and credit information.**

Domi empowers property managers to select the perfect tenant fast and with confidence, and offers tenants full personal data control.

Efficiency and security for both property managers and tenants

domi

PROPERTY MANAGER

Software platform & API

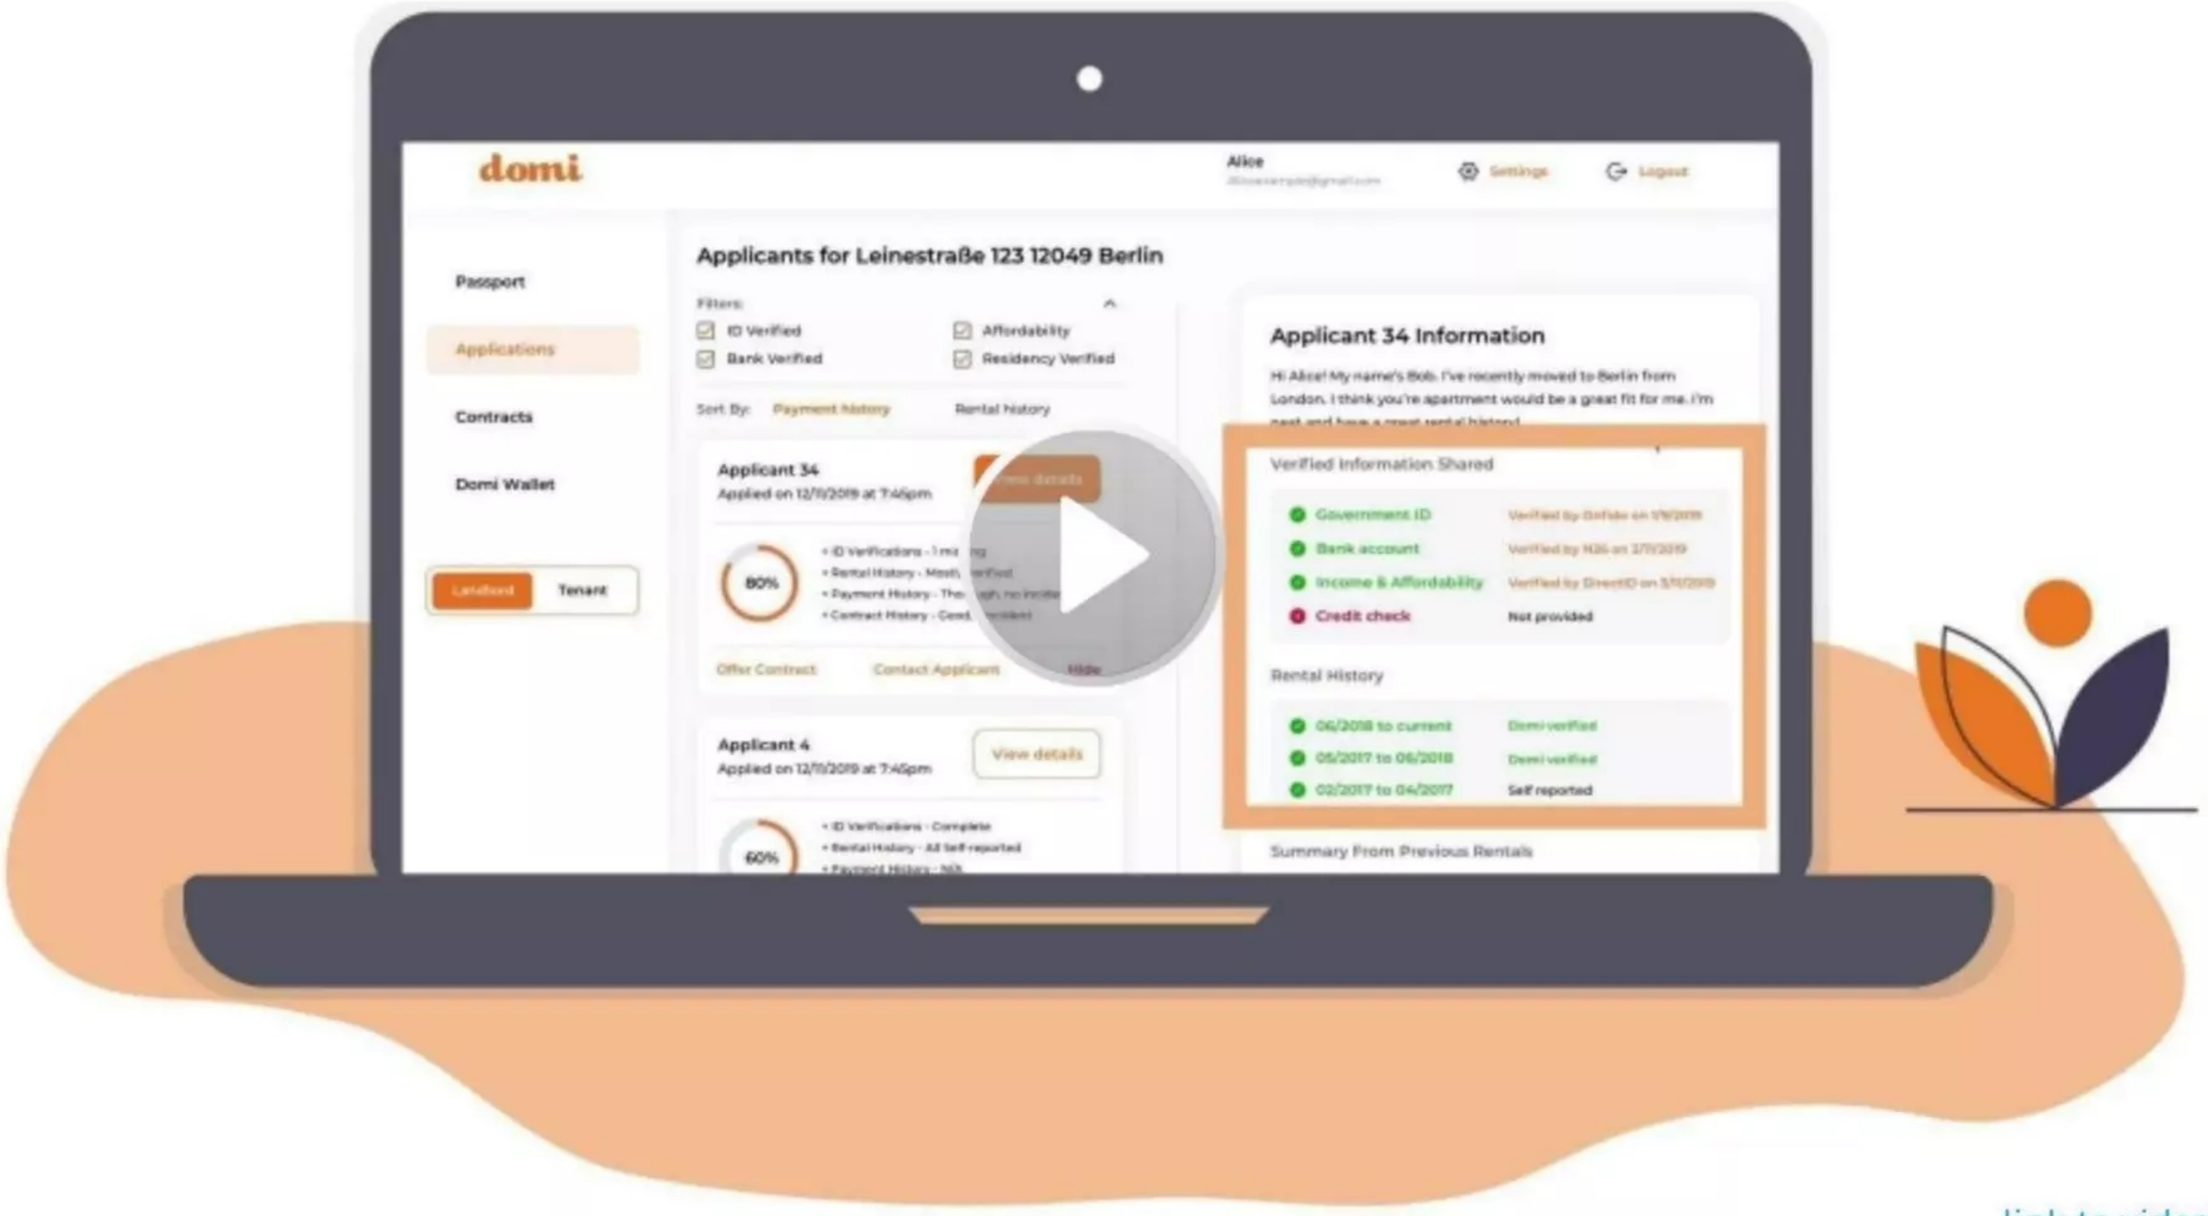

Tenant selection powered by pre-verified applications

TENANT

“Digital Passport” mobile app

Verifiable personal data credentials for simple one-click applications

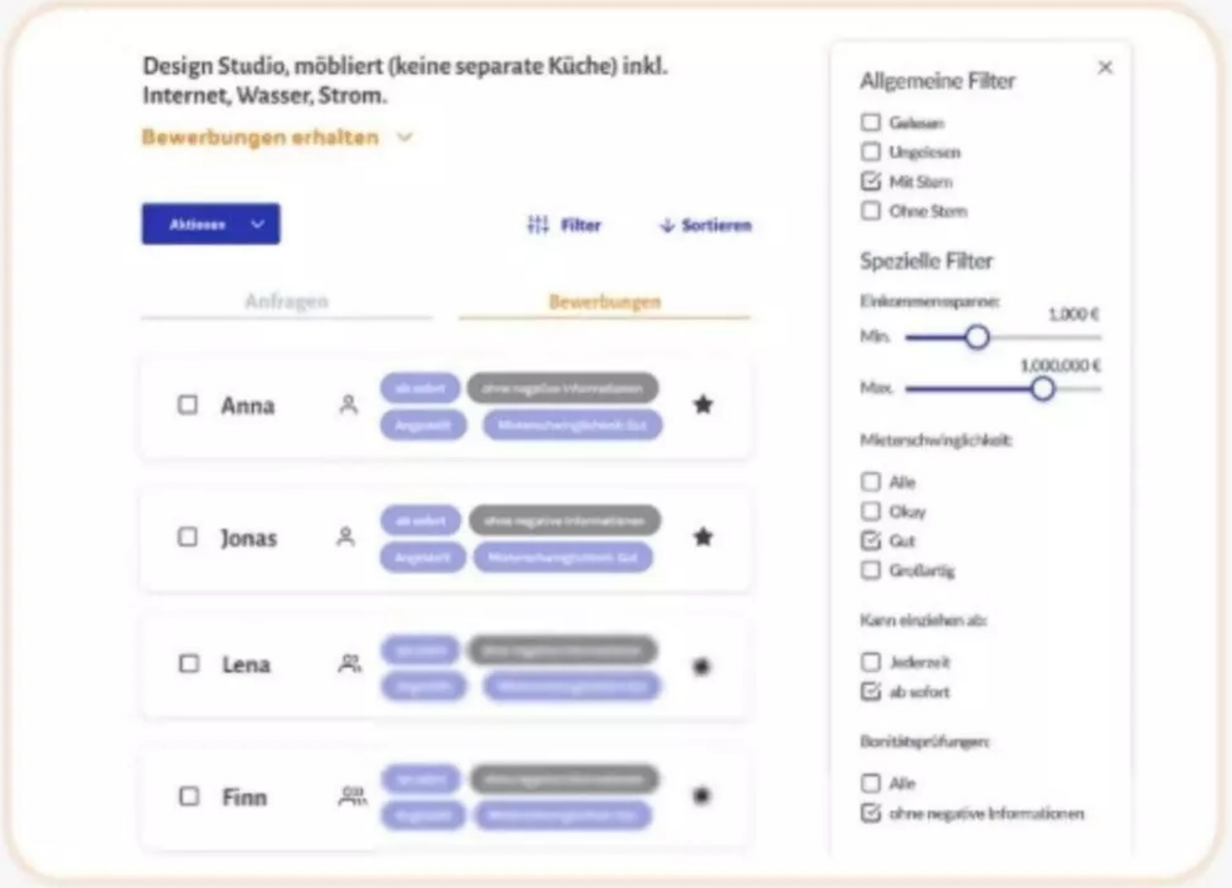

[link to video here]

For Property Managers

domi

- Application management dashboard and API
- Tenant selection based on verifiable identity, financial and credit data
- Digital contract drafting and verifiable electronic signatures

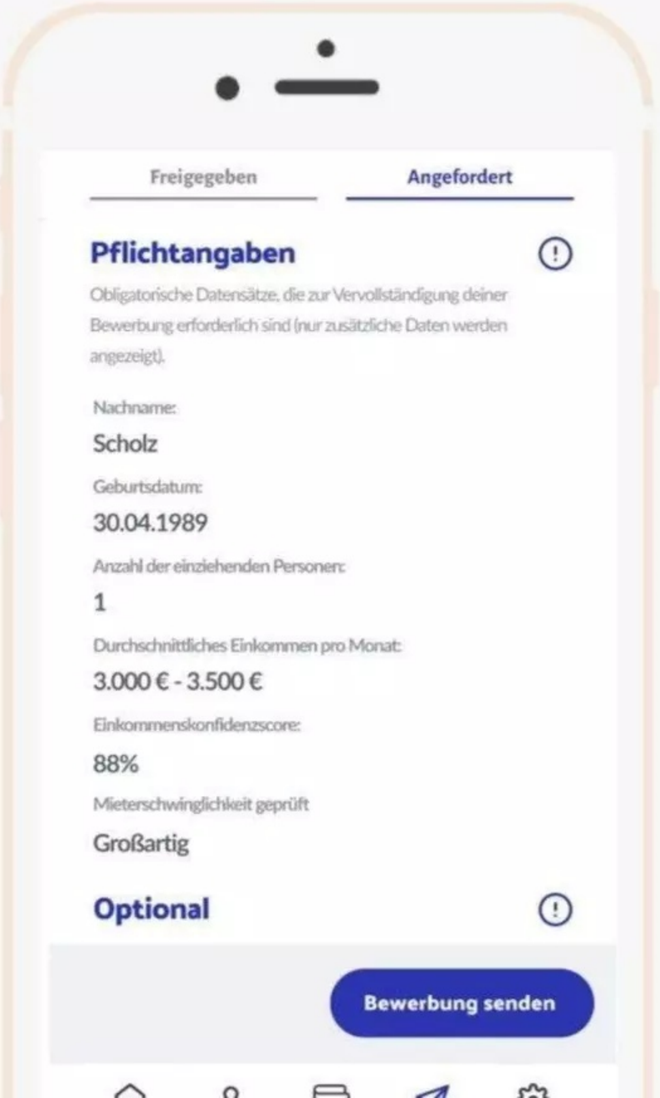

For Tenants

domi

- Reusable digital identity, bank and credit credentials
- Universal application management tool
- 100% user data control

Domi is based on the future of digital identity

Self Sovereign Identity (SSI)

domi

SSI is a model for managing digital identity where a user has complete control over their personal data.

Cryptography, semantic web and decentralisation are used to achieve principles of privacy, decentralised data storage and data minimisation.

Further reading: *A Beginner's Guide to Self-Sovereign Identity*

Innovation

domi

VERIFIABLE CREDENTIALS

Paper documents are replaced by cryptographically protected credentials

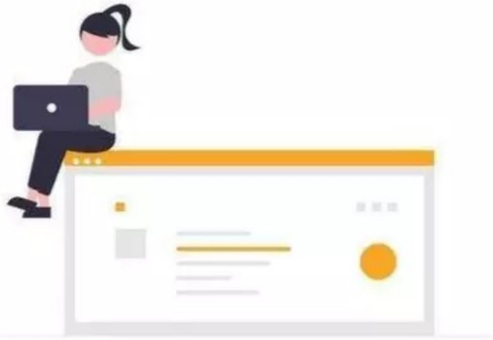

DECENTRALISED DATA STORAGE

Personal data is stored **only** on the user's device, providing full user control over data disclosure

SELECTIVE DISCLOSURE

Credentials are intuitively selected and can be partially or fully disclosed on an as-need basis

MARKETPLACE INDEPENDENCE

Regardless of where a property manager chooses to advertise a listing they will always be able to use Domi

Benefits

domi

Property Manager

Pre-checked and verified applicant information

Lower operational costs

Leaner application management - 50% more time saved over existing digital solutions

Simplified handling of tenant data with regard to GDPR and other data regulations

Prospective Tenant

Fast one-click-apply processUnified experience

Fast and guided acquisition of verifiable identity, financial and credit data

Keep track of applications in-one-place & on-the-go

User stays in control of their data (privacy-by-design)

Market Potential

domi

€26B	€6B	€2B
GLOBAL	EUROPE	DACH
750 M	**238 M**	**53 M**
RENTERS	RENTERS	RENTERS
54 M	**13 M**	**4.2 M**
RENTAL CONTRACT TRANSACTIONS PER YEAR	RENTAL CONTRACT TRANSACTIONS PER YEAR	RENTAL CONTRACT TRANSACTIONS PER YEAR

CUSTOMER INSIGHTS

75% of rental managers we interviewed are actively seeking a new digital solution to save time with document handling and viewing scheduling.

83% of rental companies we interviewed rate GDPR compliance as a major concern to their business, with housing companies expressing the greatest concern.

Why Now?

domi

The proptech market is at an inflection point.

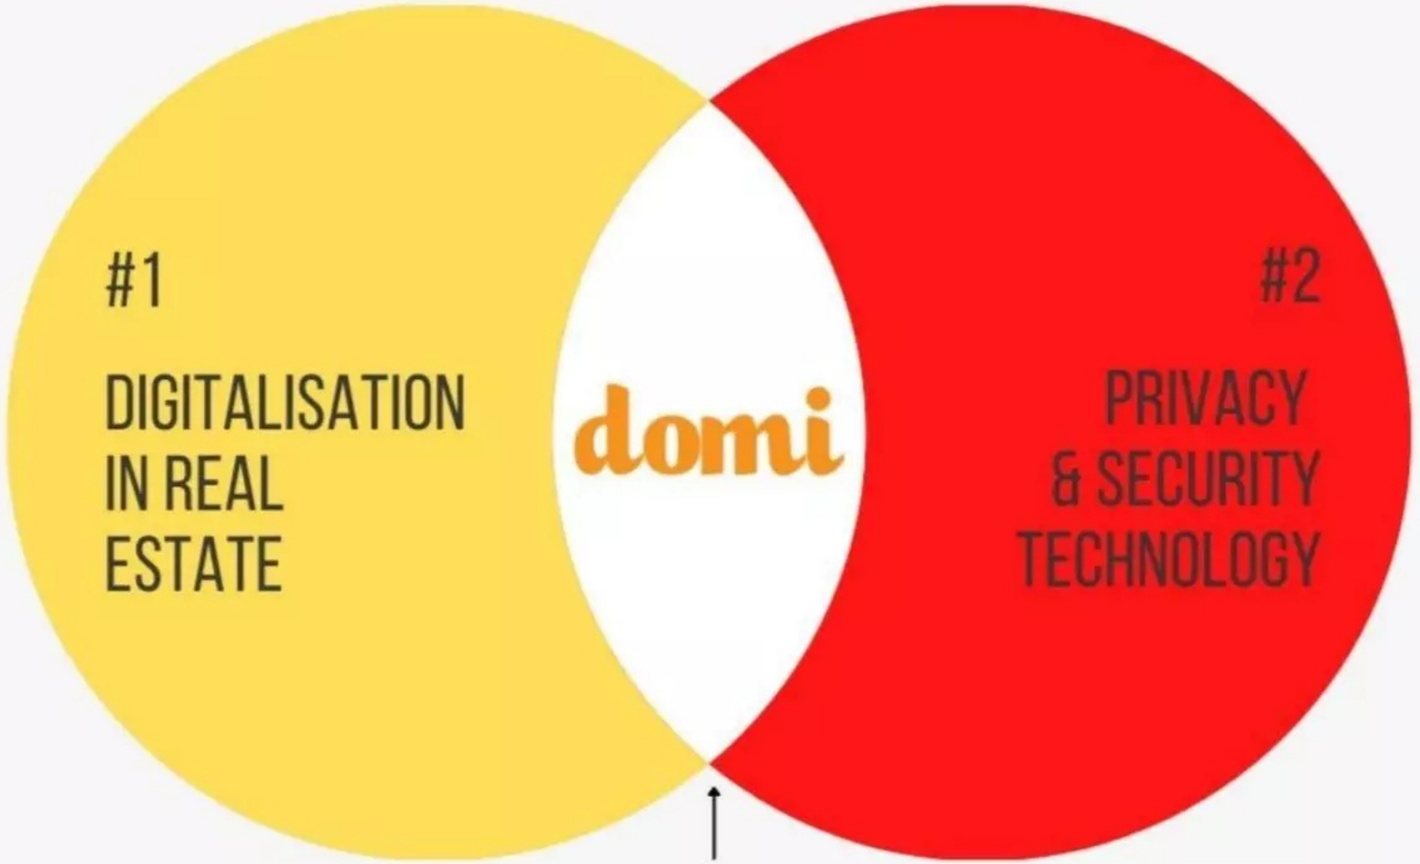

Accelerated industry acceptance of digitalisation and **growing investments towards a self-sovereign digital future.**
