endpoint

Pitch Deck

endpoint

About Us

- Full-service digital title and escrow
- An enhanced closing experience across web, iOS, & Android
- Built from the ground up through people, process, and technology

Recap: Endpoint Timeline

Endpoint Timeline

2017 - PRESENT

Recap: This resulted in a three phased approach to building Endpoint and we are currently in the Foundation phase

2018				2019				2020				2021				2022			
Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4

MVP | Product Market Fit

- Focus on REA & Buyer / Seller Experience
- Test and optimize the front-end experience
- Platform compatibilities to inform DIY+ EO experience build
- How new market requirements influence the product

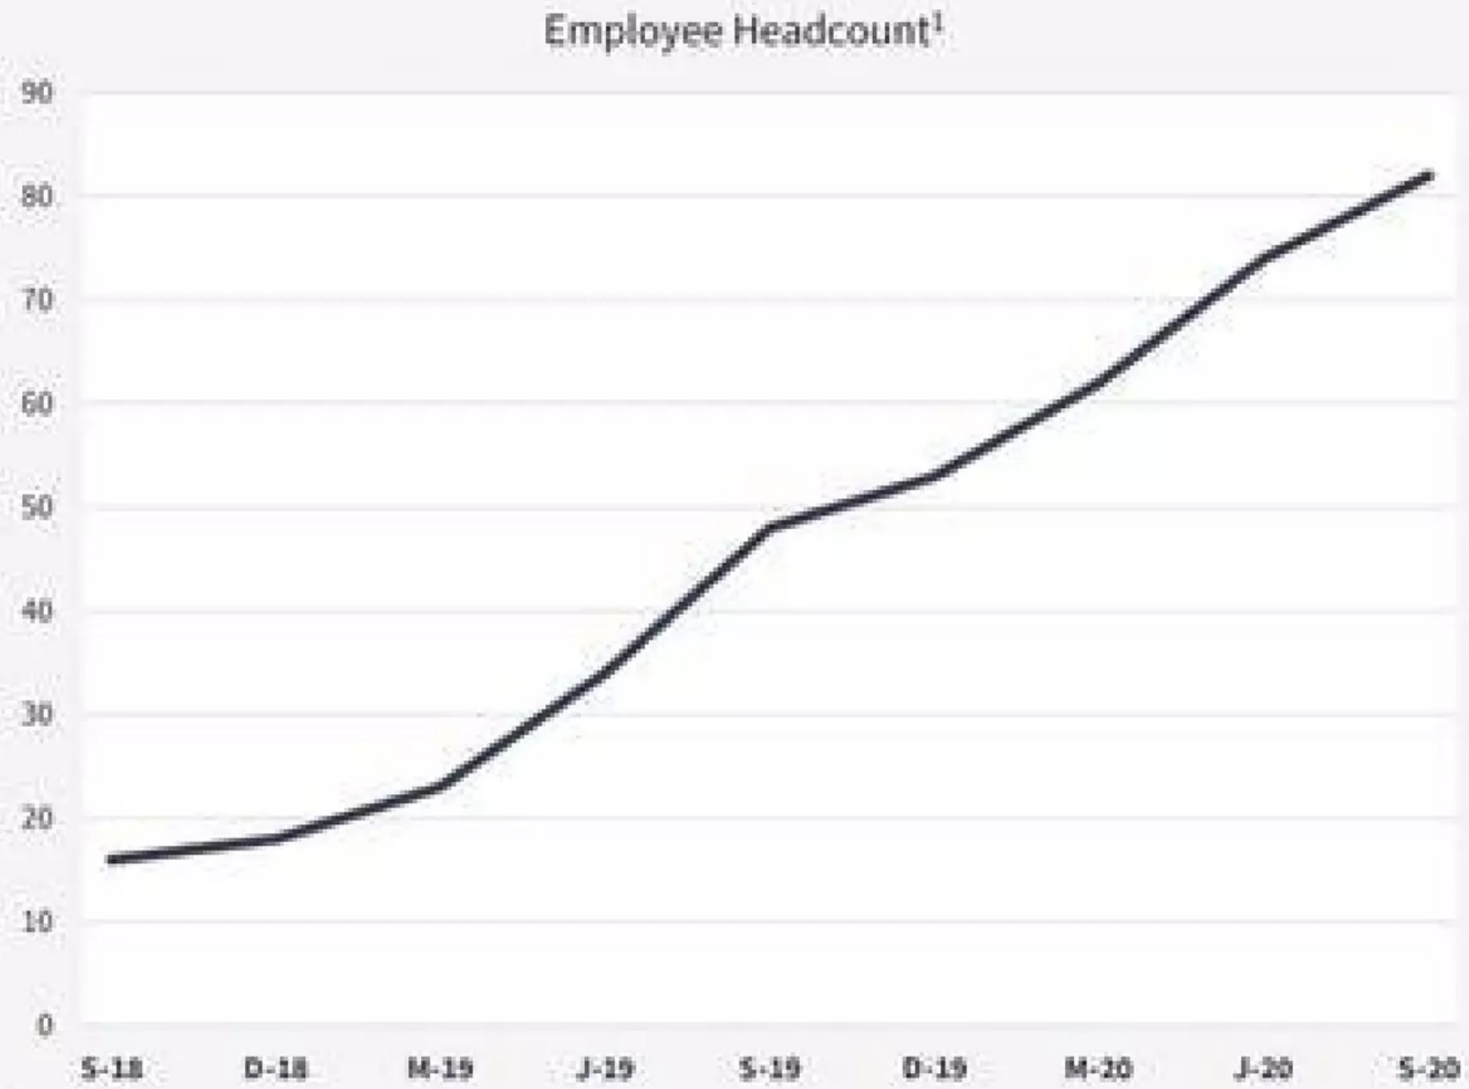

FOUNDATION | API, Markets

- Focus on the EO Experience and improving EO efficiency
- Stand up centralized Ops Hub in AZ
- Test and optimize the "new" back-end experience to inform automation
- Prove traction in multiple states (CA, AZ, etc.)
- Test whether productizing API has market viability

SCALE | Expansion & Automation

- Scale optimized product and back-end experience across markets and partnerships
- Determine whether margin can be increased through increased back-end process automation

Foundation: We have successfully grown an 80+ person technology company and are setting the stage for further growth

1 as of 9/30

Building Out Management

- 1st half of 2020 focused on building out the management structure in the Product Dev org
- 2nd Half of 2020 is focused on building out the management structure in Sales / Ops

Employee Surveys

- Endpoint is a "Great Place to Work" at 95%

Initiatives

- Performance management + growth matrix for employee development
- Diversity, inclusion, and equity

Competition: T&E Startups focused on growth and less on escrow process

2: From internal research and estimates

Future state vision for Endpoint closing process

Objective	What it feels like
Smooth, automated back-end process flow for closing	Data entry, doc preparation and proactive follow-ups are automated throughout the escrow process
Seamless UX that provides levels of service customers want, when they want it	Agents can self-serve for latest forms and buyers/sellers have automated to-do list, while onboarding and closing touch points are preserved
Timely lender engagement facilitated and enabled through automation	Lenders engage with 24/7 solution to pull standard documents and better meet deadlines
Extensible solutions across geographies/customers at scale to enable faster ramp up	Processes and tools that leverage standardization, machine learning and training to solve for variation and enable more rapid ramp up in new markets
Comprehensive integration with sources of relevant real estate data	Integrations that enable personalization and improve efficiencies for customer experience
