ENSEMBL

The things we own should serve us well.

@getensembl
getensembl.com

Our Story

Born in a small kitchen, ENSEMBL is on a mission to rethink the concepts of utility and design in traditional housewares.

We engineer beautiful, durable, multi-functional products that enhance life and optimize space.

Our spaces
(and the ways
we use them)
have changed.

Housewares have not.

→ Housewares = $350 b market category with stagnant product design

→ Housewares to grow 15% due to rise in at-home-living

THE PAST
Big homes
Lots of storage
Owning more and more "stuff"
*A life outside the house

THE PRESENT*
Small homes
Limited storage
Organization as a trend
Doing work + life from home
Conscious about consumption

THE PRODUCTS
Big and bulky = hard to store, hard to organize
Single use = need to own more
Low cost, short life = throw away, buy more

THE PRESENT =

* *WE'RE ALL SPENDING MORE TIME AT HOME. We will continue living knowing we must plan our homes for future lockdowns.*
* *A generation who prefers urban to suburban and embraces smaller homes → WSJ MARCH 2020; → FORBES OCT 2019*
* *Untidy spaces have negative psychological effects / we're embracing the Kondo-effect → HEALTHLINE 2019 → BBC FUTURE 2019*

Imagine a world where products *fit* the way you live

A PRODUCT THAT ***FITS*** MUST BE DESIGNED FOR:

Functionality

Aesthetics

Space-Efficiency

High-performance

Durability

Why does this matter?

Do more in less space.
Space is expensive, we have less, and we need to do more in it. *(And, for the foreseeable future, we spend all our time there.)* We need to use it well.

Stay organized.
Chaos inhibits focus, reduces productivity, and causes stress. We need to keep our spaces orderly as part of broader efforts to live psychologically healthy and productive lives. *(This is increasingly important as we grapple with WFH for the foreseeable future.)*

Reduce our carbon footprint.
Small-space living reduces individual emissions by an average of 45%. Cooking at home use less energy than takeout, delivery, and packaged meals.

Generate less waste.
The average person sends 2 t of durable products to the landfill in their lifetime. Instead of disposing many short-life, single function products, we should aim to own long-lasting, highly functional goods, reducing landfill waste.

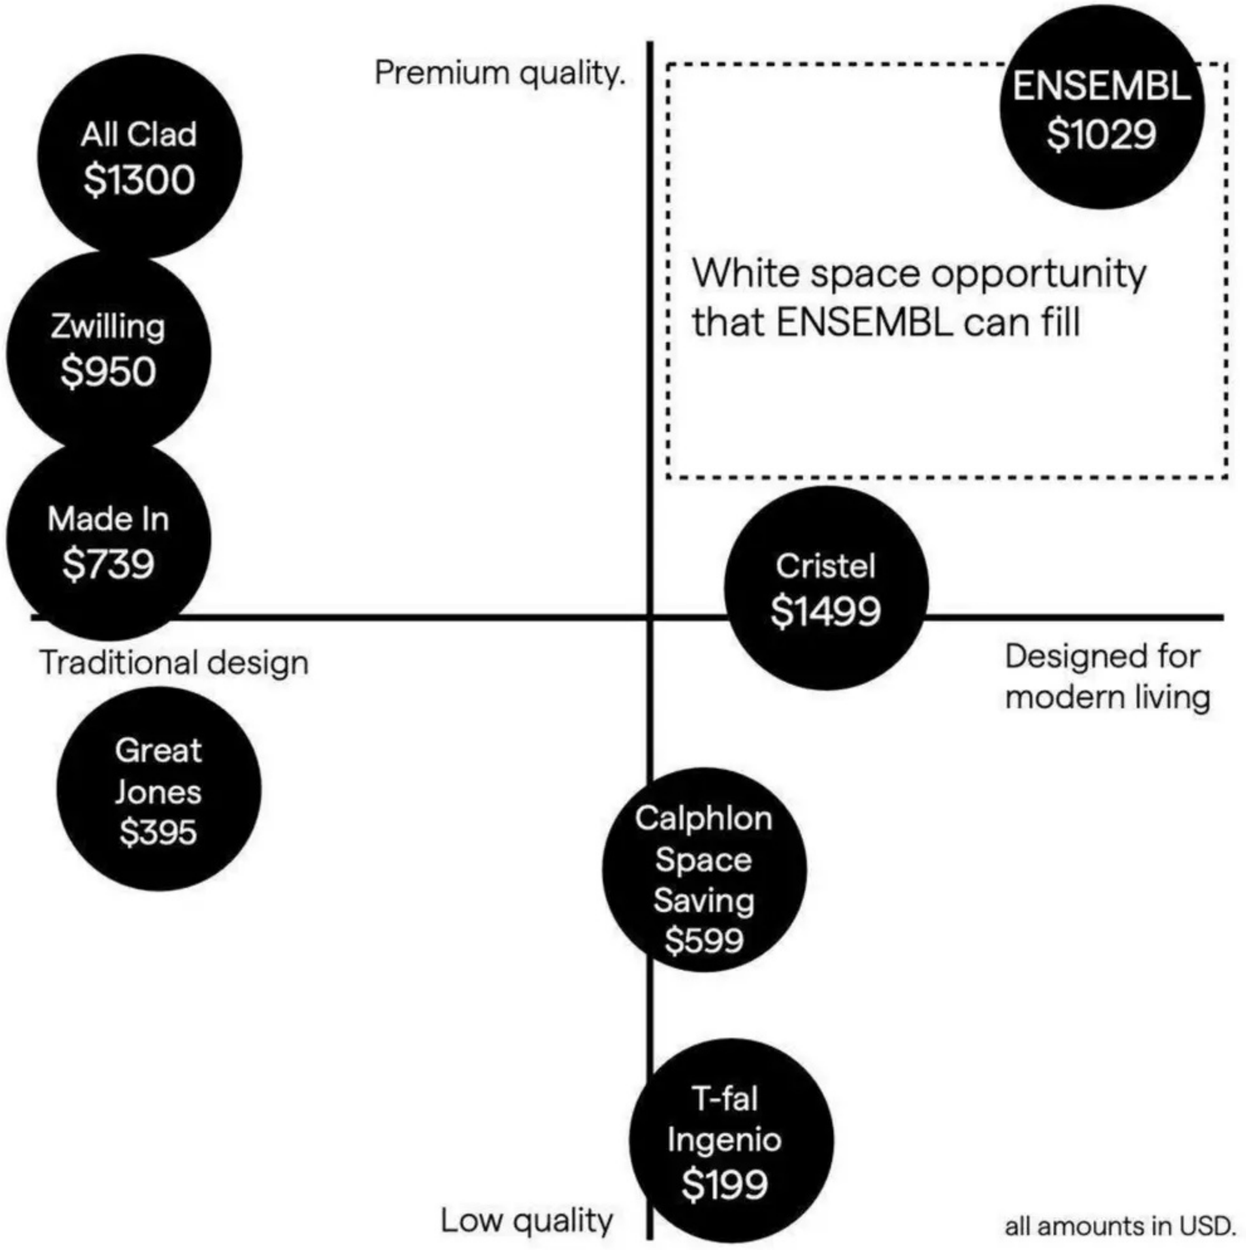

Brands differentiate on price versus quality - but ignore the way their products *fit* our life

DESIGN FOR HOUSEWARES, ESPECIALLY COOKWARE, HAS STAGNATED

Brands rely on the same designs. Using pre-made molds and tooling to create products is common practice. Innovation is rare - if it exists at all.

The result: we see many variations of the same product, but nothing new. It is a crowded space where everything looks the same.

There is an opportunity to differentiate through design and multi-functionality.

The Stackware Collection

ENSEMBL

Form and function come together to create a new product - and better experience

Custom patented removable handles unlock Stackware's potential

* **Enable organized, efficient storage** - requiring 70% less space than traditional products
* **Enable greater functionality** - with the handles removed, take each piece from stovetop to oven, to the table to serve, and to the fridge to store leftovers

*Handle Patent PCT/CA2019/000060

Purposeful details that set Stackware apart

* Performance
  * 3.5 mm fully-clad stainless steel and aluminum
  * Induction compatible
  * Dishwasher safe
  * Oven safe

* Utility
  * Transparent lids that transform to lay flat for storage
  * Laser-welded side brackets for rivet-free interiors
  * Etched measurement lines

WSJ

GEAR PATROL

House Beautiful

"The selling point is in the name - this stainless-steel collection of versatile pots and pans is designed for stacking with ease in order to save space in kitchen with limited storage - but, in practice, there's so much more behind my love affair with this cookware. Seriously, I put these things through the wringer and they stood up to all of it."

What our customers say

Bought for the design, staying for the quality.
I bought these for the unique space saving design because my kitchen is a little light on storage. But I'm STAYING for the ridiculous quality! Honestly, highest quality cookware I've ever owned. Really nice details from the etched measurements inside to the choice of welds over rivets. A++
- Adam S, male, 37, tech founder, NYC

This is what purposeful design looks like.
ENSEMBL's products address so many of the pain points of other cookware. The pans' large size makes it easy to cook large portions evenly. The detachable handles make it easy to stack everything in my drying rack, cabinets and fridge. It also looks amazing: elegant, original and playful.
- Lauren H, female, 33, media strategist, Toronto and Paris

Best cookware I've owned.
Best set of cookware I've ever owned. Performance is excellent, they take up less space, the removable handle is brilliant.
- Matt F, male, 36, tech founder, Montreal

Better performance than All-Clad.
As a chef, I know the difference quality tools make. The materials here are premium and the performance shows. Stackware is better than All-Clad.
- Tony C, male, 52, professional chef and culinary instructor, Vancouver

Bringing Stackware to Life

GROWTH

* 6X Growth in Q4 leading to stock-out + pre-orders
* 8% of customers have made a repeat purchase
* Primary customer: Urban, male, 35-50 with tech / design background - left out of current cookware landscape
* Sales from USA, Canada, France, Italy, UK, Norway, Israel

MANUFACTURING

* Working with a family-run factory in Jinhua, Zhejiang that is focused on premium fully-clad cookware

IP STRATEGY FOR REMOVABLE HANDLE

* September 2021: Canadian patent granted + approval under International Patent Cooperation Treaty (PCT/CA2019/000060)
* Additional National filings in USA, Europe, Japan, Korea, China, & Australia (April 2018 Priority date)

Omni-Channel Growth

> DTC conversion, rolling bulk orders, select wholesale

DTC: Optimize conversion, then scale.

Optimize mix of digital and IRL strategies focused on targeting, building awareness, and converting.

> Digital - email, digital ads, micro-influencer marketing, affiliate + brand partnerships, organic and paid media coverage.
> IRL - Print ads, pop-ups, mailers, and in-person events.

Bulk sales: Stable, volume orders.

Sales and partnership opportunities with condo developers, property managers, luxury kitchen brands (appliance, cabinetry, countertops), and yacht outfitters.

Wholesale: Reach a broader audience + build consumer trust.

In talks partners that will elevate the ENSEMBL brand + reach key customers; outreach to larger retailers and boutique stores focused on design + urban living, yachts, and small-space living (vans to tiny houses)

Stackware + beyond

* Smaller sizes of Stackware + bundling options
* Additional handles (short / new colours)
* Heat protectors for the side brackets + lid knob
* Care + Cleaning accessories

In the kitchen:
* Kitchen tools
* Storage canisters
* Bakeware
* Small electric appliances

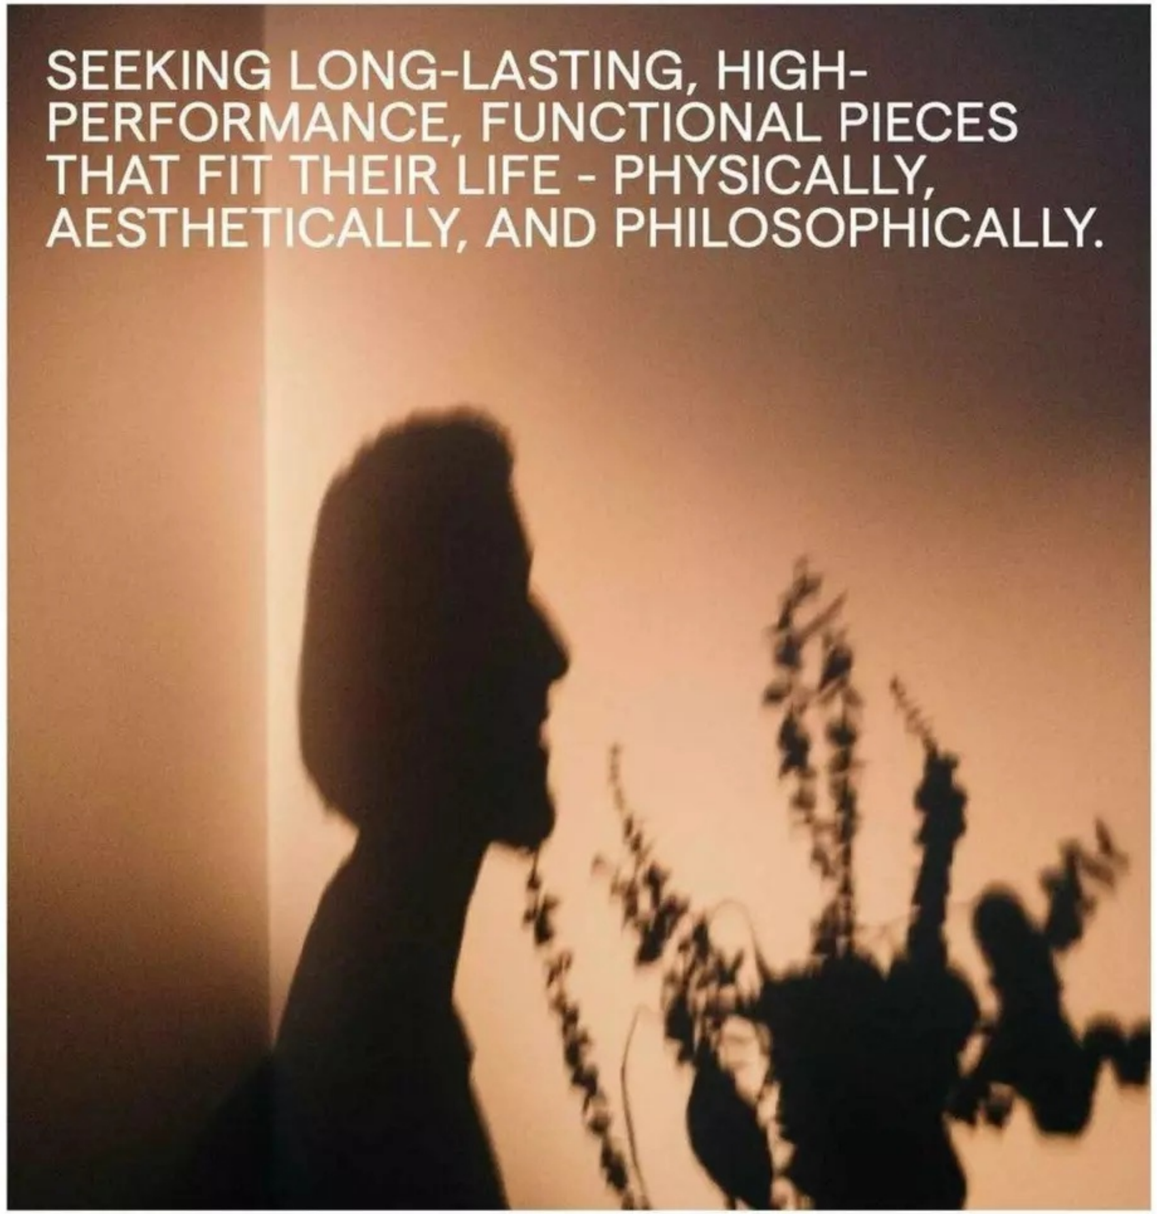

And beyond:
* Cleaning hardware
* Yard tools
* Organizational hardware
* Baby/Child Utility

We believe *the things we own should serve us well. They should fit into our lives and enhance our experiences.*

ENSEMBL is committed *to purposeful, beautiful, and innovative design; creating better products that are built to last.*

We will be remembered *for our unique capacity to reengineer products in order to improve everyday life.*

The Muse

MEET JUSTIN & BLAIR

* Aged 34-55
* Urban dweller
* University educated professional
* Earns $200k ++
* Considered consumer
* Appreciates the finer things
* Wants - and knows - quality
* Design-savvy, cultured, and critical
* Drawn to sleek, clean aesthetics over country/ traditional styles

Justin is an early adopter of highly functional, design-forward products. In search of the best. Loves to impress.

Blair cares about aesthetics and order - in her home and in life. Prefers logic and functionality to superfluous detailing.
