Our Mission

Offr is changing the way people transact real estate. Our mission is to enable people the world over to buy, sell or rent a property as easily as they book a flight.

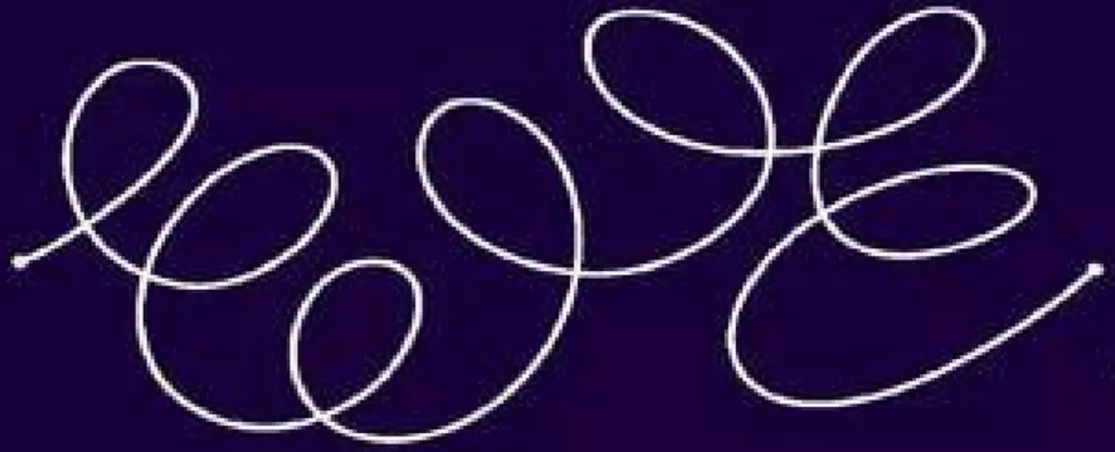

Estate agents are the lifeblood of the property industry. Our goal is to help agents quickly transition from analogue to high performance digital-first businesses.

Robert Hoban, Founder & CEO

The Problem

10m
offers

2.5m
people

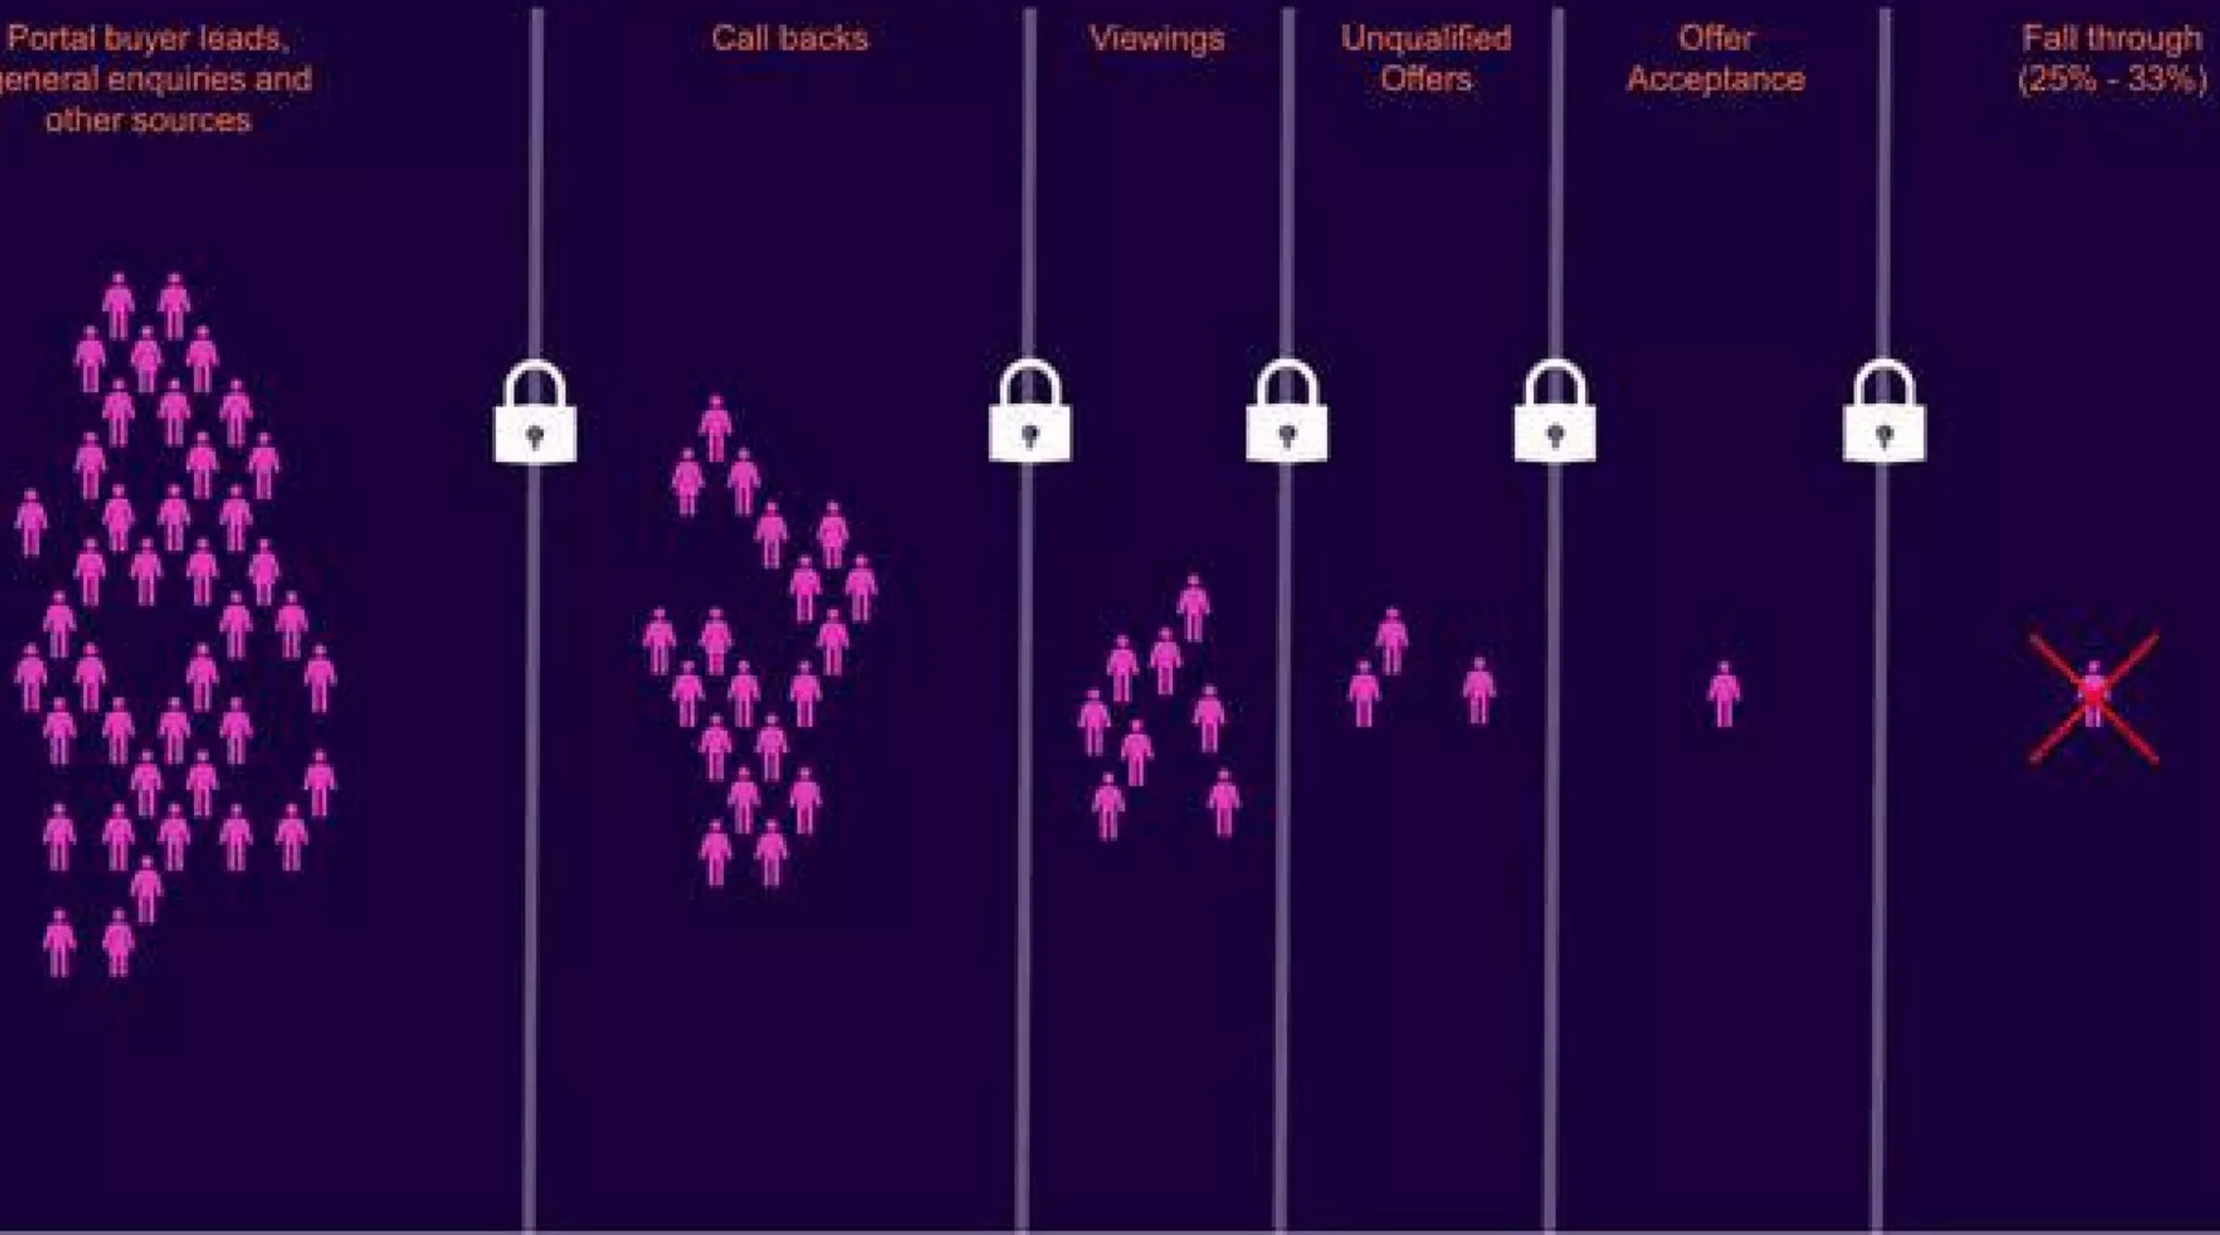

1m+
buyers

£500bn
Value of properties sold every year

The Problem (contd)

The existing sales process is fragmented, not trackable, with poor user experience, and no mobile technology

The Solution

Offr

Technology for estate agents that delivers a one-click property transaction on the agent's own website, for commercial and residential property

Customers submit offers, upload proof of funds, sign contracts and pay deposits on a mobile device, from any location, at any time. Buy, sell, or rent at the tap of the Offr button

Transparency. Trust. Speed.

The Solution

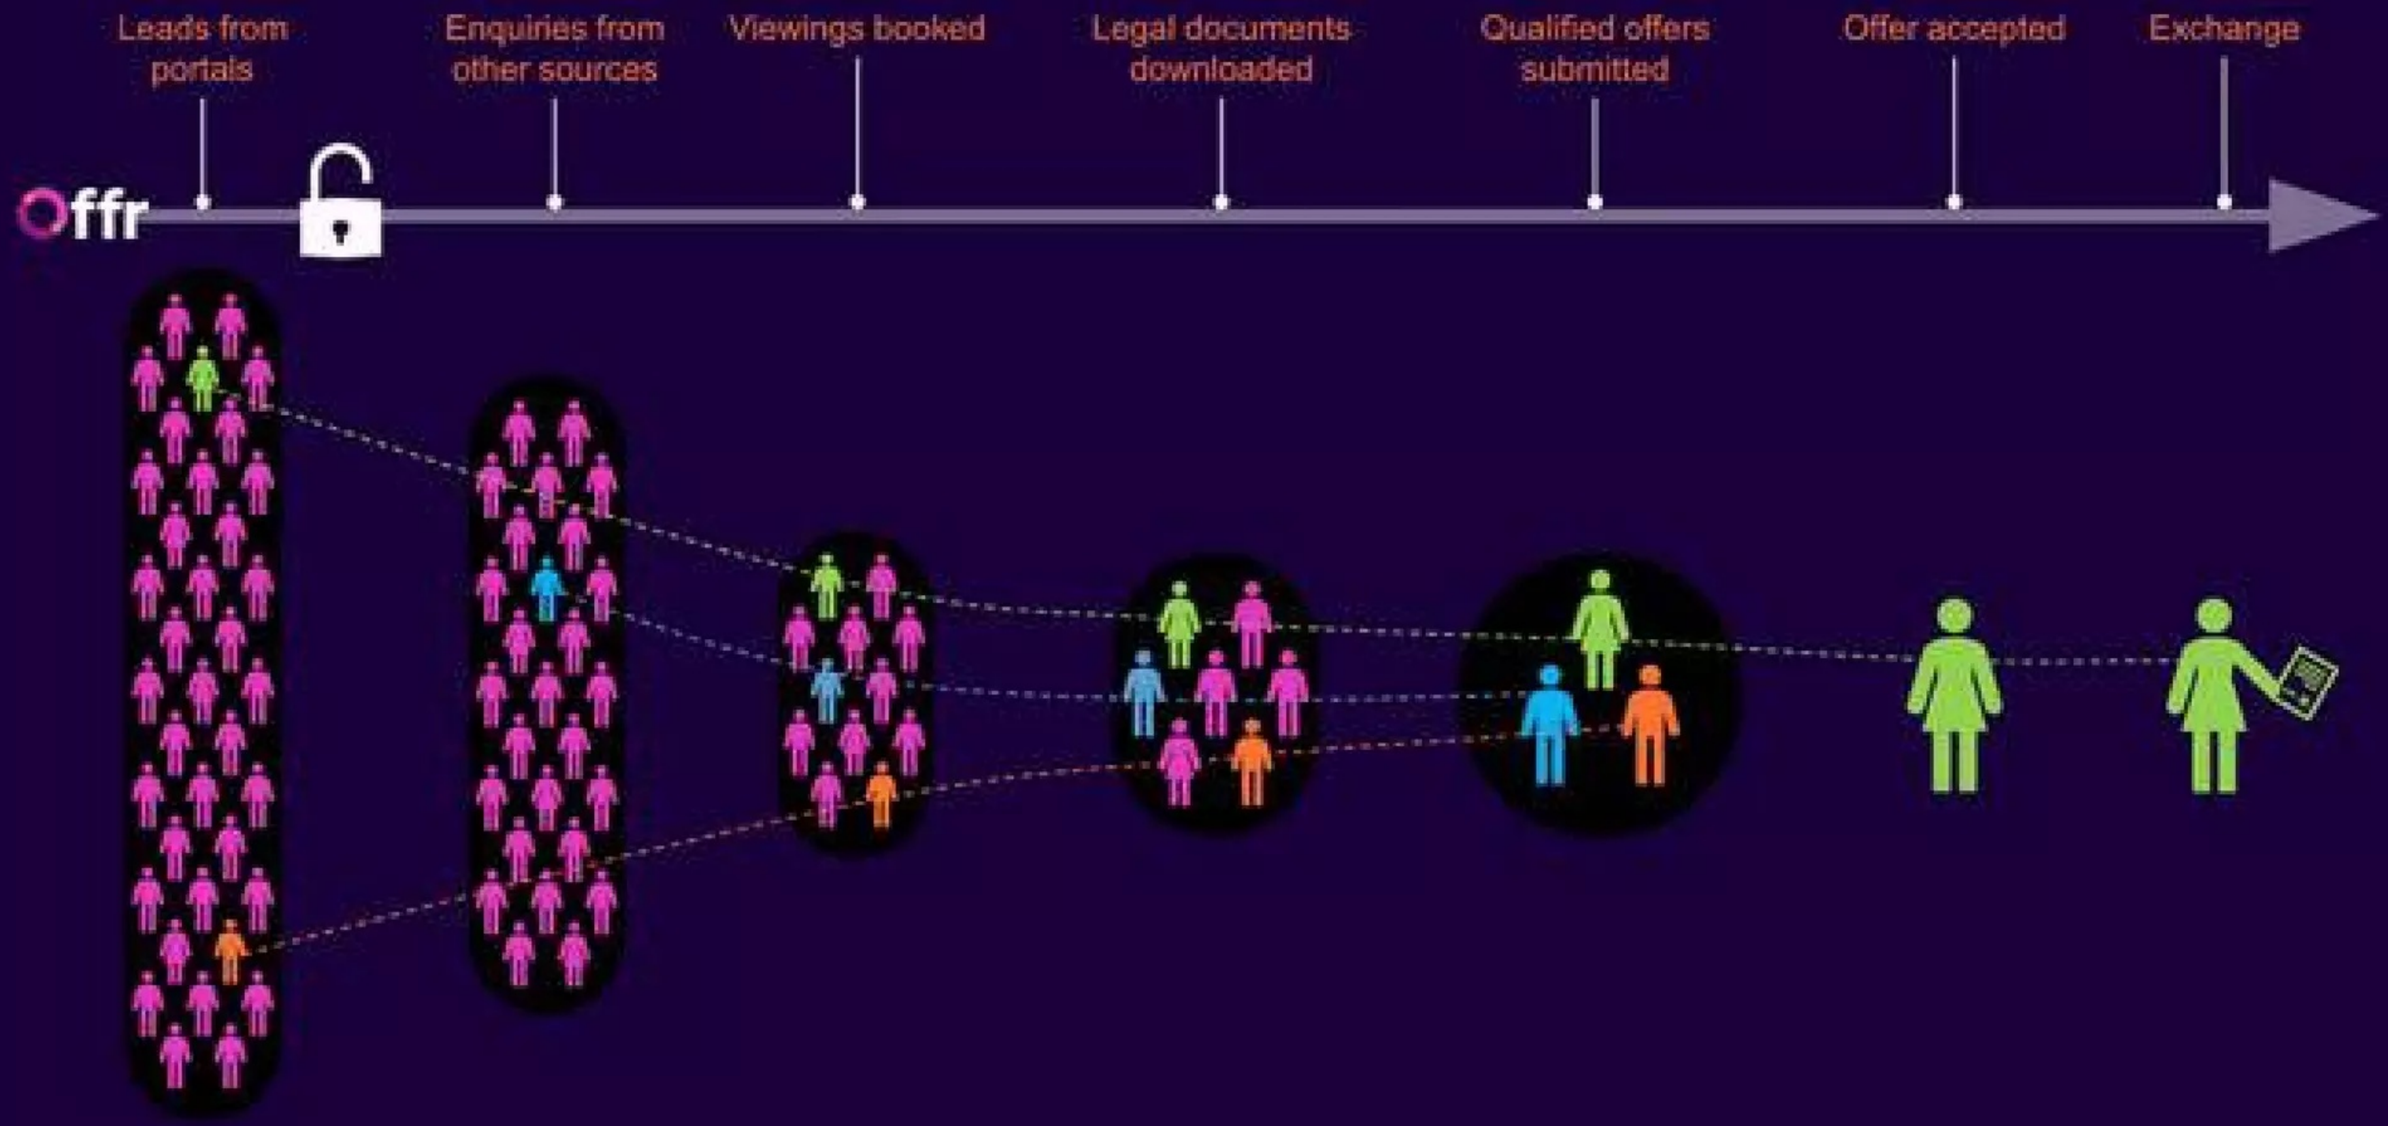

offr

The Solution (contd)

Tracked & seamless, with qualified buyers & a high quality user experience via mobile

The Solution (contd)

The Offr® Button

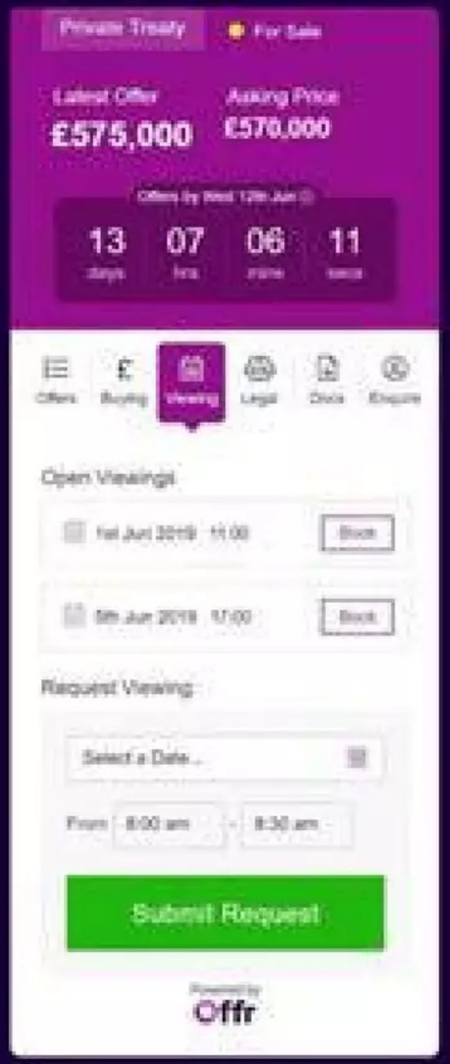

- ✓ Patent Pending No.EP19194457.8
- ✓ Trademark registered

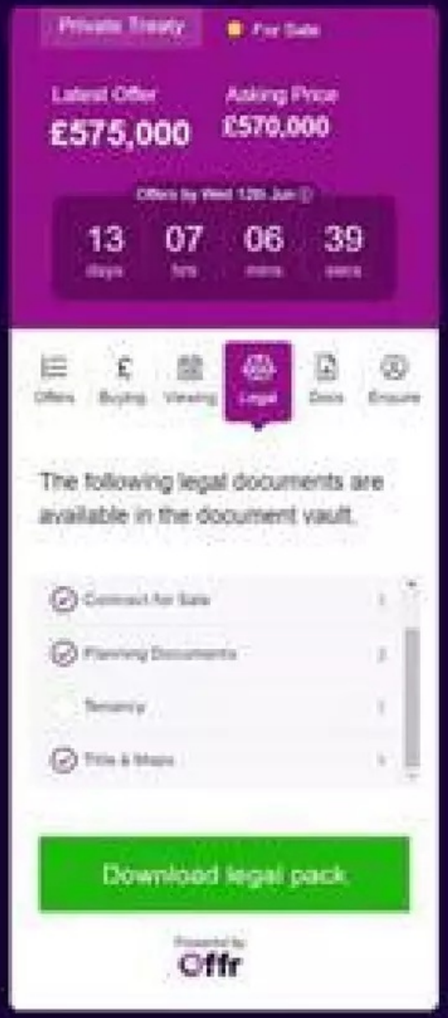

- Track offers in real time
- Track deadlines
- Submit offers securely
- Outline conditions of offer
- Upload proof of funds
- Book viewings
- Download contracts & title

The Solution (contd)

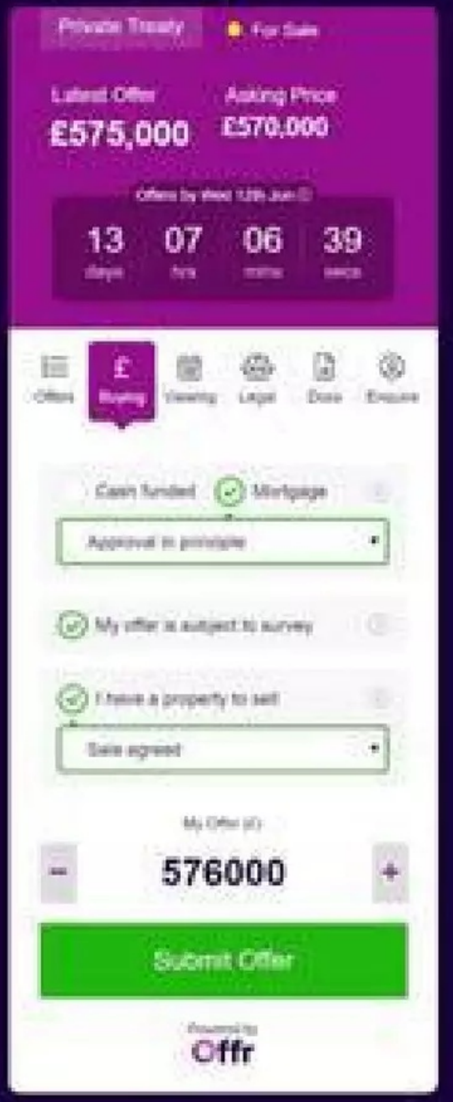

Book a viewing

Conduct due diligence

Submit an offer

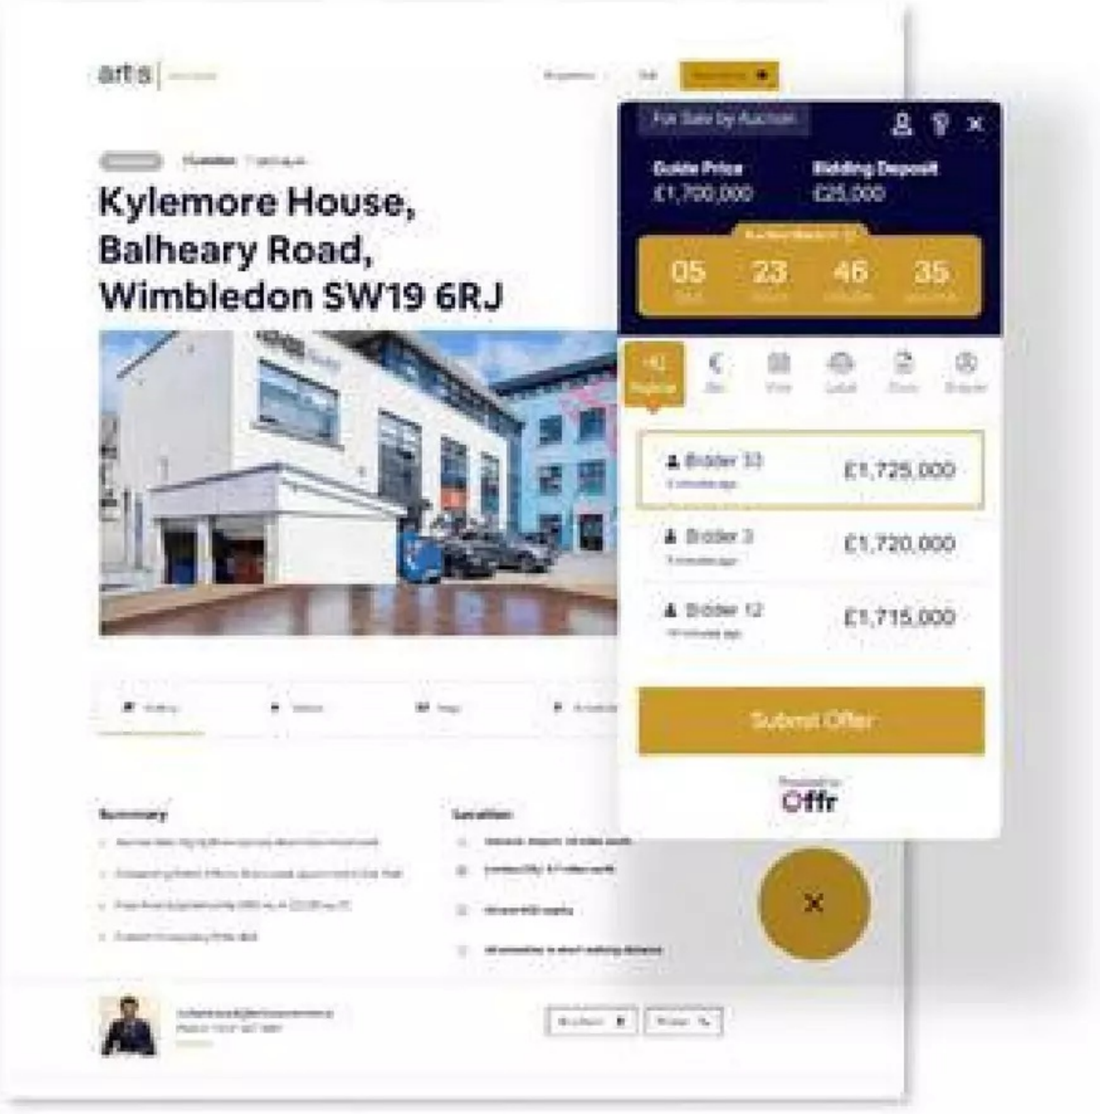

All via the agent's own website

In the agent's own branding

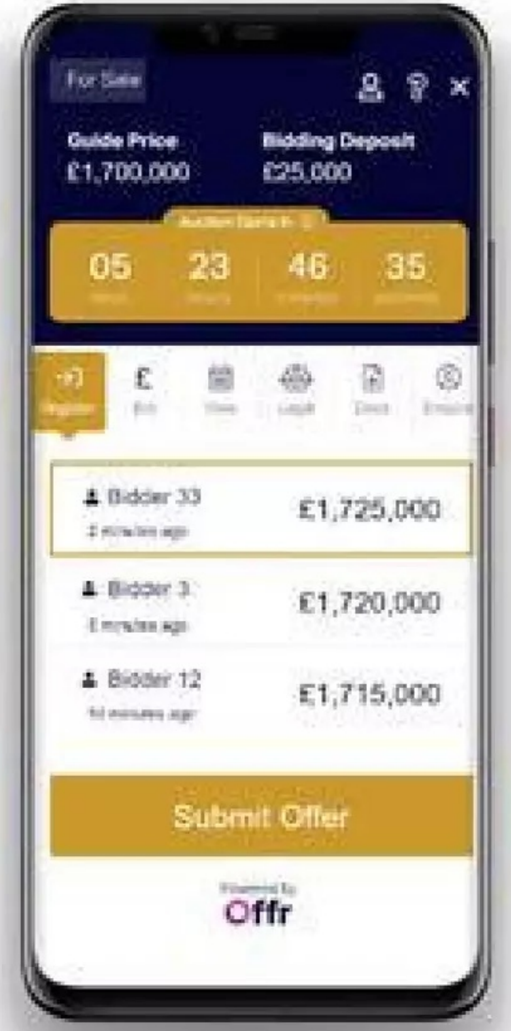

The agent can elect to disclose all offers or keep them confidential, depending on the preferred method of sale

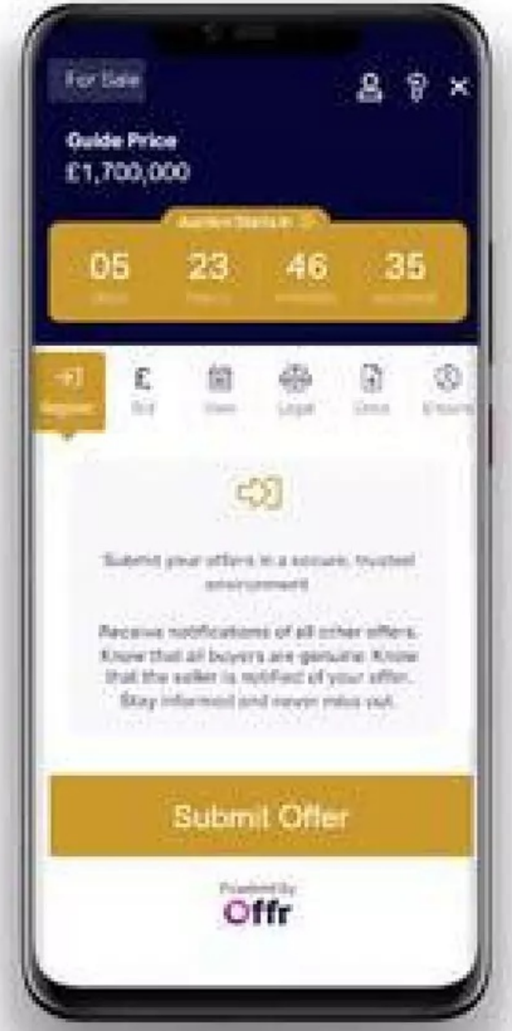

In each case, the buyer has the comfort of knowing that:

- All buyers are real
- All buyers have provided proof of funds
- Permanent, auditable record of all offers, dated and time-stamped
- The secure process is tamper-proof

Insurance Provider

At the core is Offr's unique Offer Processing Engine. A full suite of seamless products has been engineered around the core functionality, to allow the customer to experience, for the first time, a smooth end-to-end property transaction

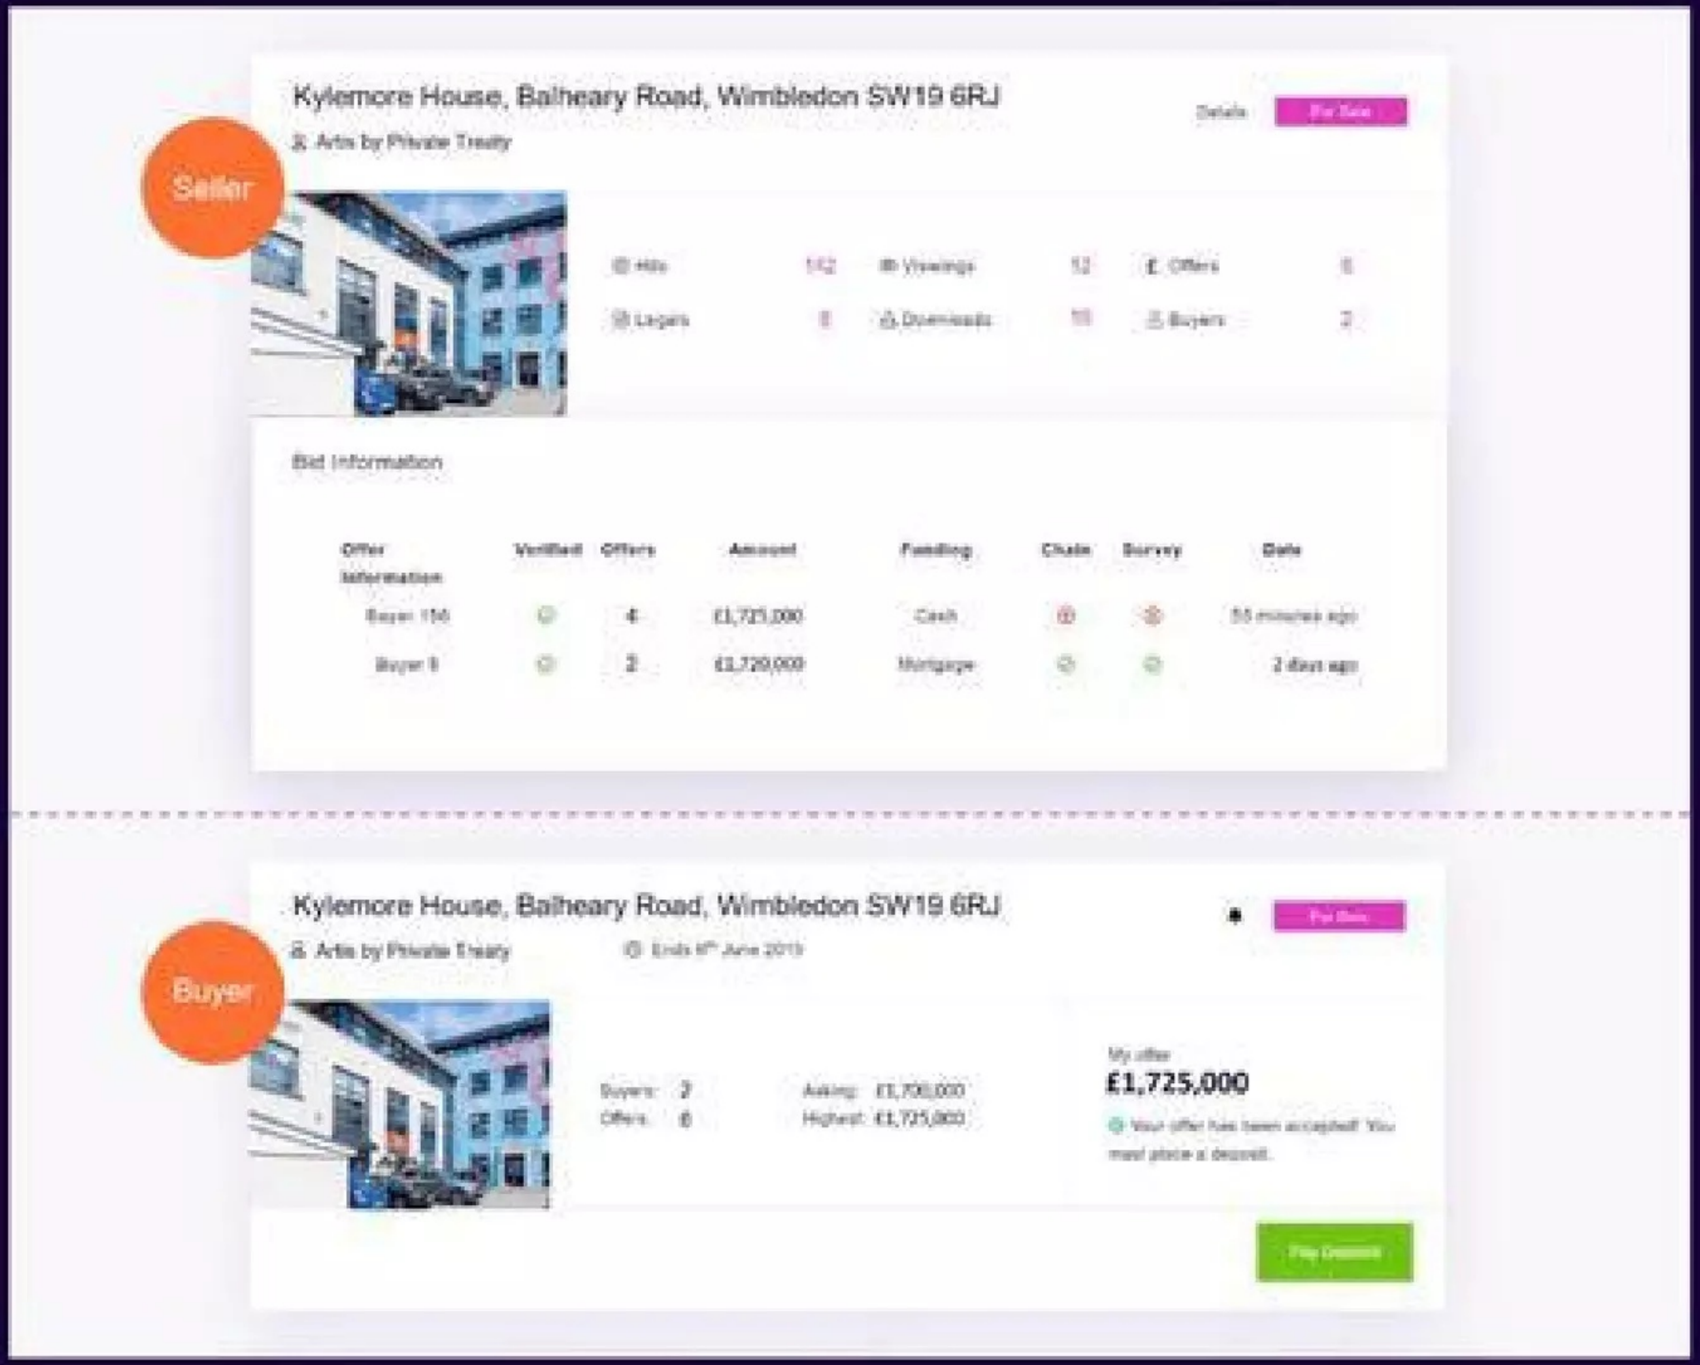

Thousands of automated communications eliminate the need for endless phone calls and emails to progress sales, allowing the agent to spend more time advising clients and winning business

Milestone: February 2020 - successful integration with Whatsapp Business, allowing agents to receive the most important alerts by Whatsapp message

WhatsApp integration

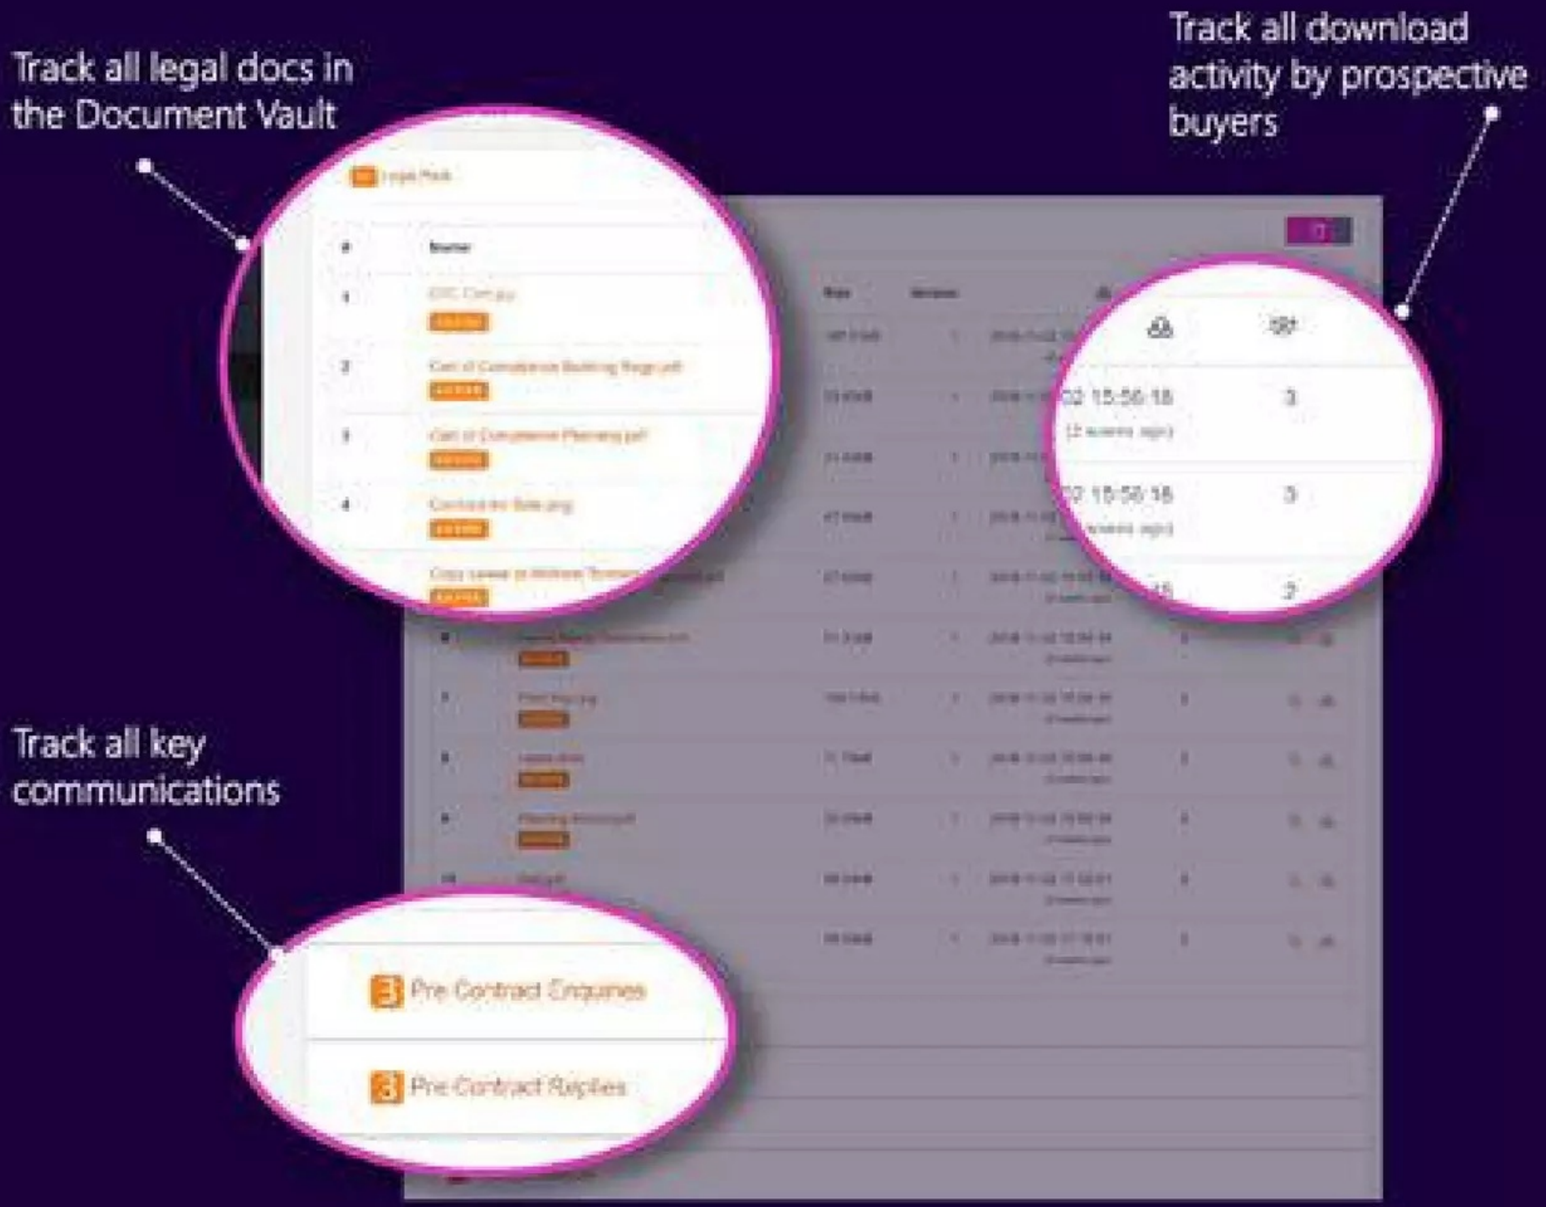

Dashboards for buyers and sellers contain real time information and updates 24/7 on their properties

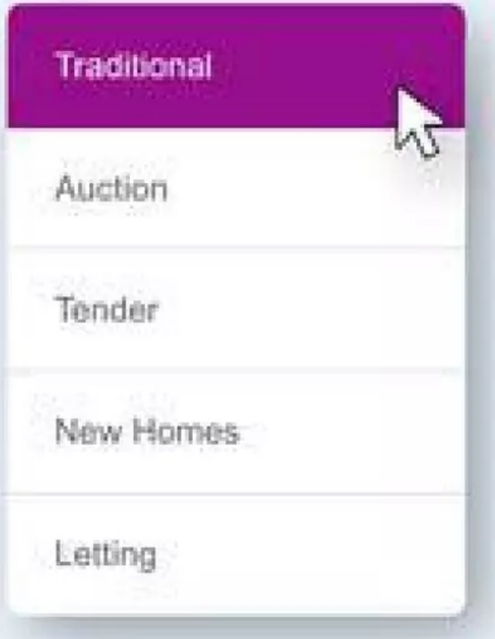

Data room for solicitors to manage legal packs, queries and replies.

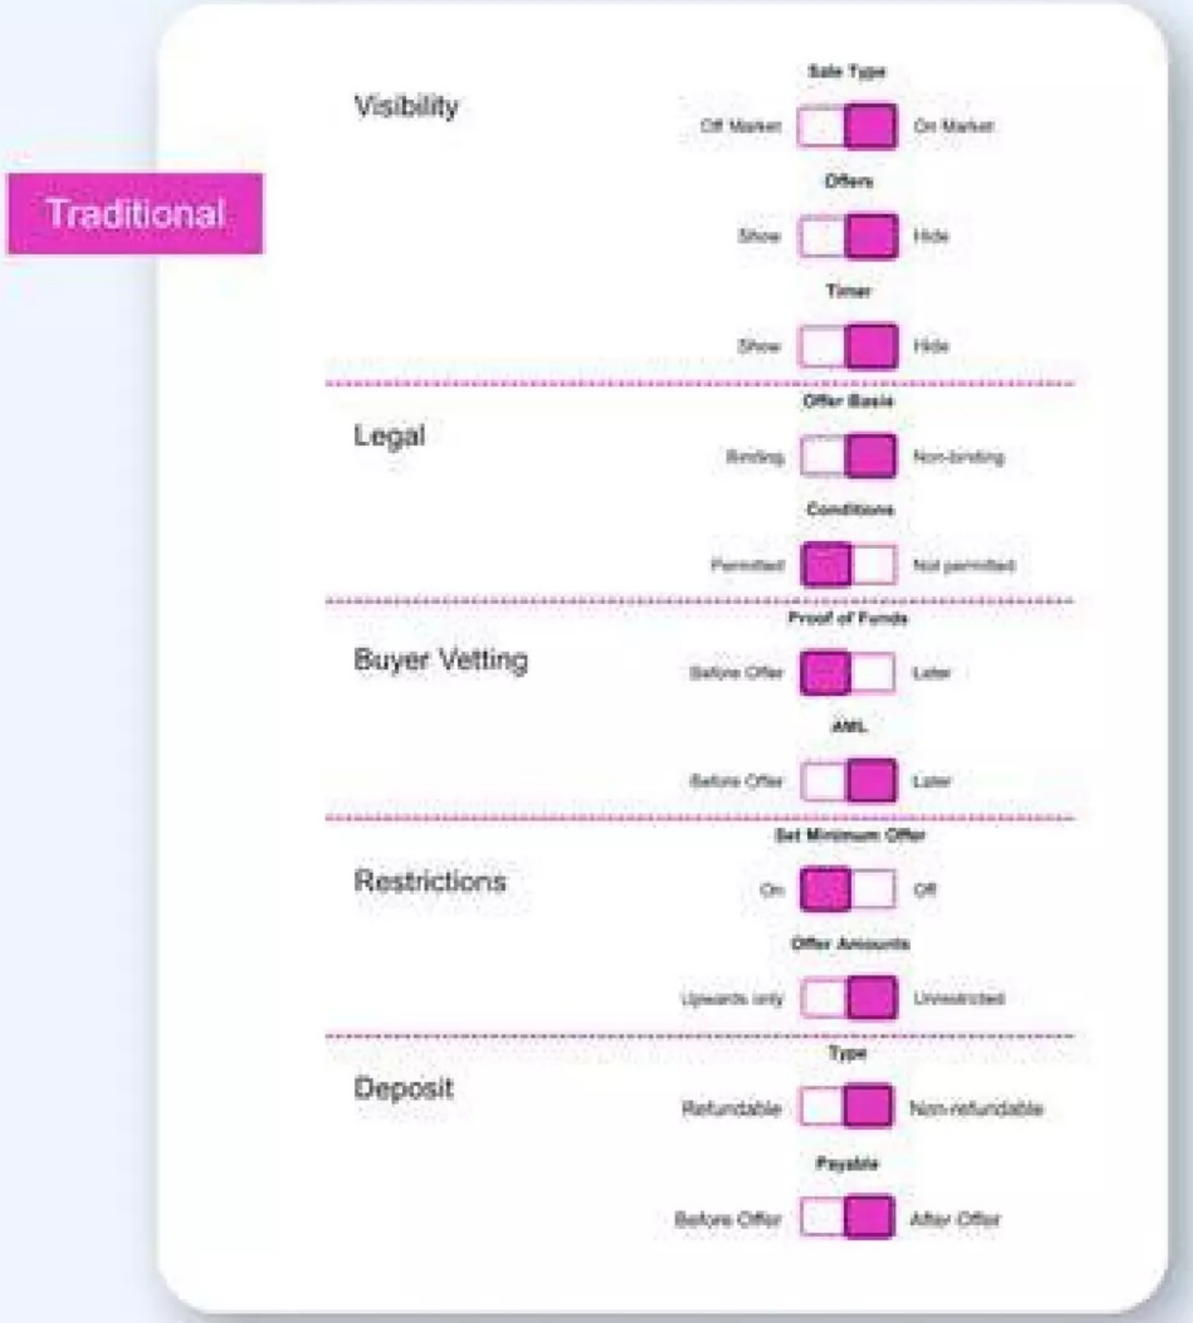

The agent can monitor progress in real time.

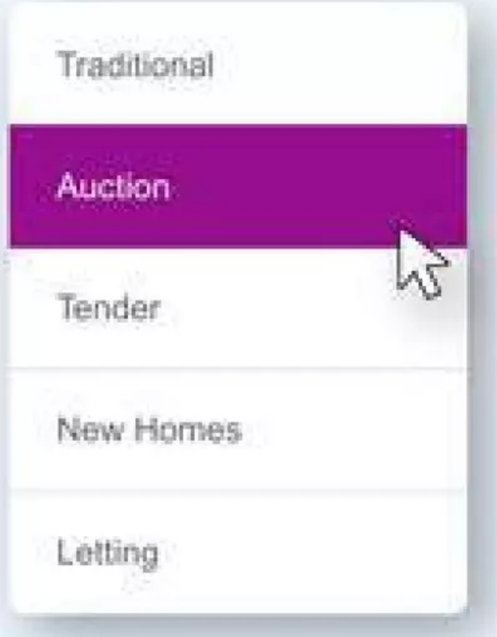

The agent can customise the sale method in seconds, to create online versions of traditional sales, auctions or tenders.

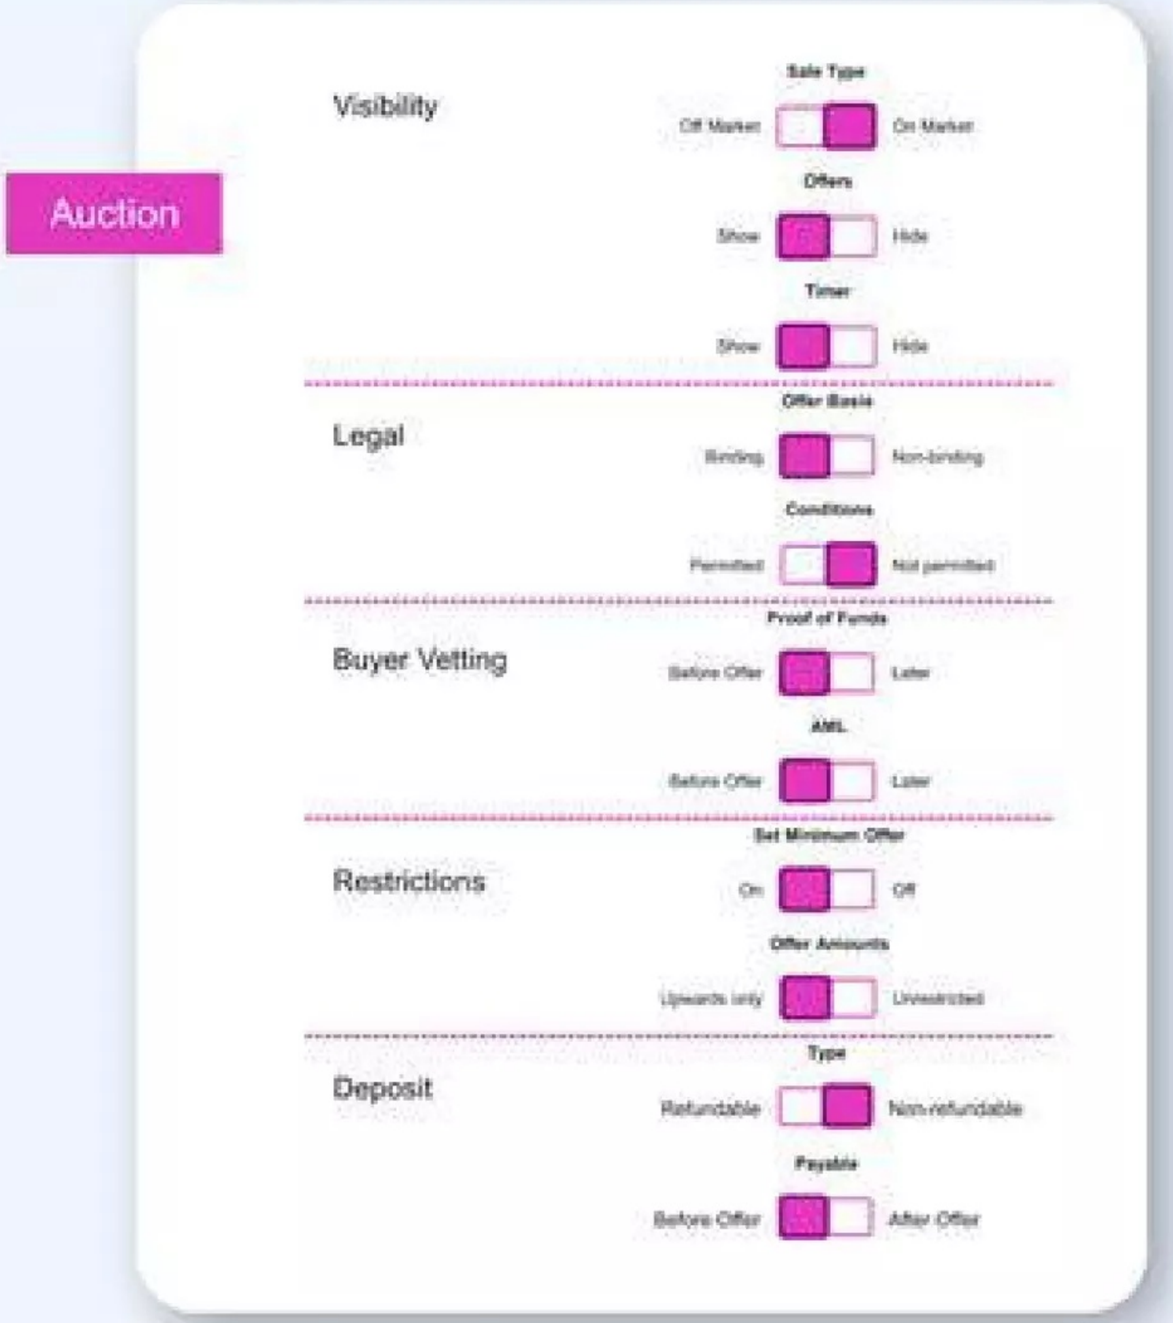

Legally binding or non-binding offer processes

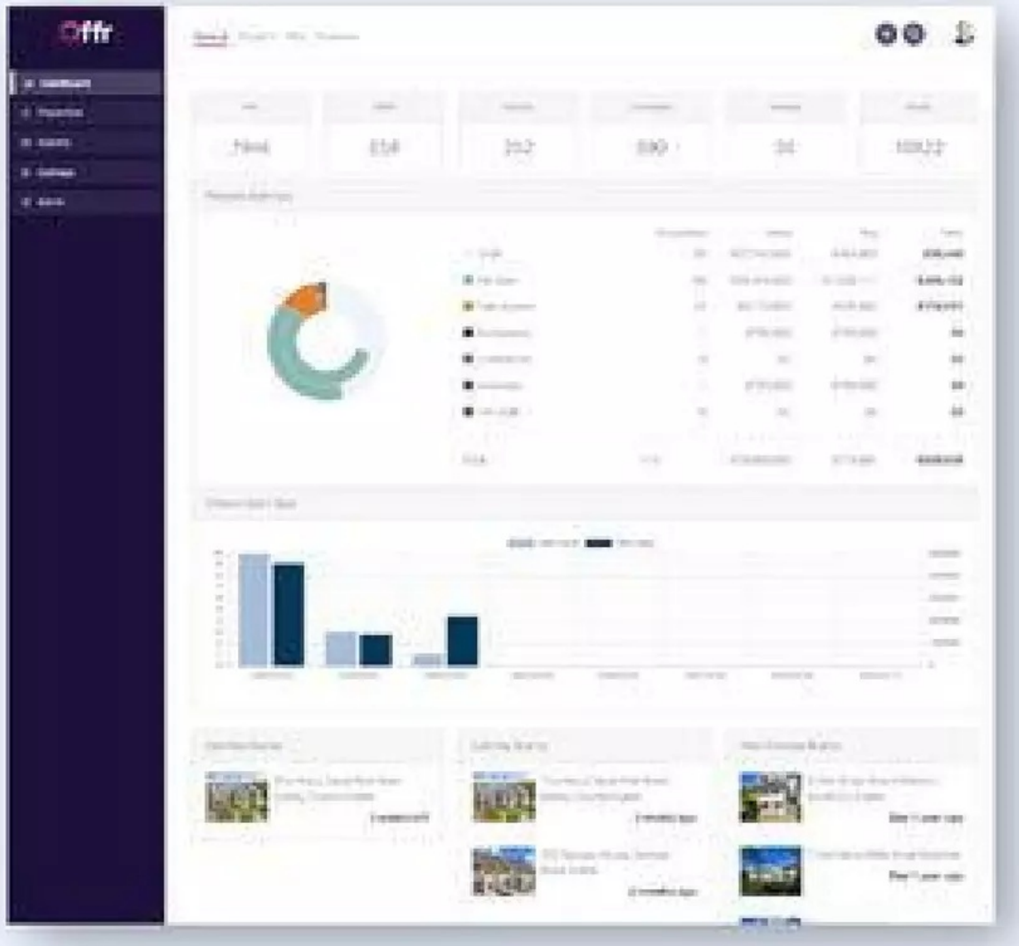

With a single click, the agent can select from a pre-programmed list of the most commonly used sale methods

Estate Agent dashboards with rich, real time data on activity and sale progression, from branch network level right down to an individual property level. Not dependent an manual input. Mobile and desktop UI. Track performance and spot blockages.

Value Proposition

Great care has been taken to ensure all stakeholders' differing interests and priorities have been accommodated so that each user profile benefits materially from the smoother experience.

Extensive research and feedback continually feeds Offr's value proposition

Offr Case study A

Ground-breaking innovation

On 24th March 2020, in the middle of the COVID-19 lockdown, Offr made national headlines by successfully equipping Sherry Fitzgerald, the largest estate agent group in Ireland to conduct a 100% remote, digital property transaction, end-to-end.

ⓘ **This represented Ireland's, and possibly the world's, first fully remote property transaction with all parties working from home.**

Offr Case study A (contd)

All parties worked from home

This included the auctioneer, the seller, the bidders, the buyer, and both solicitors.

DocuSign Contracts were signed using Offr's **DocuSign integration.**

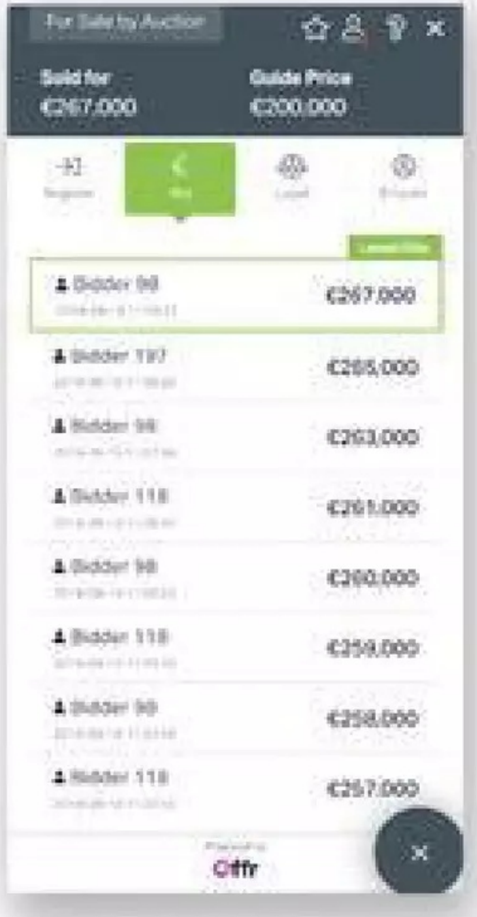

stripe Deposit was paid using Offr's **Stripe integration**
