ORBITAL WITNESS

THE UNIVERSAL RISK RATING FOR REAL ESTATE ASSETS...

...allowing anyone to understand property risk

Problem

Property due diligence is complex, slow and costly.

It relies on **manual review of paper documents** once lawyers are instructed on a deal.

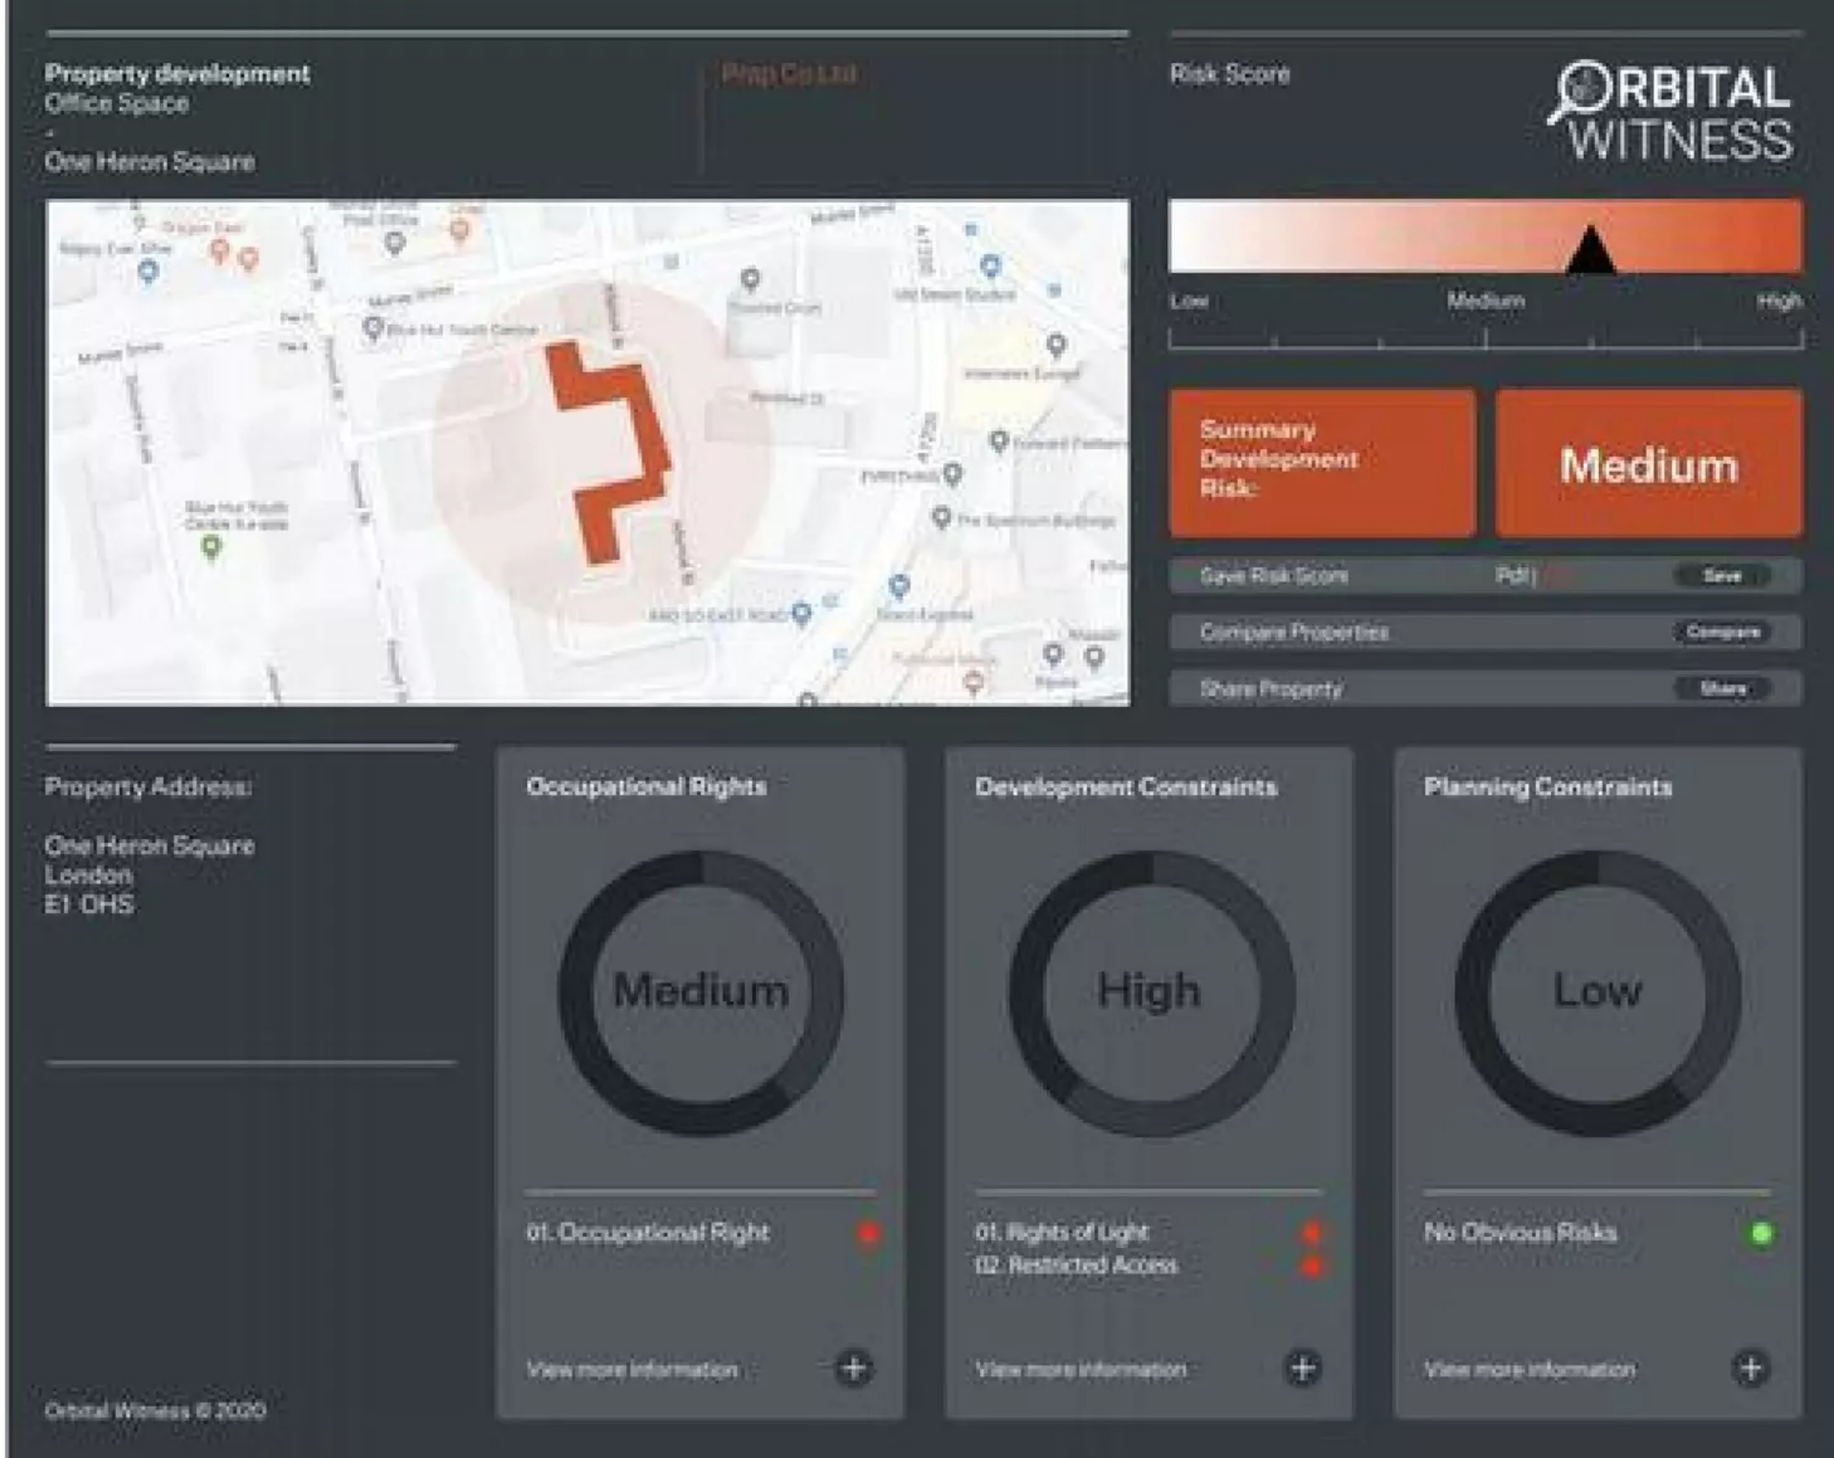

This means that issues that could impact valuation, liquidity or intended use of property cannot be taken into account from the outset.

Risk profile

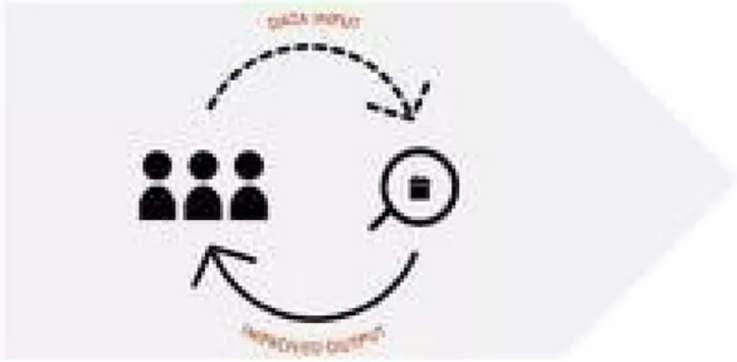

An instant risk rating for any property or portfolio available on-demand.

'A credit check for land and property'

Our strategy to achieve this...

EXPERT USER BASE

We've brought real estate lawyers and insurers onto our property data platform

MACHINE LEARNING

Expert users train OW to recognise risks in property data through consistent use on deals

INSTANT RISK PROFILE

Our trained system automatically profiles risk on real estate transactions

Team

We've hustled to build an exceptional team.

MEET THE FOUNDERS

Ed is a Rhodes Scholar law graduate from Oxford University who has presented in-front of the United Nations.

Will is an economics graduate from Warwick University who has sailed across the Atlantic.

We've worked together for 4 years having previously advised tech companies in the space industry.
