The end-to-end web platform for agile teams

platform.sh

Who we are

Staff

150 staff worldwide / 200 in Q2 2020

Global footprint: 70 in Europe / 60 in the USA / 20 in APAC.

Fast growing / Well funded.

$47m funding, way ahead of all the managed service / CMPs

Customers

5000+ Customers, incl. 2,000 enterprise customers

Magento
1,500 ent. clients

Orange
50 ent. clients + 6,000 applications

Microsoft

What we believe: Software should just run.

MANIFESTO

We believe developers should concern themselves with features and code quality, not servers and tooling.

We believe the infrastructure can and should be abstracted away.

We believe there is no enterprise software. Just software. That auditability, security, compliance, data protection and high-availability are fundamentals.

We believe you can move fast without breaking things, that software is change, and that fear of change can be overcome.

We believe that we know how to do this. **That it's our job to make software just run.** Everywhere.

[briefly]
What is Platform.sh

reas Mayr

radesign_at

t to Chris from @platformsh dealing with my sue on Saturday evening and even Sunday was having tacos for lunch and just happened top with me.'). I definitely owe you a beer. y much! "

to do everything right! "

n (United Nations)

Platform.sh for a long time now, and Friday all the time...it's not a big . "

ndown Consulting

y Giles

dyG5000

eam at @platformsh just saved my rump. Top- r service experience! "

" Thanks for making my life so much easier. Refreshing to see a platform that works in the right way. "

Martin Moar, System Seed Agency

Developers

" In the several years w with Platform.sh, it's uncommon that a quest quickly through the Slack channel. That's be echnical documentation is clear, co asy to find. Simply put, support with Platform.sh has econd to none. "

Mike Milano, TDirector of Engineering, ThinkBean, LLC

Platform.sh

@hirschbenjamin

" I can confirm, @platformsh is by far one of the best developer and hosting experiences I've made in my entire career so far! Always a pleasure to kick of a deployment or start a new project. "

Mark Conroy

@markconroy

" Not alone do I deploy on a Friday, I deploy at 17:0 Friday. Have a great weekend everyone! Thanks @p "

Alex Burrows

@aburrows

" Put a website as a test that was taking 2 minutes json on a drupal 7 website onto a basic @platformsh and it loaded in 2 seconds. #superfast "

Markus Hausammann

@m_hausammann

" I know "deploy friday" as a slogan of @platformsh fits. Of course our deployment process could still b but we can really trust their infrastructure. Weekda consideration. We constantly deploy, including Frid would never have done that 5 years ago. "

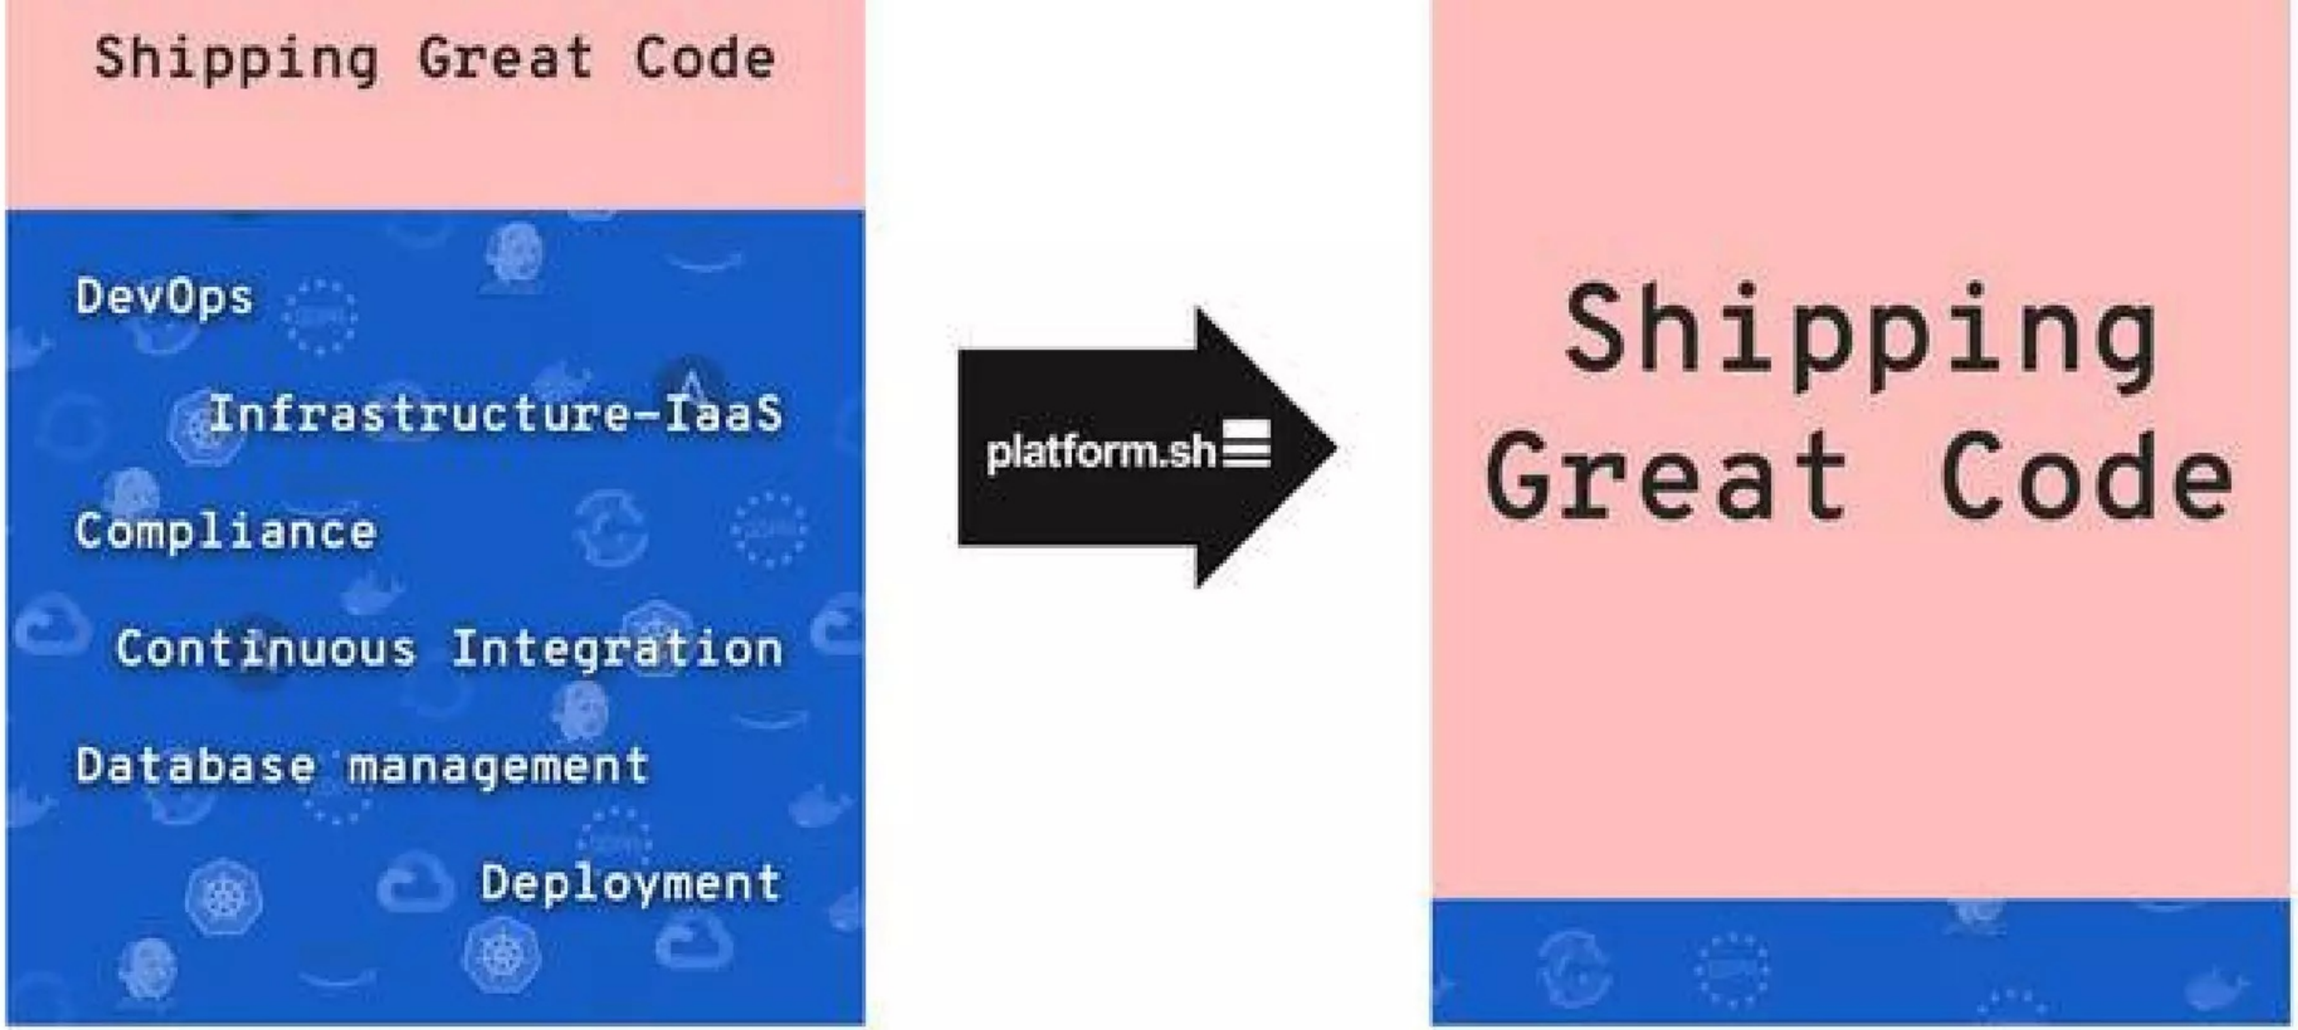

This is how a day breaks down for a typical developer

What they love [and are paid to do]

All the other stuff they *have* to do

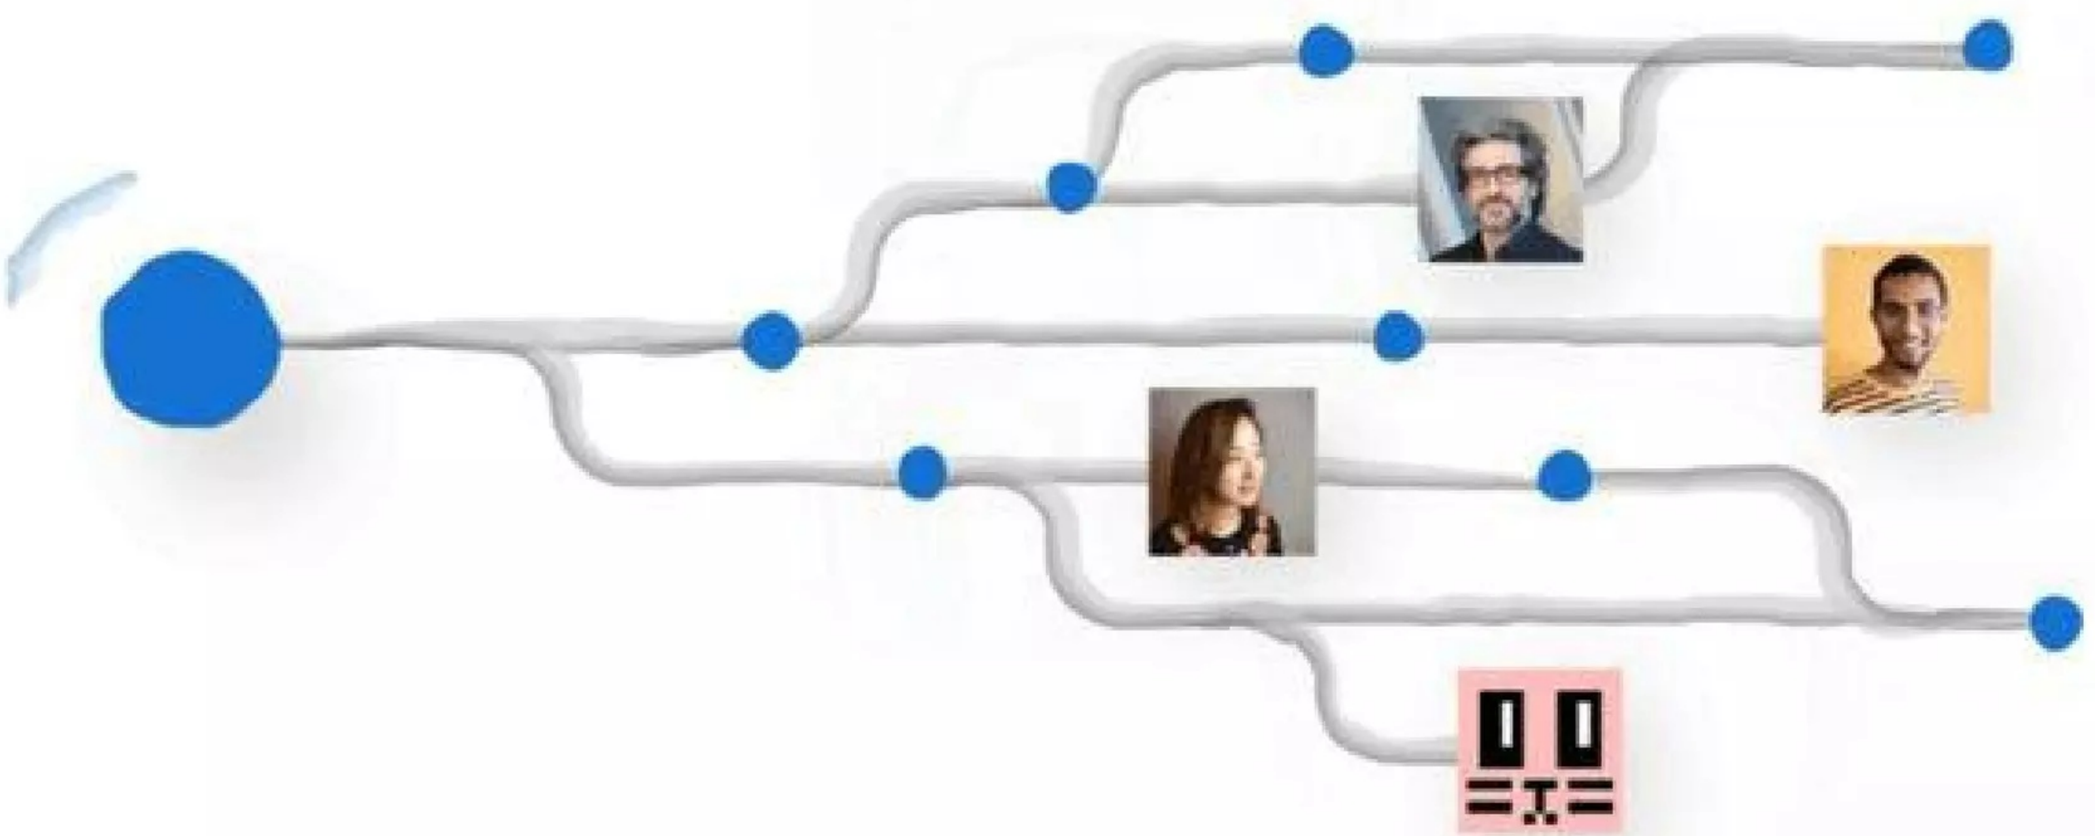

But it doesn't have to be that way

How does Platform.sh drive the shift to shipping code and creating value?

First, a little background...

Development teams live in Git

Git is kind of a big deal

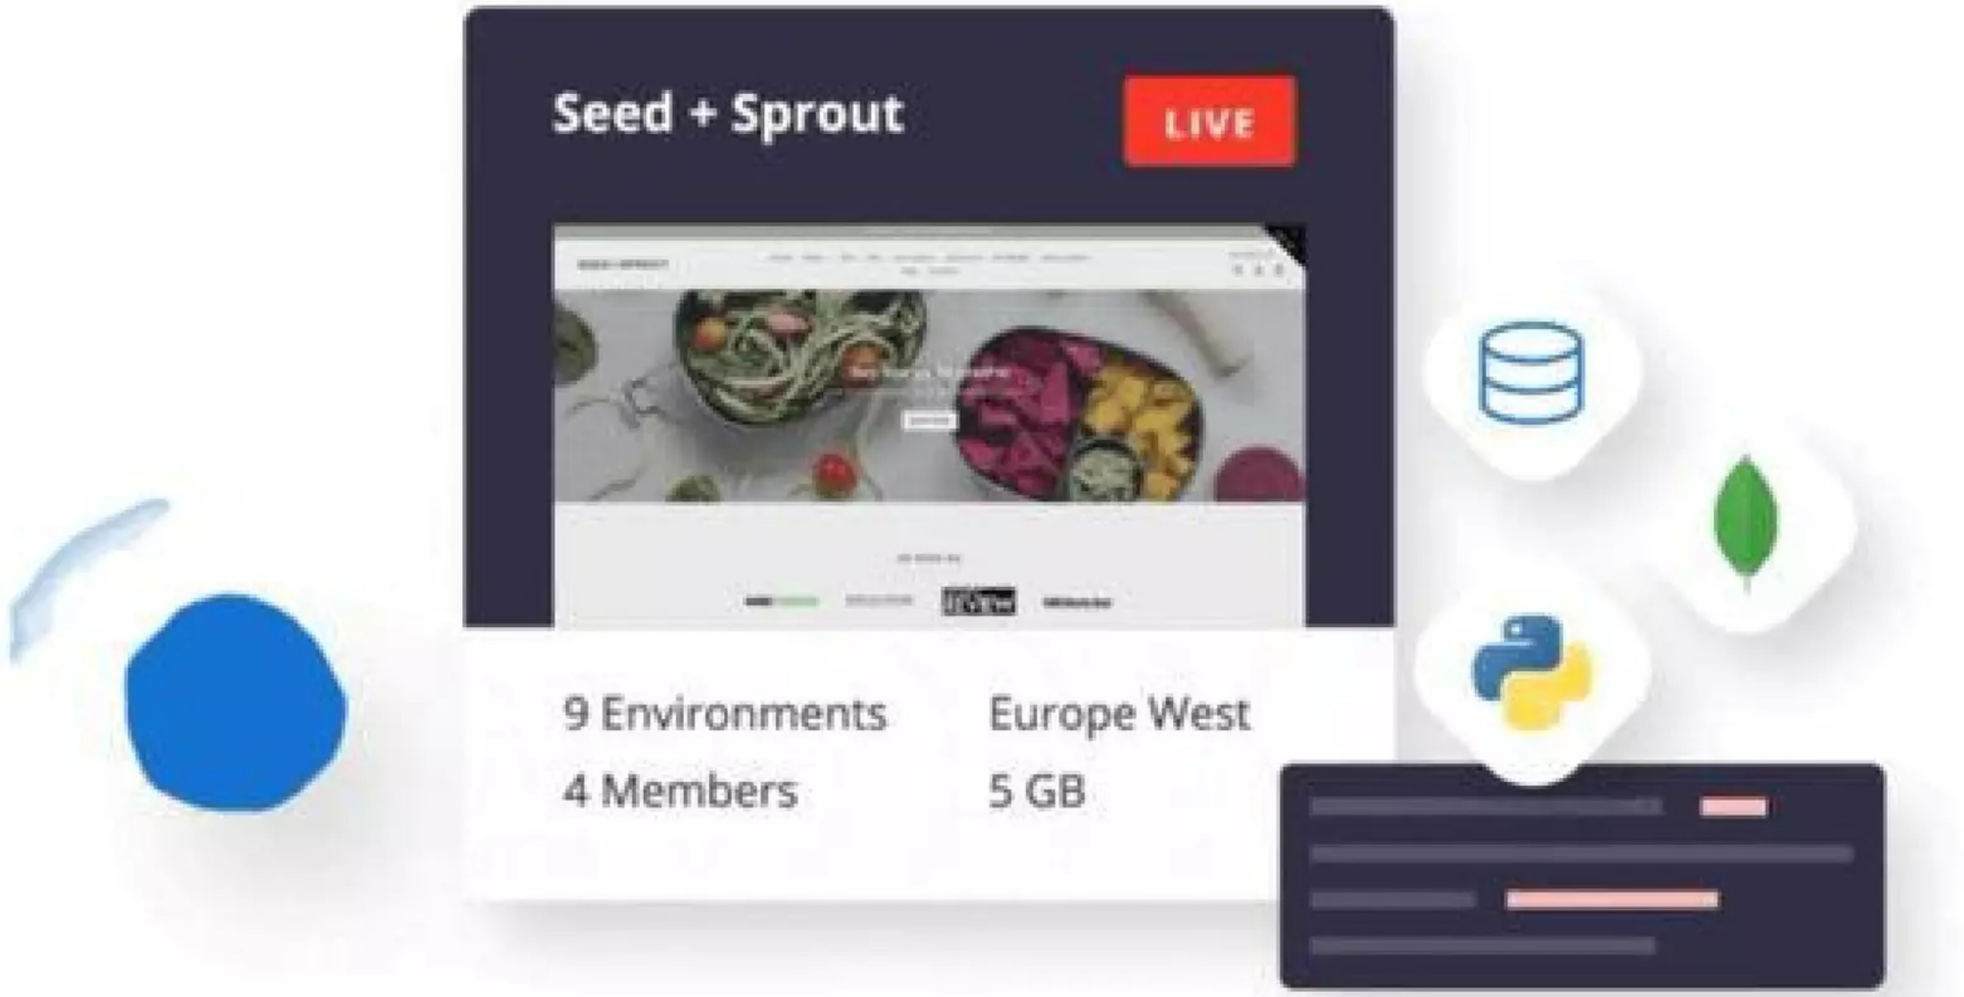

GitLab

$2.7BN Valuation
(2019)

GitHub

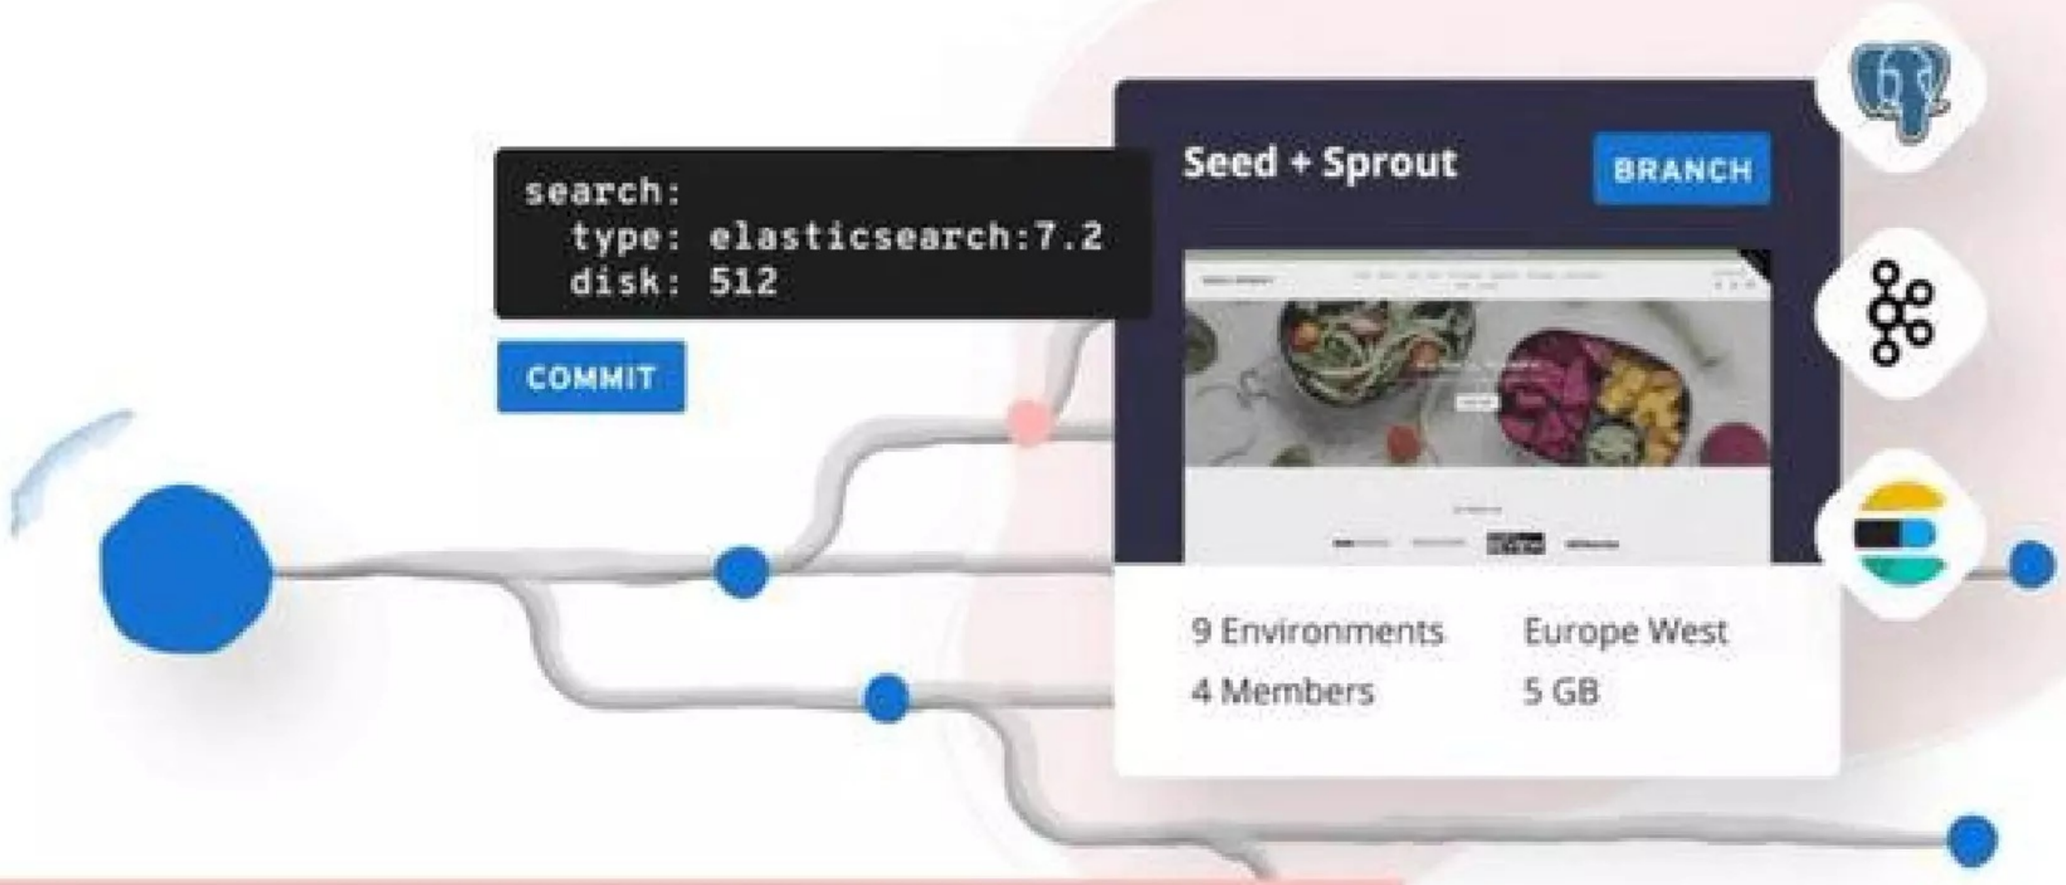

$7.5BN Acquisition
(2018, MSFT)

Platform.sh does for websites what Github did for code

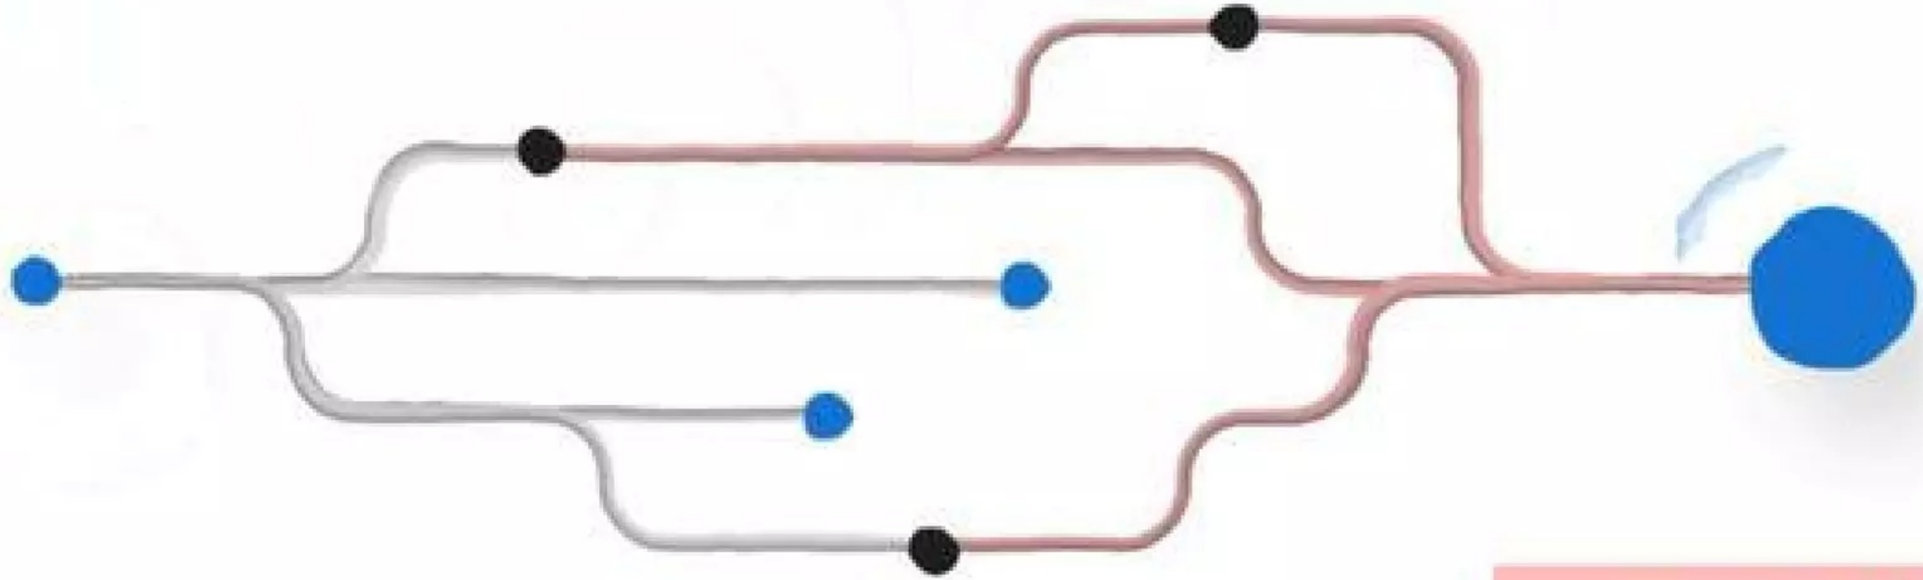

Complete websites are managed in Git

Complex infrastructure becomes a few lines of code

Teams accomplish more, faster...

bug fix
Author: Warren

COMMIT

...working together

Developer results drive business value

90%
Reduction in DevOps

15x
Faster user acceptance testing

40%
Uplift in developer productivity

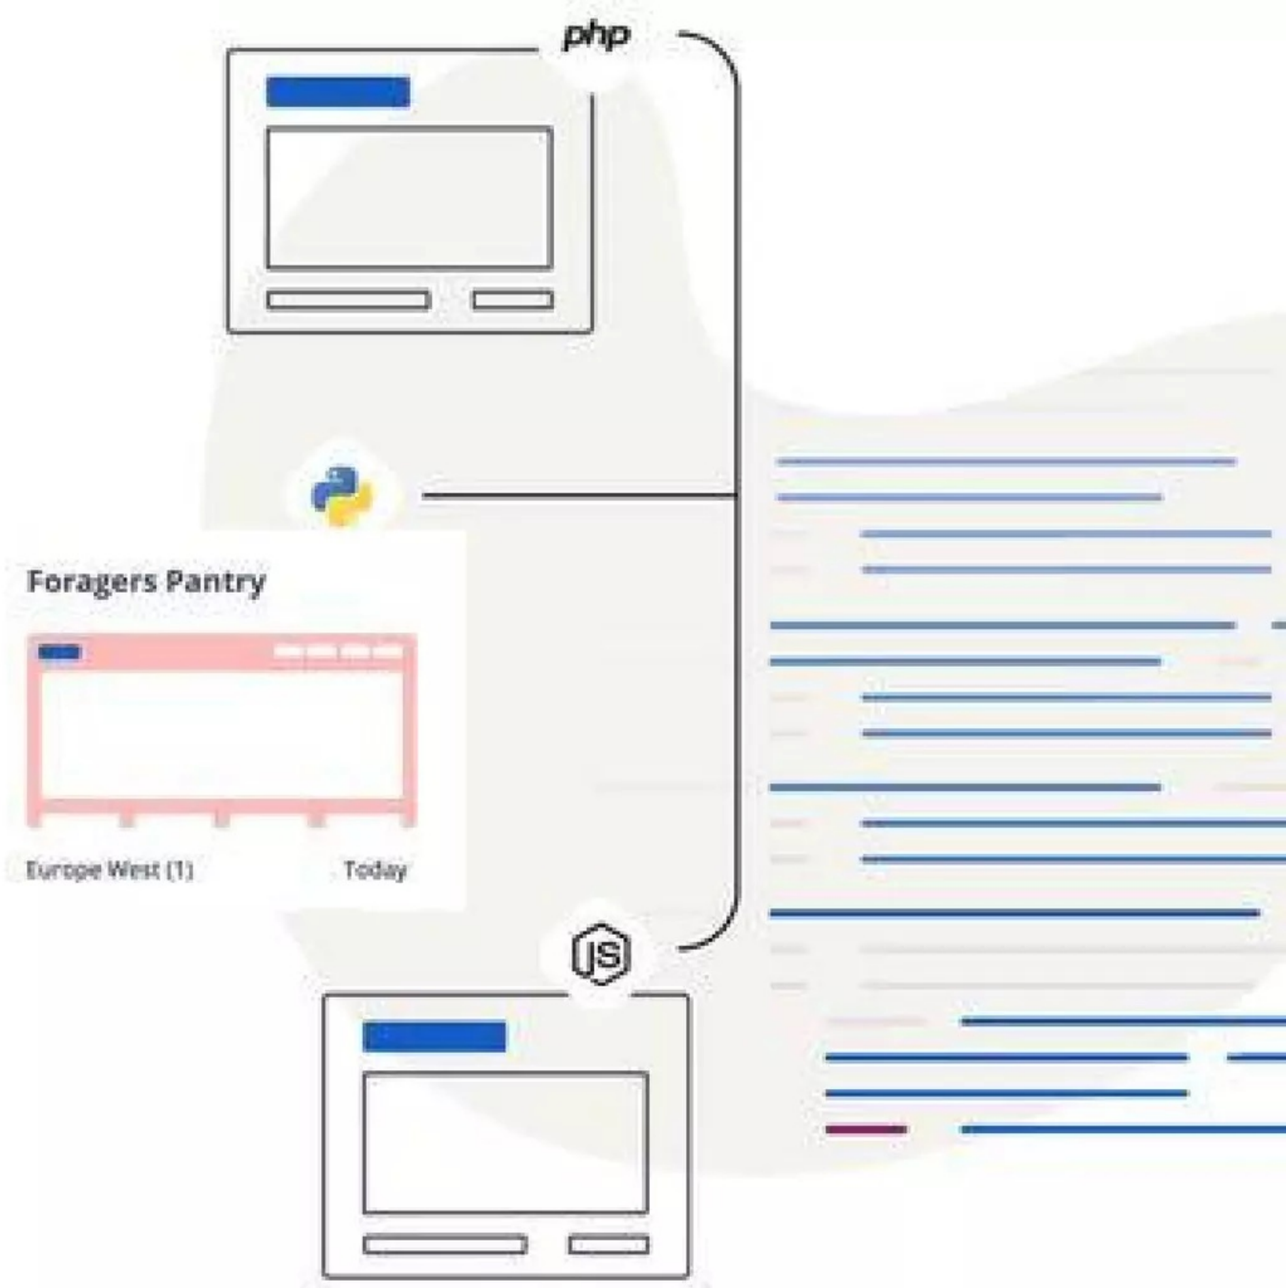

20x
More innovation

The real magic of Platform.sh: multiplying the power of workflow across *fleets* of websites

Digital teams generate value faster

- Invest in delivering features, not infrastructure and tooling.
- Launch new apps or sites in minutes from custom templates.
- Use the tools and frameworks their teams need, without costly re-architecture.
- Run across multiple regions and clouds.
- Deploy new innovations to existing apps.

Technology orgs scale and secure their entire website fleet

- Patch all their sites centrally.
- Secure their data with fully managed database services.
- Ensure governance over technology and processes.
- Provide high-availability SLAs (up to 99.99%).
- Rely on 24x7 global support.

Drupal
Magento

What we sell

Before us, change and stability were contradictory

Planes crash at takeoff and landing
When they're in the air, you're usually fine

Same goes with software
Folks were afraid to deploy. Who in their right mind would deploy a new feature on an eCommerce site on black friday?

Platform.sh solves the contradiction
Automated high-availability, parallel QA and fail-proof deployments are a game changer

THIS IS NOT JUST CLOUD HOSTING

Clone a byte-for-byte copy of your production site in less than a minute.

- → Every git branch has a url
- → Eliminates QA bottlenecks
- → 90% faster human testing and validation
- → Fail proof, predictable deployments
- → Quick bug fixes and security release resolution

Deploying **20 times** a day, while being hit with **peak traffic**, on a **Friday**, becomes something normal to do.

Our Product Offering

Self-service Hosting (credit card) :
10$ to 1,500$ / month

Web Agency Plan

Enterprise Grade hosting:
$1,500 to $40,000+ / month

Multi-Region / Multi-Cloud: 30 availability zones worldwide / Deploy to AWS, Azure, Orange, Google Cloud

White-Label offering with automated single tenant SaaS

All of the product offerings are based on a single technical stack

Multiapp, Polyglot: **Drupal, Symfony, Magento, WordPress, NodeJS, Python, Java, .NET core**

Who we sell to

Who we sell to:
