Aeris Filter Technology For Ventilation

Proven to Work on Viruses

Modular Design For All Building Duct Systems

Smart Due to aeris Cloud System

Launch Q3 2020

Reducing Energy Consumption of Buildings

Traditional Ventilation:
Up to 80% of Building's Energy Consumption

Aeris fleet Management

Sensors & Low consumption

+

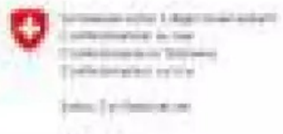

- Systems approach (Sensors, Actuators and Connectivity)
- Purification as Replacement for Ventilation
- Integration possibilities for room occupancy

Overall reduced need for ventilation!

aeris

Commercial Customers

Commercial Customers choose us due to our specialized service and unique approach to indoor air quality treatment.

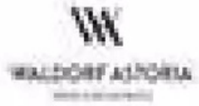

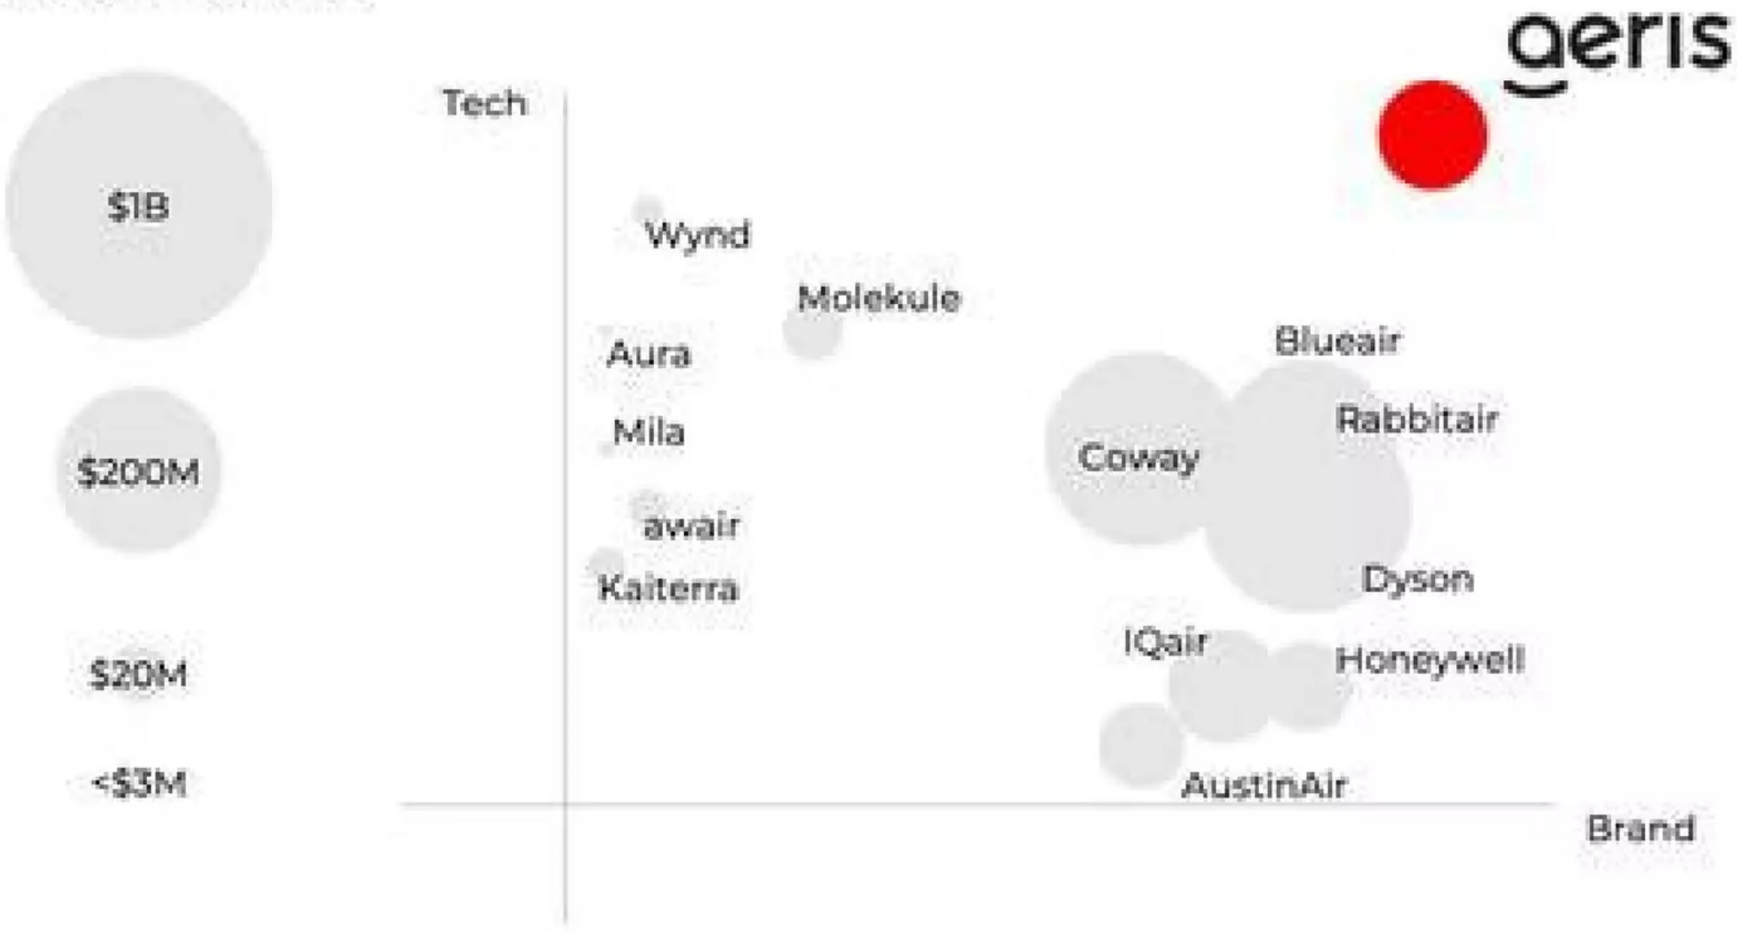

aeris

Competitor Landscape

Bubble size = Revenue

Dyson, Molekule, Blueair and IQair are our main competitors

Their total market share is ~$600M

aeris

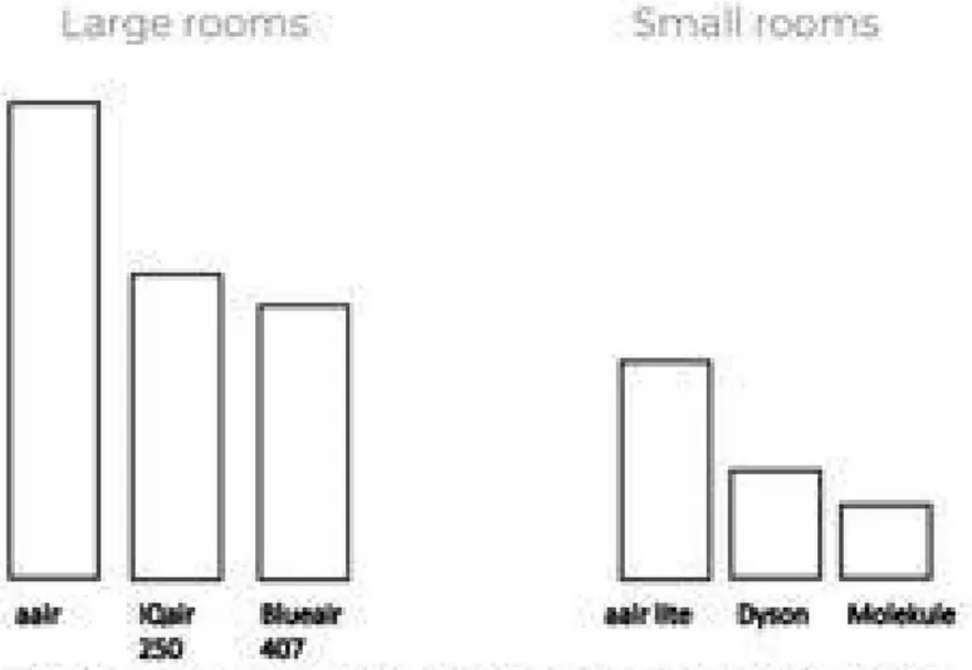

Competitor's Comparison

Dyson and Blueair only offer residential air purifiers

IQairs innovation cycle is around 20 years

Molekule is facing legal issues over misleading claims

Technical Comparison:
Clean Air Delivery Rate*

*CADR is a well-defined metric and is tested by industry norms. Europe, USA and China have different designations for those norms, but essentially require the same test setup. (EN1822, GB:T, AHAM Verifide)

CADR: Clean air delivery rate. Volume cleaned from cigarette smoke per hour. Tested in a 30m2 room.
