We're being fueled by
the demand for APIs, the growth in
E-Commerce & Digital Transformation

Algolia Company Confidential

Algolia has won the hearts & minds of developers ... since the early days

algolia

Algolia ... essential in the "developer toolkit"

Algolia is mindblowing. We are replacing mysql backend with Algolia and its **bringing down latencies from 300-400 ms down to 10-20 ms**. Things like out of the box multi location support and full text search etc **makes algolia compelling choice...** All this at $49/ month is actually a good deal! I wish them well.

Ameyamk - May 21, 2015

If you've **ever tried installing ElasticSearch and then switched to Algolia you'll understand how great of a product it is**.

Factsaresacred - Oct 17, 2019

We partnered with Algolia to offer a Firebase extension called Search with Algolia **as a direct request from our developer community**

Google Firebase Product Manager

Best search system out there. It's hosted, flexible, and scales very well. It's what ElasticSearch should have been. **Anyone who doesn't use Algolia is just living in the past**.

VP of Technology, Mid-Market Company

Best vendor experience we've had in a long time. **Blazing fast, accurate, relevant, immediately updated, elegant, easy to implement, a breeze to customize. It really couldn't be much better**.

Executive Director of Technology

We share the attributes of the leaders in the API economy

algolia

twilio is to communications

stripe is to payments

algolia is to search

- Must have, not nice to have
- Revenue driver, not a cost center
- Sustaining differentiation
- Broad applicability

Algolia Company Confidential

Algolia is at the intersection of 3 Major Trends

algolia

- Search is essential to all of these experiences
- These are just 3 different use cases leveraging our broad based API
- This is what Jeff Lawson of Twilio talks about in his book: *Ask Your Developer*
- Algolia is a better way to build search

MERCARI

Headless eCommerce

Mercari chose Algolia to improve both the Merchant and Consumer experience.

The result – 350,000+ new listings a day instantly indexed and <30 millisecond product discovery across 90+ million products

Algolia Company Confidential

theTradeDesk

Experience Driven SaaS

When the #1 Demand Side Platform (DSP), The Trade Desk, needed a superior in-app navigation experience, they chose Algolia.

The Trade Desk enables major brands, like P&G (the world's largest advertiser), to build and optimize their media campaigns.
