AudioMob

Serving Digital Audio Ads in games

INVESTOR DECK

invest@audiomob.io

The Problem

Monetising gameplay

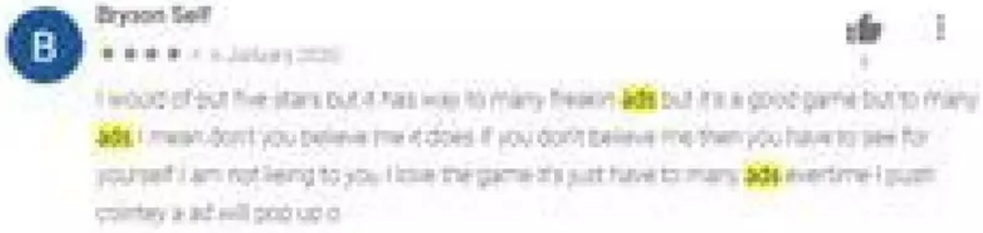

Game developers are struggling to find new ways to monetise their games.

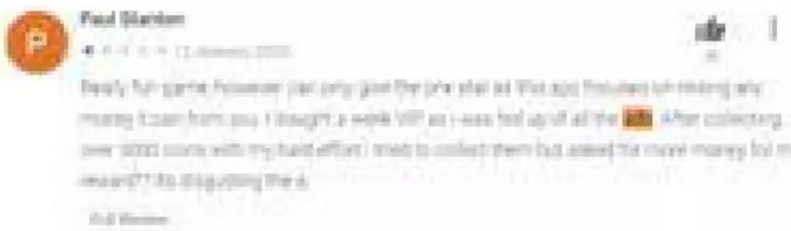

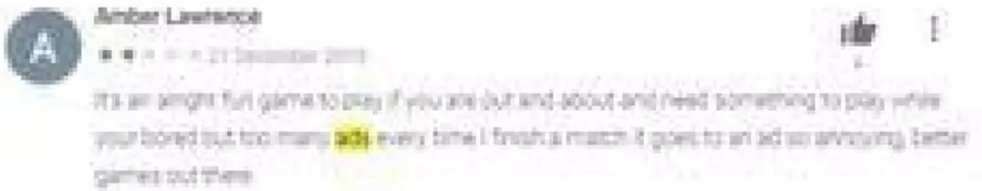

Intrusive in-game adverts

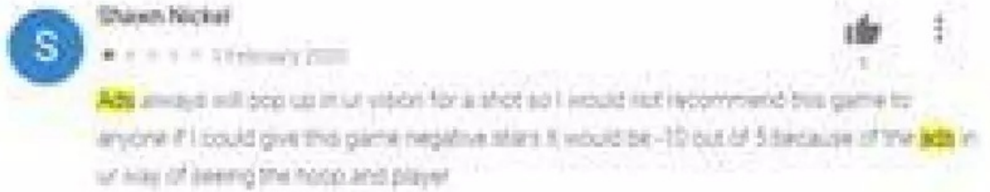

Disrupts gameplay ruining game retention e.g. game paused to watch a video ad.

Everyone Hates Video Ads

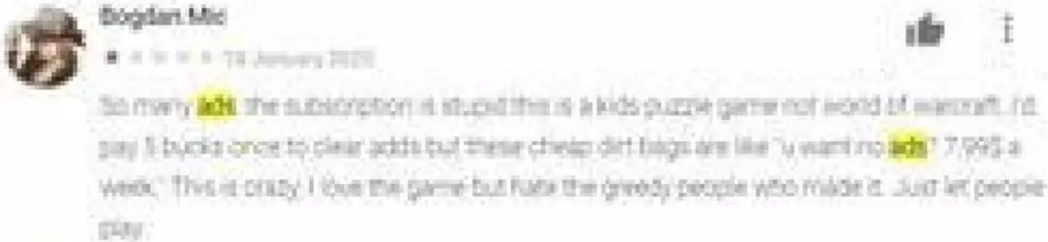

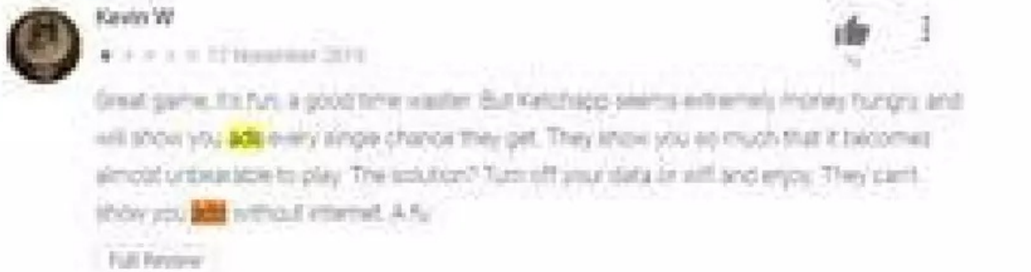

Companies we have met

Ad Networks

PubMatic

Vungle

INMOBI

Tapjoy

MobFox

AdColony

Game Studios

Voodoo

ROVIO

King

GAMELOFT

Google Play

23%

from of $1.8 billion to $2.3 billion in revenue

(IAB)

High Audio CPMs

$30

Spotify audio ads achieve $5 to $30 CPMs

(DigiDay)

The Solution

Demand (Advertisers)

Supply (Ad Networks)

AudioMob

Connect to advertisers via the **largest audio ad exchanges** in the world.

Integrate our technology into games via our Unity Plugin or DSP.

Targeted audio ads streamed into gaming publishers.

AudioMob Format

We detect audio signals
within games to deliver
audio enhanced **banner ads**

Format Breakdown - What we track

Mutable

If the user mutes, a clickable prompt appears to encourage the user to unmute, to keep their ingame reward.

Closable

Clickable

Quartile listened to

Sound On / Off

Addressable Metrics

New Audio metrics coming soon!

Full control of gameplay & **Audio Passback**

Business Model:

TAM: $35B

SAM: $3.6B

SOM: $224M

Demand (Advertisers)

Supply (Ad Networks)

AudioMob takes a percentage share of advertising the CPM
