Real-time market demand

Excess Capacity

For when the availability is greater than demand

Filling empty rooms and empty seats…

…through real-time online auctions

Excess Capacity Auctions - fill empty rooms

- Fill **excess inventory** — don't let perishable items go unsold
- **Availability** — focus on specific need dates
- **No quoted rates** — only registrants see current bids and prices **not indexed in Google**
- **No historical price** — prices disappear and only winners know the price they pay
- O**ptimize prices - b**enefit from customer competition
- **Assured booking** — no-shows pay in full and systems not overloaded by group coupons
- **Auctions** — based on internally developed algorithms that optimize auction-user-price mode
- **4-5 Star** — maintain the highest image surrounded by the best in the industry

Excess Demand Auctions - optimize revenue

For when the demand is greater than the availability:

For specialty packages that are in high-demand and have VIP appeal, we can auction starting at market price

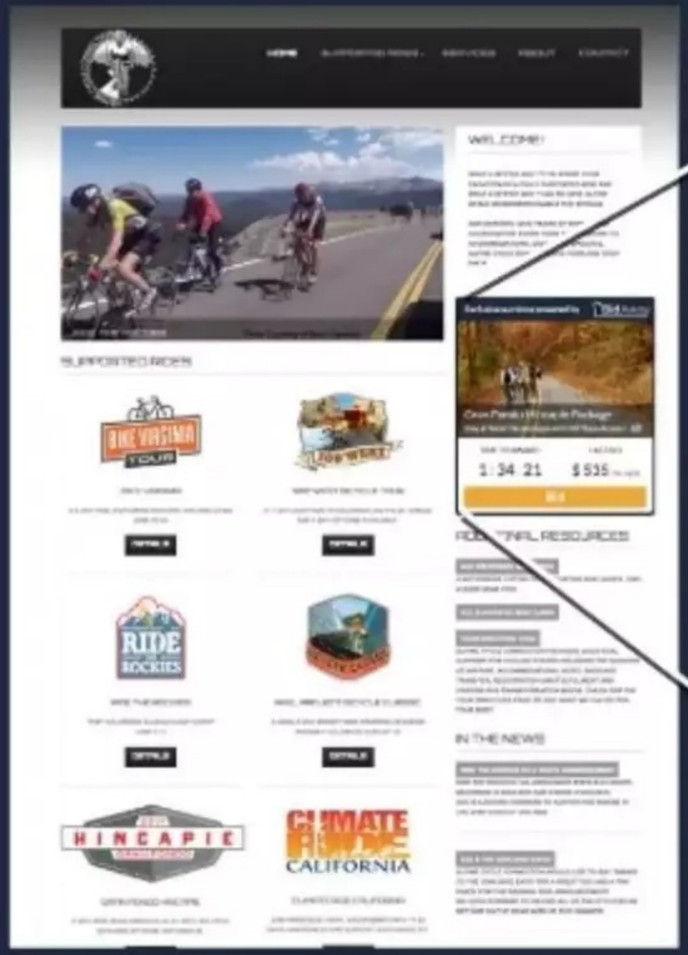

Optimizing prices to capture true willingness to pay…

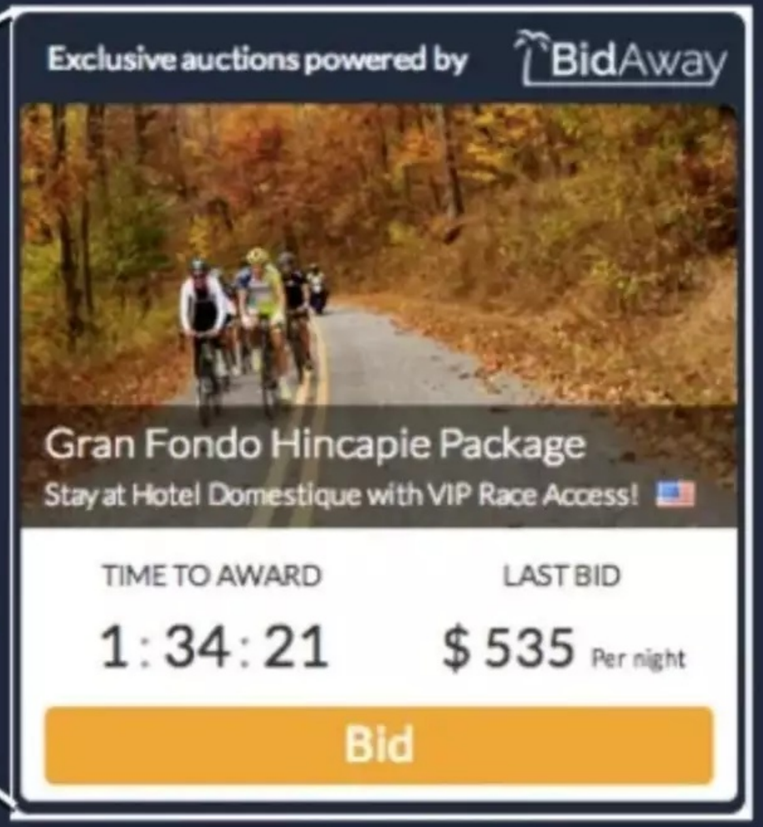

…through online auctions starting at market price

Onsite widget - direct bookings or auctions

Widget – host auctions on your own website

- Create a buzz with onsite auction
- Create double-sided traffic from BidAway site
- Live real-time auction creates exciting competition
- Create urgency for last minute deals as timer expires
- A new gamification aspect to leisure purchases
- Price flexibility for specialty packages
- **Fully customizable to your website**
