None of this makes sense in a digital world where everything happens instantaneously.

bottlepay

Imagine a world where money...

Moves like data: Freely. Instantly. Directly.

Moves between any system - across API's, between any devices.

Clears and settles instantly. Doesn't depend on credit.

Requires no contract or knowledge of the counterparties.

Is programmable and configurable.

Has no minimum transaction amounts or fees.

Use cases: Streaming payments, real-time API payments, cross border micropayments, instant paywall payments, internet of things payments, digital payment destinations, programmable SaaS contract payments, smart contract payments

In this world anyone could build a business without the worry of how to handle financial transactions.

They wouldn't need to understand the technology being used, yet would retain total control. Viewing accounts and transactions in any manner they choose.

A Move To Contractless Consumption

Today's Journey Up to 1 year

With Bottlepay Instant & On-Demand

Why now?

We are witnessing 6 mega trends collide. These will dominate the digital economy for years to come. Bottlepay sits perfectly astride all of them.

BLOCKCHAIN & DIGITAL PROTOCOLS

GENERATION Z

METAVERSE ECONOMY

PERSONAL DATA OWNERSHIP

SOCIAL COMMERCE

REGULATION

Market Size

In 2018 global payment revenues surpassed **$1.9T**

Source: McKinsey

Market Size

In 2019, digital payments reached a staggering $4.1T in payment volume worldwide. Smart devices and a booming e-commerce industry were driving its growth.

Source: Statista

One crucial factor underpinning the future potential of cashless payments is the rise in digital wallets

As digital wallets go mainstream, transaction volumes are estimated to reach $9T annually. Online purchases and digital commerce will drive this growth.
