BRD

Industry timeline

B2B business

Access the world's on-chain data via a single API. Easy on-ramp into blockchain development for engineers and enterprises

A unified data layer for any blockchain application, regardless of chain or scale

Large bank in Japan, SBI Holdings is the first signed client

Introducing Blockset (B2B)

A platform to accelerate blockchain product development, reducing time to market, cost and risk

Blockset by BRD

CONFIDENTIAL

Blockset (B2B): Components

Wallet Kit

- Custodial and non-custodial white label wallet
- Easy to use blockchain SDK for mobile, server, embedded applications

BlockchainDB

- One API for all blockchains
- Enterprise grade fault-tolerance; with up to 99.999% uptime
- Customized dashboards, monitoring, and auditing

ChainOps

- Automated, scalable, managed node infrastructure
- Fault tolerant, redundant geo distributed
- Private and public chain support

CONFIDENTIAL

Blockset (B2B): Value Proposition

Customer Challenges	Blockset Solutions
Optimize budgeting for initiatives harnessing new technologies	Save over 50% on development costs
Grow market dominance in new industry, and reduce risk of disruption	Get to market 75% faster and stay ahead of the curve
Expensive and complex to run nodes for multiple blockchains	Leverage best-in-class node infrastructure at no additional cost
Ensure proper disaster recovery plans to minimize risk to customer funds	Globally distributed, fault-tolerant infrastructure for up to 99.999% uptime
Aggregate and normalize blockchain data	One robust production API for all blockchains
